"RID-OF-RATS"

Is the only **Non-Poisonous Exterminator** of Rats and Mice in existence that is offered under **money-back guarantee.**

Rodents destroy hundreds of millions' worth of merchandise of all description. Why not spend a few cents to kill off the destroyers?

A pound, costing only $1.00, kills over one hundred rats or two hundred mice. Also sold in 15c boxes at $1.80 per dozen. Ask your store, or send money direct to us and shipment will be made promptly; shipping expenses paid by us.

THE BERG & BEARD MFG. CO., INC.
100 Emerson Place BROOKLYN, N. Y.

SCALES REPAIRED AND SOLD

50 wagon scales, capacity from 4 to 15 ton. Any size platform in following makes: Fairbanks, Howe, Buffalo, Standard and Columbia. Each scale that leaves our factory is thoroly overhauled and tested and guaranteed to be correct. We furnish competent men for outside work.

Crop Reports

Compiled by GEO. A. WELLS

The compilations given below are based on reports given by our correspondents August 19-21, and any changes in climatic conditions since those days should be taken into consideration.

SOIL CONDITION.—The soil condition is largely "favorable" in the states of Ohio, Illinois, Iowa, Minnesota, North Dakota and South Dakota, but largely "too dry" in the states of Indiana, Missouri, Nebraska, Kansas and Oklahoma. The states of Nebraska and Kansas showing serious need of rain.

TEMPERATURE.—The prevailing temperature during the past two weeks has been largely "favorable" throughout the surplus grain states except Nebraska, Kansas and Oklahoma.

CORN.—Basing the Government term "normal" at 100, the average comparative reports of growth condition as reported by each state is as follows: Ohio, 90; Indiana, 78; Illinois, 85; Missouri, 74; Iowa, 95; Nebraska, 78; Kansas, 58; Oklahoma, 82.

These reports show a slightly improved condition as compared with the Government report of Aug. 1 and still maintain the prospective crop production of 2,750 millions or more.

The percentage of the corn crop that will be matured by Sept. 1 in each state is as follows: Ohio, 50; Indiana, 47; Illinois, 57; Missouri, 51; Iowa, 69; Minnesota, 54; North Dakota, 69; South Dakota, 58; Nebraska, 52; Kansas, 78; Oklahoma, 99.

THRESHING.—The percentage of the threshing of small grain that has now been done in each state is reported as follows: Ohio, 75; Indiana, 84; Illinois, 81; Missouri, 65; Iowa, 70; Minnesota, 19; North Dakota, 20; South Dakota, 41; Nebraska, 65; Kansas, 83; Oklahoma, 78.

FARMER' SURPLUS.—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold by the farmers is reported as follows: Ohio, 53; Indiana, 65; Illinois, 75; Missouri, 57; Iowa, 57; Minnesota, 6; North Dakota, 9; South Dakota, 20; Nebraska, 41; Kansas, 32; Oklahoma, 48.

OATS.—Ohio, 40; Indiana, 35; Illinois, 34; Missouri, 30; Iowa, 25; Minnesota, 4; North Dakota, 5; South Dakota, 23; Nebraska, 19; Kansas, 27; Oklahoma, 42.

General Reports.

The following reports as to damage done to corn crop by drouth or other unfavorable conditions, the disposition of the farmers in regard to new crop at the Government price, etc., are self-explanatory:

OHIO.

Sidney (2): Drouth has cut the corn yield 10%. Most farmers satisfied with present wheat price, but very few holding for higher prices. Usual acreage being prepared for seeding.

Xenia (3): No damage to corn. Much wheat being stored by farmers in anticipation of higher prices.

Upper Sandusky (4): We do not think the corn has been damaged to any extent. Some damage in very limited section by hail and wind. Farmers generally selling wheat.

Bryan (1): Farmers are being inclined to hold a share of their wheat and take a chance on higher prices later. Wheat not moving very freely just now.

Blanchester (3): Have had no severe drouth here. Selling wheat very freely all elevators can take. Very few anticipating higher prices.

Bucyrus (4): We have had two extremes this year, wet and dry alternately. These extremes have damaged corn to the extent of 25%. Farmers are selling their wheat at the Government price, knowing that they cannot get more. I believe that if the Government would stop the control of the price of wheat it would go to $3 per bu.

Portsmouth (6): Corn looks fine. September 15 will see all out of way of frost.

Camden (2): Best possible conditions have prevailed for development of corn crop. Farmers selling wheat freely but some few holding for higher prices.

Lima (1): Most farmers are willing to sell their wheat at present prices, but elevators are full and shipping facilities not sufficient.

INDIANA.

Bloomington (3): Corn will not be as good as last year because too hot and dry early. Bottom corn much better than high ground. Farmers not selling any oats, quality not good and yield small. Wheat poor and a good deal being ground and fed. Rye very poor quality and yield very light, have been unable to buy any.

Greenfield (5): Farmers have sold nearly all of their wheat. They think the Government price is all right, but are dissatisfied about the way it is graded. None of the premiums paid for the crop reached the farmers.

Shelbyville (5): Very few oats planted here. Farmers keeping for feed. Corn hurt pretty much, 25 to 40%.

Augola (7): Only damage to corn has been by drouth. Farmers selling wheat freely. Yes, a few will hold it.

Waveland (2): Think the corn crop cut 50%. Short on account of the hot and dry weather. Think most all the wheat fit for market sold, except what they kept out for seed.

Tipton (5): Prospects good. Corn average.

Monticello (1): 10% damage to corn account drouth. Farmers generally willing and selling wheat at Government price. Probably 10 to 15% will hold for higher prices. Farmers nearly all holding their oats.

Decatur (7): Farmers selling wheat at Government price. No complaint. Ground too hard to plow right. Need good rain.

Portland (7): Very little damage done to corn. Willing to sell wheat and hold oats.

South Whitney (7): In our immediate vicinity the corn is out fully 50%. Most farmers are selling wheat at present prices, don't think they will hold expecting higher prices.

Princeton (3): Excessive heat and dry weather and poor cultivation in June has destroyed many hundred acres of corn. Corn planted 90% which has been cut down at least 50%, making about 45% normal. Farmers have been liberal sellers of wheat, a large part of the crop has been sold.

Jasper (3): Farmers are holding back to some extent of their wheat for higher prices.

Brook (1): Corn is damaged some by heat and drouth but has improved since August 1. No one holding wheat here.

Wabash (4): Corn uneven in this country account of drouth. Farmers selling wheat but inclined to hold more than on last year's crop.

ILLINOIS.

Marshall (8): Farmers selling wheat freely.

Belleville (3): Hot weather did most damage, say 10%. Farmers sell wheat freely at Government prices, some few hold for higher prices. Mills not buying wheat now as we have no coal on account of a coal strike for the last two weeks.

Mt. Pulaski (5): Corn materially aided by recent rains and cool weather. No desire to hold wheat for higher prices. Oats crop very short, few farmers raising more than feed requirements.

Princeton (4): I think corn has been damaged about 10-20% by drouth.

Freeport (4): Don't believe corn has been hurt but will require three to four weeks of favorable weather. Farmers inclined to sell wheat freely. Quality and yield poor.

Wenona (4): Wheat has all been sold. Corn has been damaged very little here and think we have an excellent prospect.

Eureka (1): Early corn damaged some. Medium and late corn not apparently hurt. No holding of wheat.

Decatur (5): Showers and favorable weather past two weeks have helped corn, hot dry weather prior to that time hurt corn. Farmers generally selling wheat, binning oats.

Sidell (8): Corn damged 20 to 25% by drouth and hot weather. Final yield on oats averaged about 37 bu. to acre. Wheat all threshed and sold, none held.

Pocahontas (3): Corn failure due to drouth. Farmers selling wheat freely at Government prices, while some will hold anticipating higher prices.

Mattoon (8): No holding of wheat here. Corn has been damaged 10 to 15% in past 45 days.

Vermont (2): No damage corn looking fine. Farmers hauling wheat in from machines. Prices seem satisfactory, although there will be some put in bins.

Rockport (2): We never had a better prospect for a corn crop in this locality, it is just fine.

Tuscola (8): Farmers sold all their wheat as fast as they could get cars.

MISSOURI.

Bethany (1): Looks like average of 50 bushels of corn on the good land. No corn on bottoms. General average for country abut 30 bushels.

Salisbury (1): No wheat holding here. Oats short crop. Poor yield. Corn, excellent condition.

Columbia (5): 10 to 15%. Selling as fast as possible. Think 90% or more will sell. Average 14 bushels to 15 bushels per acre.

Lamar (3): No rains of any consequence for the last five weeks. Corn rapidly drying. Farmers inclined to sell their wheat at Government price. Quite a small per cent holding for higher price.

Clinton (1): Corn never got a good start due to the wet spring. Some scattered good fields of corn, but bulk of crop is a failure.

Carrollton (2): Farmers are moving wheat to market as fast as it can be threshed. What is in shock now will be in poor condition. Weeds around shock and cannot dry.

Sedalia (5): Farmers will hold their oats for feed.

Harrisonville (1): Our corn crop cut short by dry weather. 25% at least.

Charleston (9): Average of corn about 60% per acre. Rains in spring. Late corn will help average and volume if late fall.

Chillicothe (1): No wheat being held back for higher prices.

Richmond (2): No oats to offer. Light crop. Farmers selling wheat freely but a few are holding back.

Mercer (1): Damage to corn by drouth and dry weather. 10% the most. Farmers selling wheat freely when cars can be secured for loading. Some are holding for higher prices and some binned their wheat on account of car scarcity.

Corning (1): Corn damaged about 20% by drouth. 15 to 20% wheat being held for higher prices.

Marionville (3): Our corn crop is 85% failure. No oats to be sold. Corn, oats and hay will be shipped in and nothing will go out.

IOWA.

Anawa (2): Some farmers holding wheat for an increase in price over the Government basis.

Clemons (5): The drouth didn't do much damage but the hail storm damaged the oats one-half to one-third and the corn is damged 40%.

Spencer (1): Corn too wet in early part of season, small ears, short grains.

Spencer (1): No wheat of consequence raised here. Corn ears short and slender stalked, apparently due to delays in spring growth and account of too much rain. Later growth excessively fast.

Wall Lake (2): Very little damage to corn, prospect very favorable. Oats running from 30 to 50 bu. Test 25 to 30 lbs.

Kirkman (2): Average corn is in good condition. The dry weather did not do as much damage as we thought; we had some light rains lately.

Belmond (4): Corn injured about 10% by unfavorable conditions. No wheat around here to amount to anything.

Gilbert (5): I think the damage from heat on corn is light. The rain of the last two weeks repairing most of it. Selling wheat direct from machines.

Wright (5): About 5% of farmers holding wheat for higher prices.

Osceola (6): Corn crop was damaged more by early heavy rains than by July or August drouth. Farmers are anxious to sell wheat, holding it only on account of scarcity of cars.

Marcus (1): Corn blew down badly by two heavy windstorms. Wheat very poor and light weight.

New Hampton (7): About one-third of the corn here is fairly good and will, with good weather from now on, be out of the way of frost by September 1st. About one-fourth of the threshing is done. There is not much of the wheat here fit for milling purposes. Oats are not more than half a crop.

Ashton (1): Early corn hurt by drouth. Farmers selling wheat freely but a few holding for a rain.

Coburg (3): Corn damaged about 30% by drouth.

Washington (8): Damage to corn by excessive heat is small. Many farmers still hope for more money for wheat. I think some will hold.

Moulton (6): Wheat is poor quality. The spring wheat is almost a failure.

Patterson (5): Corn damage small. Most of wheat going to market now at Government basis.

Hull (1): Our corn is fine. Farmers will sell the wheat as it is only sample grade testing 38 to 44 lbs.

Henderson (3): Do not believe corn has been hurt on account of the dry weather. Some are holding wheat for higher prices.

Corydon (6): Corn has not suffered for moisture at any time this season, but has been damaged 20% by too much rainfall early in season. All wheat selling at present prices.

Hamlin (2): Had bad wind, corn blew down some, otherwise all right. Wheat here is very poor quality, not any being sold.

Lowden (8): Little damage done to corn, every field shows poor spots. Farmers satisfied with wheat price and selling; spring wheat very poor, shrunken grains. Doubt that much wheat will be held.

North Liberty (8): I think about 15% all sold.

Tampa (5): Farmers mostly selling the wheat as soon as threshed. Wind did 5% damage to corn in this vicinity.

Whitten (4): Farmers are anxious to sell wheat and oats, but have only had two cars so far in August, so is impos to move anything.

MINNESOTA.

Warren (1): All hold possible.

Grand Meadow (9): Farmers will wheat at Government price.

Donnelly (2): Farmers are not se wheat very fast and quite a few expe hold for higher price.

Minneota (3): We have just raised poorest crop in our history. Farmers all hold on to what grain there is left good share of the wheat will be fed.

Henderson (6): Corn on low land have no ears on it. That will be fourth of acreage planted. Farmers sell wheat at Government prices. Qu is poor. Prices are better than the wh

Albert Lea (6): Corn prospects never better. Some out of danger of now. Farmers are selling about ½ of wh Considerable grain is being held and into granaries. Holding for higher pr

Prior Lake (6): Corn is looking Frost would be the only thing to all good bumper crop. Farmers as wel merchants at unrest regarding new proposed grades of prices covering crop.

London (6): Not much damage here to corn so far. The new cro wheat is very poor here. Farmers are ing it just as fast as they get it thres Wheat here doesn't test over 47 to per bushel.

Hutchinson (6): Quite a little drowned out and some grassy but a 75% of acres planted will be good cor

NORTH DAKOTA.

Lakota (7): What corn there is looks good. Weather favorable for gro Inclined to hold.

St. Thomas (7): What corn there is is very good but acreage small. It all mature this year. Spring wheat poor on account of hot weather. 70 the farmers are talking of holding wheat for higher prices next sum Barley, poor crop. Oats, pretty g Summer too hot for all small grains.

Carrington (5): No corn for sale farmers.

Fargo (8): Corn unusually good Farmers ready to sell now.

Langdon (7): Very little corn ra here. I believe farmers will hold wheat after they get their current debtedness paid. Country about 70 wheat crop. State below 50%.

Drayton (7): Favorable conditions threshing but no inclination to ma Wheat will average from 50 to 57 lbs.

SOUTH DAKOTA.

Clark (7): Corn is all right yet but small grain will be marketed very sic

Canton (9): 20% of damage to the by wet weather in the spring.

Brookings (8): Corn crop excellent.

Beresford (9): No damage from dr to corn.

Miller (5): Drouth is responsible about 15% of the corn loss. Too n rain early in the season and weeds, wo for the rest of the loss. The Governn price for wheat hardly puts wheat par with corn and hogs as to profits.

Hurley (9): Practically no wheat t hauled at this station. Corn on light badly fired. The best fields need a rain to make a normal kernel. Tempa ture o. k. but drying winds daily.

Dell Rapids (8): No damage to here. Crop is in excellent condition.

Mitchell (8): Won't hold wheat won't plant much for next crop.

Armour (9): Our corn generally good condition and will mature by 15. Farmers will hold their wheat f premium.

NEBRASKA.

Superior (9): Most farmers are bin part of the crop. Farmers willing to wheat, some being held back on now on account of help being scarce. will help fill out corn already set but not make much more.

Neligh (7): Farmers selling wheat rect from machines. Corn damaged 2 weeks on account of the dry weathe

Harvard (9): Corn damaged about on account of drouth. About 25% of farmers are holding for higher prices wheat.

Ashland (9): Corn cron spotted. I ning poor to very good. Estimate dam 20%. Farmers disposed to sell wheat q freely. Some holding for higher price

Nebraska City (9): Has been very and hot past 2 months. Less than 1 of rain in July and August so far. being damaged daily. About 40% of wh in bins or stock. Farmers inclined to h

Schuyler (7): Most farmers here s to be satisfied with the price but not discounts on account of light weight. Not many holding; anticipating hig prices.

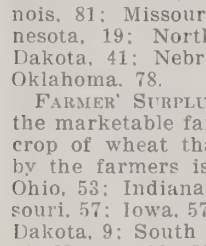
Beatrice (9): Some will hold wheat higher prices but the majority will Corn will be about 20% of normal crop

Pierce (7): Damage to corn crop drouth and excessive heat is greater t generally reported. All fields have fered. Some localities very greatly. are smaller than normal.

Central City (9): In this immed vicinity, corn fully 25% damaged— rain Aug. 19. Farmers holding 50 to of wheat, expecting to obtain prem later.

Belden (7): Think corn damaged a 25% by heat and dry weather.

Roseland (9): It is very dry now we need rain for the corn and fall pl ing. Corn will be light and chaffy.



Broken Bow: Some are holding an advance in price.

KANSAS.

Alta Vista (8): There will not be

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

n in this part of the country. Will e to ship in corn and oats.
aldo (5): Corn will make about half . Wheat is moving to market quite ly. Badly hampered for want of shing machines.
akeeney (2): 75% of wheat is being back by the farmers for higher prices.
nction City (7): Farmers holding at for higher prices.
ellington (6): Corn crop here is a ire. Some corn on the bottoms, conrable. Wheat held back by the farmers.
ttsburg (9): Corn crop is being cut n and very little will be raised from arances now.
wego (9): Our rains have been scarce ugh this country—too late for best fits for corn. Our oats will nearly all cept and fed on farmers. No other for the stock.
eensburg (6): Corn damaged 25% by th. Farmers binning all their wheat they have room for.
odesha (9): Extreme heat damaged . Wheat is all being marketed. Seem e satisfied with price.
tmore (2): Free movement of wheat. shortage very bad.
ay Center (4): Owing to dry, hot ther in latter part of June and the th of July, the corn crop has been aged 50%. Farmers seem to be satisfied with the price of wheat though short elp to thresh and market.
hroyer (7): Very little corn on up- . Fair on bottoms. Not many holding nigher prices.
hland (3): Corn crop practically all lure on account of dry weather. Prob- 30% of wheat will be held for higher . Wheat has pretty generally been at small premium over Government .
lsboro (5): Our corn crop is almost a failure. The damage has been done routh and hot winds. Farmers in this ity are anticipating higher prices for it and are holding back. The wheat nd here is only half a crop, averaging 6 to 19 bu. per acre.

OKLAHOMA.

id (4): Not enough corn planted here mount to anything. Where there is planted it is a fair crop. Threshing and balance of wheat being held for nce.
ary (2): More disposition to sell H. C. L. agitation set in. Expect o 80% to be marketed from the ther. None going into bins now and early threshing already coming out ns. Corn damaged 25%.
Reno (5): Corn badly damaged. Will ery small amount of corn, if any, eted around here.
ami (7): Upland and sidehill corn ged by drouth, other not so badly ged. Prospects are for fair crop.
id (4): Some farmers will hold their t which is in the bins for higher s.
ngfisher (4): Threshing being com- d, wheat receipts running low.
ftwood (1): Damage to corn crop by h was about 25%. Farmers made ng on wheat this year, some not even ises. Renters hard pressed.
id (4): Corn hurt 25% by drouth. of farmers will sell at Government . 20% will hold expecting a higher
dell (2): Some farmers inclined to wheat for higher prices.

EIPTS AND PRICES OF RYE.

ceipts of rye at the principal pri- markets of the Central West for week ended August 22, and for the sponding week last year, as re- d by the Minneapolis *Market Re- r*, were:

	1919. Cars.	1918. Cars.
apolis	199	191
h	168	...
go	136	116
a	34	6
ukee	36	30
	573	343

sing outside prices of rye of stand- quality and spot cash for each day e week beginning August 15, were:

	Mpls.	Dul.	Chi.	Oma.	Mil
5.	$1.50	$1.53	$1.55	$....	$1.56
6.	1.50¾	....	1.56	....	1.57½
8.	1.49¾	1.52½	1.54¾	1.45	1.55½
9.	1.50¾	1.54	1.56	1.45	1.56½
0.	1.52¾	1.56	1.57½	1.46	1.57
1.	1.52	1.54½	1.56¾	1.47	1.56½
2.	1.52¾	1.55	1.57¼	1.47	1.57

Budapest the food situation is said improving because the communist y has been outlawed by the gov- nt and as some money having de- ble value still exists farmers are ing more produce into the capital le.

TAKE OUT LICENSE.

U. S. Grain Corporation has issued notice that all dealers in wheat, whether large or small, must have a license; this covers all transactions in wheat, whether fit for human consumption or not. If a dealer has not applied for license he must do so at once and explain why he had not done so, and the nature of the business conducted, as it is unlawful to engage in business requiring a license without such license, and licensees are prohibited from dealing in licensed commodities with those who have failed to secure the required license, and subject to fine.

Conditions 3 and 4 require the licensee to place the words "United States Wheat Director License Number." followed by the number of the license, on every contract, order, acceptance of order, invoice, price list and quotation issued or signed by him relating to wheat or wheat products, and also prohibits him from knowingly dealing with any person, firm, corporation or association, who does not hold at the time such license as may be required under the President's proclamation, or who has violated any of the provisions of said act or any lawful rules or regulations issued thereunder by the President, or the Wheat Director.

German Livestock.

A census of German livestock as of March 1, 1919, reported by the Special Foreign Reports of the Bureau of Crop Estimates, shows the following comparisons:

	1919.	1918.
Cattle, all	9,098,302	10,229,703
Milch cows	4,342,256	4,605,483
Young stock	2,595,412	3,432,568
Pigs	4,644,068	3,308,108

American Steel & Wire Crop Report.

The crop report of the American Steel & Wire Co. dated Aug. 23 in part says: There is a little change in the condition of last week. Corn is holding its own. Thanks to the good results obtained in winter wheat, the wheat crop will prove itself better than average. Cotton is very uncertain. Potato estimates declining; sweet potatoes good. Numerous states have improved by more favorable weather conditions.

CORN.—In the eleven great corn-producing states the general conditions are as follows: Five states, good to very good; one state, very fair; three states, fair; and two states, poor to 66 per cent. Taking the minor corn-producing states into consideration, the crop in general is well above the average.

WHEAT.—The ten states producing the major portion of winter wheat range, one, fair to good; eight, fair; one, poor to fair. The five spring wheat states range, two, fair; three, poor to fair.

OATS.—Uniformly range fair to light.

POTATOES.—The estimates on the Irish potato crop are still declining. This is particularly true in Utah and some of the heavy potato producing states in the East.

COWPEAS.—As pointed out in a former report, this crop is proving itself to be scarce.

WEATHER CONDITIONS.—Indicate that improvement has taken place in far Western States, particularly in Montana, Washington and Utah, as regards the breaking of drought conditions, while the Southern States have had somewhat less rain than in past weeks. The states of Maine and Kentucky are somewhat too dry. This condition also prevails in various states locally. Severe storms in Maryland and New Jersey have damaged small grains, hay and fruit. If the wet weather conditions continue, corn will be hurt. A recapitulation of forty-one states reporting indicates that eleven are good; sixteen, average or better; fourteen, fair. This summarized indicates that the country as a whole is in a good average condition agriculturally.

Money in Circulation.

Money circulating in the United States on August 1, for a series of years, compares:

1919....	$5,778,565,018	1912....	$3,286,572,798
1918....	5,559,396,561	1911....	3,207,717,130
1917....	4,852,084,469	1910....	3,113,752,410
1916....	4,000,001,672	1909....	3,095,000,999
1915....	3,563,705,022	1908....	3,045,962,547
1914....	3,367,368,930	1907....	2,781,323,560
1913....	3,356,891,128	1906....	2,757,349,433

Circulation per capita on August 1, 1919, was $54.40; 1918, $52.44; 1917, $46.53; 1916, $39.00; 1915, $35.33; 1914, $33.96; 1913, $34.44; 1912, $34.31; 1911, $34.08; 1910, $34.63; 1909, $34.98; 1908, $34.77; 1907, $32.27; 1906, $37.52; 1905, $31.29; 1904, $31.06; 1903, $29.55; 1902, $28.53; 1901, $28.12; 1900, $26.78.

Immigration During June.

According to the monthly bulletin of the Bureau of Immigration, there were admitted to this country 17,987 immigrant aliens during June. Comparison with other months follows:

	1919.	1918.	1917.	1916.
June	17,987	30,404	11,095	30,761
May	15,093	15,217	10,487	31,021
April	16,860	9,541	20,523	30,560
March	14,105	6,510	15,512	27,586
February	11,010	20,636	19,238	24,745
January	9,852	15,220	24,745	17,293
	1918.	1917.	1916.	1915.
December	10,748	6,987	30,902	18,961
November	8,499	6,446	34,437	24,545
October	11,771	9,285	37,056	24,150
September	9,997	9,228	36,388	24,513
August	7,862	10,047	29,275	21,949
July	7,780	9,367	25,035	21,564

Restrictions on Corn Products.

A cable from Consul General W. S. Hollis, London, England, dated Aug. 19, 1919, states that on and after Aug. 18 the restrictions imposed on corn products from Dec. 12, 1918, will be re-established. This order of 1918 provided that on and after Dec. 12 all imports of a quantity of five tons and over of cereals, cereal flours and meals, rice, and pulses should be reported to the Royal Commission on Wheat Supplies, either on or before arrival by the original consignee, as declared on the bill of lading. Each notification should give full particulars as to quantity, quality, shipping marks, cost and charges incurred. Such shipments should be dealt with only in such manner as the commission might direct.

Contracts outstanding on Aug. 18 may be fulfilled provided shippers furnish full particulars to the Royal Commission on Wheat Supplies on or before Aug. 23.

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Aug. 23, 1919 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.

The Van Dusen Harrington report for the week Aug. 20 says the light receipts of new wheat in the Northwest are probably due to the fact that farmers are stacking their grain instead of threshing from the shock. Others are storing grain on their own farms or in the country elevators.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Aug. 23:

	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.

News of the Terminal Markets

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts of corn and oats continue heavy during the past week.

Our southern and eastern trade on oats and feeds have been heavy this week.

The Bast Fogarty Mill and the Beaver Valley Flour Mills are now operating on three shifts and are able to handle a big share of the wheat now received at Des Moines.

Des Moines has not been effected by the strike and railway tie-ups as have the other terminal markets. The elevators have been handling all grain received promptly and the railways have been disposing of same in good time. This has saved a lot of trouble which some markets have been having, with wheat getting hot on account of being tied up on the side track for a week or two.

OMAHA.

Leigh Leslie, Correspondent.

Frank P. Manchester, secretary of the Omaha Grain Exchange, has returned home with his wife and little son from the Minnesota lakes, where he spent two weeks.

A membership in the Omaha Grain Exchange was sold at auction on the trading floor a few days ago for $8,100. This is the highest price ever paid for a membership. The membership belonged to the Gate City Hay & Grain Company and was sold to E. E. Huntley, of the J. Rosenbaum Grain Co.

The Omaha Grain Control Committee, at its regular weekly meeting, Thursday, decided to accept all grain for the Omaha market without restrictions up to and including August 30. On August 14th all restrictions on the movement of grain to this market were temporarily removed, and since that time grain has been coming in to this market without restrictions, no permits being required. There is no congestion in the Omaha market. All cars have been handled promptly and will be handled promptly, and it is the opinion of those in authority that when August 30th arrives the situation will be such that the Omaha Grain Control Committee will find it unnecessary to reimpose any restrictions on the movement of grain into or out of this market. Omaha is now an absolutely open market. Country dealers may ship their grain here without obtaining permits of any kind.

DULUTH.

S. J. Schulte, Correspondent.

Max F. Rheinberger has resumed his former position as cash buyer with the Standard Grain Co., after a service of two years in the army. He served a year in France as a member of a machine gun corps, but his division failed to get up to the fighting front before the armistice was signed.

Rye again largely absorbed the interest in grain trading here during the last week. The quotation in spot fluctuated from 1c to 4c from day to day, but at the end of the week its market was practically higher at $1.33⅜. Receipts of that grain accounted for the great bulk of the offerings during the six days. Grain men here are counting on handling larger receipts of barley and rye during the present crop year to counterbalance an expected falling off in wheat receipts owing to the reduced crop.

Employes of the elevator companies operating at Duluth and Superior have kept in fashion with the other labor unions in preferring a demand for higher wages. Operators do not, however, expect to have any difficulty in arriving at a satisfactory arrangement with the men. As the elevators are practically acting for the United States Grain Corporation in handling the new season's wheat crop, it is assumed that the buck will be passed on to that corporation should any labor difficulties arise.

Duluth elevator men are looking forward to a substantial movement of grain developing during the next week or ten days. So far the receipts of wheat have been so light that the local mills have been experiencing difficulty in obtaining sufficient supplies to maintain their plants in operation. Practically all the new wheat offering here so far has been lightweight, showing the effect of the hot, dry weather prevailing at a critical period over the territory. The mills paid $2.75 for new No. 1 northern wheat here during the last week. It is assumed that the premiums will drop, and that the price will gradually ease off to the government basis as the fall movement gathers momentum.

NEW ORLEANS, LA

Guy E. Warren, formerly manager of E. L. Welch & Co.'s Duluth office, is now cash grain man for McCarthy Bros. & Co. on the Chicago Board of Trade. He resigned from his position here fifteen months ago to take up war work at Washington, and on being released from that and from his duties in connection with the direction of the returned soldiers' employment bureau here, he accepted an offer from the Duluth grain house at its Chicago branch. During his extended term of service on the Duluth trading floor he earned a reputation as a shrewd trader, and he was one of the most popular members on the local board.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

C. M. Hardman, of Hardman & Heck, is spending a vacation at one of the prominent summer resorts.

The straw market is stationary, with receipts moderate. The demand for good grades of straw is fair and prices are unchanged.

Among the recent visitors at the local grain exchange were W. F. Terry, of Pittsburgh, and M. McClure, of Washington, Pa., guests of W. F. Heck.

There is no ear corn arriving and the shelled corn market is such that quotations have been reduced. Very little demand for corn has appeared in the last week and receipts are light. No. 2 yellow is at $2.09@2.11 a bushel; No. 3 yellow, $2.05@2.06. Receipts bulletined for the last period were 36,300 bushels, as compared with 16,800 bushels for the same period last year.

The oats market is giving considerable concern here, owing to the very heavy receipts, amounting to 178,000 bushels in the last week, and the difficulty of finding an outlet even at reduced quotations. Practically all the supply is new oats. The trade does not seem willing to carry much stock in the face of unsettled conditions in other lines. The best grades are being quoted at 81@81½c a bushel down to 76c for No. 4 white.

DETROIT.

John Barr, Correspondent.

Beans are inactive and easy at $8.10 for immediate and prompt shipment per cwt.

There is little doing in the market for barley. No. 3 is nominal at $2.40@2.50 per cwt.

The injunction against K. P. Kimball preventing his engaging in the bean trade has been dissolved.

Exporters are taking rye and the market is firm at $1.53 for cash No. 2. Receipts are increasing.

A Detroit resident who has a large Michigan farm on which he is raising 80 acres of corn says his crop promise has increased 50 per cent in the past few weeks. During the dry weather he did not believe he would get back much more than his seed, but it now looks like a fair crop.

Corn is scarcely worth quoting as a market here owing to the lifelessness of the deal. Receipts make a total of only a few cars for the week and there is no demand. Business was at a standstill all week. Quote: No. 3, $2.02; No. 3 yellow, $2.08; No. 4 yellow, $2.06; No. 5 yellow, $2.01; No. 6 yellow, $1.97.

A little demand for wheat developed late in the week and the price gained ½c on bidding for eastern millers. This is the first showing of life in wheat this year. Local millers are taking the grain more freely and report an increase in buying of flour. Feed demand has been active all the time. Wheat receipts at this market are increasing.

Demand for oats shows a fair increase, but it is difficult to secure the grade asked for by eastern buyers. Some cars were sold to the East last week and there are indications of an increase in activity. Local consumption is well sustained. Quote: Cash No. 2 white, 80c; No. 3 white, 79½c; No. 4 white, 78½c; new No. 2 white, 77c now No. 3 white, 75½@76c.

BUFFALO.

E. Bangasser, Correspondent.

The Barge Canal is taking about all the grain it has tonnage for, but every little bit keeps with 20 few cars at this end of the route.

Rye in store here was well cleaned up to exports and more wanted. Track receipts were quoted at $1.56 for No. 2 through billed.

Elevator men here are not looking for a rush of grain to this port by lake now that orders have been issued to ship no more from lake Michigan ports.

Wheat receipts here are increasing but the volume is still away below last year and there appears to be little hope of any increase. Millers are buying winter wheat when they can get it at a cent or two under what sellers consider the market, and then they want the best weights. No. 2 red sold at $2.28@2.30; No. 3 red, $2.24@2.26; No. 4 red, $2.21; No. 5 red, $2.16@2.18, on track. Through billed.

All the oats arriving were disposed of daily and on the whole there was a fairly steady market. Receivers not following the option as closely as usual. The oatmeal mills bought quite freely, but wanted only good weights. Closing: No. 1 white, 80½c; No. 3 white, 79½c; No. 4 white, 78½c, on track, through billed.

Owing to light receipts the corn markets keep up fairly well after a break of about 5c early in the week. There were sales of No. 1 yellow at the close of the week at $2.11, but the demand was light. It looks as if the receipts would dribble along on this crop and keep prices comparatively high here. The mills are not anxious to buy for shipment, as they are having difficulty in selling their products on account of high prices. Closing: No. 1 yellow, $2.10; No. 2 yellow, $2.09½; No. 2 yellow, $2.08½, on track, through billed.

Inspection track receipts for the week: No. 2 soft white, 1 car; No. 3 do., 9 cars; No. 1 mixed winter, 4 cars; No. 2 do., 5 cars; No. 3 do., 8 cars; No. 4 do., 2 cars; sample, 1 car; No. 2 red, 8 cars; No. 3 do., 35 cars; No. 4 do., 31 cars; No. 5 do., 7 cars; sample, 5 cars; No. 1 hard winter, 17 cars; No. 2 do., 52 cars; No. 3 do., 41 cars; No. 4 do., 5 cars; No. 1 dark hard, 4 cars; No. 2 do., 20 cars; No. 3 do., 11 cars; No. 4 do., 5 cars; No. 1 dark northern, 1 car; No. 2 do., 3 cars; No. 3 do., 3 cars; No. 1 yellow, 4 cars; No. 2 do., 22 cars; No. 3 do., 4 cars; sample, 2 cars; No. 1 white, 4 cars; No. 6 white. 1 car; sample, 2 cars. Oats—No. 1 white, 20 cars; No. 2 white, 98 cars; No. 3 white, 47 cars; No. 4 white, 5 cars.

NASHVILLE.

John Leiper, Correspondent.

The Stout-Hunt Milling Company, of Memphis, with authorized capital stock of $60,000, has been incorporated by C. H. Stout and others.

The Nero Mills, manufacturers of flour, announce ready to begin operation in Nashville. Kenneth Crittenden is president and J. A. Cooper is secretary of the company.

Receipts of grain at Nashville last week were 355 cars. Stocks at the end of the week were as follows: Flour, 41,500 bbls., increase of 1,500; wheat, 969,000 bus., increase of 63,300; corn, 95,000 bus., increase of 13,100; oats, 172,000 bus., increase of 42,300.

Business continues quiet with corn mills in the Southeast. Quotations: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $4.30@4.40. Prices are slightly easier. Southeastern corn mills, with capacity of 145,800 bushels, had output last week of 20,291 bushels, or 13.9 per cent of capacity.

Flour trade in the Southeast was quiet last week in the matter of new business, but heavy sales have previously been made on contracts. Renewal of buying on a large scale is not expected until the flour sold has been withdrawn. Quotations are: Best soft winter wheat patents f. o. b. Ohio river points, $11@11.50; standard patents, $10.35@10.65; low grades, $10. Southeastern mills, with capacity of 230,730 bbls., had output last week of 171,815 bbls., or 74.5 per cent of capacity.

There continues a fair movement of wheat, mostly from St. Louis and western sections. Mills have large stocks, and prices are firm. Corn is in moderate demand, with little change in prices. Oats are in fair demand, and some red oats are arriving from Oklahoma and other sections. Quotations: Wheat—No. 2 red, with bill, $2.25@2.28. Corn—No. 2 white, $2.13@2.17; No. 3 white, $2.10@2.13; No. 3 mixed, $2.05@2.10. Oats—No. 3 white, 81@82c; No. 3 mixed, 81@82c; No. 3 red, 78@79c.

INDIANAPOLIS.

Myron R. Green, Correspondent.

The Acme-Evans Co., of this city increased its capital stock from $480,000 to $600,000.

J. F. Russell, of Greensburg, and T. K. Mulls, of Manilla, grain operators, were in Indianapolis last week.

The Pendleton Elevator Company, of Pendleton, Ind., and the Goldberg Grain Co., of Indianapolis, were admitted to membership in the Indiana Grain Dealers' Association.

A large barn on the farm of Perry and Walter Stembel, two miles south of Oxford, Ind., was destroyed by fire. Eleven hundred bushels of corn, 650 bushels of oats and twelve tons of hay were destroyed in the blaze.

Fire that caught from a spark set fire to loose straw about a separator belonging to George Meyers, four miles south of Petersburg, Ind. The separator was partly destroyed and several wagons loaded with wheat were entirely lost.

The banner wheat yield for Daviess county is reported by Michael Madden, former county surveyor, who got 614 bushels from a twenty-four acre tract, an average of slightly more than twenty-five and one-half bushels to the acre.

Prof. G. I. Christie, of Purdue University, sent a telegram to Secretary of Agriculture Houston at Washington, D. C., stating that Indiana farmers are hesitating to sow a normal acreage of wheat and rye because they fear a reduction in prices next year.

One of the two large grain elevators owned by the Kirkpatrick Grain Co., at Kirkpatrick, Ind., sixteen miles north of Crawfordsville, Ind., was destroyed by fire with a loss estimated at $80,000. The

MILWAUKEE.

Erich E. Meyer, Correspondent.

Arthur Kneisler, formerly with V. Armstrong Co., hay merchants, is traveling for L. Bartlett & Son.

Frederick Layton, who died Aug. was one of the oldest packers in the U States and a member of the Milwa Chamber of Commerce since 1863.

A. A. Breed, chief inspector of Mil kee, anticipated a good run of gra shipments have considerably incre showing something over 200 cars Wednesday and other days according

Milwaukee grain shipments last were 320,400 bus. oats, 9,330 bus. corn, bus. barley, 5,360 bus. wheat, 2,350 rye; total, 480,667 bus., against 777,136 the preceding week and 1,568,112 b year ago.

Receipts of grain at Milwaukee fo week ending August 23 were 256 cars ley, 116 cars corn, 534 cars oats, 132 wheat, 43 cars rye; total, 1,081 against 452 cars the week before, cars a year ago and 1,066 cars in 191

Flour production at the Milwaukee for the past week showed a slight crease, with a total production of bbls. or about 56 per cent of capacity duction, as compared with 15,300 bbls previous week. Of this week's total duction, 10,000 bbls. were wheat flour 3,760 bbls. were rye flour.

In the Milwaukee cash grain ma with the increasing movement of grain, particularly oats, prices for week declined 2½@3c for this comm 8@12c for barley, corn 2c, rye 2c, wheat exhibits little change. The dem however, is good for all descriptions the market is kept cleaned up. Crop on corn continues favorable and a crop is assured, particularly in the n ern section of the country.

I. C. Lyman, formerly of the Lyman seph Grain Co., announces the purcha a 300,000-bus. terminal grain elevat Milwaukee. The Lyman Joseph Grai has discontinued business and Mr. L has associated himself with the Fr Grain Co., and all the business for future will be handled in the name o Franke Grain Co. Mr. Lyman will, ever, continue to give his personal a tion to the grain business, as he has in the past.

The Stratton-Ladish Milling Co. ha creased its capital from $750,000 to 000,000. The company has a five- warehouse under construction and short time will place a new wheat flou the market. At present the concern a million-bushel elevator and ships a 50 cars a day of rye flour and corn ucts. The officers of the company a W. Ladish, president; Patrick Don vice-president; H. M. Stratton, treas and Stewart Hyde, secretary.

Visitors registering at the Milwa Chamber of Commerce during the week included the following: S. E. T M. E. Grant, Minneapolis, Minn.; L. White, Jr., Jackson, Mich.; A. J. West Bend; W. A. Hauser, Rubicon. F. Sharp, Chicago, Ill.; F. Hallberg, neapolis; L. M. Abbey, St. Paul. M

NEW YORK.

J. M. Nugent, Correspondent.

e sharp decline in the market for corn ed an easier feeling in corn goods, but iess was almost of a negligible char- , and prices were purely nominal.

ring the past week the following gen- n visited the floor of the New York uce Exchange: H. K. Schafer of ha, H. Wegman of Baltimore, and . Watson, W. H. Martin and Harry apson, all of Chicago.

ot oats remain inactive with only a rate domestic demand in evidence. ign enquiry is lacking, and apparently rters are not interested at present s. No. 1 white is unquoted; No. 2 , 87c; No. 3 white 86c and No. 4 white

e absence of supplies keeps the Cash market quiet and trade is on a very ed scale. The weakness in futures ad a sympathetic influence, but prices oted can only be regarded as nominal: 2 yellow, $2.10¼; No. 3 yellow, 2.09¼; 2 white, 2:13¼; No. 3 white, $2.12¼; mixed $2.08¼ and No. 3 mixed $2.07¼.

ere was a little better trade in the market during the past week owing ss apprehension regarding future de- ments in connection with the Govern- 's attitude and the efforts to reduce of living. Stocks of flour here have materially reduced as shipments from ills have been retarded by rail condi- . In consequence, the spot market ardened somewhat and buyers have n some inclination to purchase. g wheat flours have ruled firmer than winters, as mills have complained of inability to move wheat into the mills to ship flour out. Government pur- s for export during the week were 0 barrels and prices ranged from to $10.30. These purchases were said clude hard and soft wheat flours, as as durum, but the greater proportion softs. In order to clear up some un- inties over whether or not the Gov- ent intends to sell hard wheat flours cost basis similar to the manner it is sing of soft wheat flours, a delegation senting the Federated Flour Clubs n interview with Mr. Barnes during eek, and asked if he intended to sell wheat flours at the same relative dif- e to costs as has been the case in grades. Mr. Barnes was quoted as he intends to do this, but intimated the volume of flour will not be suf- ly large to cause any undue concern e part of the trade.

KANSAS CITY.

T. J. Tanner, Correspondent.

I. C. Thomas, one of the active pit brokers at the Board of Trade, is in Colorado for a vacation.

Paul D. Bartlett of the Hall-Baker Grain Co., was elected a member of the Board of Trade Thursday.

A. L. Ernst of the Ernst-Davis Grain Co., is spending a few weeks with relatives and friends at Constantine, Mich.

The largest operations of wheat stack incendiaries are reported in Russell and Ness counties, in western Kansas. L. T. Hussey, state fire marshal, has sent deputies to both counties with bloodhounds to help in the hunt for the firebugs.

Profiteering prices demanded for threshing wheat in Lincoln and Harper counties have started an investigation by Governor Allen of Kansas. According to complaints sent to the governor, machine owners have been charging $25 an hour for the use of their outfits and are receiving 40c a bushel.

Work has begun on the flour-blending plant of the George W. Hoyland Flour Company, in East Kansas City, with a prospect of completion by January 1. The plant will have a daily capacity of 2,000 bbls. It will be the largest institution of the kind in the Southwest. The plans were drawn by the Reyburn Engineering & Construction Co. and the Swenson Construction Co. is the builder.

D. F. Piazzek, zone agent in Kansas City, departed Sunday for New York to attend a meeting of vice-presidents of the United States Grain Corporation. Mr. Piazzek predicted that something would be done in the matter of readjusting the wheat price schedule so as to stop the complaints regarding value of light weight and low grade grain. The figures which he will present, however, will show that much of the talk about discounts on the poor wheat is not well founded.

The fat and lean members of the Board of Trade played their annual game of baseball at the Field Club grounds, Saturday afternoon. After an exciting contest, the fats won by a score of 12 to 3. The victory of the corpulent nine was attributed to the fact that several of their members had played in professional games. There was some brilliant batting and catching, and errors were also numerous. R. Y. Smith was captain of the fats and Cort Addison had command of the leans. Seven innings were played. A crowd of 150 men and women witnessed the game.

"Do you know?" has become a pertinent question concerning Kansas City's business resources since a local newspaper invented the phrase. Allen Logan of the Logan Bros. Grain Co. is making use of the query in his market letters. "Do you know," asks Mr. Logan, "that a great deal of our wheat is selling for less than corn over the entire West?" Again, "Do you know that Kansas produced more than 20 per cent of the total winter wheat crop of the United States this year and 8,000,000 bus. more than all the wheat of Minnesota, the Dakotas and Montana?" Then he puts this question: "Do you know that American wheat, despite its high minimum price, is selling 50c lower, relatively, in this country than Australian wheat in Liverpool?"

Cash Grain Markets.

Wheat—Receipts for the week, 3,154 cars, against 2,740 a week ago and 2,305 a year ago. The movement was facilitated by the suspension of the blanket permit system in shipping, but in place of this restriction there was a development of car shortage, due to the fact that many cars have been taken from southwestern railroads for use in handling the northwestern spring wheat crop. The existing evil is to be corrected at once by the Railroad Administration, heeding a protest from the Kansas City Board of Trade. Threshing of wheat in Kansas is being delayed in some parts by the exorbitant prices asked for the work. The market for choice dark and semi-dark wheat here was well supported most of the week by local millers and shippers, but the mills reduced their buying late in the week on account of inadequate car service for flour shipments. The total production of flour was 86,500 bbls., the largest on record. Elevator men bought all grades that were cheap enough to use in mixtures for delivery to the United States Grain Corporation, and some shipping houses reported orders from the East, the Northwest and as far away as Seattle, Wash. At the close hard wheat was quoted unchanged to 7c lower than a week ago, with the top price of No. 1 about 14c over the guarantee level. Prices of leading grades were: No. 1, $2.20@2.34; No. 2, $2.15@2.30; No. 3, $2.12@2.32. Red wheat, which was in fair supply, met a good demand until the latter part of the week, with local millers and elevator men and Minneapolis millers the chief takers. Elevator men continued to make the export grade for the Government. Prices at the close were unchanged to 1½c lower, but still at a slight premium over the minimum basis. The quotations were: No 1, $2.18½c; No. 2, $2.15@2.17½c; No. 3, $2.12@2.14. Stocks of wheat in Kansas City increased 1,685,000 bus., to 10,288,000 bus., about one-half of which represents deliveries to the Government by elevator

KAFFIR CORN
MILO MAIZE GRAIN
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

interests since harvest. A year ago the stocks were 6,437,000 bus.

Corn—Receipts were 66 cars, against 42 a week previous and 228 a year ago. The market was depressed by the offerings of new corn from the record crop of Texas in Kansas City and St. Louis territory, a condition not experienced before in many years. White corn broke 1@12c, to $1.90 for No. 2 and $1.87 for No. 3. Mixed was quoted at $1.91 for No. 2 and $1.86@1.88 for No. 3, or 4@6c off. The decline in yellow was 4@5c, with No. 2 closing at $1.95 and No. 3 at $1.92. Shipments on old sales reduced stocks 32,000 bus., to 71,000 bus., against 639,000 last year. Dealers are convinced that Kansas will be almost as dependent for corn during the coming year as on the last crop, because of drouth effects, but there will be a big crop in Iowa and a fair production in Nebraska and Missouri. The absence of demand from Texas will render the situation much easier than usual and give Kansas all supplies needed.

Oats—Receipts, 188 cars, against 132 a week ago and 496 last year. Demand for all but heavy test samples became very poor, especially late in the week, and elevator men were left to take care of the offerings on hedging basis. White oats became very weak, closing 2@3c lower, with No. 2 at 73c and No. 3 at 72@73c. Mixed lost 1c, ending at 70c for No. 2 and 69c for No. 3. The No. 2 grade of red closed at 70@72c and No. 3 was sold at 69½c, showing prices unchanged to 1½c lower. Stocks increased 68,000 bus., to 976,000 bus., against 704,000 in 1918.

Kafir and Milo—Receipts, 11 cars, against 8 a week ago and 7 a year ago. Reflecting the weakness of other cereals, the market for sorghum grains yielded 15@20c per cwt., and the demand was moderate. Prices at the close were: No. 2 white kafir, $3.50@3.55; No. 3, $3.42@3.50; No. 2 milo, $3.47@3.50; No. 3, $3.42@3.50. Some of the weakness was due to the imminence of new crop offerings from Texas. The California supply has dwindled after an unprecedented run. For some time there have been practically no shipments from Kansas and Oklahoma. The new production in these states will be liberal unless reduced by early frost. Stocks in Kansas City fell off 2,000 bus. during the week, to 7,000 bus., against 174,000 a year ago.

CINCINNATI.

George Mosbacker, Correspondent.

Total corn receipts for the week were 43 cars, oats 74 cars, rye 15 and hay 75 cars.

John B. Helwig, now associated with The D. O. Cross Co. as manager of the feed department, has been elected to membership of the Grain and Hay Exchange.

Joseph F. Costello, president of the J. F. Costello Grain & Hay Co., who left a month ago for a visit to Manitou Springs, Colo., returned Saturday very much improved in health.

Fire of unknown origin destroyed the warehouse of the Jarecki Chemical Co., located in St. Bernard, near Cincinnati, early Friday, causing an estimated loss of $100,000. The plant will be rebuilt immediately.

A. Bender, well known member of the local grain trade, is spending a pleasant vacation at Mt. Clemens and other Michigan resorts. He is accompanied by two of his sons, Ambrose and Clarence. During their absence Raymond Bender is attending to trade duties.

United States Railroad Director H. A. Worcester, of the Ohio-Indiana district, announced that the movement of freight cars in his district one day the past week was the largest during the calendar year, and in excess of what it was the corresponding day a year ago.

Louis Kuhler, Jr., assistant to Harry Hill, of the Bunting & Hill Co., left Friday for Long Island, New York, to engage in the tennis championship of the National Juniors Tournament. Louis is at present tennis champion of the Central West, and hopes to land the prize of the New York tournament.

J. H. Martin, brother of Henry M. Brouse, who as a boy entered the employ of the grain and hay firm of Brouse-Skidmore Co., has been promoted to the position of traveling representative. He is fast "making good," and the members of the firm are highly eulogistic of Mr. Martin's services.

The Mutual Commission Co., who are conducting a very successful grain and hay business, had the distinction of receiving the only car of wheat grading No. 1 red the past week. The car was consigned and realized $2.27 per bushel. Of a total of 283 cars of wheat inspected, only one graded No. 1, 45 cars No. 2, 136 cars No. 3, 78 cars No. 4, 20 cars No. 5 and 3 sample.

Alfred Gowling, prominently connected with the hay and grain trade of Cincinnati for many years and former vice-president of the Grain and Hay Exchange, has been endorsed by the Republicans of Newport, Ky., for the mayoralty nomination. Mr. Gowling is without doubt the strongest candidate that could be nominated, and in all probability will carry the polls on election day.

The railroad situation was improved here and was not as acute as last week. At the Cincinnati office of the United States Railroad Administration it was said that the box car shortage was expected to be relieved at the close of the week, that the Big Four was getting some additional cars and that word was received from Washington that the Railroad Administration was rounding up cars for the Cincinnati terminal.

John G. Walker, member of the old firm of Schmidt & Walker, successful white corn millers, has announced completion of arrangements for engaging in the grain storage and warehouse business in the building formerly occupied by the firm at 946 West Sixth street. A storage capacity of 25,000 bushels will be maintained for the present, to be increased later. The old firm of Schmidt & Walker was mutually dissolved recently to afford Mr. Schmidt greater opportunity to devote himself to his widely extensive financial interests. He will, however, render Mr. Walker all the assistance in holding the prestige and making possible the success which crowned the activities of the old firm.

Cash Markets.

Wheat—Receipts for the week totaled 283 cars, against 405 cars a week ago. Activity again marked trading in wheat during the week with the situation generally stronger than at any time since the new crop movement began, and substantial premiums over the guaranteed price are predicted by the trade. Local and nearby mills are persistent buyers of the daily offerings. Offerings of the first two grades were scarce, and lower grades smutty and sample grain showed a corresponding increase, but a firm feeling also prevails for this quality and probable advances in prices. No. 1 red winter, track, $2.26@2.27; No. 2 red winter, track, $2.23½@2.25; No. 3 red winter, track, $2.20@2.22; No. 4 red winter, track, $2.16@2.18; No. 5 red winter, track, $2.11@2.15; low grades as to quality, $2.05@2.18. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—The corn market was weak and lower early in the week, under influences of declining futures, but later developed a stronger tone, and a fair recovery of previous losses. Premiums were reversed from white to yellow, and ruled 3c higher with mixed "nearly yellow" also firmer at a cent over white. Receipts continued light.

Saturday the market broke badly as a result of sharply declining futures, and losses of 6c for white and mixed and 3c for yellow were recorded. No. 1 white, $2.02@2.03; No. 2 white, $2@2.02; No. 3 white, $1.98@2; No. 4 white, $1.96@1.98; No. 5 white, $1.94@1.96; No. 6 white, $1.92@1.94; No. 1 yellow, $2.06@2.07; No. 2 yellow, $2.05@2.06; No. 3 yellow, $2.03@2.05; No. 4 yellow, $2.01@2.03; No. 5 yellow, $1.99@2.01; No. 6 yellow, $1.97@1.99; No. 1 mixed, $2.02@2.03; No. 2 mixed, $2@2.02; No. 3 mixed, $1.98@2; No. 4 mixed, $1.96@1.98; No. 5 mixed, $1.94@1.96; No. 6 mixed, $1.92@1.94.

Oats—The market was firm with a good demand throughout the week. Receipts were only moderate, but showed evidences of increasing, under the promised improvement of railroad conditions. White of heavy weight were actively sought, but lower grades and good mixed had many inquiries. No. 2 white, 77c; No. 3 white, 76c; No. 4 white, 75c; No. 2 mixed, 75@75½c; No. 3 mixed, 74@75c; No. 4 mixed, 73@74c.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending August 22 were 928,065 bus. wheat; 150,000 bus. oats and 50,000 bus. barley.

F. W. Behrens, of the Commercial Exchange, has just returned from a business trip through the state.

Uncle Joe Haasz, the well known and popular gatekeeper at the Commercial Exchange, is spending a well earned vacation at Ocean City, N. J.

Receipts of flour and grain for the week ending August 23 were 1,951,278 lbs. of flour in sacks; 1,194,554 bus. wheat; 10,421 bus. corn; 130,369 bus. oats; 3,924 bus. rye; 53,810 bus. barley; 13,750 bus. malt and 380 tons of feed.

The United States Grain Corporation has notified all mills in Zone 9, effective August 22nd, weekly reports from mills of less than twenty-five barrels' daily capacity will be not be required. This does not affect license regulations for such mills.

H. E. Brooks, Jr., representative of the Western Star Flour Mills, Salina, Kansas; C. C. Blair, Duluth, Minn., representing the Globe Elevator Co., Duluth; A. A. Cunningham, Tiffin, Ohio, grain shipper; H. M. Stauffer, grain and feed dealer, Leola, Pa.; C. B. Forney, Chambersburg, Pa.; J. L. and Martin B. Rutt, Paradise, Pa., were visitors on 'Change during the week.

Charles E. Michael, connected with the hay department of S. C. Woolman & Co.; Jos. F. Huey, of William A. Huey & Co.; L. C. Passmore, of the firm of L. S. Passmore & Co.; W. H. Hobson, of L. F. Miller & Co., and John A. Killpatrick attended the New York State Hay Convention at Syracuse last week.

The old crop of hay is pretty much out of the market and what is left consists of low grade stock, which is used for piecing out urgent requirements in small lots; consequently our quotations are merely nominal. New hay is coming in more freely and choice qualities sell readily on arrival at the prices quoted, but many of the receipts of both hay and straw show bad effects from the recent excessive rains.

The United States Grain Corporation has issued notice to all mills and elevators in New Jersey, Pennnsylvania, Ohio, Indiana and Michigan, that, effective Aug. 21, 1919, the following are the discounts which this corporation will make payment against warehouse receipts delivered in store at Philadelphia: No. 2 red, 57 lbs. test weight and better, 6c under No. 1 red; No. 3 red under 57 lbs. test weight, 7c under No. 1 red; No. 4 red, 55 lbs. test weight and better, 10c under No. 1 red; No. 4 red, under 55 lbs. test weight, 11c under No. 1 red; No. 3 red, 53 lbs. test weight, 15c under No. 1 red; No. 5 red, 52 lbs. test weight, 16c under No. 1 red; No. 5 red, under 52 lbs. test weight, 17c under No. 1 red; garlicky wheat, 2c less than corresponding grade of red.

WESTERN CANADA.

A. Caldwell, Correspondent.

There are rumors of a great merger in the milling trade and there is something of the kind afoot, denials notwithstanding.

The regular annual meeting of the Board of Grain Commissioners to revise the tariffs in interior and terminal elevators will be held at the end of the week.

The Black elevator site at Fort William, including 1,400 feet of railway trackage, dock on the main channel Fort William harbor, office buildings, etc., has been sold to Alex Snelgrove, grain dealer, Fort William and Winnipeg.

The market is a quiet affair these days, receipts are light and offerings of cash grain few. There is, however, a fair though somewhat erratic demand from export and from eastern houses. Trading in futures has been largely influenced by the action of Chicago corn.

Donald Morrison was elected president of the Grain Exchange clearing house at the recently held annual meeting and John E. Botterell of the brokerage firm of Baird & Botterell has been elected by acclamation president of the exchange for the year beginning Sept. 1.

Threshing returns from southern and central Manitoba show a yield of about 12 bushels to the acre, but northern Manitoba and northeastern Sackatchewan have excellent crops of first class grain. The feed situation in Alberta has been greatly improved by abundance of rain and some crops of oats and barley originally sown to be cut for green feed will probably give good yields if they escape frost.

Although the Western Canada Flour Mills Co. has had good earnings during the last year they are not believed by some to be sufficient to warrant the sharp advance in the shares of the company. The supposition is that a merger is being arranged, possibly with the Maple Leaf Milling Co. In this connection it is pointed out that Western Canada's trade would broaden out Maple Leaf's organization and be of considerable real advantage to both companies. Officials of both companies deny that there are any plans for amalgamation.

Announcement by the Canadian wheat board that the initial price paid by the Dominion government for wheat would be $2.15 per bushel for No. 1 northern at Fort William has cleared the air here in grain trade circles. It is 10 cents lower than the price demanded by the organized farmers, but on the whole appears to be satisfactory to moderate people. Chronic bears think it is too high and that the government will be stung. There is naturally much difference of opinion, but the fact that Canada is the only country that has any hard spring wheat to sell puts her in a strong position. The rules and regulations of the wheat board have also been made public. They seem to have been carefully thought out and to cover all phases of the situation.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Bulk No. 3 white oats offered at 81c per bushel delivered, quick shipment, New Orleans weights and grades to govern. Sacked oats have been sold at 86¾c delivered. The demand for oats is slow and draggy, and offerings are decidedly free, with not much demand.

A rumor has recently been erroneously circulated that the elevators of the port of New Orleans were congested, when as a matter of fact not more than half [illegible] present storage capacity of the elev[illegible] has been utilized. For the past ten [illegible] 1,500 cars of grain have been receive[illegible] by Sunday night, August 24th, tracks [illegible] be clear and practically all cars unlo[illegible] With sufficient tonnage in sight, the [illegible] no fear of congestion at this port [illegible] present.

Recently Texas has held the cent[illegible] the stage with low price on No. 3 [illegible] corn, and was quoted at $1.85 per b[illegible] delivered, quick shipment, New Or[illegible] weights and grades to govern. This [illegible] is fully 20c per bushel less than the [illegible] of western corn, and while our mark[illegible] only a very small user of this cor[illegible] corn, the fact of the difference in [illegible] between western and Texas corn bei[illegible] great, it will only be a question of tim[illegible] fore the trade will be forced to use [illegible] corn in preference to yellow. No. 3 y[illegible] corn offered from the West from $2 [illegible] $2.08 delivered, and those who want [illegible] low corn must submit to the price an[illegible] for it.

BALTIMORE.

Robert C. Neu, Correspondent

The grading of new hay was offi[illegible] begun in this market on August 19[illegible]

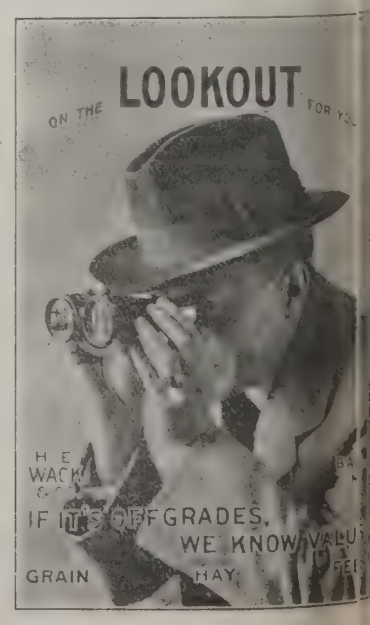
E. F. Richards, of John T. Fahey & [illegible] grain receivers and exporters, of this [illegible] has returned from a two weeks' mot[illegible] trip through New York state and o[illegible] the Hudson.

The receipts of new water-borne [illegible] in the Baltimore market so far this [illegible] son amount to 698,000 bus., compared [illegible] 800,000 bus. arrived up to the corres[illegible] ing time last year.

The name of Carroll H. Askew, s[illegible] ship manager, is posted on the officia[illegible] letin board of the Baltimore Chamb[illegible] Commerce as an applicant for membe[illegible] in this organization.

The name of Jas. W. Barker, ma[illegible] of the Harrisburg Grain, Flour & [illegible] Co., of Harrisburg, Pa., is posted o[illegible] official bulletin of the Baltimore Ch[illegible] of Commerce as an applicant for mem[illegible] ship in this organization.

Edward T. Shell, Jr., of the Balt[illegible] Grain Co., and J. A. Manger, as a com[illegible] tee representing the Baltimore Chamb[illegible] Commerce, had a conference in Was[illegible] ton last week with Commissioner [illegible] on the subject of the war tax on gr[illegible]



A. C. Gale, of the A. C. Gale Grain [illegible] of Cincinnati, Ohio, was a visitor o[illegible] floor of the Baltimore Chamber of [illegible] merce last week. Mr. Gale's firm do[illegible] large business with the Baltimore m[illegible] and he came East to look over the [illegible] eral wheat situation.

Oats are 10 cents per bushel high[illegible] the Baltimore market than they were [illegible] time a year ago, and, due to the fac[illegible] in the allotment of cars preference [illegible] to be shown for wheat, the arrivals o[illegible] oats in Baltimore thus far have bee[illegible] below the normal for the last of Aug[illegible]

Receipts of new wheat have been [illegible] ning heavy in the Baltimore market, [illegible] aging above 200 cars a day. As a co[illegible] quence, stocks in elevators are fas[illegible] proaching the three million bushel [illegible] which makes the announcement that [illegible] is progressing rapidly on the new Pen[illegible] vania Railroad elevator at Canton, [illegible] ing much greater storage capacity i[illegible] near future, most welcome news.

Allen G. Pemberton, a member o[illegible] Baltimore Chamber of Commerce and [illegible] timore manager of Baugh & Sons [illegible] large fertilizer manufacturers, died o[illegible] gust 22 at his home, "Winterbourn[illegible] Walbrook (a suburb of Baltimore), [illegible] an illness of several months. His [illegible] was formally announced to a general [illegible] ing of the members of the Chamb[illegible] President Hayward, and a committee [illegible] appointed to attend his funeral.

In a revision in the scale of wheat [illegible] paid by the Grain Corporation, notice [illegible] given that a premium of one cen[illegible] bushel would be paid hereafter for [illegible] red winter weighing 57 pounds and [illegible] but with this proviso: "The premiu[illegible] 57 lbs. No. 3 red and No. 3 red wh[illegible]

rlicky, will apply only when certificate r the wheat as originally unloaded is de- ered to the Grain Corporation with in- ection certificate showing such weight."

Hammond, Snyder & Co., Inc., grain re- ivers and exporters of this market, re- ived on August 22, 1919 a letter from one their correspondents in Antwerp, bear- g the date of December 10, 1915. The mmunication gave evidence of having n the gauntlet of various censors, was arked "released by British Military Au- orities," and was even "lost" on its way m Antwerp to Rotterdam. The letter as remailed from Rotterdam on August , 1916, and just reached its destination. its the writers expressed the hope that siness would become active again "in e near future," and closed by wishing ammond, Snyder & Co. a merry Christ- as and a happy New Year. Incidentally, have passed several new years since e communication was originally started its way.

James Lister, in charge of the cable ser- e of the Western Union Telegraph Co., th headquarters in New York City, was visitor on the floor of the Baltimore amber of Commerce last week. Mr. ster is at work upon a plan, in the in- est of a more efficient cable service, to oup the various users of foreign cables der the respective trades with which y are identified, and is giving attention t now to the grain interests. He hopes entually to bring down the time for e interchange of messages between this ntry and Liverpool or other important ropean centers to, say, 15 minutes, and eaks as one who has his subject well in nd. He made a most favorable impres- n upon the leading merchants with om he held conferences on 'Change e, and when we learned that Mr. Lister a Scotchman, the determination with ich he has entered upon his task emed less surprising.

CHICAGO.

A Board of Trade membership sold at 050 net to the buyer last week.

Jos. Gregg of Joseph Gregg & Son, At- nta, Ga., was a visitor in Chicago this ek.

The Grain Corporation bought 135,000 ls. of flour at this market last week at price range of $9.45@10.30.

Newly elected members of the Chicago ard of Trade are F. J. Murphy of Bache Co., New York, and Edward M. Hamline Boston.

Warehouse receipts for 250,000 bus. of for shipment were cancelled within the ace of but a few days last week and ving was reported as very heavy.

Applications for membership in the ard of Trade have been filed by Victor Herter, H. D. Gibbons and J. S. Reddy. e membership of N. De Golyer has been ted for transfer.

Ten cars of new Texas No. 3 white corn re sold on Aug. 25 by John Barrett to Armour Grain Co. to come to Chicago. s is the first time in the history of the de that new corn has been sold from tas to Chicago in August or any other e.

Regional Director Aishton has issued the owing instructions: "Effective at once, tructions issued Aug. 6 that freight be epted subject to delay on account of ke and enforcement of notation to that ct on all bills of lading are hereby celled."

he Armour Grain Co. will have the dis- tion of being the first receiver of Texas n in the history of the trade. Ten cars No. 3 white will comprise the shipment, ch was sold for shipment in ten days at 9. It is said that 5,000,000 bus. of Texas are ready for shipment within the next days.

fter enduring a long siege in Mercy spital, Sam Beaumont, well known cash in handler, died about a week ago as result of an operation. Some little e before his death Mr. Beaumont sold his membership in the Board of Trade . it was with regret that his friends ned that he failed to rally from the ration.

he Chicago Board of Trade rules have n amended so as to make the commis- n rates on the purchase or sale of car- of wheat, rye, barley, ear corn effec- at $2 per car; corn and oats, $1; hay straw, $3; screenings, bran middlings, ground feed, $2; flaxseed, $2.50; clover, othy, Hungarian mustard or buckwheat d, $3. Seeds in less than carlots, $3 bag.

mong visitors to the Chicago Board of de floor during last week were listed following: Lloyd Holsinger, Faribault, n.; Jesse Miller, Des Moines, Ia.; Chas. ght, Omaha; H. M. Taggert, Wenona, W. H. Kann, Guttenberg, Ia.; H. E. ter, Lowell. Ind.; J. J. Fernekes, Mat- n, Ill.; M. B. Roney, Dubuque, Ia.; G. Jones, Quincy, Ill.; J. O. Pape, Fowler, ; J. Wengel, Cairo, Ill.; and Dan Mc- y, Earlville, Ill.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

F. Ferrell of Saginaw Milling Co., also F. Richardson, Jr., of W. F. Richardson, & Co., are away on their vacations.

usiness has been quiet in Richmond this owing to the unsatisfactory railroad itions which are to some extent un- ain just now and buyers not taking nuch stuff for shipment until some as- nce that shipments can be made.

TAMPA, FLA.

Leonard Selz, Correspondent.

Effective Sept. 1st the rates on grain and grain products from New York to Tampa via Mallory Line will be raised to 18½c. This in accordance with information supplied by local steamship authorities.

No. 3 white oats are being quoted at 92½c. The local dealers are nervous over the general outlook and are buying from car to car in anticipation of their immediate needs only. Some Texas oats are being received now and show some little stain.

Harry Gallaher, assistant manager of Consolidated Grocery Co., is back at his desk after eighteen months' absence from business. Mr. Gallaher was sergeant, first class, of Engineers and was in the thickest of the fighting in France. The trade here welcomes Harry back on the job, but he is unwilling to talk of La Belle France or the war, preferring to talk feeds, grain, hay and general business.

Some samples of Florida corn have been received in this market recently, and while the corn on the cob shows up splendidly it does not prove up to advantage after having been shelled, showing some discoloration of the heart. It is possible that the samples received are not at all indicative of the general Florida crop. The movement of our crop is not yet in full swing, but will be in a week or ten days from most of the Florida corn-growing sections. The greatest difficulty is lack of grain handling facilities at Florida common points. There are about three small elevators located at different points in Florida, but their capacities are small and no facilities for kiln drying the corn and handling intelligently.

TOLEDO.

Carl Bryant, Correspondent.

Harry Schaub of the Young Grain Co., called on the trade in northern Indiana last week.

Fred Wickenhiser of John Wickenhiser & Co., is back from a two weeks' fishing expedition in northern Michigan.

R. S. Sheldon of the S. W. Flower Co., is spending a few days at Culver, Ind., where his son is attending college.

Bird Gwinn of the Gwinn Milling Co., Huntington, W. Va., was a visitor at the offices of the J. F. Zahm & Co., last week.

"Big Ed." Churchill of the Churchill Grain & Seed Co., contributed about $60 to a nimble-fingered pickpocket at Toledo Beach last week.

Fred Jaeger of J. F. Zahm & Co., was given a rousing welcome by his friends and associates when he returned to the floor after three months vacation in the East.

George Woodman of the Rice Grain Co., received a sample of Russian hard winter wheat raised in Ohio that graded No. 1 when inspected here. This variety of wheat has been grown in this territory for four years. The sample tested 63 lbs. The grade of the wheat received, Mr. Woodman says, is proof that the quality of this wheat does not deteriorate as fast as was generally believed.

L. J. Schuster of The Raymond P. Lipe Co., returned to the floor Friday after several days at home as the result of a painful injury to his foot while bathing recently.

Toledo has been selected for the next regular monthly meeting, Sept. 8, of the Northwestern Ohio Farmers Co-operative Ass'n. A large attendance of managers and farmers is expected. "Bill" Cummings' band will furnish music. "Joe" Streicher has been assigned to the base drum and a great deal of "noise" is therefore assured. John Luscombe's favorite selection "That old pal of mine" occupies a particular position on the program.

Toledo Produce Exchange wired an urgent appeal Saturday to Julius H. Barnes, wheat director, for relief from the empty car scarcity which has affected this territory seriously in the last few weeks and caused this market to lose considerable wheat that rightfully should come here. Discrimination was charged to the railroad administration in the distribution of cars in favor of western markets as a result of which scores of elevators in Toledo territory have been closed for want of equipment. Twenty-eight reports from shippers Saturday requested 315 cars for immediate loading. It was pointed out that between 2,000 to 5,000 cars were wanted here at once, and if empty cars were supplied most of the wheat would be forwarded to seaboard markets within a short time, either as wheat or flour. Terminals here are not congested and have not been since the new crop began to move and receipts at other markets show the car supply to be fairly adequate except in Illinois, Indiana, Ohio and Michigan.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts 9 cars with slow demand market 1¼ lower, 3 white selling at .72¼.

The following rates were effective August 15: The fee for weighing all grain unloaded at elevators and distilleries, 75 cents. A fee of 25 cents will be charged for each condition report. Effective same date the fee for inspection of all grain "in" will be $1.00 per car.

Corn Products Co. at Pekin which has been shut down for several weeks account of labor difficulties may start their plant in a short time. A meeting between the officials and employes will be held during the week and from all reports prospects are good that a settlement will be reached.

Peoria corn receipts showed some increase the latter part of the week. A total of 26 cars of corn was on the market Saturday with sales 6 to 8 cents lower all around. Demand very slow and local industries were practically out of the market, shippers taking a few cars at the big decline, No. 1 yellow $1.91@1.92; 2 yellow $1.91; 3 yellow $1.90; destination weights, 6 yellow $1.86; sample grade $1.83.

ST. LOUIS.

E. E. Reeves, Correspondent.

O. F. Bast, a prominent grain dealer of Davenport, Iowa, was a visitor on the floor of the Merchants' Exchange Saturday.

W. H. Karns, formerly with D. P. Byrnes, but who is now residing at Bluffton, Ind., was in St. Louis last week, looking over the market conditions.

Mason Hawpe, who has been spending a month's vacation at Cass Lake, Minn., fishing, returned last week, looking fine, and telling some wonderful fish stories.

Peyton T. Carr, president of the Kehlor Flour Mills Co., who has been missing from the cash wheat corner for some time, returned last week from a two months' vacation spent in Canada.

J. E. Argenbright, residing near Adrain, Mo., thrashed 9,300 bushels of wheat from his 400-acre field. The average is 23 bushels to the acre and the quality fine. He received over $19,000 for the crop.

Ben Lang, who has been spending his vacation with his family at Ogrenquit, Maine, came home on a hurried business trip to St. Louis last week, but returned to Maine for the rest of his vacation.

William E. Henry, formerly Federal Supervisor of Grain, with the U. S. Dept. of Agriculture, but who for the past fourteen months has been with the Wilson Sampling Bureau, has applied for membership in the Merchants' Exchange, and is now with the Stannard Tilton Milling Co.

President P. E. Goodrich, and Sec. Charles Quinn, of the Grain Dealers National Association, who were in St. Louis, recently, in conference with the local committee in regard to the arrangements for the coming convention of the association, are well pleased with the personnel of the committee, and the preliminary arrangements.

A committee of striking employes of the Corn Products & Refining Co. of Granite City has been summoned to New York City for a conference with officials of the company. The plant has been shut down for six weeks, following a strike for recognition of the union and the closed shop rule. E. R. Pritchford, president of the strikers; D. B. Gilham, secretary, and Earl Galloway, representing the trade council, will go to the conference.

James T. Bradshaw, State Grain Warehouse Commissioner of Missouri, has made the following announcement to the trade: On and after Sept. 1, 1919, the charge for inspection "In or out" and for re-inspection at St. Louis, Mo., by the Missouri State Grain Inspection department, will be one dollar ($1.00) per car. This slight increase in the inspection fee of the Missouri Department was made necessary in order to make it uniform with the charge made for the same service by the Illinois State Grain inspection Dept. at East St. Louis.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Employes of the Pillsbury Flour Mills Co. held their annual picnic at Christmas Lake last week.

The Chippewa Milling Co., Montevideo, Minn., recently purchased a grain elevator at Wheaton, Minn.

Wilbur Joyce, manager of the Duluth office of Van Dusen-Harrington Co., was in Minneapolis last week.

The Drake, N. D., flour mill, the first to be bought by the North Dakota Industrial Commission, was officially opened for business last week.

Northwestern Minnesota counties sustained heavy damage to small grains and are planning an appeal to the state legislature for seed wheat next spring.

D. D. Tenney, of The Tenney Co., returned from an Eastern trip last week. Frank C. Tenney of the same company has taken charge of the Duluth office.

During the first week in September the matter of the federation of Minnesota farm bureaus and affiliation with a national organization will be considered at a meeting to be held at the Minnesota University Farm School.

Grain elevator owners on the Great Northern Railroad near Casselton, N. D., have filed complaint with the State Railway Commission that their bins are full and they cannot obtain cars to make shipments of grain.

The Emden Elevator Co., Emden, N. D., filed suit in the United States District Court at Fargo, N. D., Aug. 19, for an injunction to prevent enforcement of the state grain law. The company has refused to take out a state license on the ground that since the United States Government took over the handling of grain the state has no authority in the matter of handling grain.

By a vote of 250 to 106 the Minneapolis Chamber of Commerce Association carried an amendment to the rules of the association in regard to disposition orders. The amendment follows: "All cars of grain or seed sold on arrival or to arrive shall be 'ordered' to the unloading industry or to the outgoing railroad yard by means of a disposition order. It shall be the duty of the seller to deliver to the buyer, and it shall be the duty of the buyer to demand from the seller, at the time of payment for

ch grain or seed, the duly authorized dicate disposition order properly signed by e railroad joint agent or his representave. Such duplicate disposition order ould be attached to invoices based on al weights, or to requests for advances connection with cars sold or to go out town."

Cash Wheat—The demand for flour is ht, so the mills have been holding back the matter of purchasing wheat, waitg for a heavier movement from the new op. Today was the first big day in the atter of wheat receipts and prices dened sharply, dropping from 5 to 15c, acrding to quality. Choice new spring eat is in fair to good demand and does t show the weakness of the thin wheat. ferings of good wheat are light. Thin eat is arriving on the market in libal volume and bids are declining every y.

The demand for old durum wheat of the avy type is good, but thin new crop rum is in slow demand.

Winter wheat is in slower demand since e movement of spring wheat picked up d prices are declining gradually. At presit they are out of line with Southwestern rkets.

Reports from different parts of the rthwest vary sharply. Some say that e farmers are threshing freely and are rketing their wheat from the thresher. other sections the movement is very ht and the farmers are waiting on the sults of the New York meeting of the eat Corporation conference regarding ces for thin wheat.

No. 1 northern quoted today at $2.35@ 0; No 2 northern at 5@10c less. Some oice No. 3 sold close up to No. 1 north- price. No. 2 hard Oklahoma wheat oted at $2.21@2.34, No. 2 hard Kansas at 28@2.32. No. 2 hard Nebraska around 26 and Iowa at $2.20@2.22.

Corn—The market for corn is narrow d featureless, as the shippers are nerus over the reports o fcheap Texas corn immediate shipment. Today the market clined several cents, as there was a very ht demand for the limited offerings. ices quoted at $1.55@1.83.

Oats—The demand for oats ranges from et to good, according to the weight of offerings, transit, etc. There is a good mand for the heavy old crop oats with d transit, while the demand for the thin w crop oats coming in on flat rates is r. Prices quoted at 1c under to October ce for the new and at October price to over for the old. No. 4 white quoted at 4c less.

Rye—The demand for rye kept pace with receipts up to within the past day or but today the arrivals were heavy and buyers, mill and elevator, reduced their s ½c compared with the futures. Local vator companies report a steady export uiry for offerings to be shipped any e up to December, but bids are just a le bit out of line. Offerings from other rkets are cheaper, so no trade has sed here recently. No. 2 sells at Octo- price to ½c under, No. 3 at 1@½c less.

Socializing Milling Industry.

At the recent opening of the Swedish ksdag a bill was introduced to estabh a state monopoly on the importan of wheat, flour and oats until Aug. 1920. During the same period the te is to have exclusive right to sell ur to consumers; and the Swedish ur mill workers simultaneously anunced a national strike. The farm nds' strike in Upland also threatens spread.

A bill to prohibit the export of corn d flour and to fix maximum prices in ler to combat speculation has been decided on by the Department of Commercial Statistics, Uruguay.

The National Joint Industrial Council for the Milling Industry in Great Britain has arrived at an agreement relating to a national basis of wages. Under the arrangement come to mills are classed into three grades, according to the roller contact, as reckoned for insurance purposes. Rollermen's wages range from 76 s. ($18.47) for the large port mills to 66 s. ($16.039) in the small country mills per week of 44 hours. Rates of pay for youths between 16 and 21 years of age range from 20 s. 6 d. ($4.98) to 60 s. ($14.58), according to age and position of mill. Women over 18 years of age are to be paid 32 s. ($7.78) to 40 s. ($9.72) per week, subject to higher rates for special work.

Cornmeal in the United Kingdom was again placed under official control on Aug. 20. Supplies of corn are still negligible, but there is hope for fuller quantities within the near future, owing to the good interior movement in the Argentine and the substantial increase in the available tonnage at the ports of the southern grower.

The British Wheat Commission on Aug. 19 fixed the following prices for imported wheat: For 480 lbs., Canadian, $12.60 to $14.40; United States, $12.96 to $14.40; Argentine, $14.16.

State to Provide Seed.

Owing to drought in North Dakota, which the bank of North Dakota is investigating, it is proposed to confer power upon county commissioners to increase the amount of seed and feed bonds to be issued by the state. The proposition is to stake each farmer to the extent of $1 per acre of land plowed this fall for seed and to encourage farmers to stay on their holdings. It is planned to furnish feed for horses used in fall plowing. Banks, elevators and business houses will be asked to advance the feed or the money until the plowing is actually done, and the county would then issue warrants and make arrangements through some fiscal agent to have them carried until bonds can be issued.

Argentine Corn Exports.

The following are the totals by weeks of the exports of corn from Argentina for the past three years:

Week—	1918.	1917.	1916.
Aug. 31....	1,009,000	236,000	2,490,000
Sept. 7....	577,000	456,000	2,392,000

Con.-Gen. Gunsaulus reports from Singapore the utilization of Para rubber seed for oil which was valued at $250 per ton at a time when linseed stood at $300. Experts are of the opinion that rubber seed oil could be used in the manufacture of paints, varnishes, etc., while the cake resulting from the oil-making process is shown to be a good feeding cake for cattle, comparing favorably with linseed and other oil cakes. In the British Malaya there are about 2,000,000 acres in the rubber states, of which 633,000 acres are in bearing, producing 300 lbs. of seed per acre, which hitherto has been absolutely wasted.

Visible Supply of Oats.

Official statement of the visible supply of oats weekly, compared with same weeks of previous three years:

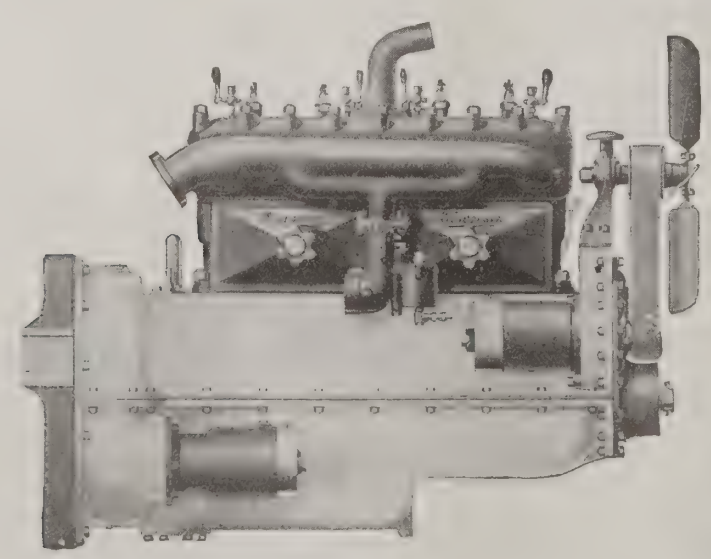
MU

"America's

An "All Star" Tru

Like an "All-Star" theatrical performance, the MU TRUCK is an aggregation of units that have won a pla a name for themselves at the very top of the pro

In making our selection of the units for the MUTUAL we closed our ears to the noise of mere p advertising; and, by careful comparison, measurement and test, of the rival makes of engines, cl transmissions, universals, frames, axles, radiators, steering gears, magnetos, carburetors, wheels and a parts, chose the ones that the great majority of the best posted authorities on the "inside" agreed were the only ones that could be used for a truck that would dare call itself—*"America's Greatest T*



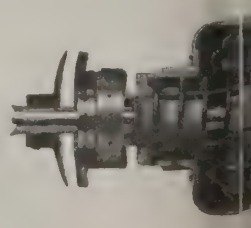
MUTUAL SUPER SPECIFICATIONS (Two T

America's Greatest Truck Engine

From every standpoint—design, material, construction, extreme care in manufacture and inspection, the *Wisconsin Engine* is recognized as indisputably America's Greatest Truck Engine.

There are several very good "second best" truck engines on the market, any one of which is good enough for an ordinary truck; but there is only one engine that is good enough for "America's Greatest Truck"—and that engine is the "Wisconsin"—first in gas economy, endurance, reliability and all-round engine efficiency.

And we put into our 2-ton MUTUAL the same 4 x 6 Wisconsin engine that others use in their 3 and 3½-ton trucks.



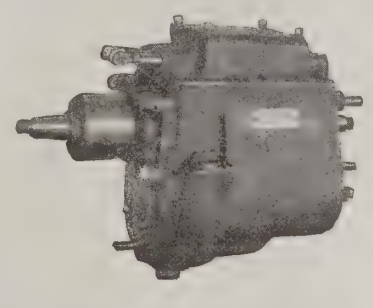
America's Greatest Truck Governo

The Duplex Company's Duplex (not Simplex) is the only one that controls road-speed independent of motor-speed. It makes the driver obey the owner's orders always and everywhere; it is, in fact, an "automatic chauffeur," that adds years of life to the ma guarding it against abuse. It is vastly more accur throttle control; makes a 20% increase in gasoline e by use of a patented "grid" valve instead of the b type. It proportions fuel-feed to suit road conditi livers power as needed, and insures a quick get-aw Duplex delivers more power on hills and bad ro creases average road speed 20-30% and acts as a matic safety brake on steep down grades. Incide costs us 2 to 5 times as much as other makes and t

America's Greatest Truck Clu

The Hele-Shaw, Universal No. 5, oil-immersed, m disc clutch costs us twice as much as the next best, a three to four times as much as clutches used majority of trucks. It gives a smooth, silent but pick-up; a firm final grip; and saves the engine an mechanism (including tires) the ruinous "racking" that cheap clutches cause. You will tolerate no other clutch on any truck you own after you use the Hele-Shaw.

TUAL

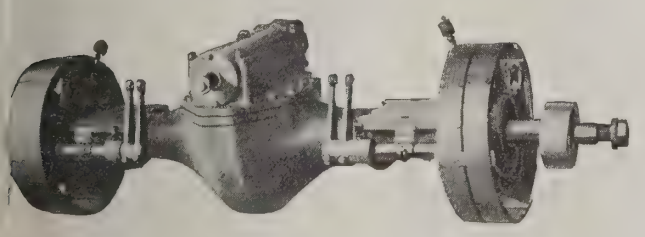


reatest Truck" 2-3½-5 TON

erica's Greatest Truck Universal

it be anything but a Spicer? And we use three nts in the shaft and a fourth in the universal clutch ere, too, we put into our 2-ton Mutual a size used l 3½-ton trucks by all other makers who use the

rica's Greatest Truck Transmission



" of course; and their model "G5" selective; with e plates to permit at- of mechanical hoist and . Four speeds forward rse. A simple, sturdy, le gear-set used by lead- priced truck makers on d 3½ models.

rica's Greatest Truck Axles

(Ball Bearing)

ure the highest efficiency, we adopted the Sheldon ear Axle—*first* because both the worm thrust and ds are taken by *ball bearings* which offer less fric- any other type of bearing. *Second*—because it semi-floating type, which has the advantages of implicity, less weight, greater carrying capacity, esistance to side shocks, lower maintenance cost er ease of removing wheels for inspection. The

ply versed in scientific automotive engineering a ne more emphatic will be his declaration that the s America's Greatest Truck Rear Axle.

Ball bearing steering knuckle type of Front Axle ed as a matter of course.

And These, Too, Are Greatest:

Parish & Bingham pressed steel Frame; extra heavy type. Length 224 inches.

Mather Chrome Vanadium Springs.

Smith Metal Wheels for solid tires—regular equipment and not a costly extra.

Dayton Steel Wheels for pneumatic tires.

Goodyear or Firestone Tires; 36 x 4 solid for front wheels and 36 x 8 for rear; or same makes of Pneumati tires as an option, at an extra cost.

Ross Steering Gear—with 20 inch wheel (not 17-18 inch).

Perfex Radiator, worth a big story in itself.

Westinghouse Starting and Lighting System, part of regular equipment.

Bosch Magneto—type ZR4 with impulse-starter. Dust proof and water proof.

Stromberg Carburetor; type M.

Bound Brook Oilless Bushings: throughout.

Weather-tite Cab—fit for a King; regular equipment.

Powell Muffler—12 sections. Remarkably silent.

Electric Steel Castings at vital points, where others use Malleables.

25-Gallon Gasoline Tank.

Special 2½-gallon ***Reserve Lubricating Oil Tank.*** Wheel base—150 inch.

Specifications on the Mutual 3½-ton and 5-ton are equally "Great."

Buy One "Mutual"

Don't quibble about the price; but take our word for it—on this one purchase—that we give more for the money, in actual cost to us, than you can get in any other truck.

Put your "MUTUAL" into the hardest service you have, and keep a record of its ton-mile performance—all costs counted.

Do this, and all your future purchases will be MUTUALS.

We rise or fall on this test; and remember, we have vastly more at stake than you.

UAL TRUCK COMPANY, SULLIVAN, INDIANA, U. S. A.

Interest and Insurance.

Zone Vice-presidents of the Grain Corporation are sending out copies of the forms to be used in making claim for interest and insurance, under ¶ 4 of the dealers' agreement, to wit:

"In case the dealer shall be unable, after using every effort and all diligence, to ship in any week such total quantity of all grain as makes the equivalent of at least 20% of the amount of wheat (wheat only) in his elevator and owned by him at the beginning of such week, the Grain Corporation shall pay to the dealer to cover insurance and interest for such week 7/20c per bu. on the amount of wheat in the elevator and owned by him at the beginning of such week; provided, however, that in event the Grain Corporation announces that it has established and includes in the guaranteed price an advancing premium framed to reflect a fair carrying charge, this Section shall not be effective during the period of such advancing premium."

For example: A dealer has in store on any Monday morning 15,000 bushels wheat, 5,000 bushels corn, 5,000 bushels oats; previous to that Monday morning he has placed orders for cars with the railroad agent. If, during that week, he is not able to secure enough equipment to load 3,000 bus. of grain of all kinds, such being the equivalent in amount to 20% of the wheat he had on hand, the Grain Corporation, on proper evidence which the forms themselves require, will pay the agreement holder 7/20c per bushel on the entire 15,000 bus. of wheat he had in store at the beginning of the week.

The dealer is not required to ship only wheat. He may ship all kinds of grain, but if his total loadings are 3,000 bushels or more, he will not receive this interest and insurance and no claim for that particular week will be in order. Separate invoices must be made for each elevator.

The Winnipeg Grain Exchange has elected John E. Botterell president, N. L. Leach vice-president. The committee selections will be made later. There is a contest for the secretaryship, John Fleming, manager of the Young Grain Co., being a candidate to succeed Dr. Magill, the present secretary.

TRADE CONFERENCE.

The vital problems of business, multiplied by post-war and industrial developments, will be discussed at a National Conference to be held in Chicago on Sept. 8 and 9 under the auspices of the Illinois Manufacturers' Ass'n, at the Congress Hotel.

Trade and industrial associations in every line have been invited to appoint delegates, and to participate in what is believed will be a meeting of moment, inasmuch as it will enable business to present concretely its attitude on some of the questions now before the lawmakers at Washington, and some of the proposals of a revolutionary nature that have been presented from various sources in the past few months. Representation is to be given at the conference not only to business, but to the farming interests and organized labor.

Some of the subjects which it has been suggested be discussed at the conference are the following: Participation in private business on the part of the Federal government; Nationalization of industry, Influence of exports on prices and production, Possibilities of increasing production, The relation of the Unit States to the rehabilitation of indust in Europe, Stabilization and guaran of contracts, Definition of profiteeri The attitude of employing farmers a manufacturers to labor, Adjustment tween property rights and commun interests, Participation of labor in t management of industry, Increasing t purchasing power of the dollar, Dist bution of the war debt, Governmen price fixing, The Plumb plan, The so darity of farming and business int ests.

Trade Mention

ulletin No. 266 has just been issued the Walter A. Zelnicker Supply Co., St. Louis, describing rails, portable k angles, and other equipment of nature. The bulletin will be sent the asking.

o expedite the office routine of their ny friends and customers, Mayer-brook & Co., with main offices in the bster Bldg., 327 South La Salle st., cago, have compiled a serviceable handy sheet which enables one to at a glance the freight per bushel ny given rate per hundred lbs., in-ling the 3 per cent war tax, on at and clover; corn, rye and flax; ley and oats. Reshipping rates on in to points East and South are also en.

he Guarantee Construction Co. of Cedar St., New York City, and Old ony Bldg., Chicago, advises that two umatic car unloading installations e been completed for the Postum eal Co., Battle Creek, Mich. One sed for corn and the other for wheat ing these large mills greatly in-ased handling capacity. It has been result of good fortune as well as eful business planning that has fa-ed the Guarantee Company with ny large jobs during the period n labor uncertainties with instances strikes and Bolshevistic situations cope with, proving to the many nches of the feedstuffs industry that reased mechanical equipment and sequently lessened manual labor is ep in the right direction.

he Alfa-Maize Mfg. Co. of Platts-uth, Neb., is now erecting a $60,000 lfa mill which will have a capacity about 40 tons per day and be de-d to an output of concentrated al-a meal, corn fodder meal with other ducts to balance same and other high le milled forage feeds. The com-y, which maintains sales offices in Omaha Grain Exchange Bldg., at aha, in line with the late Governor T. Hoard of Wisconsin, believes "the lfa movement is the most important nt of the century"; and to the end supplying milled foods for animals, ch they contend is as important as humans, they are undertaking an national campaign whereby they e to prove to their farmer friends folly of devoting valuable land to ing a crop with expensive labor to rest it and then feeding the crop to stock in the rough. To prove that the crop is lost by this wasteful hod of feeding, which is a crime n butter is worth over $1,000 a ton milk 15c a quart, is a part of their paganda which should prove of in-st to dealers and handlers of al-u feeds, the number of which is in-sing steadily.

Change in Business.

ie Associated Mill & Elevator Co., Kansas City, through its officers H. unn, president, and E. R. McDonald, president, has purchased from the rated Mills Co., and the Silver n Co., of Morganville, Clay county, , the following property:
ie mill and elevator and warehouse 50 bbls. wheat flour and 100 bbls. meal capacity per day, formerly wn as the Federated Mills, together the Rock Island Elevator of 25,000 storage capacity, capable of unload-10 cars per day; also the Union fic Elevator of 16,000 bus. capacity, ble of unloading 300 wagon loads loading 8 cars a day.

This is one of the most economical operating plants for the handling of grain and grain products in central Kansas and has hitherto enjoyed its share of the business in Clay and adjoining counties.

The milling division of the Associated Mill & Elevator Co., having been solicited by Eastern connections in the last four weeks for flour and by-products, regards it advisable to acquire several small mills and elevators in order to handle this trade and as feeders for its large mill and elevator in course of construction on the property recently purchased in the East bottoms, Kansas City, work on which is progressing satisfactorily.

GRADES ON INTERSTATE WHEAT SHIPMENTS.

Charges that the new winter wheat crop is being graded down so that it brings large discounts from the Government guaranteed price for No. 1 hard winter are not borne out by figures on wheat receipts at Western markets, according to licensed grain inspectors' reports received by the Bureau of Markets. These reports show that in the Kansas City district of Federal grain supervision 77.7 per cent of the hard red winter wheat inspected up to Aug. 9 graded No. 3 or better. At the Oklahoma City district 91.2 per cent of the wheat inspected up to Aug. 11 graded No. 3 or better. Figures from the Wichita district show 71 per cent of the wheat graded up to Aug. 11 No. 3 or better. At the Omaha district 83.3 per cent of the wheat up to Aug. 13 graded No. 3 or better, while at St. Louis 88.5 per cent of the hard winter wheat graded No. 3 or better up to July 26. The inspection points in these districts are at Wichita, Arkansas City, Coffeyville, Cherryvale, Hutchinson, Wellington, Winfield, Lawrence, Leavenworth, Salina, Topeka, Abilene, Atchison, Clay Center, and Kansas City, Kans.; Oklahoma City and Enid, Okla.; Kansas City, St. Louis and St. Joseph, Mo.; Des Moines, Missouri Valley, and Sioux City, Ia., and Fremont, Lincoln, Omaha, and Superior, Neb.

These figures do not cover grading at country points, where licensed inspectors are not located. The Grain Corporation has required Federal standards to be applied on all its transactions and has provided machinery to handle appeals on grades assigned by country buyers. If any farmer is dissatisfied with the grades assigned to his wheat, at a point at which no licensed inspector is located, he has the right of appeal to the Grain Corporation. Officials say that "the complaints on wheat grading are primarily due to abnormal marketing conditions"; but would it not be as well to say that the quality of the wheat is responsible for the low grading? In support of this view, they say that in the case of shelled corn and oats, which are not handled under fixed prices, "information received by the Department indicates that the Federal grades are giving general satisfaction."

Decontrolling Grain in England.

According to a circular issued by the National Association of Corn and Agricultural Merchants of Great Britain, it is not the intention of the British government to issue a grain prices order for the 1919 crop. Merchants will deal freely with barley, oats and rye for the new harvest. The only probable restrictions will be in the use of millable wheat, and special announcement with regard to this may be expected at an early date.

Liverpool has cabled that the British government is reducing the official price of foreign wheat to the sixth basis, with No. 1 Northern Manitoba the first grade. The subsidy has been adjusted, but not increased; native wheat is fixed at a minimum price of 75s 6d per quarter of 480 lbs.

Imports of Corn at New York.

On August 4th 230,517 bushels of corn arrived at New York from Argentina. On August 6th two shipments, amounting to 328,157 bushels were entered. Total for week ended August 9th, 558,674 bushels. Total since January 1st, 4,571,372 bushels.

Orders were issued Aug. 21 that no grain should be loaded out for Buffalo for Boston delivery.

HAPPY N. DAKOTA.

J. A. McGovern, manager of the North Dakota Mill and Elevator association, in an interview given out at Fargo a few days ago outlined the plan by which the state will engage in the elevator and milling business in accordance with the provisions of the law passed by the last legislature at the instance of the Non-partisan League.

He says the terminal elevator will be of about 1,000,000 bushels capacity, and that the original unit of the terminal flour mill will have a daily capacity of about 2,000 barrels. It is his expectation that the mill and elevator will be in operation by 1921, as it will require probably all next year and the winter of 1920 and 1921 to do construction work. Plans are now being prepared.

As to location, that decision lies with the State Industrial Commission. Fargo, Wahpeton, Valley City, Devils Lake, Grand Forks, Minot, Bismarck, Jamestown and Mandan are making bids for the institutions. In addition to the mill and elevator plan, McGovern says that it is proposed to also construct and operate a cold storage warehouse, though this latter project still is uncertain. It will be connected with the mill and elevator, for the purpose of creating a great central market for farm products.

The purchase of a flour mill at Drake by the state, authorized by the Industrial Commission, will be completed within a few days. It is likely that the Industrial Commission will require of the city which gets the "big market center" that it take a certain block of the state bonds by which the projects are to be financed. Now, all "Go!"

Embargo on Canadian Freight Cars.

The Canadian National Railway, operated by the Dominion government, has issued an order that until further notice all freight cars, the property of the railway, are prohibited from leaving Canada. The records of the company show that some 5,000 of its cars were in the United States at Aug. 1, while only 1,000 cars belonging to the United States railways were in its possession. The embargo is for an indefinite period, but it is thought that it will be removed as soon as there are again enough cars on hand to handle the business of the railway.

New York Oats Market.

Oats receipts at New York last week ere 354,000 bus. Arrivals of the new op, while still very moderate, confirm ie previous reports of light test weight. ld oats have, therefore, been in fair equest, at satisfactory premiums. The emand, however, has shown a falling f the past few days, due to the unset- ed speculative situation, and the fact iat jobbers had purchased freely the evious week. Values have declined in mpathy with the option, although mly held, in most instances. Offerings ot burdensome, and should any fur- ier export demand develop, prices ould do better.—*L. W. Forbell & Co.*

Strong's Double Indexed Car Index
Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."
The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.
ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.
ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

CANADIAN WHEAT PRICES.

Sir George Foster at Ottawa stat on Aug. 21, in explanation of the Bi ish price fixing for Canadian, Unit States and Argentine wheat, that th was simply an arrangement with t British millers whereby the bak should be able to sell a nine halfpen (19c) loaf. On a similar arrangem last year the British government sac ficed many million pounds sterling.

The following schedule of cash p ments, representing the first installm of the Canadian wheat crop which w be handled and marketed by the n wheat commission, has been approv by order-in-council:

Manitoba, Alberta and Saskatchew No. 1 hard, $2.15; No. 1 Manito northern, $2.15; No. 2 Manitoba nor ern, $2.12; No. 3 Manitoba northe $2.08; No. 1 Alberta red winter, $2.1 No. 2 Alberta red winter, $2.12; N 3 Alberta red winter, $2.08. Abo cash payments are the basis in store t public terminal elevators at Fort W liam and Port Arthur.

British Columbia No. 1 whe $2.10½; No. 2 wheat, $2.07½; No. $2.03½, basis in store, Canadian gove ment elevator, Vancouver. Ontario a Queebc wheat, No. 1 grade, $2.18; N 2 grade, $2.15; No. 3 grade, $2.11, ba in store, Montreal.

The State Board of Agriculture Ohio is petitioning the State Emergen Board for an appropriation to empl more assistance to investigate the hi cost of living in that state.

Sedgwick County, Kans., reports three cuttings of alfalfa; first two made a yield close to two tons per acre and the second crop a ton. The third crop was little less than one ton. The county generally will have a larger amount of hay this year than last and also a large supply of straw.

New Texas Corn.

The new corn from Texas is pressing for sale; St. Louis reports purchase of 40,000 bus. of No. 2 white at $1.89; Memphis had offers at $1.84@1.85 and some business, but details were not disclosed. It is true that the Southern crop is subject to severe damage by weevil if held; but it covers some urgent needs just at this time, and after all most of it, as in the Northern producing area, is fed to hogs and cattle. —*Pope & Eckhardt Co., Chicago.*

FARM PRICES.

The level of prices paid producers of the United States for the principal crops increased about 6.1 per cent during July; in the past 10 years the price level increased about 1.6 per cent during July. On August 1 the index figure of prices was about 17.2 per cent higher than a year ago, 6.9 per cent higher than two years ago, and 91.9 per cent higher than the average of the past 10 years on August 1.

The prices of meat animals—hogs, cattle, sheep, and chickens— to producers of the United States, increased 4.2 per cent from June 15 to July 15; in the past nine years prices decreased in like period 0.2 per cent. On July 15 the index figure of prices for these meat animals was about 14.1 per cent higher than a year ago, 36.1 per cent higher than two years ago, and 91.3 per cent higher than the average of the past nine years on July 15.

Following are details of prices paid to farmers, compared quarterly on dates indicated, as reported by the Bureau of Crop Estimates:

	1918			1919	
	July 15.	Oct. 15.	Jan. 15.	Apr. 15.	July 15

Corn Situation.

Never has the corn situation been so complex as at the present time. Seldom if ever, has the market's tendency been subjected to so many different factors, vitally important from an economic viewpoint, but irrelevant and not directly bearing on corn values. Supply and demand, as a matter of fact, present practically the same relative position they did during the last days of July, when December corn sold at $1.73. Actual and prospective crop supplies have not increased one iota, if anything, and available stores have diminished through consumptive channels. Still, prices receded over 30c per bushel for future delivery. Sentiment is responsible; all conditions are subservient to its powerful influence until it has spent its force. We admit that a continued decline in foreign exchange reduces European buying power, but it seems rather far-fetched to give it such prominence as an adverse factor on corn values. Our corn exports at present are nil; during the past season we shipped only 16,687,538 bus. Whether sentiment has run its course and stability of values is in prospect, remains to be seen. A certainty is that the selling at current level is meeting with considerable resistance and the undertone is decidedly firmer.—*Simons, Day & Co., Chicago.*

Government Box Cars.

With quantities of new cars in railroad yards unmarked, which the Government has been unable to induce individual railroads to accept at prices paid for them, it would seem good business to take a loss and get them in service at a time when they are so badly needed. Is there any difference between a box car and any other war article? Perhaps it is only a matter of bookkeeping after all.—*H. I. Baldwin & Co.*

News of the Country Grain Trade

ARKANSAS.

Calico Rock, Ark.—The White River Mlg. , is operating a 25-bbl. Midget Marvel ill and will do custom grinding.

Prophetstown, Ill.—Earl Troppert has ught the feed mill business of Jay Sib- at this place including the building and tents. Consideration said to be $20,000.

Ulrich, Ill.—The Farmers Grain & Prod- Co. will erect a new elevator here as n as this season's harvest has been com- ted, it being planned to have a 25,000 house.

Lyiar, Ill.—The Illinois Farmers' Co- rative Ass'n has obtained a charter m Springfield authorizing it to conduct business with capital stock listed at ,000 to $250,000.

Dixon, Ill.—The Universal Oats Co. has chased the property of the Clipper Lawn wer Co. and will thereupon erect on it mills, giving the plant a capacity of 0 bbls. of food products daily.

Hanna City, Ill.—The new elevator for Hanna City Farmers Elevator Co. is ng pushed to completion very rapidly Staeser & Co. and machinery is now ng installed in the upper portion.

Green River, Ill.—The Green River Farm- Co-operative Grain Co has been cap- ized with a capital stock of $5,000. In- porators include Emil Holke, Geo. Hop- key, Julius Grymonprez, Chas. Betcher and John D. Mahlstedt.

Rapatee, Ill.—A farmers elevator company has been organized here with the assistance of Farm Adviser A. W. Miner. The company is to be capitalized at $30,000 and the first night's subscriptions totaled $18,000 while the last night $12,000 in cash was paid into the treasury.

Cuba, Ill.—A Farmers Company has been organized here and a 30,000-bus. concrete elevator was built. Due largely to the influence of the farm bureau with A. W. Miner, adviser, quite a number of farmer elevator companies have been organized in Fulton County the past year.

McLean, Ill.—The Farmers Co-operative Grain & Supply Co. incorporated a year ago at $30,000 with O. E. Travner president and Wm. Sage secretary and manager reports a $300,000 business last year and was enabled to declare a 10 per cent dividend in July. They report shortage of cars has interfered with taking care of all their customers.

Hermon, Ill.—The Hermon Farmers Co-operative Co. of Macon County has been incorporated under the laws of Illinois to deal in grain, seeds, cement, lumber, coal, lime, livestock and other farm products with a capital stock of $50,000. The incorporators are H. E. Roberts, Joseph T. Tucker, J. E. Brown, F. K. Janvrin and Fred B. Rogers.

Ottawa, Ill.—A 25-bbl. flour mill of what is known as the short system of milling will be installed here by D. E. and E. P. Daly and it is expected that it will be in operation within the next 30 days. The flour mill will be operated in connection with the regular grist and feed business which has been carried on by D. E. Daly for the past several years.

Heyworth, Ill.—The elevator of Harrison-Ward Grain Co. at this place was destroyed by fire recently with a property loss of $25,000. The elevator was filled with grain, 10,000 bus., of which 2,200 bus. were wheat, total grain valued at $17,000. It is thought that spontaneous combustion was responsible for the conflagration which spread throughout the structure very rapidly. The company owns elevators at Craig, Lane and Wapella, near Clinton.

INDIANA.

Syracuse, Ind.—The Syracuse Flouring Mills have been purchased by Columbus Disher who resides south of here. Consideration said to be $10,000.

Winchester, Ind.—Elevator managers in this vicinity have appealed to the state railroad commission for relief from shortage of cars.

Evansville, Ind.—John Dickman, who for the past four years has been head miller in the largest flour mill in Richmond, Va., is visiting his father, Henry Dickman, here with his family.

Fowler, Ind.—The Oxford Grain Co. has received bids for a new cement elevator and also a wooden building. The cement contract was approximately $35,000, and the wood building $20,000.

Kirkpatrick, Ind.—The elevator of the Kirkpatrick Grain Co. with 6,600 bus. of wheat, 9,000 bus. rye and 6,000 bus. oats, burned to the ground the night of Aug. 16. Loss estimated, $60,000, partly covered by insurance.

Indianapolis, Ind.—The Valier & Spies Mlg. Co. of St. Louis recently bought a tract of land at the northeast corner of South Oriental street and the Pennsylvania Ry. tracks for the purpose of erecting a warehouse thereon. The ground has a frontage of 110 ft., and a depth of 112 ft. Other than that the structure will be of brick the plans of the company have not been announced.

Evansville, Ind.—The Union Elevator at Spruce and Bismark Sts., having a capacity of 250,000 bus., has been purchased by A. Waller & Co. of Henderson, Ky., who for many years have had an extensive trade in the tri-state territory. Since the company's elevator at Henderson burned two years ago it has had no central location and the business of the company will now center around the elevator at this point. Whether or not the offices will be moved here has not been decided upon.

IOWA.

Clarion, Ia.—The elevator at Galt burned to the ground and also a tenant house.

Atlantic, Ia.—The grain elevator of Nelson & McCaustland in the Rock Island yards was damaged by fire last week when struck by lightning. Loss $2,000.

Ames, Ia.—The stockholders of the Farmers' Grain Co. here held a meetin-

TENNESSEE.

Columbia, Tenn.—W. Andrew Dale, president of the Columbia Mill & Elev. Co., and Jesse Ellington, secretary of the city mill and grain company, were in attendance at the convention of the Southeastern Millers Ass'n held at Nashville recently.

Memphis, Tenn.—The Chas. B. Carothers Co., Inc., has increased its capital stock from $20,000 to $40,000. The company, which buys and sells grain, has as incorporators Chas. B. Carothers, C. W. Hall, J. C. Griffith, R. N. Archer, G. T. Carothers and E. T. Carothers.

TEXAS.

Houston, Tex.—The American Mlg. Co. recently made announcement of the formal opening of its Independence Heights plant.

Dallas, Tex.—The Interstate Feed Co. has been incorporated with a capital stock of $10,000, incorporators being C. R. Garner, R. C. Ware and J. J. Bond.

Vernon, Tex.—The Kell Mlg. Co. is making improvements to its plant approximating $50.000. The plant will be closed while improvements are under way.

Waco, Tex.—E. C. Sparke, assistant traffic commissioner of the Chamber of Commerce, will handle the traffic and rate matters of the Clements Grain Co. of this city.

Ranger, Tex.—The wholesale grain and hay house of Richardson & Evans, two box cars of hay and a number of small shacks, were destroyed by fire entailing a loss of approximately $50,000.

VIRGINIA.

Orange, Va.—The Mercersburg Mlg. Co. has been incorporated, minimum capital being listed at $35,000, maximum $100,000. H. O. Lyne is president of the company.

WASHINGTON.

Medical Lake, Wash.—The Medical Lake Grain & Mlg. Co. is building a new elevator and will install a feed mill and dust collector.

W. L. PERKINS GRAIN CO.
Oklahoma City, Okla.
We are Buyers and Sellers in Car Lots of CORN, OATS, KAFFIR, MILO MAIZE, FETERITA, HAY AND FEED
WRITE OR WIRE US FOR PRICES

Pullman, Wash.—The Community Mlg. Co. has purchased the Pullman Flour Mill which has been idle for several years past and it is expected the mill will be in operation within a couple of months and will have a capacity of 100 bbls. daily.

Toledo, Wash.—Establishment of a flour mill at Toledo is under consideration according to Hugh E. Bran, president of the Toledo Community Club. This would take care of the wheat production of the Cowlitz Valley which is reported of excellent quality.

WISCONSIN.

Dorchester, Wis.—Paul Lotzer has sold his flour and feed business to J. A. Allar.

Bangor, Wis.—The Bangor Mlg. Co. has been incorporated with a capital stock of $40,000.

Hudson, Wis.—The Burkhardt Mlg. & Electric Power Co. will erect a new building for its central heating system.

Marion, Wis.—Harvey Luschen of this city is contemplating the erection of a $10,000 flour and feed mill, 36x43 ft., 2-stories high.

Montfort, Wis.—John C. Kramer, Jr., has purchased the feed mill and grain business of John H. Johnsen, who has operated the mill for the past 16 years.

Black Creek, Wis.—The Nichols Farmers Mlg. Co. has recently been incorporated with a capital of $28,500. The incorporators are A. L. Nichols, Bernard Olson, and Albert Klockzien.

Rhinelander, Wis.—The Northern Hay & Grain Co. has been incorporated by S. A. Dalson, E. W. Swedburg and O. C. Nelson to do a wholesale, retail and jobbing business in hay, grain and farm products. Capital stock $5,000.

Appleton, Wis.—More than 200 farmers of this county, members of four locals of the Equity Society, unanimously voted to incorporate the Outagamie Equity Exchange with a capital of $50,000 for the establishment of a co-operative warehouse and elevator.

Antigo, Wis.—The Langlade Wholesale Co. of this city has been organized to engage in the wholesale flour, feed, hay and grain business. The promoters of the new Company are Joseph Golberg, who operates a feed store at Rhinelander, Wis., and Harry Goldberg of this city.

Black River Falls, Wis.—The John F. Dunn Mill and elevator business has been incorporated under the name of the River-

Field Seeds

F. Mueller & Son has built a seed house at Calamus, Ia.

Arrangements are being made to issue bonds on Slope County, N. D., to buy and distribute seed to farmers.

The Minnesota Agricultural Extension Division of the University are urging farmers to lay by for their own use no less than 500,000 bus. of seed corn this fall.

The State Commissioner of Agriculture of Montana estimates that if the state buys the seed to be used by 20,000 farmers as contemplated $7,000,000 will be required.

Flax in South Dakota is reported generally good, but needs rain. In North Dakota late flax has been improved by recent rain, but grasshoppers have done considerable damage.

It is said that Germany has ready for shipment several cargoes of seed, particularly of the grass seeds and sugar beets. This information, however, can be taken with a grain of allowance.

A Minnesota seed firm writes C. A. King & Co. that Minnesota, Iowa and Wisconsin may not cut much of a figure in the clover seed, but it seems as though all the clover left for seed is filling well. Many farmers expect a yield of two bushels; acreage, however, is not very large.

The Van Dusen-Harrington report says that threshing of early flax has started in a small way in parts of Minnesota and South Dakota and that movement will probably be a little earlier this season than last. Samples of new flax received are of good quality. Late showers have improved the late flax.

Chicago Seed Market.

There was not much activity in the timothy market until Thursday. On Friday futures were considerably easier, but the cash seed held firm. However, on Saturday, due to the increase in offerings, the tone of the market was rather heavy, although prices did not change to any great extent. Country lots ranged in prices from $10.25@11.25 for fair to good quality.

The clover market was a dull and neglected one throughout the week, although at the end there seemed to be a firmer tone to the market. Range of prices of both timothy and clover follow:

Timothy—	Sept.	October.
Aug. 18	$13.65	$12.25B $12.50A
Aug. 19	.....	12.25B 12.50A
Aug. 20	13.75B	12.25B 12.50A
Aug. 21	13.60	12.25B 12.50A
Aug. 22	13.00	12.00B 12.50A
Aug. 23	13.25	12.00B 12.50A

Clover, contract prime—			
Aug. 18	$50.00	Aug. 21	$50.00
Aug. 19	50.00	Aug. 22	50 00
Aug. 20	50.00	Aug. 23	50.00

Toledo Seed Market.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Aug. 23:

	Rng. for wk. High.	Low.	Close Aug. 23.	Close Aug. 16.
Clover—				
Cash	$30.50	$30 00	$30.25	$30.00

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during the week ending Aug. 23, 1919, reporter to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts 1919.	1918.	Shipments. 1919.	1918.
Timothy, lbs.	1,588	30,000	72,052	10,250
Clover, lbs.	100,896	67,155	22,591	2,515

Kansas City Seed Market.

KANSAS CITY, Aug. 23.—A firm undertone characterized trade in all grass seeds this week. Belief in a short crop of alfalfa seed persisted, especially as far as Kansas is concerned. There are a few spots, one of which is Cottonwood Falls, in which the opportunity for seed saving will be good, but the need and the high prices of hay are strong inducements for the cutting of the third crop. Production in southwestern and western Kansas has been greatly curtailed by the grasshopper plague. Dealers report a good demand for old seed for fall sowing. They say that new seed offerings from New Mexico, Arizona and Texas, which usually come in first, will be light this year. Seed is quoted here, as from first hands, at $17@23 per cwt.

Blue Grass—Threshing and cleaning of the recent purchases of rough seed from Missouri is going on, with good results. Dealers are well supplied, and it is said that little unsold seed remains in the country. They have no doubt of a demand for all they may be able to offer, and expect prices to continue high. Rough seed is quoted at $10@14 per cwt.; cleaned, at $19@25. Jewell Mayes of the State Board of Agriculture says 450,000 bus. of seed in the rough was saved in Missouri a that 200,000 bus. went to waste.

Meadow Fescue—Holders of the li ited crop of meadow fescue or Engl bluegrass seed in eastern Kansas a western Missouri have been playi for fancy prices. It is said they ha not sold much thus far. Prices as hi as $34 per cwt. were bid recently houses in Kansas City, St. Joseph a Lawrence, but this level seemed to

imit, and now the market is quoted $25 to $34. Before the war there an export demand for this seed, this is supposed to be the present of strength. All seed raised this could be used at home in restoring crease given up to wheat last fall, it is doubtful whether farmers d pay the prices now asked.

mothy—Small new crop offerings eed are reported and Kansas City rs are buying at prices ranging $9.50@12.50 per cwt. The seed is not large, owing to a reduced ge and the big hay requirement. rs have fair supplies of old seed.

ver—Indefiniteness still surrounds production of clover seed in the hwest. Farmers have found hay profitable. The acreage of old was greatly reduced by drouth in and 1918, and this limits seed bilities, as new acreage is avail- only for pasturage and hay. No ast of prices has been made, and is no old seed to quote.

ne and Millet—Advices concerning rowing crops are favorable, on the e. There is some uneasiness over possibilities, but two weeks more mmunity would remove most of Millet is already out of danger. cane, kafir, milo and feterita crops all headed and beginning to ma- Crops in Texas are finished and have been sought.

Duluth Flaxseed Market.

LUTH, Aug. 23.—Market movements xseed have been contrariwise dur- he last week with the spot article vely strong, while the distant fu- sagged persistently. On Thurs- seed to go into store sold at 10 over the September future, and s notable that the spread between September and November futures widened out to 51 cents. Final s showed losses extending from 5 cents, the former in the cash arti-

shers were reported to be picking the seed offering, and it was inti- l that they were bearing the dis- utures with a view to establishing er price basis for the new seed it becomes available. Consider- speculative selling was also re- d, presumably on the theory that overnment inquiry into the costs ing would have an adverse market nce upon general commodities. s noted by operators that Minne- crushers received the great bulk e light movement of flaxseed dur- he week, and the returns showed they were ready to pay good pre- s for it.

m a trading standpoint, operators ot disposed to take any liberties e flaxseed market in view of the pointing crop outlook over the ry, and the probability that a ge of supplies will be acute for season's building trade. With a possibility that the domestic crop may not bulk up to more than 8,000,000 bushels this season, and the prospect of not more than 4,000,000 bushels being available from the Canadian Northwest, crushers realize that the supplies situation may be acute during the coming year. Some of the specialists predict that quotations will eventually be advanced materially from even their present record high levels.

Receipts were light on this market during the week, amounting to 56.4 bushels, and with several small lots shipped out, stocks in the elevators were left at 84,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track.....	$6.00	$6.05-6	$4.35
To arrive.....	5.95	6.05	4.35
September	5.90	6.00	4.35
October	5.53	5.72	4.27½
November	5 43	5.64	4.25
December	5.36	5.51	4.21½
May	5.28	5.50	....

Louisville, Ky., Seed Market.

LOUISVILLE, KY., Aug. 23.—The general seed situation is about the same, there being a more active demand for fall seeds, with rye seed especially active, and some demand for wheat as a result of much bad grain this year, that is not considered fit for seeding purposes. Bluegrass and orchard grass are moving very slowly due to high prices asked by farmers and the fact that cleaners and dealers are holding back, and not stocking.

Farmers are still asking around $1.75 a bushel for stripped bluegrass, with cleaners offering to buy at $1.50. Orchard grass is being quoted by farmers at prices ranging up to $3.50 a bushel, but cleaners are not anxious to take it even at $3.

SEED SITUATION.

CLOVER SEED CROP SHORT.

OHIO (1).—Conditions with us are very favorable for a corn crop; recent rains were a great help. Threshing is practically all done.

Clover crop very short. Medium is filling well, but is a very thin stand. No mammoth hulled as yet. Pasture very short.—*Raabe Brothers, Ft. Jennings, Ohio.*

Minneapolis Flax Seed Market.

MINNEAPOLIS, Aug. 25.—There was a sharp break in flax prices today on account of the decline in the futures and buyers were not so anxious to take offerings as they think the increased hedging indicates a heavier farm movement. Hedging increased sharply on Argentine reports of a big acreage in sight. On the extreme of the decline today to arrive offerings were light, but in the past week or so these trades have totaled as high as 20,000 bushels daily and the crushers have engaged considerable seed for nearby delivery. Minnesota shippers made the bulk of the sales. Premiums today were quoted at 3@5c over Duluth September price compared with 5@6c over prevailing Saturday. To arrive prices the same as spot.

Argentine Linseed.

The linseed market has been peculiarly jumpy. Rises and falls of two or three dollars in the course of as many hours have been quite ordinary occurrences. On July 24 there was a great fright. Sellers suddenly appeared from nowhere and there was a panic among the gentlemen who adorn the railings of the ring. There was as sudden a recovery, but the movement should have caused many "furiously to think." After all, there are many who are buying February linseed, or, rather, who have bought February linseed, at as high as $37, on the contention that there will be little linseed in February. These individuals completely forget that there is still time to sow linseed, and at these prices it would pay any grower to sell for that month's delivery and plant the seed now on the expectation of a half-crop. There is a fortune in it for the enterprising agriculturist. The average peace price of linseed is in the neighborhood of $13. Three times as much leaves a nice little profit. It is impossible to think that the world is to be almost entirely bereft of linseed in 1920, for there is no doubt that Canada and India will grow as much linseed as possible this year. The gambler on next year's linseed, therefore, is taking a big risk if he buys at present quotations. It seems to us that the chances are greatly in favor of the seller, if he can withstand for a time the great bullish tendency of the market.—*Times of Argentina.*

Clover Seed Crop and Supply.

Clover crop promises small, due chiefly to short acreage. Some has been pastured and some consumed by grasshoppers. Wisconsin has the best prospect. She frequently ranks second and sometimes leads. Indiana is usually the star producer. Ohio, Michigan, Idaho and Illinois are the only other important producers. They all expect a short crop this season. There is practically no old seed left to help fill the holes.—*C. A. King & Co., Toledo.*

The grain and provision list now stand on a peculiar ground. The early August break was a recognition of drastic labor uneasiness and the U. S. Federal move to control many costs. As a leading late August factor, the extent, the severity, of this profiteering and cost investigation stand uppermost.—*E. W. Wagner, Chicago.*

Detroit Seed Prices.

Closing prices on grass seeds at Detroit were as follows Aug. 23: Clover seed, cash, $30; October, $30.50; Timothy seed, $5.50.

Toledo Clover Seed Market.

Clover ruled rather firm last week. Trading though was not very heavy. It was especially light in October. March is getting to be the popular month, selling at times at 60c over December, and at a smaller premium at other times. Crop reports are more favorable; at least we have had some very good ones from Indiana, and those from Wisconsin are exceptionally favorable. Looks like Ohio won't have much of a crop, but the results of the yield in the western states will be the important factor.

Alsike was firm. There was a fair trade in the futures, but the buyers seemed more anxious than the sellers, in that they paid advanced prices to get what they wanted. Receipts have been much smaller than expected, considering the talk of a fair crop, many farmers, as well as shippers, have an idea alsike is going much higher, and are not selling.—*J. F. Zahm & Co.*

Toledo Timothy Market.

Timothy was quiet all last week. Liberal shipments from Toledo. Stocks continue large.

Ohio dealer writes that timothy yield is smaller than expected—about 3 to 5 bushels—color only fair. Iowa correspondent says lots of timothy is coming in, of pretty fair quality. Central Illinois reports small crop of fair quality timothy. Wisconsin seed firm, basing opinion on reports of farmers, predicts larger timothy crop there than was harvested last year.—*Southworth & Co.*

St. Louis Seed Market.

ST. LOUIS, MO., Aug. 23.—The seed market continues dull and nominally unchanged, as there are very few spot offerings, and futures are held at prices above the views of the buyers. New seed is not moving to any extent, and stocks of old seed are practically exhausted. Nominal quotations are as follows: Timothy, fair to choice, per 100 lbs., $11 to $12.50; clover, from $46 for choice, to as low as $25 for low-grade; red top, $13 to $14 for fair to choice; alfalfa, from $15 to $27.50, according to quality; millet, golden, $3 to $5, common, $2 to 3, Siberian, $2.50 to $2.60, per 100 lbs.

The total visible supply of barley at the primary markets, including lake and seaboard ports, as compiled by the Secretary of the Chicago Board of Trade for the week ending August 9, was 8,131,000 bus. compared to 1,108,000 the corresponding week of 1918.

UNITED FEED MANUFACTURERS' ASSOCIATION.

The United Feed Manufacturers' Ass'n is a new organization of feed manufacturers, most of whom are located at present in the Central-West, although there is nothing local in the personnel of the organization or in its objects and purposes. The official list following is guaranty of the high intent and character of the new Association. M. C. Peters of Omaha is president; J. W. Anderson of Kansas City, vice-president, and Chas. P. Woolverton of St. Joseph, Mo., secretary.

The following is a formal declaration of the principles and aims of the Association:

DECLARATION.

(A) To increase the use and distribution of all manufactured feeds made from pure, honest ingredients of high

M. C. PETERS, PRESIDENT,
United Feed Manufacturers' Assn.

and recognized feed value, provided they are manufactured both scientifically and economically.

(B) To discountenance and help suppress the discreditable use of inferior, worthless or deleterious materials sold as animal feeds, and to prevent misbranding.

(C) To promote honorable competition, to denounce methods unethical or in restraint of trade.

(D) By united effort and coöperation to assist in the enactment of laws for the protection of the public.

(E) Believing there is an almost unlimited field for the introduction of better feeding methods, we hope by united coöperation to educate the live stock feeders to the importance of correct feeding practices, the use of balanced rations, and the economy of manufactured feeds.

(F) To welcome to our ranks all manufacturers of meritorious feeds whose purposes are in the direction of improvement in feeds and feeding methods.

ALFALFA NEWS ITEMS.

Kittitas, Wash., reports light shipments of alfalfa. Price $26.25 per ton.

Mackintosh County, Okla., has made three cuttings of alfalfa, also good crops of grain sorghums.

Emmett, Ida., reports alfalfa moving very slowly; growers are asking from $20@24 in the stack.

In Nodaway County, Mo., two cuttings of alfalfa were made and with rains they may cut a third.

Reno County, Kans., has put up a crop of alfalfa and there is abundant feed to carry all cattle in sight.

Hermiston, Ore., reports alfalfa moving at $25 per ton with market steady. The third crop is nearly all bought up.

Alfalfa growers of Crowley, Kans., have already put up three crops. The first cutting made a yield of one and a half tons per acre, next two cuttings one ton each. Rains would give the county another crop this fall.

Alfalfa hay has recently taken quite a tumble in Denver, the loss during the first week of the month being about $7.50 per ton.

The hay crop of Chautauqua County, Kans., is said to be one of the best in several years. Alfalfa in the same county is also doing well.

The Montrose County (Colo.) Commissioners have declared a quarantine of 6,000 acres of alfalfa in the Spring Creek Mesa, alfalfa weevil having been covered. The effect of the quarantine is to impound all hay and straw in the affected area.

CLIMAX SUPERFINE BRAND.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

WE SELL TO DEALERS ONLY

CLIMAX SUPERFINE BRAND.

A Modest Profit.

The value of the mixed feed is no longer questioned except by some "agricultural advisers" who ought still to be in the abc class in feedings. Nevertheless dealers must bear in mind that education of their trade is still and for a long time will be a necessity. As long as grains continue on high levels the opportunity is open to push the lines of complete feeds which do the work without grain. For instance an Ohio Duroc swine breeder recently wrote Edw. J. Butler & Co. that he made a gain of 90 lbs. on two sacks of "Premium," which cost $7.20 and ... ted $10.60 profit, the ration being ... feed made as a slop with milk ... water. This feed barring some ... flour and alfalfa leaves was com... wholly of industry by-products. ... is real economy in the consumpti... whole grain as well as profitable ... ing.

Toppenish, Wash., reports al... moving fast, about 60 cars being ... during the past week. The outsi... mand is good, but conditions for h... ping unsatisfactory.

Beans and Potatoes

e peanut crop was reported fairly d and improving in Virginia and gia.

e *National Weather and Crop Bul-* reports beans in New York as ly benefited by recent rains. In lornia the bean crop continues to ove in the fog belt. In Michigan s improved materially during the .

e American Steel & Wire Co. re- on the bean situation says the promises to be fair to good in all producing sections. Reports from ar West indicate that most of the s produced last year are still in ers' hands there and are starting ve at higher prices.

e *National Weather and Crop Bul-* for the week ending Aug. 19 re- that potatoes in New England nue to look well. In Virginia potatoes are flourishing, as they ractically everywhere in the South, potatoes are reported fair only est Virginia, poor in the western ies but good elsewhere. In Ohio potatoes have been improved by as they have also in Wisconsin. linnesota potatoes are generally although there are some good In Colorado potatoes are now lifted. In Utah the weather is favorable to the late crop.

y C. F. Waugh of the Rocky tain Bean Jobbers' Ass'n, at Den- says considerable improvement is in the past ten days in Colorado er, also that light to moderate quite general in character were ted in New Mexico and the Texas ndle. In California there was less the usual amount of foggy weather e coast section, which was decid- detrimental to the growing bean which depends almost entirely for ure on the fog deposits. Michi- eports exceptionally light rainfall July 26; since then light rains occurred and the bean crop has tially improved and a good crop of eans may be expected, providing g happens between now and har- The new crop shipments are not ed in any considerable quantity the middle of October.

Beans of Lower California.

sul Smith, Ensenada, Lower Cali-, Mexico, under date July 7 says: commercial bean crop for export es in the northern section of California consists principally of dy Washington white beans. Ap- nately 2,000 acres have been d to this crop this year, being a 40 per cent reduction from the e for the year 1918. The reduc- f acreage is due to the export and other restrictions imposed e Mexican government, which nade the raising of this crop un- ble. This kind of beans is not ned by the Mexican people and is no market locally. The pres- rice of beans in California is sufficient to pay the export du- re and deliver them to the ware- at California points.

yield per acre for the 1919 crop es to be very light—about two of 110 pounds each to the acre. s about 50 per cent of the aver- ld for last year.

e are about 30 tons of last year's n the warehouses at Ensenada present time and no possible sale em. The present crop will not 150 tons, as against 300 tons ar. This entire crop will un- dly lie in storage for lack of a .. All beans raised in exportable ies in this locality are produced erican citizens.

Anthracnose Found in Ohio.

w disease known as potato an- se has been found in Ohio potato fields, the first report coming from Vermillion, Erie County. The potato districts in Wayne County have also been attacked. Botanists at the Ohio Experiment Station are now working on the outbreak to determine the extent and loss.

The disease is due to a fungus which in the early stages of infection may be recognized by brown dry tips and margins of the leaves and by a rotten condition of the stem at the ground, according to Miss Freda Detmers, assistant botanist at the Experiment Station. Such infection spreads through the plant and the entire vine becomes dry and brown and lies flat on the ground. The stalk is covered with minute coal-black specks which are thickly beset with minute black bristles.

The infection seems to be most severe on the early varieties, as Early Ohio, Early Rose and Early Six Weeks. When the potatoes are thus stunted the yield is reduced from 50 to 75 per cent.

The Experiment Station authorities at Wooster ask that farmers, potato growers and county agents send in samples of diseased potato plants so that the extent of the new disease may be located.

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise stated, as of Aug. 23:

Beans—

Boston—Limas, $9.50@10.

Buffalo—Marrows, $11@12; mediums, $8@9; pea beans, $8@9; wh. kidney, $11@12; red kidney, $11@12.

Chicago—Pea beans, hand picked, ch. to fancy, $8.75@9; fair to good, $8@8.50; brown Swedish, $5.50@7.50; red kidney, $11.50@12.

Cincinnati — Navies, $8.75; marrowfats, $12.50@12.75; red kidneys, $14; limas, $10.75; pintos, $7.50.

Detroit—H.-p. pea beans, $8.10.

Montreal—The market is steady and unchanged, cars of Ontario hand-picked being quoted at $5 to $5 25 and three pound pickers at $4.75. Quebec beans are quoted at $3.75 to $4.25, as to quality.—Trade Bulletin.

Minneapolis—Navies, $8; brown, $6; soya, $5; limas, $11.

New York—Calif. limas, $12@12.50; pinks, $7; ch. marrows, $11.50; fair, $10.50@11.25; ch. pea beans, $8 50; sma. wh. Calif., $8.75; red kidney, $13.50@14; wh. kidney, ch., $12.25@12.50.

St. Louis—Quote c. lts.—Ch. h.-p. Mich., $8.75; prime ma.-p., $8.50; orders and small lots higher; pinto beans, $7 per cwt. From store—Scotch peas, 8c per lb.; split peas, green, at 15c, and yellow at 9c per lb. Per cwt.: Calif. black eyes, $7; ch. limas, $13; Calif. pinks, $8; white, $8.50.—Market Reporter.

Potatoes—

Boston—N. J., $4; L. Is., $4.

Buffalo—L. I., $4@4.15; Jersey, 150-lb. sk., $6.50@6.75; Jersey long, $5@5.50.

Chicago—Market strong; Minn., Ohio skd., $2.70@2.80; Jer. Cobb., $3.75@3.90.

Cincinnati—Minn. early Ohio, $3.75; N. J. giants, $5.50 per 150-lb. sk.; early Ohio h.-g., bbl., $6.50@7.

Kansas City—Kaw Valley Cobb., $3.25@3.50; Ohios, $2.75@3.10; Minn. sand land, $3.25@3 50.

New York—New southern, bbl., No. 1, $3@5.50; Jer. rnd., 150-lb., $5@5.75; L. I., bbl., $6@6.50.

Los Angeles—Stockton Burbank, $3.25@3.40; wh.-red rose, $3.10@3.40.

Minneapolis—Field run, $3.75.

Montreal—Receipts for week ending Aug. 16, 58 bags, against 280 bags last year. Canadian potatoes quoted at $2 to $2.10 per bag last week should have read $2 70 to $2.80 per bag of 90 lbs. On the Bonsecours market yesterday sales of new Quebec whites were made at $2.50 to $2.60 per bag of 90 lbs. A more plentiful supply is expected next week.—Trade Bulletin.

Pittsburgh—East'n shore branded No. 1, $7.50 per bbl., c. lts., $7.25@7.50; N. J. Cobb., 150-lb. sk., $6.50; Giants, 150-lb. sk., $5.75@6; Md. Cobb., c. l., per bbl., $7.

St Louis—New, h.-g., bulk early Ohio, $3 25@3.50 per cwt.; Idaho rural, $3.85; Minn. rural, $3.50.—Market Reporter.

Feedstuffs

The American Steel & Wire report says that generally wild forage crops in various sections of the country are in need of rain. They range from fair to good, condition reflected in the varying sectons by good returns. In Kansas and Oklahoma the grain sorghums promise a crop of good to extra good.

Spokane reports strong demand for feeds from Montana. Local mills are operating anad plenty of wheat is available. Seattle reports more mill feeds available but the amount is short for the demand. Lewistown, Ida., reports demand exceeding the supply. Great Falls reports that that section is still dependent on Washington for mill feeds, but that prices are showing some slight decline.

New freight rates are now in operation from sources of supply to Montana, Wyoming and western North Dakota. Half-rate tariffs prevail on alfalfa meal and feed, mill feeds, barley and other grains, the cake meals, also on grain sorghums, straw and sugar feeds. These rates are on the C., M. & S. P., G. N., C., B. & Q., O. S. L., N. P., C. & N. W. Transit rates also prevail on cattle eastward.

London Oilcake Report.

The cake trade has not developed any new features, but continues in a waiting attitude, the situation being most critical, with the much higher prices ruling in foreign countries and the determination here to keep prices down to as low a level as possible. With this object in view, a new Control Order came into force from Aug. 1st.

All linseed cakes offered are readily absorbed, and unfortunately no cakes are going into stock to be held for the winter deliveries, the forecast for this period looks most alarming with regard to supplies and deliveries. Foreign makes can only be bought at much higher prices than those ruling here, business is therefore most difficult to bring about. Cotton cakes are most sparingly offered, and those obtainable are mostly from Bombay seed, at £19 10s. per ton, and supplies will continue short until the seed arrives and is available.—*London Grain & Seed Reporter.*

Cottonseed Buyers Hold Off.

KANSAS CITY, Aug. 23.—Mills at scattered points in Texas and Arkansas have begun offering cottonseed cake and meal of the new crop for immediate shipment. Offers made in Kansas City were around $74@75 a ton for 43 per cent protein cake, basis Texas common points, with Little Rock and Memphis on a much higher scale. So far as could be learned, no sales were made, buyers holding off in the hope that the market would recede. Some inquiry for cake was reported from drouth-stricken areas of the Northwest. Buyers called attention to the fact that Texas and Oklahoma have a large roughage crop, which will increase the available supply of cake and meal for market.

Cottonseed Products.

A preliminary report of the United States Bureau of the Census gives the quantity of cotton seed received at American mills during the 12 months from Aug. 1, 1918, to July 31, 1919, as 4,450,189 tons, contrasted with 4,260,290 tons during the previous year. This does not include 40,438 tons and 31,828 tons on hand on Aug. 1, nor 146,271 tons and 208,358 tons reshipped or burned for 1919 and 1918, respectively. There were 4,466,028 tons of seed crushed during 1919, against 4,251,680 tons during 1918, and 24,599 tons on hand on July 31, 1919, against 40,438 tons on the corresponding date of 1918.

Cottonseed products manufactured, shipped out and on hand were as follows:

Item.	Year.	Produced, Aug. 1 to July 31.	On hand July 31.
Crude oil, lbs.	1919	1,320,249,788	[1]25,681,260
	1918	1,312,471,125	16,503,655
Refined oil	1919	[1]1,158,864,979	[1]146,719,782
	1918	1,188,213,854	265,875,255
Cake and meal, tons			
	1919	2,158,888	45,975
	1918	2,067,977	28,751
Hulls	1919	1,123,879	120,312
	1918	996,065	60,425

[1]Produced from 1,296,420,913 pounds of crude oil.

During the year ending July 31, 1919, there were imported into the United States 19,057,236 pounds of cottonseed oil, as compared with 16,967,737 pounds during the previous year. Exports of cottonseed products consisted of 174,769,424 pounds of oil, against 109,437,949 pounds; 169,791 tons of cake and meal, against 19,051 tons; and 71,534 running bales of linters, against 187,704 bales.

Ground Feed Stocks.

The Bureau of Markets under date of Aug. 23 has the following as regards ground feed stocks throughout various sections of the country:

CENTRAL. — Terre Haute — Prices steady, dmd. less active, considerable wheat being fed. Hopkinsville, Ky.—Bran $35, middlings $60. Lexington, Ky.—Bran $54, middlings $64.

EASTERN.—Scranton, Pa.—Dmd. lgt., sup. norm. Concentrates such as linseed, c. s., etc., dmd. gd. St. Albans, Vt.—36% c. s. meal Oct. $79.25, Nov. $79.25, wh. fds. dmd. gd., bran $47.75 per cwt., middlings $61 per cwt.; corn gluten Aug. shpt. from N. J. skd. $82.47; dairy fd. 22% protein $70.25. Clarksburg.—Spg. bran $47, std. middlings $59, reddog $71. Norfolk—Std. middlings $59.50, bran $47. Washington, D. C.—Prices firm, dmd. fair, bran $47.25, middlings $60.

SOUTHERN.—Atlanta—Dmd. mill fds. quiet although prices easier on hard winter wh. bran and middlings. Spg. wh. fds. vy. stg. Dealers well supplied. Sup. c. s. and peanut fds. scarce except c. s. hulls. Old crop c. s. meal $71 for 36% f. o. b. Georgia rate points, 36% protein peanut meal $72, hulls $8@9 in bulk; 20% c. s. fd. $58; std. spg. wh. middlings $63.50, bran $50, hard winter wh. bran $46@47. Savannah—Dmd. lgt. for bran and middlings, bran $52, middlings $60, c. s. fd. 20% immediate shpt. $60. Mobile—Bran $44, middlings $48@50, brown shorts $50@52, c. s. fd. meal $61, 7% c. s. meal $78.50, 30% peanut meal $60, 20% c. s. fd. $61. Wilmington—Bran $51@54, middlings $62.50@64. Tampa—Bran $49, middlings $66, brown shorts $63, 30% peanut meal $70.75, 7% c. s. meal $74.10, 20% c. s. fd. $62.50. Pensacola—Bran $45, brown shorts $55. Miami—Bran $54, shorts $70. Jacksonville—Stg. dmd. middlings and gd. for bran. Bran $46, 30% peanut meal $63, 7% c. s. meal $72.60. Vicksburg—Bran $43, brown shorts $62.

FEED MARKETS.

LOUISVILLE, KY.

Louisville, Ky., Aug. 23—Ground feeds of all kinds are in good demand. Millfeed is very active, while offerings are more liberal as Southern mills are beginning to catch up on back orders and have more feed to dispose of. Mills are running full. Quotations are: Bran, $45 per ton, sacked and packed, Louisville; mixed feed, $65; brown middlings, $60; gray, $62; hominy feed, $82.

CHICAGO.

Chicago, Aug. 23.—Bran is in better supply and consequently is about $1 lower than previous week, quotable $43. Middlings are scarce and higher in price, quotable at $57. Cottonseed meal is firm and unchanged with only old crop moving. It will be about 45 days before new starts to move. Linseed meal firm unchanged.

PHILADELPHIA.

Philadelphia, Aug. 23.—Feedstuffs firm under a fair demand and light lings. Quotations are for carlots in 1 sacks to arrive at cost per ton: W bran, $47@48; spring bran, $46@47; s ard wheat middlings, $62@63; flour dlings, $68@68.50; red dog, $73@74; sl $62@63; low grade flour, $74@75.50; middlings, $60@61; fine yellow ho 81½@82; fine white hominy, $82@ reground oats feed, $31.50@32.50; cc seed meal, 36% protein, $79@80; cc seed meal, 41% protein, $85@86; cc seed feed, 20% protein, $59@60.

NEW YORK.

New York, Aug. 23.—The feed m during the week was in a waiting po with buyers and sellers apart. Offers a trifle larger early in the week and slight concessions were made, but, o whole, quotations were well maint and mills were very slow about red their price levels. City bran was q at $48.00, middlings, $58.00, and red $69.00, while Western spring bran $47.50 to $48.00, middlings, $59.50 to $ and red dog, $73 to $74.

DULUTH.

Duluth, Aug. 23.—Apart from an vance of $10 a ton in rye feeds quot in the feeds market here closed uncha Demand and sales were both small the mills having limited supplies on to offer. Dealers are buying for pr use only as further readjustments in ket levels are feared. Prices per to low: Bran, $43.50; ground oats, $57.25 l ground feed, $64.50; No. 2, $61.25; $57.75; shorts, $54; red dog, $66; B mixed, $57; cracked corn, $71; rye $50; flour middlings, $62.50.

NEW ORLEANS, LA.

New Orleans, La., August 23.—Ow the strike and labor troubles with Kansas mills, offerings of bran have rather restricted. Quotations from West have been at $2.20 per hundred livered. Rumor has it that some br have had prices on hard wheat bra $2.15 per hundred, delivered New Or and were willing to take bids at Some dealers have been willing to $2.10, but whether this price has bee cepted by mills is the question. B shorts offered at $2.80 and gray at

vered. Offerings are scant and the de-nd, too, is poor.

PITTSBURGH.

ittsburgh, Aug. 23.—Feed is high and ipts, while better than they have been some time, are insufficient to meet demand for good grades of feed. Red is quoted at $72 and the supply is t. Bran is plentiful, due to the ar-l of recent shipments, and is quoted nd $45 a ton. The best demand is good middlings of which the supply is fair. Lower prices are expected on tember feeds, although mills are now ering considerably owing to lack of acity. No regular quotations have been blished as yet, on account of numer-local conditions which affect the mar-over short periods.

NASHVILLE.

ashville, Tenn., Aug. 25.—Demand is active for wheat bran and middlings, mills have output sold for several ks ahead, and offerings are light. er ground feeds are in fair demand. tations: Wheat bran, 100 lb. bags, per $45.20; middlings or shorts, $61.20; e and mule feed, $48@61; dairy feed, 68; hog feed, $68; poultry feed, $75@

MILWAUKEE.

ilwaukee, Wis., Aug. 23.—The local feed market is holding steady to last k's prices with but moderate offerings. and for prompt shipments continue with the uncertainties of the mar-having a tendency to hold off orders future shipments. There is an excel-demand for middlings which is ruling per ton higher. Current quotations Bran, per ton, $52.50@43; standard llings, $56@56.50; flour middlings, $61; dog, $65@66; hominy feed, $78; rye , $53; old-process oil meal, $90@91; nseed meal, $86@93; brewers' dried ns, $60; all in 100-lb. sacks.

BALTIMORE.

ltimore, August 23.—Feed prices are rded as abnormally high and their atenance at present levels depends ly upon the outcome of the corn crop. demand is rather reserved, buyers ating for near or actual wants only. le prices on spot are steady, the trade s no disposition to anticipate wants. ations follow: Western spring bran, ton, in 100-lb. sacks, $48@49; Western llings, per ton, in 100-lb. sacks, $59@ ity Mills' winter wheat bran, per ton, 0-lb. sacks, $60; brown middlings, per in 100-lb. sacks, $60; white middlings, ton, in 80-lb. sacks, $70.

DES MOINES, IOWA.

s Moines, Aug. 23.—Offerings of oil- and cottonseed meal are about the as last week. There is only a lim-demand at the present high prices. eed prices are ruling same as last , about $1@2 lower. We look for in-ed offerings of wheat feeds and be-markets will work somewhat lower next thirty days. Tankage and mixed are still offered in large enough quan-to supply the demand. Prices un-ged.

TAMPA, FLA.

mpa, Fla., Aug. 22.—There is prac-y no demand for millfeeds in this mar-except for quick shipment, and offer-from mills to book for September ices around $64 for gray shorts are ing no consideration. The local deal-elieve that prices will be lower on eds in September, while many of the mills advise that they are having demand for early September millfed ome demand for last-half September. her words, our dealers are buying carefully and cannot see how prices illfeeds can go higher under present tions. There is practically no demand an at the prevailing price of $48 Red s not receiving much demand at $70 on. No. 1 alfalfa meal is offered at ew bags, September shipment. Some have been quoted on new crop cot-d meal for September shipment, but uyers are not much interested at close to $75 per ton, delivered Tampa per cent ammonia meal.

ST. LOUIS.

Louis, Mo., Aug. 23—Wheat feed is in emand and spot feed is about steady, erings are light, but offerings of fu-are increasing and on these the feel-s easier. Other kinds of feeds are , and held at stiff prices, with quota-mostly nominal. Prices are as fol-bran, $40 to $43, shorts, $57.75 for t, down to as low as $55 for futures; feed, $49 to $53 for spot to as low for futures; white hominy feed, $73@ t feed, $25@27; alfalfa meal, No. 1, @40; No. 2, $34.50@36 per ton.

MINNEAPOLIS.

neapolis, Aug. 25.—The demand for ed is fair to good and offerings for lelivery are very light. For that rea-firmer tone developed in the market the past few days For some time okers were getting fairly liberal de-s on contracts and offered this stuff e trade at lower than mill prices. s had the bulk of their output sold e month of August and consequently t have much fresh stuff to sell. They or $1@3 per ton over brokers' prices lemand for deferred feed is fairly but bids are several dollars under uotations Shipments are good, but of the millers are behind in filling ontracts Quotations in car lots, f. o. inneapolis, in 100-lb. sacks: Bran, 2; standard middlings, $54@55; flour ngs, $60@61; red dog, $66@67; rye ngs $54@55; ground barley, $61@63.

Alfalfa Department

Light Demand for Alfalfa Meal.

KANSAS CITY, Aug. 23.—Less interest was manifest in the alfalfa meal trade in Kansas City this week. Buyers balked at the higher range of prices prevailing, and bids were $3@4 a ton out of line in numerous instances. Millers and jobbers were forced to advance quotations as much as $2 a ton, owing to the sharp rise in alfalfa hay prices during the week. Many mixers are filled up for current requirements, and, naturally, are not eager to make sales at present prices, generally expecting lower quotations soon. Offerings were light.

Choice alfalfa meal, which was scarce, closed at a range of $39@40; No. 1, $36.50@38; No. 2, $33@35; brown, $31@33. No. 2 meal displayed the strongest tone, owing to sharp advance in hay of that quality.

Inquiry for alfalfa mixed feed continued fair to good, with a moderate volume of sales for this period of the year. Feeders of hogs are using an enormous volume of mixed feed, desiring to fatten their hogs to maturity as soon as possible in order to share present prices. Scattered shipments were made to the East. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $48@60.

Alfalfa Prices.

The Bureau of Markets reporting under date of Aug. 23, has the following as regards alfalfa prices:

SOUTHERN.—No. 1 alf. $36.50, market fairly active, supplies heavy as dealers have anticipated requirements for some time to come. Best prices from Kansas City. 31 cars of No. 2 alf. and 10 cars of std. inspected during week. Mobile—Alf. available at $33 for shpt. Ch. alf. $36. Pensacola—Ch. alf. $34, No. 1 $33.50. Jacksonville—Ch. alf. $37, No. 1 alf. $34. Vicksburg—Ch. alf. $33, rcts. lgt., dmd. fr., stks. lge., bulk arrivals from Kans. City.

THE ALFALFA SITUATION.

NEBRASKA ALFALFA.

NEBRASKA (6).—Two cuttings of alfalfa are in the stack and the third soon will be. Scarcity of men and teams, especially the latter, and unheard of prices for labor, are retarding milling operations. A number of mills in the state are hoping to make a start by Sept. 1st.

The drouth in the Northwest has affected the price of alfalfa. Train loads of half grown stock going east are frequently seen. The growers of alfalfa are not quite ready to sell.—*E. J. Woolworth, Gibbon, Nebr.*

ALFALFA SEED CROP LIGHT.

PHOENIX, ARIZONA.—It is very quiet with us in the seed business at the present time, due to the fact that our alfalfa seed crop is the lightest we have had in years. There will probably be about 15 cars of seed in this state this year, where we used to have from 50 to 100 cars a year.

Farmers have received as high as 2¼c per pound for recleaned seed.—*Phoenix Seed & Feed Co., Phoenix, Ariz.*

New Feed Plant at Denver.

The Great Western Alfalfa Milling Co. has announced the completion of its large, modern mixed feed plant at Denver, the only mixed feed plant in the Rocky Mountain region. This firm will manufacture a full line of alfalfa molasses grain mixed feeds for live stock and poultry and will no doubt do a big business from the start. The following products will be used in the manufacture of the various feeds: Corn, oats, barley, wheat, wheat bran, shorts, gluten feed, cottonseed meal, peanut meal, velvet bean meal, grain screenings, rice bran, kafir corn, milo maize, millet, sunflower seed, cane molasses, beet molasses, dried beet pulp, powdered buttermilk, semi-solid buttermilk, packing-house products.

Novel Advertising Stunt.

The Denver Alfalfa Milling & Products Co., Lamar, Colo., has adopted a neat and clever manner to reach and interest the big men in the mixed feed manufacturing industry and has sent out under first-class mail a "Kilty Special" golf ball imbedded in a small bag of alfalfa, using the slogan, "Keep your eye on the ball and follow through." Mr. Wilson's idea was, just as the golf player likes to "get on the green" with his golf ball, so also does the alfalfa miller like to "get on the green" with his meal. The little ball will no doubt be greatly appreciated by all recipients and be a reminder of the quality alfalfa meal turned out by this progressive firm.

In Montana the second cutting of alfalfa has been made and the third growth is doing well in various localities, being cut in some of the southern counties.

In Idaho the second cutting of alfalfa has been stacked in fine condition. In Washington the crop is doing well where irrigated.

Hay Department

Great Falls, Mont., reports very little hay moving. Prices, however, have advanced $1 per ton.

In the dry sections of Montana recent rains and reduced feed rates have improved the situation.

Hillsboro, Ore., reports wheat and oat hay as well as grain now moving to Portland, timothy hay bringing $24.

Seattle reports considerable hay sold on the exchange for future delivery at $28 per ton, but present demand is slow.

St. Ignatius, Mont., reports considerable hay raised in the irrigated sections, but the dry farms are without feed.

Thayer County, Neb., is said to have a greater amount of hay and forage this year than last, and also abundant straw.

A number of points in the North Pacific division report an easing off of demand and prices of hay during the past three weeks.

The third cutting of alfalfa hay in Holt County, Neb., is now in the stack and the wild hay is rather better than the average.

In the neighborhood of Mackey, Ida., hay this year produced about 50 per cent only of a crop where there was no irrigation.

Jerome, Ida., reports hay selling at $18@20 in the stack or windrow and about 10,000 tons have already been contracted for in the county.

Spokane reports inquiry for hay very slow at the present time, owing to uncertainty at the present time as to the future. Prices for both timothy and alfalfa have fallen off about 50c per ton.

It is said that hay buyers have taken most of the hay in the neighborhood of Mountain Home, Ida., and cattlemen are shipping stock. Sheepmen are also preparing to get out of the country with their sheep. It is estimated that fully 50 per cent of the hay locally grown has already been sold at approximately $15.50 per ton.

Toberman, Mackey & Co., St. Louis, think the country is going to see higher hay values and a good market for some time to come, except that low grades of hay are not likely to be good property.

A stockman from Lena, Neb., says the hay crop thereabouts is so heavy the farmers are unable to get help to save it all. The stockmen have hay enough for winter use and pasture and can hold cattle until late fall if necessary.

The Oregon Public Service Commission has directed the Spokane, Portland & Seattle Ry. to establish hay inspection tracks at the Portland terminal. It will be under the direction of the grain department of the commission.

A cattleman from Lawrence County, Mo., says orchard grass is very successful this year and he regards it as one of the valuable farm crops of that part of the country. It does not suffer from drought nor does it winter kill.

The hay harvest in Thurston County, Wash., is about ended. Many pieces of clover and vetch made a heavy crop. On the whole the total crop is good and was secured without rain and is of excellent quality. Pastures, however, are drying up.

The Northwestern Hay & Grain Co. has been incorporated at Rhinelander, Wis., by Oscar Nelson, E. W. Swedberg and Samuel Dalson. For the present they will deal entirely in hay in carlots, also grain receiving consignments from farmers for delivery to consumers. The secretary and treasurer of the company is Samuel Dalson, who with Vice-president Swedberg are the present managers of the company.

A stockman from Caldwell, Ida., says there is hay enough in that part of the country to winter all cattle the stockmen care to keep, but cattlemen are buying hay only when compelled to do so, as prices are almost prohibitive. The stockman referred to thinks hay is going to be cheaper later in the season, as a good many cattlemen are shipping stock rather than buying hay at present prices, some of the cattle going into Nebraska pastures.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

"An acute shortage of cars in the producing areas contributing to the Kansas City supply of hay is doubtless the principal influence in the present strong tone of the trade," declared Dan Tilson, head of Dyer & Co. "The outgoing movement of hay from this market is not being restricted to any extent, but numerous complaints of a serious character are coming from the interior. Farmers have gathered comparatively large crops of hay this season and are generally eager to dispose of their surplus stocks at current prices. Because of the difficulty in obtainng cars, the desire to market hay in the country increases among the producers, owing to the nervousness over the inability of carriers to meet all requirements. Unless the car situation is relieved, and this is doubtful owing to the approach of the corn moving period and heavy wheat and oats shipments, the hay market will continue to display a strong tone. The Northwest is not yet an important factor in the buying, but it is probable the needs of the graziers in the drouth-stricken sections will increase late in the fall and winter."

"Our representatives in Kansas report the largest supplies of hay on record," declared J. C. Kerr of the J. C. Kerr Hay Company. "Prairie and alfalfa particularly are abundant in the districts thus far investigated. Railroads are busy loading wheat and other grain, and, having suffered a setback by the recent strike of shopmen, are unable to supply more than a small percentage of the cars desired by hay shippers. Consequently, the accumulations of hay in the country are large, and it is probable that an easier situation as regards the car supply would witness a heavy movement to market. Timothy is abundant in Iowa, but the color of the hay is not as desired. The recent break in prices for timothy at Chicago from the high point tends to stimulate the movement from that state to the Kansas City market."

"So far as a comparison of values is concerned, the market for hay is on a normal price basis," declared J. C. Glover of J. C. Glover & Co. "Choice alfalfa is bringing around $30 a ton, while for a similar grade of prairie hay prices range from $20@21 a ton. difference of $9 to $10 a ton, or a mium of this amount for alfalfa the wild hay, is on a parity with difference in feeding value of the varieties of forage. Timothy now mands a premium of $5@6 a ton prairie, also a normal difference. present position of prices for the ous classes of hay indicate the fact no unusual shortage or surplus prev in any variety. In this connectio is interesting to recall the period in the old crop year when prairie bringing a top of $43 a ton and alf at the same time was selling at a of $30. There was an extreme sh age of prairie at the time, and the t knew that immediately after offer of new prairie became liberal, the m ket would suffer a break of 50 per ce

Kansas City's importance as a market has attracted another large here. Announcement is made that McCune-Moore Co. will establish an fice in Kansas City, in addition to present headquarters at Omaha. cording to C. P. Martin, who resig as head of the hay and feeding rep ing service of the Bureau of Market the United States Department of A culture in Kansas City to become p dent of the McCune-Moore Co., Kansas City office will eventually come the most important of the ganization. Associated with Mr. Ma will be H. H. Hovey, who also has signed from the hay and feed repor service. Mr. Hovey will have ch of the Kansas City office of the McC Moore Company. Incidental to the tablishment of the Kansas City application has been made for mem ship in the Kansas City Hay Dea Association. Both Mr. Martin and Hovey are widely known in the trade of the Southwest, and over country as a whole. Mr. Martin been identified with the forage indu since 1905. The company will carr a general receiving and shipping ness.

Severe drouth conditions prevai many sections of the Southwest, ticularly in Kansas and Oklaho "The eastern half of Kansas and s of the south-central and southwes counties were favored with ligh moderately heavy local rains, but amount that fell was inadequate for present needs," said the we

Hay Stocks.

The bureau of Markets under date of Aug. 23 has the following as regards hay stocks throughout the country:

CENTRAL.—Terre Haute—Offerings in excess of dmd., market unchanged, No. 1 tim. $31.50, No. 2 $30.50, No. 1 clov. mxd. $30. Hopkinsville, Ky.—No. 1 tim. $35, No. 2 $34, No. 1 clov. mxd. $30. Lexington, Ky.—No. 1 tim. $37@38, No. 1 clov. mxd. $37@38.

EASTERN.—Scranton, Pa.—Dmd. gd., no rcts. Clarksburg, W. Va.—Dmd. improving, shpts. lgt. owing to car shortage. Washington, D. C.—Lgt. stks. and rcts. cause firm prices, dmd. norm. No. 1 tim. $36, No. 2 $33.50, No. 1 lgt. clov. mxd. $35.

SOUTHERN.—Atlanta—No. 1 tim. $36@37, No. 2 $34, No. 1 lgt. clov. mxd. $36@37 but few interested at that price; Ky. shippers offering straight clover, $30 del. Savannah—Market easier, freer offerings No. 1 tim. $36, No. 2 $34.50, No. 1 lgt. mxd. $34, No. 1 John. gr. $27. Mobile—Market dull, John. gr.-prairie hay offered $23.50@24.50, No. 1 tim. $31.50@32, No. 2 $29, No. 1 lgt. mxd. $30, No. 1 clov. $30. Wilmington—No. 1 tim. $34@37.50, market practically bare. Tampa—No. 1 tim. $38@41.50, No. 1 lgt. mxd. $41.50, No. 1 lgt. mxd. $41. Pensacola—No. 1 tim. $32, dmd. fr. Miami—No. 1 tim. $44.50. Jacksonville—No. 1 clov. mxd. $33, No. 1 tim. $35, No. 2 $33@33.50, No. 1 lgt. mxd. $34, dmd. lgt. for tim. Vicksburg—No. 1 tim. $32, stks. lge., dmd. fr.

$38 a month ago, but today it is bringing around $32 to $34 per ton in carlords. Farmers are not disposed to sell at these prices, and it looks like they will hold for higher prices again this winter. Much agitation is going the rounds as to lower prices for everything, but unless we get lower prices on grain and feeds, there cannot be lower prices on bread, milk and meats, the principal foods of the people.—*Bedford Milling Co., Bedford, Ohio.*

MORE HAY THAN A YEAR AGO.

NEW YORK (2).—There is about the same amount of hay for sale here this fall as last; that is, good hay cut in right season. There is also about 25 per cent of ripe hay in addition to the good hay, making a crop larger for sale here this year than last. The late-cut hay will have to be put on the market next winter. Hay is worth here at present $20@23 per ton to the farmer. It looks like dangerous business for the dealer this year.—*W. H. Burt, Belfast, N. Y.*

TENNESSEE HAY CROP.

CHATTANOOGA, TENN.—We have a pretty good crop of hay around here and the surrounding country, between Chattanooga and Knoxville, principally up and down the Tennessee River. We believe that we have a better crop of medium quality of hay than we had last year and there were quite a good many cowpeas and soy beans sowed for hay purposes that will increase the crop sum, if they have luck in saving this kind of hay, which is very uncertain.—*Chattanooga Feed Co., Chattanooga, Tenn.*

Hay Markets

JERSEY CITY.

Jersey City, N. J., Aug. 19.—The hay market for the past week has shown a weaker tendency. Prices have declined on all grades, and the situation looks like lower prices, especially on lower grades. Receipts have not been heavy and the trade has held off. The removal of the embargo at 33d St. has had a natural effect on the buyers. An increase in invoices for the past few days has influenced the buyers to hold off.

Information we are receiving from our shippers in Michigan and New York State report a large crop, and all are anxious to ship. We think the farmers are holding their hay too high—from $20 to $25 in barn, loose. Almost all the hay now arriving is new, and has been bringing good prices on account of light receipts, but, at present writing receipts are getting heavier, which will mean lower prices in the near future.

We are advising our shippers to go very slow in paying big prices for loose hay as we do not think our market will warrant the same.

We beg to quote our market Aug 18 as follows:

Large Bales—No. 1, $43 to $45; No. 2, $41 to $42; No. 3, $38 to $39.

Small Bales—No. 1, $40 to $41; No. 2, $38 to $39; No. 3, $31 to $32.

LOUISVILLE, KY.

Aug. 23.—Hay prices are several dollars over quotations of last week due to fair demand, short stocks, and short offerings and deliveries of farmers. Transportation facilities are bad and movements slow. Quotations are: Baled, carlots, No. 1 timothy, $35.50; No. 2, $34; No. 1 clover mixed, $32; No. 1 alfalfa, $32.

DULUTH.

Aug. 23.—A good healthy hay market prevailed here during the last week. The better grades were in active demand but the off-grade stuff was draggy. So far the hay offering has been of exceptionally fine quality on the average, the season having been favorable in the district for the curing of the crop. Prices are firm and unchanged as follows, per ton: Timothy—No. 1, $27@28; No. 2, $24@26. Mixed timothy—No. 1, $25@26; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $19@20; No. 2, $14@16. Straw—Rye, $9@10; oat, $9@10.

DETROIT.

Aug. 23.—Offerings of hay in this market are increasing, but there is still more than enough demand to absorb all offerings and the market is quoted firm. Quote: No. 1 timothy, $31.50@32; standard and light mixed, $30@31; No. 2 timothy, $29@30; No. 3 timothy, $25@26; No. 1 clover, $25@26 per ton.

NEW ORLEANS, LA.

Aug. 23.—Offerings of hay from the West on No. 1 range from $34@35, No. 2 from $33@34, and No. 3 from $32@33. Receivers here, on account of stocks and demurrage charges staring them in the face, are willing to cut these prices from one to two dollars per ton.

BUFFALO.

Aug. 23.—The tendency is downward owing to a disposition to sell. No. 1 timothy was offered at $24, No. 2, $23, and No. 3, $20@21, on track. There has been no speculation in hay so far and will be none until the market settles down to what is considered a reasonable price.

MILWAUKEE.

Aug. 23.—After several weeks of continuous price soaring which seemed to have reached its apex last week the local hay market experienced a general price lowering. New crops which have been good are reaching the market with a fair demand. Choice timothy showed a drop of $1@2 while No. 1 showed a lowering of $1@1.50. Current quotations are: Choice timothy, $33@35; No. 1, $32@32.50; No. 2, $30@31; No. 1 clover, $20@23; light clover mixed, $28@30; red top and timothy mixed, $28@30; marsh feeding, $16@18; packing, $11.50@12; rye straw, $10.50@11; oat straw, $9@10.

NASHVILLE.

Aug. 25.—There is fair demand for hay in the local market. Quotations: No. 1 timothy, $38; No. 2 timothy, $36; No. 1 clover, $35; No. 2 clover, $33; No. 1 alfalfa, $36. Receipts of hay at Nashville last week were 27 cars.

PITTSBURGH, PA.

Aug. 23.—Prices in the local hay market are working lower as a result of limited demand and an excess of arrivals in the market. Prices have been reduced but even this has not had the effect of stimulating the buying. Most of the trade is taking only what is absolutely necessary

for immediate needs. Receipts amounted in the last period to 1,020 tons as compared with 838 tons for the same period the year previous. No. 1 timothy is selling at $34@35 a ton; No. 2 timothy at $31@32; No. 1 light mixed, $31@32; new No. 1 clover mixed, $30@31.

CINCINNATI.

Aug. 26.—A feature of the hay market here the past week has been a combination of steadily advancing prices and sluggish condition of demand. The limited buying was almost wholly local in character with practically no shipping outlet, but the unusually light movement influenced the firmness of tone, and prevented a depressing effect that enlarged receipts would undoubtedly have caused. The situation though was indicative of improvement at the close of the week as stack hay on Western farms with which Southern consumers were supplied in competition with this market, was reported as about cleaned up, and that inquiries from the South would increase from now on. Timothy advanced $2.25 as compared with last week, and mixed $1 per ton, while clover remained firm and scarce at $1 higher. Straws of all kinds were also stronger and higher. No. 1 timothy, $35.50@36.25; standard timothy, $35@35.50; No. 2 timothy, $34@35; No. 3 timothy, $30@33; threshed timothy, $20@25; light clover mixed, $33@34; No. 1 clover mixed, $32@33; No. 2 clover mixed $30.50@31.50; No. 1 clover, $32@33; No. 2 clover $30.50@31.50; No. 1 local alfalfa, $32@33; wheat straw, $10@11; rye straw, $12@13; oats straw, $10@11.

BALTIMORE.

Aug. 23.—Old hay is pretty well out of the way here, and the trading now is confined to new hay. The official grading of new hay was started in this market on Aug. 19 and all quotations below are for new hay. The tone of the market is considerably easier on hay under increasing receipts of new crop. Much of the new hay is coming in heated, not unusual for the first run of the new crop. For the better grades of new timothy and light mixed there is a fair demand at quotations.

STRAW.

All descriptions of straw are higher under limited spot stocks and a fair demand for No. 1 straw. Quotations follow:

Hay (all quotations below are for new hay) per ton: Timothy—No. 1, $41@42; standard, $40@41; No. 2, $38@39.50; No. 3, $34@37. Light clover mixed—No. 1, $39@39.50; No. 2, $37@38. Clover mixed—No. 1, $35@36.50; No. 2, $33@34. Clover, nominal—No. 1, $31; No. 2, $29.

Straw, per ton: No. 1 straight rye, $17@18; No. 2, $15@16; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

OMAHA.

Aug. 23.—Receipts light on both prairie hay and alfalfa. Demand continues quiet. Market steady with no change in prices. Upland prairie—No. 1, $23@25; No. 2, $20@22; No. 3, $10@15. Midland prairie—No. 1, $22@24; No. 2, $18@20. Lowland prairie—No. 1, $15@18; No. 2, $12@14; No. 3, $8@10. Alfalfa—Choice, $26.50@27; No. 1, $25.50@26; standard, $21.50@25; No. 2, $17.50@21; No. 3, $14@17. Straw—Oat, $9@10; wheat, $8@9.

DES MOINES, IA.

Aug. 23.—Hay shipments continue quite liberal during the past week. But several cars are being tied up in transit and receipts are not as heavy as should be. Choice midland hay is quoted at $23.50 per ton, first cutting. Alfalfa hay, $24.50 per ton, second cutting. Green alfalfa hay, $28.50 per ton.

MONTREAL.

Aug. 22.—The quality of the hay in this province is good as it was harvested in splendid condition as a whole. The only complaint we heard of was that in some instances it was allowed to ripen too much before being cut. As it will be several weeks before it is in a fit state to ship, there is very little export business reported except in the lower grades of old hay, which sold this week at $25@28 as to quality, but without any grading. Two cars of old hay were reported shipped from a country point at a cost of $27 f. o. b. to the American market. Although this report is doubted, it was given out by the shipper himself, who stated that he sent the lot forward on the strength of return he had just received from former consignments. There is no dearth of new hay in this market as farmers from nearby points are carting it into the city in a loose condition, quite a few loads going direct to private houses and stables, as well as to the market.

The trade in new baled hay has yet to develop, as the farmers are in no anxious mood to dispose of it, and are waiting to see what shape the export movement will assume. That this province and eastern Ontario will have a good yield there is no doubt, although some sections on the north shore report a short yield.

The first new baled hay sold at $21.50 a car, bringing that price on track here. But today No. 2 new hay is quoted at $19@20 on track and No. 3 at $17@18 on track. The percentage of No. 1 hay on the new crop is said to be small.

The Alberta and Saskatchewan governments are reported to have given out contracts for the new crop, owing to the shortage in the yield of hay in those provinces. These contracts are said to range from $19 to $20 per ton on track Montreal.

The receipts of hay during the last week at Montreal were 10,375 bales, against 6,994 bales for the same week last year.—Trade Bulletin.

KANSAS CITY.

Aug. 23.—Irregular price changes were recorded in the trade in hay on the Kansas City market this week. Prairie displayed weakness, selling unchanged to $1 lower than a week ago. Alfalfa prices closed 50c to $5 a ton higher, while timothy and clover mixed advanced 50c to $1. A moderate increase occurred in the movement, arrivals amounting to 994 cars, compared with 704 cars last week and 962 a year ago. Scarcity of cars is restricting the movement of hay to market and is one of the important influences in the present strong tone of the trade. The South and Southeast continue keen buyers of alfalfa, and small shipments are being made to the Northwest. Tame hay arrivals were light, with only small quantities being drawn from Iowa territory. Straw was unchanged.

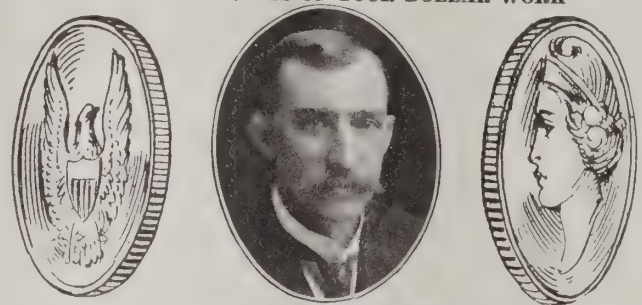
Prairie—Choice, $21.50; No. 1, $19.50@20.50; No. 2, $18@19; No. 3, $13@17.50; packing hay, $8.50@9.50.

Midland prairie—No. 1, $15.50@17.50; No. 2, $10@15.

Alfalfa—Choice, $29.50@30; No. 1, $28@29; standard, $25.50@27; No. 2, $22@25; No. 3, $21@24.

Timothy—No. 1, $25.50@26.50; standard, $24.50@25; No. 2, $22.50@24; No. 3, $17@22.

Clover mixed—Light, $25.50@26.50; No. 1, $24.50@25; No. 2, $18.50@24.



Clover—No. 1, $21@23; No. 2, $13@20.50.

Straw, $8@8.50.

PHILADELPHIA.

Aug. 23.—New hay is coming in more freely and meets with a moderate demand at prices quoted. Old hay is scarce and well out of the market. Straw is quiet but steady.

Old timothy hay (according to location)—No. 1, nominal; No. 2, $36@37; No. 3,

TAMPA, FLA.

22.—Local stocks of hay are sufficient or present needs, considering the mand from country buyers. Receipts totaled about 25 cars this week, running fair. But little trouble has found with new hay as to heating. Is quoted at $37 to $38 for No 1 and ar for choice. Very little rejected on racks here.

CHICAGO.

6.—The following is a statement of ceipts and shipments of hay in tons Chicago market for the week ending also the total receipts and shipments of hay from Jan. 1, 1919:

	Aug 23, 1919.	Aug.16, 1919.	Aug.24, 1918.
ceipts.....	5,360	2,122	4,040
ipments....	151	47	525
ince Jan. 1.	156,447	151,087	217,970
ince Jan. 1.	34,901	34,750	66,190

Heavy receipts during the week, ere well distributed, gave the market weak tone and declines in prices natural consequence. Lower grades of course suffered the most. Monday's arrivals of 157 cars of timothy, 42 of prairie, one of alfalfa and two of straw were excessive, and the market suffered because a large part was of lower grades, which dragged the better hay down with them. Shippers are urged to keep the low grade at home as far as it is possible to do so or expect a weak market. Quote Monday's prices as follows:

Timothy—No. 1, $28@30; standard, $27@28; No. 2, $24@26; No 3, $18@22; sample, $15@20; threshing, $12@15.

Clover—No. 1 light clover, $25@26; No. 1 clover mixed, $24@26; clover, $23@26.

Prairie—Kansas and Okla., Ia., Minn., Dak., $17@21.

Marsh hay—feeding $13@16; packing $10@12.

Straw—rye & oat $9@10, wheat $8@9.

ST. LOUIS.

Aug. 23—Receipts of hay during the past week have been very moderate, consisting principally of common hay, both timothy and alfalfa.

Timothy hay market continues to rule strong with an urgent unsupplied demand for good No. 1 timothy. The medium and lower grades are in more liberal supply and quiet. The demand is excellent here for good timothy hay and high prices can be obtained when offered.

Light clover mixed hay firm under continued light offerings and excellent unsupplied demand. The medium grades are quiet but steady.

Heavy clover mixed hay scarce and wanted, the demand being urgent for good heavy clover mixed hay.

Pure clover hay in very light offerings and in excellent demand. Offerings very readily absorbed at full prices.

Prairie hay steady, receipts of prairie are light, the demand excellent.

Alfalfa hay continues to rule firm with an active demand for good No. 1 or better alfalfa, also a fair demand for good standard hay, but the lower grades, hay that is grassy, off-colored or weedy, is very dull and hard to place. The trade wants good alfalfa and quotations can be readily obtained.

Straw market quiet.

Track sales: Timothy No. 1 $31@33; standard $29@30, No. 2 $26@28, light clover mixed No. 1 $30@31, No. 2 $27@28; heavy clover mixed No. 1 $29@30, No. 2 $27@28; pure clover hay, No. 1 $30@31, No. 2 $27@28; alfalfa, choice $35@36, No. 1 $33@34; standard $30@31, No. 2 $26@29; prairie, choice $27@28; No. 1 $25@26; standard $24@25, No. 2 $21@23; straw $7.50@8.

The College of Agriculture of Pennsylvania has issued a bulletin on the extermination of rats and mice, the most important feature of which is the directions for making the buildings under process of construction intended to hold grain, mice and ratproof. A bulletin, No. 461, entitled "Uses of Concrete on the Farm," issued by the United States Department of Agriculture, gives details for the same work and it can be secured on application.

STATE NEWS.

[Concluded from page 39.]

side Mill & Elevator Co., with a capital stock of $50,000. John F. Dunn is president, Miss Lou Dunn, vice-president, and P. W. Dickie, secretary and treasurer of the new Company.

Milwaukee, Wis.—The capital stock of the Stratton-Ladish Mlg Co. has been increased from $750,000 to $1,000,000. The company has under construction a five-story warehouse although at present owning a 1,000,000 bus. elevator. Officers of the company are H. W. Ladish, president; Patrick Donohue, vice-president; H. M. Stratton, treasurer, and Stewart Hyde, secretary.

LIVE STOCK RECEIPTS.

Live stock receipts at principal Stock Yards in July, 1919, as reported by the Bureau of Markets, were as follows:

	Cattle. 1919.	Hogs. 1919.	Sheep. 1919.

Meats in Store.

The worthlessness of the Federal Trade Commission's estimate that the stores of food in storage warrant great reductions in prices has been ignored of course by the public press which has the power to inform the public of the facts, but as the latter invariably "run with the hounds" and abandon the chase for facts when the hounds tire, it is difficult to get the truth expounded. As to lard, for example, W. G. Press & Co., Chicago, for many years experts in its distribution, say: "Much ado has been made about our surplus stocks in storage. Statistics show that 58 million pounds of meat must be forthcoming every day to feed this Nation. The Bureau of Markets in its report Aug. 1 shows 98,915,028 pounds of lard in storage plants. This is about 7% of all the meat and hog products in store, and it is only about 0.8 pound per capita. With much of this lard to go to Europe, we think the stock very light. We see a future for the lard market because all fats are scarce and high. The Government reports Aug. 19 stated that on Aug. 8 there were only 441,000 barrels of refined cotton oil on hand. This is a remarkably small supply." The Government's part in this whole agitation has been that of the pee-wee politician tearing around in a panic of fear.

MEATS AND PRODUCE STOCKS.

The Bureau of markets reports the following stocks of dairy products, produce and meats in store on Aug. 1, 1919, with comparisons:

	Aug. 1, 1919.	July 1, 1919.	Aug. 1, 1918.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Aug. 25.—Provision prices declined to the lowest of the season last week, going materially under the low of the previous week and making a sharp recovering from the inside figure. At the close pork was only 65c lower, lard off 15c on the near futures and 90c for January and short ribs 40c lower than a week ago.

There is said to be a loss of $1.50 a hog in making regular product and the situation as regards the packers is most unfavorable. The low rates of foreign exchange has caused them to lose money on remittances from abroad, which some claim have absorbed their profits. Export business has been cut down to the smallest in months, although an order for 1,000,000 lbs. of long cut hams and 250,000 lbs. of other product was received here from Italy at the close of the week. Cash demand for lard was slow, although at the close it was said to be a little better, and cash lard was 12½c over September for round lots with country lots to arrive at $29.10@29.15. Leaf lard closed at $31.25 and neutral at $35@35.25 for No. 1. Shipments of lard for the week of 10,774,000 lbs. were nearly 5,000,000 lbs. more than last year. Stocks are not increasing as the make is small.

Most of the speculative business centered in lard and there was a break of $1.40 from the close of the previous week to the lowest of the past week on the near futures, while January was off to $1.90 and sold down to $25, but was up to $26 at the close. Liquidation and short selling was on and with hogs breaking sharply at times and again rallying, there was a most uncertain and unsatisfactory condition.

Trading in short ribs was moderate and some buying of ribs and selling of pork was on. Domestic demand for meats was light and cash prices on many cuts were lower. Pork loins, which recently sold at 40c, were down to 36@37c here and were advertised in Minneapolis at 19c. Shipments of meats, however, were 18,989,000 lbs., against 19,711,000 lbs. last year.

Stocks of hog products in the United States and abroad are regarded as liberal for all demands up to January, but by that time Europe will have to become a liberal buyer. Supplies of hogs for the fall and winter packing are expected to be liberal and lower prices are predicted by some of the packers.

Range of prices in July and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Aug. 23.—Slight declines occurred in the provision mrket in Kansas City this week. A good demand prevailed for fresh pork in the East, and local packers made liberal shipments of frozen meat to that territory. Local demand for meats was fair to light. Loins were unchanged to ½c lower, while butts and cheaper grades of fresh meat sold down ½@¾c under a week ago. Florida, Virginia and other Southern points were good buyers of dry salt and heavy smoked meats, with prices for these grades off about ½c. Lard was off ½c, while substitute products declined as much as 1½c. Hams and bacons were ¼@½c lower, with only a fair local demand prevailing. Packers report large quantities of pork going for export, much of the meat being consigned to Holland and German points.

Weekly Average Prices at Chicago.

Weekly average prices at Chicago for good native beef cattle, hogs, aged sheep and fat lambs, as compiled by the Chicago *Drovers Journal:*

	Cattle.	Hogs.	Sheep.	Lambs.

Lard, lbs.	10,774,000	509,437,000	173,037,000

Meat Exports.

The Bureau of Markets reports the following meat exports from New York for week ending:

	Aug. 16.	Since July 1.
Beef—		
Fresh and frozen	4,670,987	19,785,634
Cured and pickled	637,734	7,168,272
Lamb	56	15,353
Pork—		
Fresh and frozen	210,482	3,364,314
Dry, salt and pickled	7,117,872	64,145,001
Bacon, hams, etc.	3,444,954	53,812,767
Lard and compounds.	7,390,616	62,671,758
Sausage	228,409	1,532,941
Poultry and game	305,675	559,041

During this period 24 mules were shipped to the West Indies and 116 horses to Belgium.

Exports May Decline.

There is no question but that the present heavy movement of American goods to Europe must soon show a definite falling off, unless we supply adequate credit and that the financial resources of this country must be organized to absorb the imports that will be rushed to us. It is easy to guess what effect this is going to have on our prosperity and our ability to meet the demands of our labor unions. The President has passed the "buck" to the Senate and now says nothing can be accomplished until the peace treaty is signed. There is only one thing that will safely and permanently reduce the H. C. L., and that is to increase the production of all commodities. We cannot work six hours a day and accomplish it.—*W. H. Perrine & Co., Chicago.*

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	1919. To Aug. 23.	1918. To Aug. 24.
Chicago	3,276,800	3,340,200
Kansas City	1,348,100	1,285,300

For the week	298,000	382,000
Preceding week	358,000	445,000

Weights are reported as follows: 250, 225, 266, 186, 243, 276, 206, 222, 183. Reports of quality: Two "good," one "fair to good mixed," two "fair."

Cash Meats.

Trading Monday was light in volume as regards hog products and little interest displayed. Prices declined but rallied somewhat later in the session. Shipping inquiry for mass pork is reported firm with moderate offerings. Country lots of lard are quotable to arrive at $29.20@29.25, with a rather quiet market for the day reported. Trade in short ribs lacked interest for there was no urgency to the demand. Quotations as of Monday follow:

CHICAGO LIVE STOC

CHICAGO, Aug. 25.—Hog price most uneven the past week wit bulges and breaks. The Saturda were $1.40 to $1.50 lower th previous week's close, the to $21.90 and average for the we $19.50, against $21.25 the previo and $19.05 last year and onl higher than two years ago. Sat average was $20.35, or 15c high that of the week previous an pared with $18.80 last year. were indifferent buyers at the l 2,500 hogs were carried over t finish. Between the regular ma of hog prices and those in the pi market, the packers and hog s had a most unsatisfactory week purchased by packers were against 87,200 the previous we 84,300 last year. Average weig 256 lbs., against 250 lbs. the p week and 248 lbs. last year. Sp of hogs were not heavy, 68,975, 101,475 the previous week and last year. The twenty marke 265,400, a decrease of 148,200, e eleven markets had 312,000 agai 000 the previous week, and 254,(year.

Cattle prices moved irregular a stronger close. The demand better grades was improved wit outside call a factor and it is sa should shipments of meats be s for ten days, there would be an exhaustion of supplies in easter kets. Closing prices on the best were about 25c higher than the the previous week, the top being Average price for the week was against $17.30 the previous we $15.60 last year. The bulk of s beef cattle for the week was $17.50 with extreme range $10 to Receipts of all cattle were against 61,561 the previous we 55,910 last year. At the twent kets there were 371,500, an incr 59,900 over last year. Western cattle were taken fairly. Receip 15,300, against 9,800 the previou and 16,000 last year. Quality w erally good, and prices held well ing from $11 to $14.

Butchers stock were in liber ply and the demand irregular, not being so good. Choice heife up to $16 with a few lots in steers at $18.25, but not man above $14, with common down and $10 and plainer grades at $8. lower.

Trading in bulls was light and $1 to $1.50 lower, ranging at $ $8.75. Canners and cutters stock at $6 to $7.75. Calves were in supply and prices closed 50c to $1 the latter on heavy, with the $10 to $21, the latter for choice a many at that.

Supplies of stockers and feeder ample and the demand slower. tations are that a larger run will this week. A few sales of choic at 25c advance. A load of fancy ming Herefords carrying consid flesh, sold at $14.50. There were tanas on the market that brought and a train load of light flesh D sold at $12.75. Average for st and feeders was $10.75, or 55c for the week.

Sheep closed 25 to 50c lower f best and common grades were to $3. Top prices were $12 made A 18, and the bulk of sales were at to $11, or 25c higher than the pri week. Average price for the wee $10.25, or 25c lower than the pri week and $2.50 under last year's. native lambs closed 50 to 75c lowe others off $3 to $4. Western sold up to $18.75 but reacted 35 t The bulk of sales was at $16.50 t and average $17.35, or 30c higher the previous week and compared 17.75 last year. Feeding lambs s

$15.25 and breeding ewes at $15. Re-
pts were 124,825, against 111,628 last
ar. The twenty markets had $578,700,
increase of 108,100 for the week.
Estimated receipts at Chicago this
ek are: Cattle 70,000, hogs 85,000,
ep 125,000. Receipts last year: Cat-
74,231, hogs 86,318, sheep 128,610.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Aug. 23.—Declines were
eral in the market for cattle, hogs and
ep in Kansas City this week. Increased
eipts were a depressing influence, while
tinued agitation over high food and
ernment investigation of prices aided
kers in forcing down the market. Ar-
ls of cattle amounted to 82,363 head,
pared with 57,000 head last week and
00 a year ago. Hog receipts increased
ut 4,000 to 30,300, compared with 38,000
ear ago, while sheep offerings, amount-
to 51,000 head, were more than 17,000
e than last week, and 30,000 above the
ply a year ago.
ith shipping interests and speculators
tive buyers of hogs, sharp declines
e recorded early, the market being off
nuch as $1 at the low time and about
rom the high point early in the month.
uced supplies later in the week, which
owed the early sharp losses, gave the
ket a stronger tone, sales at the close
g made at steady prices in instances,
igh generally 15c to 50c off. The top
e of the week was $21.40, compared
1 $23.15 last week and $19.70 a year
The average cost of all droves dur-
the week was $20.20.
ass cattle from Kansas and Oklahoma
ures moved to the Kansas City mar-
in the largest volume so far this season,
bined receipts of both cattle and calves
unting to more than 100,000 head.
ice corn-fed beeves continued extreme-
scarce, with prices ruling steady to
ng. Sales were made at a top of
5, compared with $19 last week and
5 a year ago. Prime yearling steers
ight $18.10. Declines on grass steers
unted to 25c to 50c, medium to plain
les, which predominated in the offer-
, suffering the sharpest break. Colo-
steers brought a top of $12.50, while
ring of Oregon steers sold at $10.50
$12.50. Common grades of grassers,
e bringing under $11, were little lower.
p declines in cows and heifers, as
h as $1, reflected the largest move-
t of the year. Canner stock sold around
to $6. Croice grades were off 25c.
heifers down about 50c. Veal calves
in large supply and declined $2 to $3,
ng sales around $15, compared with
early. With the fall season approach-
demand for stockers and feeders im-
ed. Feeders ranged up to $14.25 and
ers at $11.75, the general market
ring a loss of 25c to 50c.
ter a strong opening, sheep declined
o $1 and lambs from $1 to $1.50. An
e demand prevailed for feeding stock,
prices holding up well. Colorado and
lambs sold early at a top of $17.75,
yearlings reached a top of $13.

'ort Worth Live Stock Market.

Roy C. Murphy, Correspondent.

rt Worth, Aug. 23.—Reduced receipts
i to prevent a decline in the cattle
et this week, but the fact that sup-
were not so voluminous doubtless
d off some of the reduction that was
ore for the trade. Beef steers faced a
eciation of 25 to 50 cents, the lower
d cattle suffering less than the better
s. Canner cows lost about 25 cents
the good kinds saw a revision
nting to at least 50 cents. Bulls faced
cline of 25 cents. Best light calves
l at a decline of $1, while heavies
$1.50 to $2. Stocker cattle of a de-
le type revealed little or no change
he common kinds had to sell lower.
gs witnessed a rapidly declining mar-
Prices lost 25 cents Monday, and
er drop of 50 cents was recorded
lay, when a choice consignment could
better than $21.15 as against a quot-
top of $22 at last week's close. Since
lay there has been little or no change
e market, the close showing a loss
he week of around 75 cents. Pigs
yed strength, the good kinds selling
y at $18 to $18.50.
ep and lamb values remained un-
ed throughout the week. Most of
pply consisted of lambs and stockers.

t. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

ional Stock Yards, Aug. 23.—The cat-
n this week was a little lighter than
evious week. Monday, however, was
y heavy day, the count being some-
over 14,000 which was just twice as
as the corresponding Monday of a
ago. The price on choice steers re-
unchanged. We had several lots
eek both on Monday and Tuesday
were good enough to bring $18.50,
is the top of the market for the
On the medium grades of cattle
is a break in prices of 25c to 50c,

the close of last week. Oklahoma
are coming in increasing volume and
ality this year is as as we
ever seen it from that state. They
had plenty of rain and consequently
of pasture and the cattle show the
of this condition.
hog market has been most uneven
ratic this week. Advances and de-
clines of 25c to 40c in a day were not uncommon. On Friday the advance was right at $1.00 on the day's trade and at the market's close for the week the advance over the close of last week is $1.10 per hundred. The quality for the week has been generally fair. The week's closing quotations are: Mixed and butchers $21.65@22.35; good heavys, $22.10@22.35; Rough $17.00@19.25; light $21,65@22.25; pigs $18.00@21.00; Bulk, $21.65@22.25.

With a fair run of sheep and lambs and the quality not very good the market developed a weakness in the late rounds which indicates a decline of $1.00 to $1.50 lower than a week ago. The demand for breeding ewes continues and this is about the only grade that does not show a decline in price this week.

Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

Omaha, August 23.—Cattle receipts here this week totaled 52,121 head, being the largest of the season to date. Westerns made up almost the entire supply, and after Tuesday not enough cornfeds were coming to make a market. Native beef values continued to slip, heavy steers closing 50c@1.00 below a week ago and $1.00@$1.50 under the high time. Medium kinds suffered most. Choice to prime yearlings were very little lower at any time, but fair to good kinds showed a decline similar to that noted on weightier cattle. At the close $16.50@17.75 was buying best steers of all weights, fair to medium kinds selling down to $14.00. Butcher stock closed unevenly lower for the week. Even choice heavy cows were 50c lower than a week ago, and fair to pretty good kinds sold 75c@$1.00 lower. At the close $11.50@13.50 brought good to choice cornfed cows and heifers, with $9.50@10.50 catching most of the good to choice heavy range cows. Medium grades landed around $7.50@8.50, cutters at $6.50@7.50, and canners at $6.00@$6.50. Bulls were largely unchanged with bolognas closing at $7.00@8.00 and butcher grades at $8.50@12.00. Calves also sold largely steady at $8.00@14.00. Stocker and feeder demand was very urgent the first part of the week and good to choice feeders sold higher. Prices suffered a sharp reaction at the close, and best kinds finished a little lower for the week, while medium to plain grades closed as much as 50c lower than last Friday. Bulk is selling at a spread of $9.00@14.00. The urgent outlet for feeders helped to hold up values on good grass beeves early in the week, but on the close packers pounded the market hard, and good to choice steers wound up 50c lower than a week ago, with plainer grades on down to as much as $1.00 lower. Choice to prime grass beeves closed at $13.50@15.00, good to choice at $11.50@13.00, fair to medium kinds around $9.50@11.00, and plain grades on down, canner steers going as low as $6.50@7.50.

Monday and Tuesday there was a continuation of last week's decline in hog values, but from midweek on the market strengthened up, and today's values were 40@50c higher than those in force a week ago. At present bulk of the offerings is selling at a spread of $19.70@20.00, with shippers paying as high as $20.50@20.80 for choice lights and butchers. Receipts have been extremely light all week, the six days' run amounting to only 25,793 head. Conditions appear to be more settled than they were a week ago.

A new high mark in August sheep receipts was set this week when 187,334 head were received here. Feeder demand continued very broad, and while feeding lambs closed generally lower than the high time, best kinds are almost steady with a week ago at $15.25@15.50. Medium and plain kinds are down 25@50c for the week. Fat sheep and lambs sold stronger on the opening, but closed with the edge of the trade, all grades of killers selling yesterday 25c lower than last week's close. Fair to choice fat lambs closed at $16.00@17.00, with yearlings at $10.50@11.50, aged wethers at $9.50@10.50, and fat ewes at $7.00@9.00.

Canadian Live Stock Market.

Winnipeg, Aug. 22.—The hog market opened with a decline of 50c, selects going for $20, which figure prevailed throughout the week although it had been expected there would be a still further drop in prices. The undertone to the market was one expressing weakness right through the week and it was only the top quality with grading very severe that brought the price named. Cattle also witnessed a slump in prices, the break ranging from 25@75c. A load of choice breedy feeders at the end of the week brought $12.50 but the bulk sold at about $10@11.50. Cows and heifers of top quality sold at $10 with bulk at $7.50@9.

Denver Cattle Market.

Denver, Aug. 22.—Everybody tried to get here on Monday. In consequence the market showed a decline of anywhere from 25c to 35c on the best grades to 50c to 75c on the ordinary grades. Quote: Choice beef, $14@14.25; good beef, $13; killers, $7@8.65; stockers, $7.30@9.75.

Bread is quoted in Great Britain at 18c for a four-lb. loaf. In France 21c; in Italy 22c; in Sweden 30c; in Switzerland 25c; in Germany 25c, which in all cases is cheaper than in the United States.

Millers from Minnesota points are said to be scouring the Dakotas for good milling wheat.

Movement of Cattle.

Weekly receipts and shipments of cattle and calves at Western centers week of Aug. 23, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

The Price Current-Grain Reporter

Exponent of Trade Interests in Grain, Hay, Crops, Provisions, Live Stock, Etc.

OL. LXXXII. No 10 WEEKLY | CHICAGO, SEPTEMBER 3, 1919 | $3.00 A YEAR. SINGLE COPIES 10 CENTS

BUSINESS AND TRADE CONDITIONS

HE July statement of the foreign trade was somewhat of a surprise in that the imports showed so large a total, exceeding that of ne by $52,000,000, that of July, 1918, by $102,694,- and that of July, 1917, by $118,645,000. Exports both domestic and foreign merchandise ($570,- ,000) were of course large, but they were $348,- ,000 less than in June while the net excess of orts in July was only $225,511,000 compared with 5,000,000 in June and $265,590,000 in July, 1918. e excess of exports for seven months ending with y, 1919, were $2,663,092,000 and for twelve months same ending 1918 $4,087,154,000.

he showing for last July would seem to indicate endency of international trade to return to nor- l, or pre-war, conditions. This tendency may be elerated momentarily, whatever may be the per- nent result, by the disposition abroad to reduce ir imports from this side as much as possible for reasons: one, because the bankers handling the tlements know better than the people generally difficulty of paying for such volumes of imports l the necessity of checking them until exchange ll become equalized; and, too, because of the un- tunate disposition, even in England, now, to keep imports in order to sustain and perpetuate as g as may be, high prices for domestic products the home markets. Americans, even American tectionists, complain of this as discrimination, ecially when the news (true or false) comes that European Entente allies will endeavor in the fu- e to confine their trade within themselves and ninate this country; but one class of complainants rlook the first reason, which temporarily is a nd one, and ignore the fact that the leaders of the ninant party in Congress have already set the ex- ple of exclusion on this side, which is suggested the second reason given and for the same purpose. s often remarked hitherto in this place this ab- mal showing of exports as compared with imports exchange ought to explain to reasoning people the t, not of living, but of maintaining the high stand- of consumption to which Americans had become ustomed, especially during the war. One can't dollars nor wear them. One must have the goods mselves if one would consume or use them. The sident at last is now giving a tardy and reluctant ognition of this fundamental fact of daily living giving it his sanction and officially calling it to workmen's attention, that they cannot have to or to keep the things they will not produce in icient quantity to make plenty for all. Were it sible for Europe to send us more consumable ds in exchange for our shipments and to take less m us for a time, prices would soon readjust them- es to the reasonable, and all peoples would then able to have enough of those things which are essary to decent living and again begin to enjoy erally those things which give comfort apart from essity and pleasure also.

he President's address to the railroad shopmen the reply of Mr. Gary of the Steel Corporation he demand that the Corporation shall be operated a closed shop had apparently a restraining reac- n on labor leaders. Certainly they had on busi- s as reflected last week in that best barometer of lic opinion on business matters, the Stock Ex- nge. The adjustment of the shopmen's wages, ommended by the Director General of Railways justified, to harmonize with other advances, and nted by the President for that reason, adds $50,000,000 to the railway pay rolls, all of which will come out of tax payers' pockets since the Government is now piling up an annual loss on its operation of the roads of 400 millions, more or less, saying nothing of the indirect losses to the country by the inefficient and inadequate service. This concession by the President might be construed as another surrender had it not been accompanied by notice to the shopmen in Southern California that if they did not return to work immediately their places would be declared vacant and filled by other men, in order that the roads might resume operations, and that to effect this consummation the whole power of the Government would be exercised. This stand by the Administration was unusual, it having been the previous habit of Mr. Wilson to throw himself on the mercy of the unions, who have not at any time granted anything without a string to it, and who voted against his party in 1916; but the public feel that the time had come when the Government should no longer treat with its own unreasonable citizens as it would with a foreign power; and the effect was distinctly favorable. This was the greater when it appeared that the California roads, inactive for many days, have been able to resume the performance of their proper functions. There is also contained in all this the hope that the Administration will at last call a halt to concessions to the demands of a class, which means that they can end only in surrender of the last dollar—the expropriation of the railways—the plundering of the country in perpetuity—for the sole benefit of less than 2 percent of its population.

The demands of the steel workers' alleged union—only a mere fraction of the whole body of these workers—for the closed shop, with shorter and to them more convenient hours and still more wages, is of like nature to the railway demand. In substance it approaches soviet rule of the steel industry. The closed shop is but one step short of that. The Steel Corporation has not combatted labor but it has never permitted the tyranny of the closed shop, and its employes have approved the policy, which, as Mr. Gary says, "best promotes the welfare of both employes and employers" because it means freedom of action by both, a thing impossible to either in the closed shop. The employes of the corporation have been peculiarly favored. Their wages have been advanced in five years about 170%. Every incentive has been held out to the men to become financially interested in the company as stockholders by offerings of stock at far below the market price, to be paid for in installments, with bonuses to those who hold the stock for even a short period of years, the dividends in the meantime being paid in full to holders even though the purchase price had not been all paid in. But the effect has not been encouraging. Moreover the morale of the men as their pay advanced has steadily declined as represented by their output, the efficiency having decreased about 20% in five years, so that the actual labor costs have advanced about 225%. In 1918 the average output of finished steel per man in the Corporation was 52 tons against 56 in 1917, 61 tons in 1916 and 62 in 1915. In the Republic Iron and Steel Co. the output per man fell from 93 tons in 1915 to 70 in 1918, while the wages increased from $8.30 per ton in 1915 to $23.20 in 1918.

The public is directly interested in this controversy because all the cost is paid by the consumer in heavier house rents, in heavier freights, in higher prices for all types and kinds of steel products, utensils and machinery. The burden of the slacker falls on him; and the worker is the consumer as well as the producer. But he fails to recognize, as few others indeed do, that his interest as a consumer is greater than his interest as a producer. Labor's largest dividend comes in the reduction of prices of what it consumes rather than in high nominal wages as a producer, unless nominal wages are based on large production. There is in fact no visible limit to labor's possible profits if it would allow capital to earn what it can by piecework in quantity production, without overworking labor, and even by reducing labor's efforts by throwing that effort upon coal, waterpower and machinery. That is what the Steel Corporation and the Crane Company and other open shops are trying to do; but now as after the Black Death of 1348, when once before there was talk of a new social order, labor is again "doing its damnedest and angels can do no more" to deprive themselves of the possible good that might come to them now by attempts at extortion whose only limit is the sky and high wages for the few and dear goods for all. The rationale of unionism is exceptional advantages for the few; were unionism universal no one would gain because the privileges would then disappear.

The railway and Steel Corporation troubles and the growing seriousness of the Senate controversy over the Treaty and the League Covenant have intensified business hesitancy and uncertainty, in spite of the fact that the anti-profiteering campaign has reduced food prices somewhat, at least for the immediate present, by dragging surplus stocks into immediate consumption at reduced prices. Whether or no we are eating now what should be in store for winter's use will appear next winter, not now. Though the wholesalers report some slowing down of their sales, there is nothing to complain of in the retail line—every one, at least the working classes and the farmers, have an abundance of money and are spending it. The return to work of the railway shopmen has improved transportation conditions and this may continue for a time, the Brotherhood's ultimatum having been suspended in its action for ninety days to give the Administration opportunity to knock the top off the H. C. L.

ILLINOIS CONSTITUTIONAL CONVENTION

THE primaries for the Illinois Constitutional Convention candidates are near at hand, and at least all the promoters of fads in government are organized and at work. Among others there is the Gateway Amendment League headed by Harriette Treadwell, a persistent advocate of legislative and social quackeries, the object of which is the "I. & R." A recent meeting of this group was distinguished by the presence of Sec'y Steinhart, alongside of Margaret Haley and Pres. MacDonald of the State Federation of Labor—a queer combination indeed. And the Hearst outlets in Chicago devoted much space to Mr. Steinhart, commenting on the "happy association" of interests, as though Mr. Steinhart's 75,000 farmers had bedfellow and trunk intimacy with 5-hour 6-day coal miners and slackers generally.

So far as our own knowledge of candidates goes they are up to date almost exclusively a bunch of faddists and professional cheap-skate politicians, the kind always out for a per diem and mileage job, who have the people's interest about as much in view as so many coyotes. We are not much "up" on this campaign as to details, but we warn our Illinois readers that it is time to get busy if they don't want the convention packed with professors, faddists, so-

cialists, collectivists, deadbeats, and promoters of all the other isms. The daily newspapers practically ignore this great matter—"no one interested in it"—not half as much as in a picture of half-naked women at the Chicago bathing beaches.

PROMPT FEED SHIPMENTS

THE subjects of trade confidence, continually increasing business, the proper relationship of the various hands in the production and marketing of feedstuffs all along the line, have been fully discussed, but soon forgotten. The leading speakers and writers of the world quite broadly treat the principles which trade publishers may particularize about, and therefore there is a certain angle to the feed business on which a few remarks may not be out of place. A recent editorial in THE PRICE CURRENT-GRAIN REPORTER on "Bright Green Meal Contracts" referred to the moral obligations, such as grades, deliveries, prices, closing with the all-sufficient reason for any effort to build up a business when we suggested that the alfalfa milling industry must not be permitted to decline in any respect.

The point we should like to hammer home to feed mills, flour mills and such like institutions, one that has been a continual irritant among distributors, dealers and other feed manufacturers depending on certain materials of the larger mills, is the necessity of prompt deliveries. We do not overlook that human nature in the form of an enterprising sales manager will find a fellow after big sales who thinks that the mill can take care of itself. It is an everyday occurrence that such men are not only soliciting business broadcast by mail but wiring offers of millfeeds and other products, when the mill is weeks behind on deliveries. We venture this word of caution with special emphasis as the trade is entering a fall and winter season of unusual uncertainty, with assured high prices, because the effort to beat down the high cost of living for humans does not carry far with sacked feeds. Millers accepting feed contracts stipulating certain deliveries should know with a reasonable certainty that they can be made and whether the orders should be booked. Much of this trade is transacted through brokers who also should feel that a responsible mill is back of their contracts and can thus assure their widely scattered trade of smaller folks the materials they would require on approximately the date agreed upon. There are relatively few mills and many consumers; so it means working possibly along the lines of least resistance to suggest to these millers that observance of punctual shipments assures the stability of their trade, on which the maintenance of proper supplies of milk, dairy products and feed for cattle and work animals so much depends.

THE BREAD SUBSIDY

THE governments of both England and France have subsidized bread. It is costing Great Britain two hundred million dollars a year, and morally disintegrating the English people. The farmers of France, always the financial backbone of that nation, are guaranteed $3.25 per bushel for wheat. The bakers are subsidized and bread is selling at about 21c per 4-lb. loaf. What more natural therefore than that John A. McSparran, representing the National Grange at Washington, should cry "Me-too" to this selfsame proposition before the Senate Committee on Agriculture?

The worst part of this craze to protect and subsidize the farmer by indirection is yet to come, just as the worst era of British farming came in the years following the Napoleonic wars which gave an immense profit to agriculture. When the end came and prices receded, the greedy landlords put up their clamor, and the corn laws were stiffened to hold the price of wheat at $2.50 per bushel in England before any importation would be permitted. Farming was immensely profitable, although there were then no steam plows, no tractors, no reaping machines, no binders, no separators—all hand work. It was so profitable that rents soared like American farm lands today; but in a few years the unsalable surplus became so great that literally agriculture in England was ruined. Farms were abandoned by tenants. Thousands of acres went into permanent pasture, while the number of paupers to be fed by the "rates" became appalling.

The farmer everywhere is likely to feel the pinch of the days after the guaranties come to an end. And we may be sure that this same Gronna and the Billy Kents and the Pinchots and all the National Farm Organization crowd who are suffering distress now when the farmer is in deep clover and lands have reached the highest levels ever reached perhaps for farm lands in the world, will then find new devices for holding the farmer vote at the expense of the people and the farmers themselves. Every orgy has its morning after the night before.

What is needed is some sort of sanity to treat now the guaranty evil in such a way that it shall not be a continuing menace to the agriculture, at least of our country, which can least of all occupations thrive on the purely factitious props of legislation.

WHEAT PRICES READJUSTED

THE personnel of the complainants at the New York Conference with Mr. Barnes on the matter of wheat prices represented the Northwest exclusively. With the exception of the editor of a farm paper, they represented the chronic malcontents and the professional politicians of a section of country which the complainants very speciously but questionably represented as crowded with agrarian discontents. Many boasting newspaper articles from the spring wheat country are evidence that the grain buyers in the county have been reflecting the premiums on the top grades to the producer, and no sophistry of Dr. Ladd can make millers pay a first class price for a second or third class milling wheat. The trouble in the Northwest is, in the first place, personal and business exploitation of the discontent which always comes with unusual prosperity and the grading heresies put out and persisted in by Dr. Ladd, who seems to have none or to ignore all the elements of a practical business sense necessary to the selection of wheat for milling purposes. The new discount list for grades No. 2, 3, 4, and 5, as revised by the Corporation may or may not be fair to millers. They will know most about that—they will pay if the prices are fair and will not pay if the prices are not fair to them; and there was really no reason why the Corporation should have made the readjustments save the purpose to conciliate a class of discontents purporting to represent producers who will be no more satisfied now than before; so that possible disorder has been injected into the buying game without any substantial gain in any respect.

TEXAS CORN IN COMMERCE

TEXAS corn has certainly created quite a disturbance in the market the past fortnight; and, as a St. Louis market paper has suggested, it looks as though Texas and Argentina were bidding for the minimum. A. Galbreith of Dallas, a well known dealer, who was in Chicago recently, ridiculed the notion that Texas corn is going to cut any wide swath during the season. In 1918 the state produced 69 million bushels of corn, putting her in the twelfth place as a producer, but the amount leaving the farm has been very small—only 1% in 1917 and 1918 and averaging for ten years only 7% against 41 for Illinois, 28 for Iowa, and 20.6% for the entire country. Mr. Galbreith's theory is that the present offerings come from a small irrigated section in the western part of the state, which has not to exceed 200 carloads to dispose of and when that is absorbed offerings will cease, as Texas feeds her corn and has this year not more than 70% of the feedstuffs the state will need for her own use. Texas corn, like imports from Argentina, is more a "mental hazard" than anything else, although as long as the job lot Mr. Galbreith has located is in sight it m be also a "casual."

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures rep senting the past week, the preceding week and cor sponding time last year, here assembled for ready ref ence:

	Aug. 30.	Aug. 23.	Aug. 31.
Wheat—			
Primary receipts.....	19,803,000	17,447,000	16,486,(

EDITORIALETTES

THE question propounded by Prof. James Boyle on another page is a pertinent one a worth pondering. In the first place, it is sound business suggestion to the elevator men w do not carry side-lines, a class growing less year year and losing ground everywhere.

SOMEONE has suggested that if the reader finds on one thing in this paper in a year, which benefits h in his business, the $3.00 for subscription will ha been well invested.

DON'T neglect to use our classified adv. departme if you want to sell or buy anything, or to get a j or to hire a man.

THE Government ownership proponents are floo ing Washington with their arguments. If those w object to this kind of French syndicalism transferr to this country sit back and say nothing, there no telling what may happen. The cranks are ganized and militant—don't forget that.

WHY all this fuss about prices for wheat in t country? If the former doesn't want to sell at t dealer's bid, he doesn't have to. Senator Gronna a his committee don't seem to think they are not l licemen but legislators. They ought to find the selves and tell their constituents to read and app the law.

THE scramble for the location of state grain e vators and mills in North Dakota has actively beg and the towns with "claims" and "natural adva tages" will be heard from, whether they have a real merits as proper business locations or not. old fashioned business commercial considerations g erned in such matters, but when the "state" tak hold such particulars are the last to receive consi eration, particularly if their ambition goes to t extent of buying state bonds to pay the cost.

same rate. Single copy 10 cents.

LETTERS on subjects of interest to those
raged in the grain trade, news items, reports
crops, grain movement, new grain firms,
grain elevators, contemplated improve-
nts and cars leaking grain in transit are
icited.

THE ADVERTISING value of The Price
rent-Grain Reporter as a medium for
ching the buying power of the grain eleva-
men is unquestioned. The character and
nber of advertisements in its columns tell
its worth. If you would be classed with
leading firms catering to the grain trade,
ce your announcements in the trade's only
kly, which is always first to get the live,
to-date news to its readers.

DVERTISEMENTS of meritorious grain
ator machinery and supply houses and of
onsible grain firms who seek to serve
in dealers are solicited.

CHICAGO, SEPT. 3, 1919.

GRAIN TRADE REVIEW

Corn prices have declined to the low-
level of the season for the deferred
iveries, the dominating influence be-
the Government which has come out
footed with a statement that the
hest prices have been seen. The
vernment is now as anxious to de-
ss prices as it was to advance them
ie time ago; and while the producer
grain is suffering extremely heavy
ses, nothing apparently has been done
bring down the cost of production,
greater part of which is beyond the
rage farmer to control. That there
e been many economic errors com-
ted during the past few years is cer-
n, and the efforts to justify some of
ors is resulting in much confusion.
fact that the surplus supplies were
released when they should have
n had considerable to do with forc-
prices of foodstuffs up after the ar-
tice was signed, while now the Gov-
ment has apparently gone as far as
sible the other way and proposed
n to enter the retail business with
idea of forcing prices down. There
no getting away from the fact that
y effort is being made to reduce the
of living; and because there is an
n market for grains the results are
more apparent in them than in any
er foodstuffs, with the exception of
ts.

ow the farmer will view this pro-
ling remains to be seen, but it is
ily likely to be with favor. It is
likely that there will be something
in Congress regarding the Govern-
t entering the retail business, and
sibly on the efforts made to depress
es, especially as all the agitation will
add a bushel of grain to the total
ly, that sooner or later the mar-
will reflect the actual condition of
ly then. As far as corn is con-
ed the crop is purely a domestic
osition. Heretofore Government ef-
s to regulate prices have had the
osite effect from that anticipated.
xtremely low prices for all grains
a impossible, in view of the guaran-
figure for wheat, as there is a rela-
ship between the value of wheat and
r grains, no matter how remote.
a time it looked as though low grade wheat might be used for feed in many sections, but the fixing of minimum prices for the No. 4 and the No. 5 grades will probably result in such use being curtailed. The discount of the No. 3 grades under the No. 1 has been changed so that it is now 6c instead of 7c, as was the case for several years. The change in the low grades was due to the fact that Northwestern farmers—chronic kickers always—were in many instances forced to accept extremely low prices for grain of very light weight and they have been complaining of late. Grain is not leaving this country as rapidly as was expected, and some congestion prevails at all the leading Atlantic and Gulf ports. As yet none of the leading terminal markets has been affected, either by inability to unload the grain or a shortage in storage room, but unless there is a constant stream of grain moving out of this country sooner or later the wheat will accumulate to an extent that will tax all facilities. The car situation is decidedly acute in some sections of the belt. If the Government had the same success with refrigerator cars which now belong to the packers and others, as they have had with the kind used for grain, there would be many towns without meat and other perishable commodities.

Crop conditions have shown little change the past week. Kansas has been severely damaged by drought, and parts of Oklahoma and Nebraska have also suffered, but in Illinois and Iowa, especially the later state, the outlook is very good, and indications are that Iowa will have a large yield this season. The total yield will probably not exceed 2,800 millions. The spring wheat yield continues to diminish, and the total for wheat is after all not likely to exceed last year's grand total, so the increased acreage of winter wheat was a happy circumstance.

Export demand for oats, rye and barley has flattened out completely, and scarcely a bushel has been reported sold of late. The low foreign exchange rate has been a big factor, and there are also stories coming from abroad to the effect that every effort will be made to curtail purchases of all commodities in this country to bare necessities. The clearances of wheat and other grains are enlarging somewhat, wheat exceeding 1,000,00 bu. per day, but there is not sufficient ocean tonnage to prevent accumulation. Foreign crop reports are decidedly mixed, and while some sections seem to have a surplus, others have smaller yields than last year.

All indications point to a reduction in the acreage of winter wheat acreage this fall. Plowing has been greatly delayed as the result of the hard ground and lack of moisture in many of the main sections of the belt, and with the prospect of an open market next year, in connection with the Government's agitation for a lowering in the cost of living, there is a tendency to cut the acreage still more. Rains are needed in the Northwest to permit plowing.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Aug. 30, 1919.	Aug. 23, 1919.	Aug. 31, 1918.
Wheat	19,803,000	17,447,000	16,486,000
Corn	2,883,000	2,024,000	5,077,000
Oats	6,999,000	7,177,000	12,231,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	29,686,000	33,794,000
Preceding week	26,648,000	33,375,000
Since July 1	176,948,000	229,150,000

Corn prices fluctuated rapidly within a rather wide range the past week. Liquidation was on early and prices dropped rapidly to a new low level for the season on the deferred deliveries. Sentiment was extremely bearish, the dominating influence being the Government's stand on the high cost of living. There was little in the news to justify buying for a material advance, but the market became oversold and a sharp recovery came toward the last. Closing trades were at net losses of 1¼c on September and 3¼@5⅛c on the deferred deliveries, December leading. For the week the range was 6⅝@7⅝c.

Oats were affected by the action of corn and ranged lower, closing with net losses of 1¼@2¼c after a range of 2½@3⅛c for the week. When the pressure is considered the market showed remarkable resistance to selling pressure, and the undertone was not weak despite the heavy liquidation by some of the leading longs. Sentiment is inclined to be rather bullish, and good buying developed on the breaks.

Demand for cash wheat remains fairly active for the choice grades, but the poorer kinds were inclined to drag. In many instances low grade springs are selling above the Government minimums, as the spring wheat crop is short and mills have been taking fair quantities. Movement is apparently limited only by the ability of country shippers to secure cars. In parts of the Northwest farmers are holding their wheat, being afraid of the price, but now that the Government has set a minimum some of this grain may be marketed. Italian import requirements this season are estimated at 88,000,000 bus. Range of prices the past week follows:

			Close		
	High.	Low.	Aug.30, 1919.	Aug 23, 1919.	Aug.31, 1918.
Corn—					
Sept.	$1.80¾	$1.73¼	$1.77½	$1.78¾	$1.53⅜
Dec.	1.43½	1.35⅞	1.36⅝	1.41½	.....
May	1.38⅞	1.32¼	1.33⅝	1.36⅞	.....
Oats—					
Sept.	.72⅝	.69⅛	.69½	.71¾	.69¾
Dec.	.75⅜	.72¼	.72¾	.74⅜	.....
May	.78¾	.76	.76½	.77¾	.....

Exports of Corn.

The exports of corn from principal United States ports, as reported by the Chief of Bureau of Statistics of the Department of Commerce, for each month, for four years:

Mos.	1919.	1918.	1917.	1916.
Jan.	1,177,297	1,952,528	7,253,348	3,498,443

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Aug. 30, 1919, with comparisons with 1918:

	1918-19.	1917-18
Chicago	30,795,000	33,816,000
Milwaukee	897,000	2,674,000
Minneapolis	16,299,000	14,824,000
Duluth	731,000	194,000
St. Louis	17,275,000	21,944,000
Toledo	3,045,000	2,565,000
Detroit	434,000	446,000
Kansas City	31,743,000	30,337,000
Peoria	1,205,000	2,305,000
Omaha	8,345,000	7,792,000
Indianapolis	4,741,000	5,065,000
Total	115,510,000	121,992,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Aug. 30, 1919.	Aug. 23, 1919.	Aug. 31, 1918.
St. Louis	2,657,000	2,296,000	2,421,000
Kansas City	5,041,000	4,157,000	2,948,000
Omaha	1,445,000	1,469,000	927,000
Toledo	346,000	337,000	342,000
Detroit	74,000	56,000	70,000
Indianapolis	319,000	408,000	359,000
Peoria	150,000	248,000	317,000
Chicago	4,436,000	4,878,000	3,753,000
Milwaukee	306,000	174,000	806,000
Minneapolis	4,933,000	3,357,000	4,434,000
Duluth	96,000	67,000	115,000
Total	19,803,000	17,447,000	16,486,000
Shipments	6,193,000	8,963,000	8,428,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Aug. 30, 1919.	Aug. 23, 1919.	Aug. 31, 1918.
American	7,225,000	13,204,000	3,298,000
Indian	.....	.....	210,000
Argentine	4,101,000	3,071,000	2,372,000
Australian	1,944,000	1,624,000	720,000
Others	89,000	65,000	94,000
Total	13,359,000	17,964,000	6,694,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	44,808,000	15,161,000	31,507,000
Indian	.....	1,170,000	3,019,000
Argentine	15,267,000	19,002,000	725,000
Australian	8,737,000	3,620,000	8,166,000
Others	238,000	230,000	227,000
Total	69,050,000	39,183,000	43,644,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Aug. 30, 1919.	Aug. 23, 1919.	Aug. 31, 1918.
American	.....	49,000	422,000
Argentine	2,928,000	2,724,000	1,009,000
African	117,000	76,000	82,000
Total	3,045,000	2,849,000	1,513,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,533,000	26,599,000	42,230,000

FROM WASHINGTON

ort by the Trade Commisson Recommending a Government Monopoly of Refrigerator Cars—Testimony of L. D. H. Weld Before the Senate Committee.

he trade interest in Washington the week was centered on the Senate mittee hearing on the Kenyon-drick bills and the latest report the packers by the Federal Trade mission. The latter report is on transportation question and, of se, the recommendations are dective, being that the operation of igerator cars be declared a "Govnent monopoly"—that the property erned, including icing stations and r facilities as well as the cars, be ired by the Government and rails thereafter be licensed to own and ate them. The report in part says: he present country-wide system of ribution by the five big packers has vn up from their control of refrigor car lines in conjunction with vas pools.

n turn the volume of traffic of the packers has enabled them to secure the railroads advantages over peting shippers. Formerly in the e of direct rebates, these advans are now usually in expedited ser- to the big packer cars: in favor- mixing rules, which include all r diversified products and even y articles not related to the pack- industry; by allowances paid to e of the big packers by carriers a part of the transportation ser- ; by favorable arrangements and e of stock yards by the railroads ome of the big packers; and by sale to the railroads of bumping s manufactured by a subsidiary of of the big five.

he small independent packer's cars misused and diverted, frequently g out of his service for extended ods, in several instances as long x months. In 1917 the cars of the five' and their subsidiary comes maintained an average of 80.8 s per car per day, while the averfor cars of their competitors, the pendent packing companies, was 54.5 miles.

he prompt and efficient handling ie traffic in meats and other perle foods is of great public con- and it is also important that all ers should have equal and adee service. The recommendations nade to correct present inequalities rvice and rates, as well as to pre- the dangers of monopolistic adages."

A REJOINDER.

omas E. Wilson, president of Wil- & Co., and chairman of the Insti- of American Meat Packers, on the arance of this report, said the ers were willing to submit the jusof the Commission's "demands" in eport on private car lines to the ion sense of the American public. fter an investigation by men inienced in transportation ques- ." said Mr. Wilson, "the Trade nission presented a report diacally opposed to that handed down he Interstate Commerce Commis- composed of men trained in rail- work. After a six-year study of uestion, the Interstate Commerce nission report said:

An important part of the inter- commerce of the country is transd in privately-owned cars. It is to nterest of the owners, carriers, and e that their operation should be nued under such rules and regula- as will insure their efficient han- without discrimination against hipper or particular description of . The system of the use and supf private cars that now exists cane at once and radically changed ut serious consequences to ship- carriers, and the public.'

ere are admittedly too few reator cars. Spread the use of the r-owner cars among shippers over ntire country and mileage will be reduced with a consequent increase in the cost of meat foods or a necessary reduction in live animal prices. It would seem that if a real solution is sought it might be found by some agency building enough additional cars to meet the deficiency."

The Hearings on K.-K. Bills.

The chief witness during the week was L. D. H. Weld, formerly chief of the division of agricultural economics of the University of Minnesota, and while there the author of several pamphlets on marketing problems as they affected the farmer; later professor of Business Administration in Sheffield Scientific School, Yale University, and while there he published (The Macmillan Company, 1916) an exhaustive volume on "The Marketing of Farm Products." He is now in the publicity and investigation department of Swift & Co. and is a recognized authority. Mr. Weld made a two-days' argument before the committee in which he declared that the reports of the Federal Trade Commission on the five large packers and the alleged control of the industry are "absolutely useless as a basis for passing legislation." He challenged the truth of the Commission's findings in a half dozen particulars, and ended by attacking the Commission itself.

Mr. Weld said he had demonstrated that the five packers, far from controlling 25 per cent of the wholesale grocery business, did less than 3 per cent of it; that they did not control prices, either for live stock or meats; that their profits were moderate if not lower than the profits of any other industry, and that in numberless details, as to capital investment, operations in England, "live stock pools," the Commission and especially Commissioner W. B. Colver, who opened the hearings, had "dealt in misstatements, misrepresentations, insinuations, and inaccuracies."

Mr. Weld said that Swift & Company spent $1,500,000 on advertising last year and intended to keep up their efforts in that line in an endeavor to "educate the public and eliminate the unjust prejudice against the packer." When Senator Harrison of Mississippi asked if that sort of expenditure would not raise the price of meats, he said that it only amounted to 15-100 of 1 per cent of sales and that it would justify itself by adding to the ease of operations.

Ownership of stock yards, Mr. Weld said, in discussing a point stressed in the Trade Commission report, was not particularly important to the packers "if we get the yards run as efficiently."

Another witness was Everett C. Brown of the National Live Stock Exchange, who, among other things, said: "Unless we can be assured of more efficient and economical governmental control than was the case with the railroads, the telegraph and telephone companies, neither the producer nor consumer can hope to benefit from such legislation."

MANY OBJECTING WITNESSES.

A great many minor witnesses were heard in objection to the proposed legislation—stockmen, farmers, feeders, bankers, commission men, etc.

Frank Currie of Gard, Nebr., a cattle man and state senator, said he opposed the bills "because they would Germanize the United States." To which Senator Kenyon, with the sophistry of the demagogue, replied: "We've heard every other argument against them, but the pro-German one." "Well, they are used to being licensed and regulated over in Germany," Currie retorted. Mr. Currie might have said more.

J. G. Curtis, for the New York and New Jersey Live Stock Exchanges, was positive that packers competed in purchasing live stock. "There is absolutely no necessity for regulation. I am sure of that after forty-three years of experience as a live stock salesman."

"I'm for competition," C. Niemier, a Princeton, Ind., retailer told the committee. He said one of the reasons for the fight against the packers by the grocers was that "they are eliminating some of the profits between the producer and the consumer."

E. M. Ammons, former governor of Colorado, headed a delegation of seven teen cattlemen from that state in opposition to the legislation. "I am opposed to laws which give discretionary powers to officials to make laws. If you want to divorce packers from ownership of refrigerator cars—I think you might as well take away their delivery wagons—pass a law and say so. Don't let somebody have power to say whether they ought to own them, and how many they ought to have. The same for stock yards. Our experience is that when the yards are owned by people interested in the business we get more facilities and more competition than when some one owns them just for investment. Nor do I think you ought by license to control market news, for that is not freedom of the press. Make the laws against circulating misinformation more stringent. That will be enough. But make all your regulations in law, so that every man can have a day in court before being penalized" [and not do it by Rules and Regulations made by petty lawyer-clerks under the direction of a bureaucratic and radical secretary].

"Do you think there are any evils in the packing industry we ought to correct?" asked Senator Ransdell, Democrat, Louisiana. "There may be, but I know of none," the witness responded.

J. G. Emboden, president of the Illinois Live Stock Association; Irving S. Cook of Byron, N. Y.; James Strickler of Skidmore, Mo., and Robert Thompson of Benton, Mo., were among cattle raisers who objected to the measures. This sort of testimony could be reported here *ad lit.*

Who Are Interested.

The people interested in this legislation are not the packers only as Ogden Armour points out in a recent statement. He said:

"Whose concern is it that Congress is considering legislation that will restrict the meat packers from competing in the general food field and put them under complete domination of some Government official?

"Of course, our concern, it hardly need be said, will protest emphatically against such legislation. We believe that others, too, will protest, because, under the Moses amendment to the Kenyon bill the act becomes applicable to all interstate business, which means that the baneful effects of this proposed legislation will not be confined to the packing industry. If need be, we will make this fight alone, but we are writing to record this thought:

"This proposed legislation affects every kind of business because it sets a precedent inimical to enterprise in all fields. It puts business under the heel of bureaucracy and the logical result would be a return to the medieval practice of craft and guild domination, which kept initiative in a straightjacket.

"When it comes to pass that a business can exist only by leave of some official holding temporary office and not necessarily conversant with the business involved, then industrial and commercial progress in this country will cease.

"If the wholesale grocer can by law eliminate competition at the hands of the meat packers, as is the intent of pending legislation, then there is no logical reason why the tailor could not in a similar way stop the sale of clothes at department stores, or why automobile distributors could not prevent wholesale grocers from handling accessories, or why cigar stores could not stop the sale of tobacco by druggist, or, why the fiction magazine should not make it illegal for newspapers to print serials.

"It will be a terrible blow to American business when Congress begins deciding for the firm or individual what legitimate activity he may or may not engage in.

"Of similar significance is the proposal to take away from the meat packers their refrigerator cars—not because of any misuse of them but simply because all firms do not operate their own. It is as though a law were passed which compelled the owner of a modern press to make it common property because some one desired to compete with him for business but was not possessed of proper mechanical equipment.

"We do not aver that such foolish laws will ever be enacted, but they are no more foolish or unjust than the proposed law to license packers, limiting their activities and take away from them that portion of their equipment which others would like to use."

FARMERS' ELEVATORS, SIDE LINES, AND THE PACKERS.

By JAMES E. BOYLE.

I know more about farmers' grain elevators than I do about the packers. But the farmers' elevators, now operating by the hundreds in each of the grain states, learned and put into practice several years ago one lesson, namely, that to cut down the cost of handling grain and to keep their plant busy, it was necessary to go into "side lines." And so we now find the country elevators in Kansas and Dakota and elsewhere selling certain bulky, imperishable products such as coal, lumber, fencing, wire, salt, tillage tools, lime, fertilizer, etc. It requires no Government expert to show that this use of the manager's time and of the plant enables the elevator to keep open twelve months in the year and to handle grain on a lower margin of cost, to the benefit of all concerned, both producers and consumers. Indeed, two or three recent reports by Government experts mention this condition as to side lines at farmers' elevators.

Now, the crusade of the Federal Trade Commission against the "Big Five" packers seems to center in the fact that they are handling butter and eggs and poultry and other "side lines" with their meat business.

A creamery friend of mine in Dakota, who makes very fine butter, sells this butter in Chicago to some of the "Big Five" packers. And I know a family in Ithaca, N. Y., who usually ask their grocer for butter with the brand of one of the "big packers," because the price is the same as any other good butter, but the quality is uniformly good. The packer has the plant, the refrigeration service, the branch houses and all that so he can put the Dakota butter into this New York home. Like the farmers' elevator, he has gone into "side lines" because he can thereby introduce certain savings.

What is the difference in principle, if any, between the farmers' elevator side lines and the packers' side lines?

Don't Need Canadian Wheat.

Grain men in London, a cable of Aug. 28 says, are making strong comment regarding the attitude of J. B. Musselman, secretary of the Saskatchewan Grain Growers' Association, towards the wheat situation, which was indicated in a newspaper item published Aug. 11. They ask if Musselman's views mean the Canadian growers intend to grasp the last dollar at the expense of Europe's necessity. This seems incredible. No anxiety is observable there to accumulate large supplies of foodstuffs at high prices.

Musselman's opinion that Europe needs Canadian wheat at any price is contended to be erroneous, as the latest reports from Roumania indicate that the surplus will be double the spring estimate. The same is applicable to the entire Balkan field. Australia and Argentina are stated to possess large supplies in addition to the 1919 surplus. It is admitted that Europe has a difficulty ahead, but the attitude of Herbert Hoover, of the American food commission, is taken to indicate that the possibility of starvation has been practically eliminated and that Europe cannot expect instant and wholesale relief at the expense of the American consumer.—*Winnipeg Grain Trade News.*

THE HIGH COST OF LIVING

An Open Letter to the President by Secretary Lackey of the American Corn Millers' Federation—High Prices for Cereals Not All.

The following open letter to President Wilson was written by Douglas W. Lackey of the American Corn Millers' Federation, and is submitted as a valuable contribution to the literature of the H. C. L. at this time:

I am closely following your worthy efforts to bring about a readjustment of the cost of living and feel a deep concern in what is presented to me as a practical solution, or at least a nucleus on which to build an effective means. Under the direction of our industry's principles and in my present position, I had the privilege of coöperating with the Food Administration in the solution of several problems during the war. I am therefore in a position to speak with the conviction of experience when I disagree with the suggestion of Congressman Fitzgerald that the billion-dollar wheat guaranty appropriation be employed for this purpose. Such a procedure would not bring practical results except through its psychological potentiality. Our wheat consumption last year was 4.6 bushels per capita. At the Chicago basic price of $2.26 the total cost per capita would be $10.39 or .0285 cents per day or about one cent per meal. It is therefore apparent that a reduction of one dollar ($1) per bushel in the price of wheat through using the appropriation would only reduce the average daily wheat-bread expense to about 0.16 cents for each individual. Assuming that the gross consumption of all other cereals would equal the average wheat consumption, it will be seen that the total cost would hardly reach six cents per day per individual for all cereals and at their present value. The manufacturing and distribution costs are not included in this computation, inasmuch as they would be the same were cereal costs lowered and the present wage scale maintained.

In seeking more vulnerable and practical influences I find that meat, eggs, milk, cheese and fats present interesting possibilities.

Our per capita meat consumption last year was 181.55 lbs. and in the following proportions: Beef, 78.87 lbs.; pork, 88.25 lbs.; mutton and lard, 7¼ lbs.; veal, 7.18 lbs. If computed on the retail prices and per capita with beef at 45c, pork at 50c, mutton and lard at 43c, veal at 50c, the cost would total $85.92 at Chicago today. If reduced to cost for one day, meat and lard would total 23.54c or 7.85c per meal per capita. The comparative costs then are 2.85c for wheat and 23.54c for meats per day.

In his address at the conference of grain, milling, baking and flour-handling interests in New York June 11 last, Wheat Director Barnes said:

"The Inter-Allied Scientific Food Commission, investigating the actual value of various foods, gives wheat the premier position in food content of all the cereals. When ocean transport is scarce and costly and the overseas need of great volume, this influence alone may cause wheat values to part company with all conceived relation with other foods.

"A better education of our own people as to how to increase the per cent of cereals and vegetables in their diet would save in a single year at home twice the value of our entire wheat crop. And it would be done without the sacrifice of palatability.

"It has been calculated that the American people today spend annually eighteen billion dollars in their food bill. That of this, cereals, with 38 per cent of the food value, cost only 16 per cent of the total bill. That bread, sugar, potatoes and fruits, furnishing 62 per cent of the food value, cost 31 per cent of the total expenditure. The remainder of the diet—namely, meat, fish, eggs, milk, cheese, butter, lard, furnishing 38 per cent of the food value—costs 69 per cent of the food bill. A change of 10 per cent in these relations would save our domestic food expenditures by three billion dollars annually.

"Why not help our people lower their living cost by better understanding and more accurate knowledge of food contents and food values? There is a fertile field here for our schools to till."

An analysis of these details prompts the suggestion that a very substantial reduction in the cost of living can be effected through abstaining from the use of meats, animal fats, milk, eggs, and vegetables one day in each week. This would curtail the Nation's consumption of these expensive foods more than 14 per cent and reduce the Nation's food bill $25,557,769 each week, or $1,329,600,000 for the year.

Not only would these immediate practical results be effected, but the saving would influence daily economies through the educational effect. If it is not possible to make such a practice mandatory, it is certainly possible to bring about a strict compliance through official suggestion, leadership and education.

The equation of individual effort made the Food Administration's tremendous accomplishments possible, while in this case every benefit would revert directly to the individual. He would not only reduce his living cost, but in so doing would restore economic serenity. As Mr. Barnes relates, an increased consumption of sugar, potatoes and fruits, or 15 per cent of our present food bill, would equal the saving brought about by increased cereal use and now representing 16 per cent of our food bill.

To insure against profiteering by any milling or cereal interests, I feel secure in saying that each operator would pledge his enterprise to a strict adherence to the working factors approved as fair by the Food Administration and during the war period when personal sacrifices were freely and patriotically made.

Experiments conducted at Columbia University by Dr. Sherman have demonstrated that cereal proteins are sufficient. Returned soldiers have told us that they observed French soldiers who subsisted entirely on bread and light wines and under arduous physical strains for days.

I believe I had the privilege of suggesting the wheatless meal daily to the Food Administration, and although skeptically received, a trial proved its worth, and Mr. Hoover augmented its effectiveness until it reached the fifty-fifty regulation.

Reliable authorities agree that lower grain prices would not at this time effect a reduction in meats. They do believe, however, that lower meats would influence grain prices to a basis sufficiently low as to permit of profitable meat production at the lower prices. For a long period it has been the disposition of producers to feed grains in preference to selling in the open market and mainly for the reason that greater returns are secured at the high live stock prices.

Northwestern Grain Dealers Ass'n.

Following is a list of the officers and directors of the Northwestern Grain Dealers Association: W. T. Greely, president, Great Falls; J. Watkins, vice-president, Cascade; H. N. Stockett, secretary-treasurer, Great Falls.

Directors—E. J. Sandborgh, Sheridan, Wyo.; D. R. Fisher, Great Falls; O. W. Simonson, Malta; G. L. Friedlein, Lewistown; J. A. Moore, Great Falls; W. P. Ladd, Billings; A. D. Persson, Powell, Wyo.; W. C. Wilkes, Missoula; John McVay, Great Falls; W. B. Woodman, Belmont; A. E. Barkemeyer, Great Falls; J. R. Swift, Lewistown; H. S. Anderson, Red Lodge; August Schwachheim, Cascade; C. W. Sweet, Bozeman.

Executive Committee.—John McVay, D. R. Fisher, J. A. Moore, all of Great Falls.

A Stockholm correspondent of the London *Grain & Seed Reporter* says that Swedish weather has been favorable and crops promise to be above the average, with oats as a record.

PRICES LOW GRADE WHEAT

The Grain Corporation Fixes Discounts to Be Paid for Low Grade Wheat, Including No. 5 Wheat—Wheat Below No. 5 Sells on Its Merits.

Announcement that the Grain Corporation would at once declare the basis on which it will purchase the various lower qualities of wheat was made on Aug. 26, by Julius H. Barnes, Wheat Director, following an all-day meeting at the offices of the Corporation in New York, during which Mr. Barnes discussed wheat grading and prices received by farmers for wheat with various members of Congress, representatives of farmers' organizations and vice-presidents of the Grain Corporation.

At the close of the meeting Mr. Barnes stated that the Corporation would follow this course as a protection to the producer against under-payment of the proper relative value of his wheat and in order to reassure country buyers of the ultimate value of lower grades on arrival at the terminals. For two years it has not been necessary for the Grain Corporation to announce a basis on which it would buy lower qualities because of the preponderance of high grades of wheat in past crops. The Wheat Director urged that every possible consideration be given the producer, unfortunate now in the character of his yield, and the establishment of a basis as close to the guarantee price of No. 1 as could be justified by interpretation in favor of the producer of each practical doubt.

Those in attendance at the conference with Mr. Barnes to fix the fair relation at which the lower grade and damaged qualities of this year's wheat crop should be bought by the Corporation as compared with the guarantee price of No. 1 wheat were Congressman George M. Young, Sidney Anderson, Andrew J. Volsted, Craig Steenerson, John M. Baer, Carl W. Riddick and J. H. Sinclair; Dr. Ladd of the North Dakota Agricultural College; O. P. B. Jacobson of the Minnesota Railway and Warehouse Commission; D. P. O'Neil of State Board of Appeals of Minnesota; I. J. Murphy, Railroad Commissioner of South Dakota; H. N. Owen, editor of *Farm, Stock and Home*, Minneapolis; J. N. Anderson of the Equity Coöperative exchange of St. Paul; S. A. Aandahl of North Dakota and N. J. Holmberg and A. C. Smith of Minnesota.

In discussing the conference Mr. Barnes pointed out that the relative prices which the Corporation might fix would bear a relation to the guaranteed price at the terminal markets only and not to the current price which in such markets as Minneapolis is ruling 30 to 40 cents above the guarantee basis, and that no attempt would be made by the Grain Corporation to reflect any premium basis above the actual guarantee price. He added that with the execution of 17,000 contracts between the Grain Corporation and country mills and dealers, any producer who felt that he was not being fairly treated in grades and price could, by submitting a sample through the mails, receive a decision, binding on the buyer, as to the proper relation to the guarantee No. 1 price at the terminals, but not as to its relation with any premium basis currently ruling in the terminals and outside of the Grain Corporation buying.

Threshing and marketing in the Northwest have now reached a stage demonstrating the large proportion of the crop shrunken and damaged by heat and premature ripening. Flour qualities of much of this wheat appear to be excellent owing to its high gluten strength and low per cent of moisture content. Because of this shrinkage in the berry, many producers in the Northwest are securing yields as low as four to six bushels, where fifteen to twenty had been confidently expected.

Dr. Ladd of North Dakota presented at the conference tables showing exhaustive experiments made in 1916 by the Agricultural College of North Dakota. He expressed the conviction that the quality of No. 4 wheat in the l[ow]est indicated a value for actual n[o] of within ten cents per bushel of t[he] 1 price.

PRICES FOR LOW GRADES.

On Aug. 28 the Corporation [is]sued the following statement (Bulleti[n] 83):

"After two days' consideratio[n] Wheat Director Barnes with offic[ers] the United States Grain Corporat[ion] the problem raised in respect t[o] year's wheat crop suffering from t[he] fects of adverse weather condition[s] ing the growing and harvesting s[ea]son the Grain Corporation has re-fram[ed] scale of discounts for the lower g[rades] of wheat on a basis calculated t[o] the producer the benefit of every [doubt] as to the value of lightweight wh[eat] order to protect, as far as possible, [the] producers in wide sections that [have] suffered unfavorable crop develop[ments] with the production of an ur[gent] quantity of low-grade wheat. [The] scale is effective Sept. 2, 1919, a[nd] dealers will be required to pay p[rice]rs not less than the proper co[n]point reflection of the terminal g[ua]teed price for No. 1 wheat and wi[th] relation for other grades as follow:

"No. 2 wheat 3c under No. 1.
"No. 3 wheat 3c under No. 2.
"No. 4 wheat 4c under No. 3.
"No. 5 wheat 4c under No. 4.

"For all wheat otherwise confo[rm]ing to the specifications of No. 5 or h[ig]her but deficient in test weight, dis[count] No. 5 price 3c for each one pound [de]ficiency in test.

"Wheat grading below No. 5 fo[r] reasons other than deficiency test w[ill] shall be bought on its relative me[rits].

"Smutty wheat to be discounted [from] 2c for slightly smutty to larger [dis]counts, according to degree of sm[ut].

"Mixed wheat will be taken a[t] discounts ranging from 2c to 5c, accor[ding] to quality, in the judgment of each [local] president.

"Mixed wheat and rye grading [No. 5] 'mixed grain' will be discounted as follows: Estimate the average value of the wheat and rye separately at their proper value and in their proper proportion, figuring the rye at sixty pounds per bushel, make allowance for dockage or other inseparable foreign matter and make such deductions as are justified, but not less than 5c per bushel as a penalty for the mixture.

"Garlicky wheat should be discounted 2c."

Grain Movement to Minnesota Terminals.

The Cargill Elevator Co., Minneapolis, reports the following receipts, in bushels, of grain at Duluth and Minneapolis for month of July during last four years (000's omitted):

	1918-19.	1917-18.	1916-17.
Wheat—			
Spring	2,589	1,236	6,685
Durum	622	74	906
Wtr. & West.	1,691	1,487	1,296
All wheat	4,902	2,797	8,887
Flax	964	358	454
Barley	6 349	332	542
Oats	2,652	1,406	661
Rye	2,084	108	98
Corn	524	670	244
Total	17,475	5,672	10.886
Duluth	4,544	237	392
Minneapolis	12,931	5,439	10,494

FROM AUG. 1, 1918, TO JULY 31, 1[9]

	1918-19.	1917-18.	1916-17.
Wheat—			
Spring	156,350	78,066	102,585
Durum	33,176	13,309	17,031
Wtr. & West.	14,812	7,503	32,417
All wheat	204,338	98,878	152.033
Flax	12,032	8,901	14,635
Barley	51,706	42,936	34,934
Oats	30,696	44,242	34,506
Rye	34,519	15,361	9,768
Corn	8,575	14,758	10,056
Total	350.866	225.075	255,934
Duluth	121,719	31,039	49,308
Minneapolis	229,147	194,036	206,626

In France the rye harvest has [been] completed and the results appar[ently] are satisfactory. The grain, how[ever] has been put into the stack and is [not] yet threshed.

F. FUTURE OF AGRICULTURE

State of Agriculture in Europe—Dis-
s of the People for Lack of Foods—
The Farmer and the Community

By G. I. CHRISTIE,
ely Ass't Secretary of Agriculture.

e future of our agriculture is not
ident alone on American farms but
d up with the agriculture of other
ries; and so it is well for us to
cognizance of the condition in for-
lands. Upon the signing of the
stice and demobilizing of those
armies, it was thought those peo-
ould return to their farms, plant
and produce foodstuffs for their
e and in that way reduce the
tuffs that must necessarily be
rted. When those men, tired
weary after a long period of
ng and warfare, returned to
homes they found things very
ent from when they left. They
things demoralized; they found
nstable government; and they
great unrest; and instead, there-
of going to the farms and on the
they did just what other people
have done, they went to the
. We find the city of Budapest is
increased over a million, and we
he same condition in Vienna. In
ity of Budapest we are told they
receiving 200,000 litres of milk a
o feed their people, and they are
nly receiving 80,000 litres of milk
, and so the milk supply that has
into the city of Vienna has been
ed.

en we go into the country of Rus-
where the land owners have been
from their homes, where the
ment has been destroyed, there
d production has been decreased.
so you can take the prices there
hen take the prices in Vienna and
rmany and you will find they have
far away from normal. We find
governments were able to control
odstuffs necessary for the army,
hey were able to control and ar-
for supplies; but since the arm-
there has been very little control,
rices have gone away beyond nor-

e is the point I want to make:
we find those countries so abnor-
e know it is going to take a long
to get back to normal. After the
tice was signed the idea spread
h Russia that farms should be
d up and given to the people.
were a large number of farm-
on the hillside in a certain town;
ey said if these are to be cut up
an't we have them, and they went
to get them, and the farmers who
his land said: "If this is to be
away why should we plant?" And
dtime has come and gone and the
s not planted. There are many
which will never be reached in
, and many hundreds of thou-
of people will have perished.

Hoover said the other day that
eatest need now is for finances,
e must give as much attention to
nancial part as to the foodstuffs
nd to these countries. We need
pound of foodstuffs we can pro-
in order that we may feed those

. If we don't make it so that
an put their cattle in for next
conditions will be abnormal.
has been a great deal said about the price the farmer is receiving. I heard a man say—he was speaking in favor of the working man, and he said: "The workingmen of this country have supported the country in the war, thank God, without a guarantee of wages, but the farmer had to have a guarantee of $2.50 for wheat before he showed any patriotism." I want to say to you, gentlemen, that kind of talk works a great injury, and that kind of talk is unjust. The day wheat was fixed at $2.50 wheat was selling on the market at $3.00. On the day the price of wheat was fixed flour was selling to consumers in this country at $7.00 a barrel and when they fixed the price of wheat it went down. It is unjust to say to our people that by fixing the price to the farmers we were getting patriotism from the farmers, for if we had left the price as it was the farmers would have got a larger amount of money than they received; and I think you men who are near the grain trade realize that if the price of wheat were removed today it would go up. We know that overnight the price of mill feeds jumped from $8.00 to $28.00 a ton. We know that the people thought the farmer was receiving too much, and they went before the President and before the Trade Commission and before the Food Board, and they insisted that all those agencies were holding back in order that the farmer could get a fair price. They listened to those people and they removed the price fixed for hogs, and they had no sooner removed it than the price of hogs went up, and it has gone up to $23. I say, friends, that we are getting close to the time of radical readjustment, and when the farmer, who has been receiving $2.20 for his wheat, and a like price for his other products, is going to be asked to take something less for his products just when you ask him to take a less price, he asks, Why? and you just tell him that is the price, it brings a radical organization of farmers everywhere.

Just recently an association of farmers was organized at $10 apiece. In Indianapolis last Tuesday the state was organized with a fund of $200,000, in order that the farmer might get what is coming to him. So all these other state organizations. It will not do to say to the farmer, "You must not organize." I think it is the greatest thing that can happen for the farmers to organize, but make it that the farmers are organizing to promote agriculture. We don't want to organize farmers to compete with the grain organization, or fight the meat trust, or fight other interests—no. If we do that we break down the center of agriculture, and the strength that stands for the development of those people throughout the land. It is going to take some cooperation and some guidance to get our people to understand that we are organized for agriculture and not for the individual money that the farmer will get. They are talking about the dollar, and we are getting to lose sight of the building of roads, the building of schools, and the call of men and women who are going to make this a community in which to live.

We have radicals on the farms, and they are wondering if the grain dealers are not getting a little too much for handling the wheat; and someone is wondering if the farmer is not getting too much, or the grocer too much for handling the groceries. It is very easy to say to a man, "Do you see that estate there. He built that out of the profits he got from you on grain." Or, "Do you see those beautiful homes? Those homes come from your land and your labor." And I want to say to you, the fellow with a silver tongue can very readily arouse a sentiment such as, "That fellow is a robber—we will get together."

Now, what are we going to do about it? My experience with our people is this: Just as soon as we develop mistrust between the farmer and elevator man, between the farmer and grocer, between the farmer and other interests in that town, we have broken down all the community interest and we have got a lot of men who make it so we can't live in that place and the community is going to be a mighty poor place for your children and mine. Instead of fighting we have simply got to go out and make people understand that a farmer is a citizen of the community; that a hay dealer or a grain dealer is a citizen of that community, and all working for that community. When we want to brag of our state, we say that Winchester, or any other little town out there, is just the best little town in the state, and the fellows work for the farmers and support them and do everything they can; and when you get that feeling among the farmers they say, "This is a mighty good place to live. This is the place I want to be." One of those men came in the other day and told an old elevator man, "You know I got an offer of $380 an acre for my farm and it only cost me $80—160 acres—what would you do?" The elevator man said, "That is a lot of money. What have you got out there?" The farmer said, "I have got two boys." The elevator man said, "What do you want to do with the money? Do you want to buy an elevator?" "No, I don't want to buy an elevator." "What do you want to do with it?" The farmer said, "I don't know what I want to do." The elevator man said to him, "Don't you think that is a pretty good place to keep? We like your boys and they like it here and we like you." The farmer came back the next day and said, "I am the happiest man in the world, because I have decided to stay." He decided to stay because he believed in the elevator man and the banker; he liked the schools; he liked the road and the community, and $300 an acre for his land wasn't going to move him. He was going to stay right on that farm.

I want to say the greatest evil taking place right now is the speculation that is taking place on the farms. In our state one farm changed hands six times in a few weeks. What does it mean? It means they are speculating with those farms. Right out in Iowa they are selling farms, and selling them again the next week. Those people are the enemies of the farmer. They are put in the hands of speculators who know the farmers will have nothing to do next spring and the speculators will set the price and the farmers will have to pay, while some lawyer in the city of Des Moines, and some doctor in the city of Des Moines, are making a little money. I want to say they are doing a great deal of harm. We can't prey on those people without doing injury that will reflect not only on them but on the whole fabric of our citizenship. It is nice to say these farms changed hands at tremendous prices, but do you know what it means? Here is a farmer who is well thought of by the community. We put another man there who doesn't belong to the same church, or doesn't send his children to the same school, and I can show you community after community that is broken up by that very thing. What we have got to understand, friends, is this: We have not only got to grow more cattle, more wheat, more hay, but we have got to see that there are on those farms men and women who will be happy in that community; but if we pay them $2.05 for their wheat when they ought to receive $2.10, there is only one thing that can happen and that is, those people are going to complain and we are going to get into trouble. We have gone into a tremendous fight in order that this land might be protected and 70,000 boys went across and gave up their lives in order that we might be protected.

And friends, when this readjustment period is upon us and when a man is wondering just what will happen, when it is easy to fill his mind with discontent, we must try to show the other fellow that we are all here to work together; that there is a place for all of us and if we do that thing we will not only be happy, but we will be rewarded, for we will fulfill the great democratic ideals and secure the ideals thereof. (Applause.)

JULY EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products, cotton and mineral oils, from the United States was completed on Aug. 26 by the Bureau of Foreign and Domestic Commerce, Department of Commerce (000 omitted):

			7 months ended July,	
Exports by groups.	July, 1919.	1918.	1919.	1918.
Brdstffs.	$54,823	$59,296	$562,979	$414,303
Ctnsd oil, lbs.	10,645	15,086	146,151	90,949
	$2,274	$3,197	$30,204	$17,341
Meat, etc.	$104,179	$94,759	$819,137	$584,774
Cotton, bales	529	219	3,629	2,126
Cotton, lbs.	270,744	112,038	1,865,891	1,091,677
	$89,975	$34,924	$583,218	$339,129

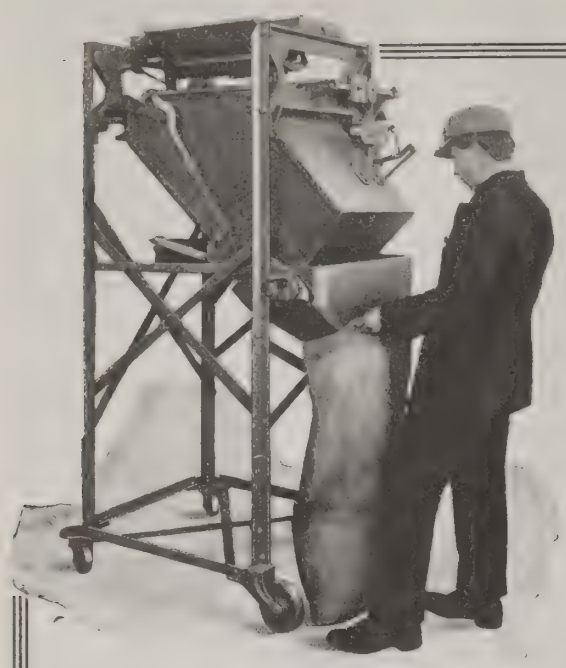
Pkld. beef	5,661,148	9,087,262	4,256,036
Bacon	273,469,822	378,729,046	205,615,959
Pork	156,365,586	204,667,696	97,736,077
Lard	162,433,551	210,417,859	91,004,882
Mts.,etc.	$645,460,935	$1,167,850,576	$232,262,439
Cotton	583,218,332	863,161,409	339,128,851
Oil	30,204,148	36,820,545	17,340,621
Total all agricultural:	$2,183,940,879	$3,367,355,533	$1,550,279,045



QUANTITIES.

Shipments during the month, in amounts, made the following comparison with June and with a year ago:

	July, 1919.	June, 1919.	July, 1918.
Corn, bu.	587,816	909,875	2,009,159
Wheat, bu.	5,834,154	16,389,853	225,381
Flour, bbls.	1,731,617	3,613,714	2,428,540
Cotton, bls.	528,902	631,985	218,877
Oil, lbs.	10,645,296	30,694,876	15,085,705

Wheat exports during the month of July, for a series of years, compare as follows (in bushels):

1919	5,834,154	1912	13,141,931
1918	225,381	1911	4,937,451
1917	5,059,242	1910	2,207,690
1916	89,144,225	1909	6,710,386
1915	123,202,141	1908	13,427,527
1914	24,017,827	1907	9,598,235
1913	9,397,745	1906	11,104,270

He Can Do It Alone!

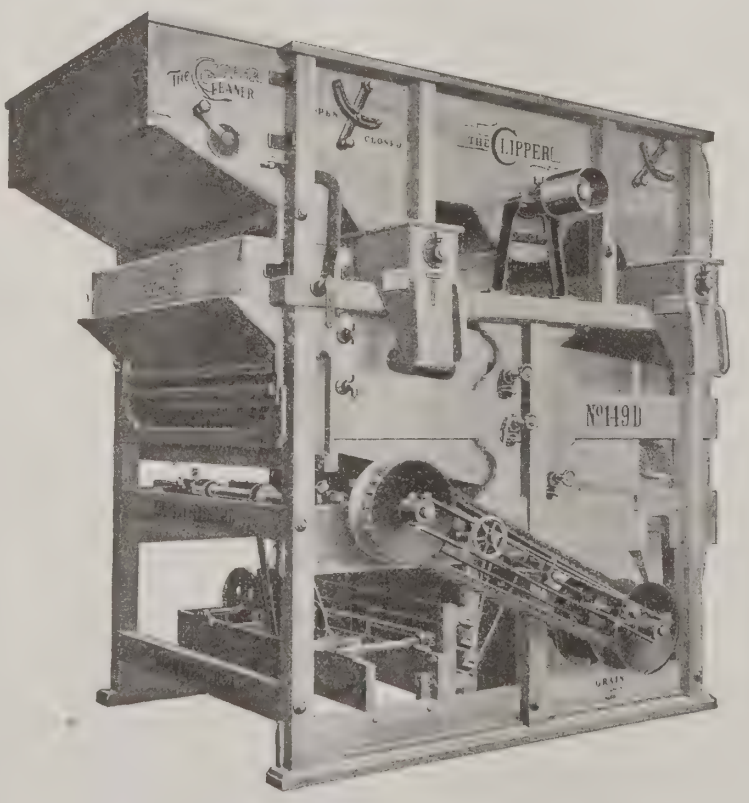
Prices are high. Labor is scarce. Why hire two men to do work that can be done by one man? And not only done—but done faster and more accurately than the two did it before. Have every sack filled with the exact amount—with no overweights to nibble your profits — no underweights to hurt your reputation.

A Richardson Automatic Sacking Scale

with one man can fill accurately from three to seven sacks a minute (according to type of scale and material sacked).

The man doesn't need to take time to record the number of sacks filled. A mechanical counter on the scale does that for him. And there is no danger of mistakes, for the counter never forgets to put down a tally. Nor does it record one twice as men are apt to do.

The RICHARDSON AUTOMATIC GRAIN SACKING SCALE is made in three types—FLOOR PORTABLE (as here shown), OVERHEAD PORTABLE, and STATIONARY.



It weighs and sacks corn, oats, corn chops, cracked corn, beans, chicken feed, seeds, etc.

RICHARDSON SCALE COMPANY

Passaic, New Jersey

Chicago, Ill. **Omaha, Neb.** **Minneapolis, Minn.** **Wichita, Kans.**

The "CLIPPER" DOUBLE SUCTION GRAIN CLEANER

No other machine has as many wonderful TIME SAVING and LABOR SAVING devices as the Clipper Cleaners. Skilled labor is daily becoming more difficult to secure. Every move, every minute saved will enable you the more easily to take care of your business.

The Variable Air Regulator enables you to secure any desired degree of air blast without any annoying changes of pulleys or shifting of belts. A simple turn of the wheel does the trick.

Our Double Screen System permits the oats screen and the wheat screen to be left constantly in the shoe. The grain is shifted by means of a gate onto the screen it is desired to use.

Our Traveling Brush System keeps the screens from clogging and the machine working at its highest efficiency ALL THE TIME.

Ball Bearings on Exhaust Fans reduce friction, eliminate hot bearings and save power.

The yearly balance sheet of the user of Clipper Cleaners shows that it pays to have the best that can be procured in the line of grain or seed cleaning machinery.

A. T. FERRELL & CO., Saginaw, W. S., Mich.

The Letter Box

Not Now in Business.

Price Current-Grain Reporter: We are not now in the grain business. Plant was completely destroyed in a great tornado of May, 1917, and we have not rebuilt.—*G. B. & C. M. Griffin, Charlestown, Ill.*

Transportation the Big Question.

Price Current-Grain Reporter: Our biggest test problem at the present time is that of transportation. We will not build or make any additional changes until conditions are more settled.—*Panhandle Texas Grain Co., Sweetwater, Texas.*

An Important Thing.

Price Current-Grain Reporter: We think one of the most vital and important things at the present time is the high cost of living in respect to grain handled at the prevailing prices.

We expect to make some repairs at our plant next spring.—*Farmers' Cooperative Co., Fontanelle, Iowa.*

Buckwheat in Michigan.

Price Current-Grain Reporter: The wheat situation has improved wonderfully throughout this section since we have had such fine rains. During the drought period it looked as though we would not secure a bushel of buckwheat throughout this section, but since the rains have come along it looks like what little is planted will go 100%.—*Schoenendt Milling Co., Monroe, Mich.*

Business Getting Good.

Price Current-Grain Reporter: We are getting a nice run of wheat and oats at our different elevators.

We are now shipping new baled hay and oats as nice a quality as we have had for years.

Our dairy trade is beginning to open up and we are shipping in quite a number of cars of alfalfa from the West.—*Foote Brothers, Scotts, Mich.*

Change in Elevator Holdings.

Price Current-Grain Reporter: The Liberty Coöperative Exchange of St. Louis has bought the Farmers' Elevator here. Pifie Elevator here. Both are open for business. F. H. Sanders as agent. They handle twine, wool, coal and wood. H. I. Christinson, former manager of the Farmers', is now manager of the Sanders' house at Thorne, N. D. I am president of Imperial Elevator Co. here.—*F. McHugh, Imperial Elevator Co., Keyseith, N. D.*

Very Early Threshing.

Price Current-Grain Reporter: The Derrick Farmers' Elevator have installed new 15-H. P. Ingeco kerosene engine.

Threshing is on in full swing; wheat and rye are of good quality, wheat yielding about 10 bus. per acre in the average, rye about same. Oats and barley very light crops; also flax. We are having the earliest threshing operations in season ever known in this vicinity.—*Derrick Farmers' Elevator Co., Charles Ceilky, mgr., Derrick, N. D.*

Quebec Hay Crop.

Price Current-Grain Reporter: Hay is moving very slowly owing to shippers having to depend upon foreign shipment, which is very scarce. Farmers are not ready sellers as they are holding off in anticipation of higher prices.

Contrary to general expectations, there is very little Ontario or Quebec hay moving to the Canadian West owing to prohibitive freight rates, viz., $20 per ton to Alberta points.

The Hon. Duncan Marshall, Minister of Agriculture for Alberta, has obtained a concession in existing rates from $15.00 to $10.00 per ton (Supplement 1 to Tariff 7-A) when consigned to himself as Minister of Agriculture, but with Manitoba Upland hay selling in Alberta at $22. and $24 per ton there will not be much Quebec hay moved at present prices; therefore, unless favorable export rates are obtained, the bulk of Canadian hay will continue to find its way to the American markets.

The oat crop is now being harvested and the yield runs between 15 to 20 bus. per acre—almost a failure. There will be no oat straw for sale.—*LeFebvre & Mahon, Horwick Station, Que.*

From Teton County, Montana.

Price Current-Grain Reporter: During May and June the Valier Elevator Co. and the Equity Coöperative Ass'n had new distributing systems put in and considerable repair work done on their houses.

Threshing commenced here on Aug. 26th, and wheat is running from 9 to 35 bu. per acre on irrigated land. All No. 1.

Alfalfa will yield two cuttings and if there was not a shortage of irrigation water there would be three big cuttings. The two cuttings will make from three to five tons per acre and is selling for $25 per ton in the stack.

Oats and flax will make a fair crop, but at this writing none has been threshed.—*The International Elev. Co., Valier, Mont.*

Russell Leffingwell of New York has been appointed Assistant Secretary of the Treasury, perhaps to succeed Prof. Christie and been made one of a committee of ten to spend (one newspaper report says) "a billion dollars to reduce the cost of wheat." Probably the sum to be expended is somewhat less, but the money waste will be only in proportion.

WHAT BECOMES OF THE CORN?

C. H. Gibson, with W. P. Anderson & Co., Chicago, recently sent an enquiry to the Department of Agriculture as to the disposition of the corn which leaves the farms (approximately 21% only of the entire crop). In reply the Bureau of Markets quotes the article in the June, 1917, *Monthly Crop Report* on "Uses Made of the Corn Crop." Up to that time the average production had been about 2,700 million bushels of which about 26% only was shipped from the farms. Of this amount (702 millions) 8% (216 millions) remained in near-by towns, 11% (297 millions) were to a distance or for export, and 7% (189 millions) to distant farms. The 513 millions estimated as used in towns as distinguished from "farm" consumption, was divided as follows:

	Bus.	% of total crop.
In flour and grist mills (census)	245,000,000	9.1
For glucose and starch	40,000,000	1.5
Distilled liquors (1910)	21,000,000	0.8
Malt liquors	14,000,000	0.5
Feed in towns	120,000,000	4.4
Exported	45,000,000	1.7
Indefinite	28,000,000	1.0
Total	513,000,000	19.0

The estimated farm consumption was distributed as follows:

	Bus.	% of entire crop.
Horses and mules	728,000,000	27.0
Swine	724,000,000	26.8
Cattle (not milch)	254,000,000	9.4
Milch cows	231,000,000	8.6
Poultry	97,000,000	3.6
Human beings	92,000,000	3.4
Sheep	60,000,000	2.2
Seed	23,000,000	0.8
Indeterminate	103,000,000	3.8
Total	2,312,000,000	85.6

Another Obstacle.

Cattlemen are trying, with financial and official assistance, to develop the export trade in beef. Extension of credit to Europe is essential to enlargement of trade, and that is where the help of financiers and government is necessary. Unfortunately lack of credit is not the only obstacle to a bigger export business. There is a great deal of prejudice to overcome, and it has been fostered by our Federal Trade Commission's report on the meat industry in this country. Other countries naturally suppose that such official reports as this state facts, hence they believe the worst possible things about those who alone are in position to develop and carry on an export business. The Federal Trade Commission promises to cost the cattlemen of this country millions in loss of foreign trade, in addition to the losses it has already caused by its unfair reports about and its persistent campaign against the meat industry in this country.—*National Stockman and Farmer.*

WHERE EXPORTS WENT TO.

The following table shows a few of the heaviest exports and buyers of the American products named during the fiscal years ended June 30, 1918 and 1919:

Articles and countries.	1916-	1917-	1918-
Animals, No.:	1917.	1918.	1919.
Cattle	$13,387	$18,213	$42,345
Hogs	21,926	9,280	17,390
Horses	278,624	84,765	27,975
Mules	136,689	28,879	12,452
Sheep	58,811	7,959	16,117
Corn, bus.	64,720,842	40,997,827	16,687,538

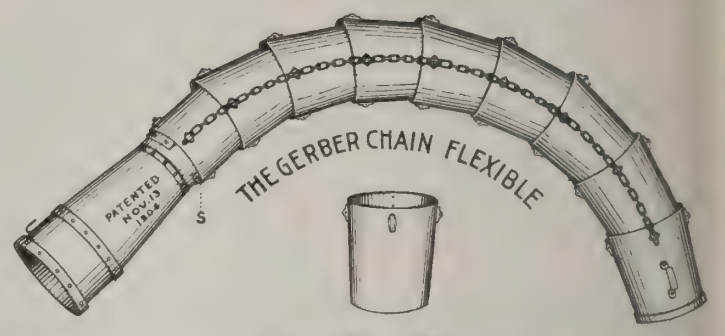
AGITATORS AT WORK.

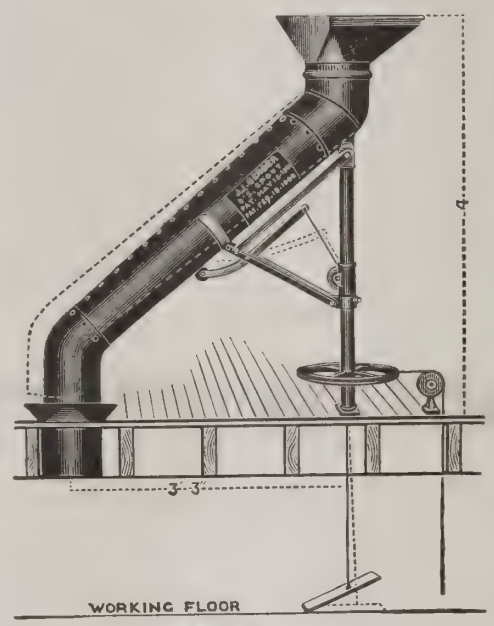
The handling of the 1919 wheat crop is nearly over in all sections of this state, and up to this time this office has no advice that there has been complaint lodged against any Illinois dealer. It is to be hoped that the unpleasantness of last year will not be repeated in this state, and it is not thought that it will be, but in one of our neighboring states a lecturer for the Farmers' Federation is endeavoring to stir up agitation. The facts are: This lecturer delivered his wheat to a certain dealer. It graded No. 2 and No. 3, and he was furnished a ticket with each wagon load showing the grade and price. When the delivery was complete he came in bringing his ticket and settled without protest or intimation that he was dissatisfied, accepted his check, and up to the time of writing this article has made no demand or request of the dealer for a different price, but he did take it up with the Zone Agent.

The first that the dealer knew of any dissatisfaction was when he received a letter from the Zone Agent advising complaint had been filed and asking him to advance his price and settle with the farmer. The dealer declined to do so advising the Zone Agent that no complaint had been made to him. After a lapse of time, the Zone Agent wired the dealer asking what he intended to do, and the dealer wired back that he did not recognize the complaint of the farmer as being one provided for under the terms of the contract and he could do nothing further. The dealer later received a letter from this Zone Agent advising him that if he did not make the adjustment he would pass it up to the Enforcement Division for investigation and action.

Now the buying basis not being known, this office has no comment to make regarding whether it was reasonable, but desires to call your attention to the fact that this Zone Agent's method of procedure is in conflict with the understanding that all the country grain trade have of the contract which they signed with the Grain Corporation, and with the interpretations of the contract as given by Mr. Julius H. Barnes, Wheat Director, at the General Conference in New York last June, which was that cognizance of the buying basis at country points was to be taken by the Grain Corporation only on complaint of a party at interest, and in such case the dealer would have the opportunity, before any action was taken, to justify the reasonableness of his buying basis. In this case no such opportunity has been afforded, but decision was made by the Zone Agent on ex-parta evidence.

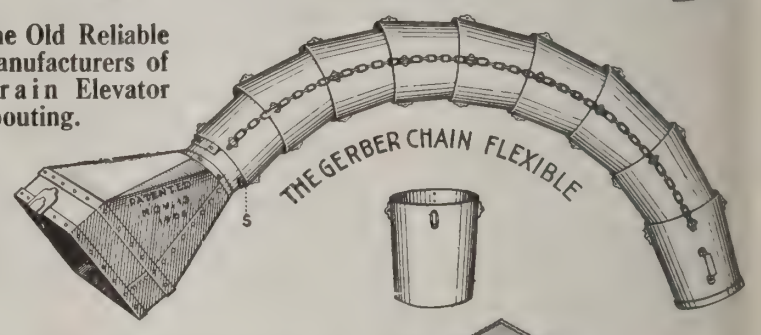


The contract states that complaint must be made or exception taken by the farmer or customer of country elevator operator at the time of the original transaction. This was interpreted by the Vice-President, Bert H. Lang of the St. Louis Zone in a letter to your Secretary under date of July 9th, 1919, in the following words: "If a producer makes no complaint either as to price, grade or dockage, at the time of delivery, he forfeits his right to make complaint thereafter."



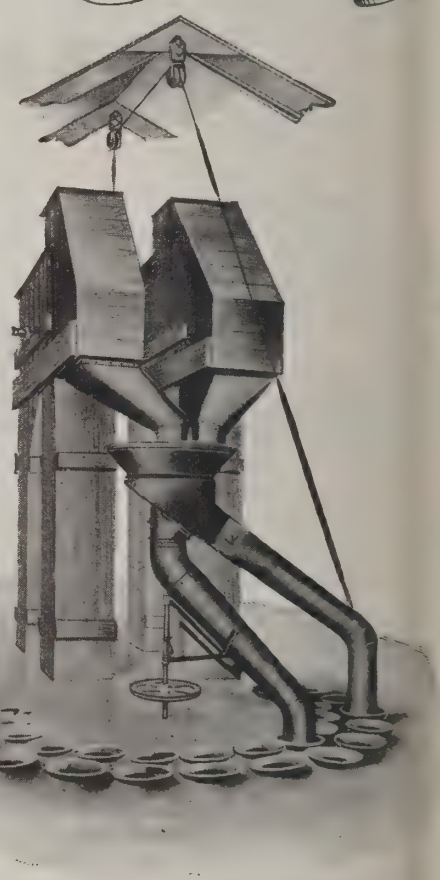
It is perfectly logical to assume that the actions of this Zone Agent are not in accord with the ideas in reference to the contract held by our Zone Agents and this is given you, only that you may be fully advised as to what is doing and to show that Agitators are still much in evidence.—*Sept. 1 Bulletin. Ill. Grain Dealers' Ass'n.*

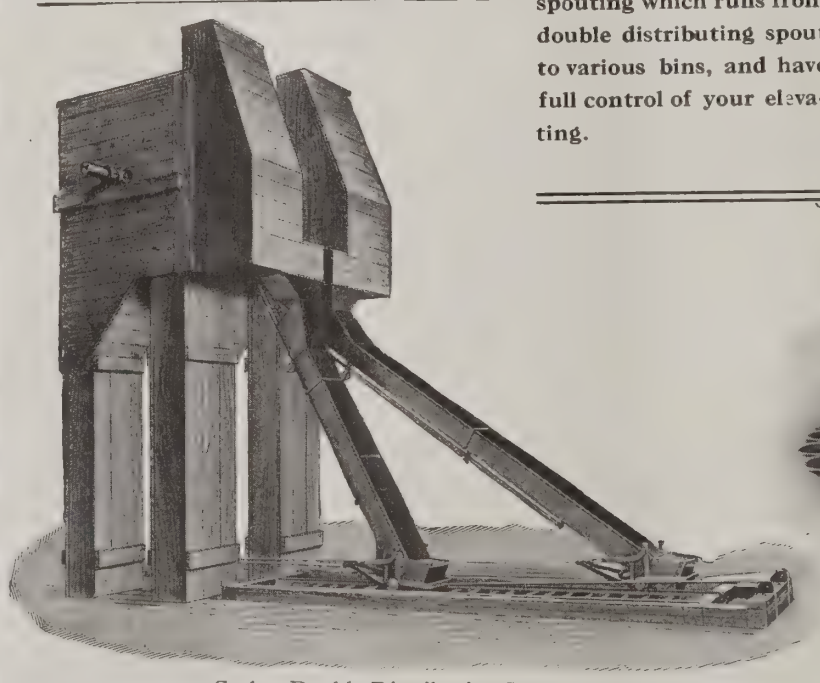
Gerber Products Are Sold on Their Merits



For They Are Practical and Durable at Right Prices

Double and Single Distributing Spouts and Four-lug Telescope Flexible Loading Spouts Have No Equals.





The Old Reliable Manufacturers of Grain Elevator Spouting.

For a double leg elevator use a double distributing spout and save half the spouting which runs from double distributing spout to various bins, and have full control of your elevating.

KANSAS STATE REPORT.

The Kansas State Board on Aug. 29 issued its August report on crop conditions, based on a canvass of the situation made Aug. 23. It says in substance:

Corn.—The crop may amount to 56,445,000 bus., the smallest acreage since 1881, and the prospective yield indicated is the fifth smallest produced in Kansas in 45 years, although it is more than last year's crop by about 12,000,000 bus.

The Sorghums.—The season subjects the sorghums to another test of their dry-weather-resisting powers, and with what success they have withstood the adverse conditions is well suggested by their average percentages of condition ranging 24 to 33.1 points higher than the percentage condition of corn, which is reported at 43.8. While the progress of the sorghums was checked by the unfavorable weather of the past month, these crops are in good condition and where recent rains have fallen, may be expected to respond with rapid growth. The acreage markedly decreased, being 1,881,000 acres, or less than last year by about 40 per cent.

Kafir. — Acreage, 729,000; decrease, 42.6%; condition, 67.8, or 14.4 points higher than a year ago.

Milo.—Acreage, 227,000, or 174,381 acres decrease; condition, 76.5.

Feterita.—Decrease of acreage, 61%, to 76,800 acres; condition, 73.4.

Sudan grass continues to grow in popularity in Kansas; acreage, 108,000 vs. 79,166 acres last year; condition, 76.

Broom Corn.—Only a little more than one-third as much broom corn was planted this year as in 1918—20,384; condition, 72.5 per cent. By far the bulk of state's broom corn is annually produced in a dozen or so counties in the southwestern part.

Newport Elevator Burns.

Fire of unexplained origin, starti on the top floor, destroyed the W. Prillman elevator at Newport, In. with all its contents. The grain d stroyed includes 5,000 bushels of whe 7,000 bushels of oats and 700 bushels rye. The total loss may be from $25,0 to $30,000. Prillman carried insuran

A correspondent of the London *Time* at Sofia reports that Bulgarian pe ants at the middle of July were wor ing day and night harvesting an abu dant wheat harvest of excellent qu ity.

YOU can do it by selling him the Ankorite Steel Drive Post. It gives him all of the advantages of other steel posts, PLUS THE PATENTED CRIMPED ANCHOR, which protects it against frost-heaving and side-thrust. That's the feature that clinches the sale every time, because it can't be bought in any other post.

Right now you have the opportunity of a lifetime to corner the fence post business in your territory. The demand is unparalleled—the post is right, the time is right, the sales plan is right, and all the resources of the Calumet Steel Company are behind you.

But you'll have to act quick. Farmers will be ready for the posts almost before you can get them, and territory is being closed fast. Dealers are ordering carload lots by wire, and can't get the posts fast enough to meet the demand!

Farmers know "the green post with the Crimped Anchor," and they won't be satisfied with anything less than Ankorite quality. Don't wait for your competitor to step in and secure exclusive sales rights—get in your initial order NOW, and clinch the Ankorite agency.

CALUMET STEEL CO., 208 So. La Salle St., Dept. 7, Chicago

ROPS IN TRANS-CAUCASIA.

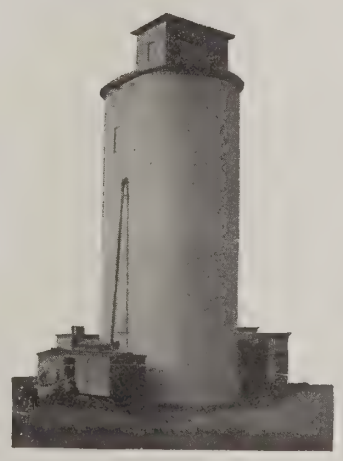
he regular correspondent of the erpool *Corn Trade News*, traveling ough Europe to Novorossisk in Transcasia, under date June 22, reports na, Bulgaria, peaceful "and every t of land carefully cultivated. I uired about crop prospects and was d that immediately after Bulgaria e up fighting all the men went home their farms and all the land was ivated. There is a great shortage of le and horses, and the Bulgarian sant has been paying fabulous sums buy them in Roumania or elsewhere. prospect for the harvest was very d indeed, and certainly as much as ld be seen bore this out."

n Trans-Caucasia there is the usual fusion—a medley of governments "all fering from want of unity, and capamen." Besides the levies of duties, *octroi*, at every boundary line, the ance in Georgia consists in the nting of roubles to about 600 to the glish £." It is Don currency and nting goes on *ad lib*.

he weather was very bad all spring umerous and heavy rains, which at st gave an abundance of hay and feed sheep and cattle. But "my old view hat no harvest in South Russia was r lost through rain, though rain after grain is cut can undoubtedly do an nense amount of harm.

You will be wondering whether there ny chance of export this season from s part of Russia. I was very pessitic about this in England, and am l of the opinion that the Odessa/ olaieff side, also the Upper Azoff not be exporters, but I think that vorossisk will do a certain amount of ort for several reasons. The crop l be much in excess of requirements the population of this part of the ntry. The total population of what alled the Southeast region is about millions, of which 80 per cent are upied solely with agriculture. The a of the country is larger than that France or Germany. The total cereal crop (wheat, rye, barley, oats and maize) is about 10 million tons, besides which some 400,000 tons of sunflower seed, some 600,000 tons of hempseed, tobacco, wool, sugar, etc. Before the war it carried seven million horned cattle, ten million sheep, two million pigs and three million horses. It is easy to see that with a good harvest there will be a very large surplus of grain. Some of this grain will doubtless go into central Russia, but it will be beyond the power of the railways to carry so large a quantity, and the most convenient thing will be to ship some of it to places like Greece, Italy and France, or England, and to obtain exchange wherewith to purchase the machinery, clothing, tools and utensils which must be had to enable the country to carry on. Central Russia will have to be partly fed by Siberia and the eastern provinces can be fed from America more conveniently or by shipping from Novorossisk to the Baltic."

Corn Cob Burners.



The new corn movement will soon find the fires started in thousands of cob burners scattered over the corn belt. The tonnage of potash for fertilizer has in the past few years been an important addition to our natural potash supplies. A fan for figures recently estimated that 3,000,000,000 bus. of corn cobs were thrown away annually only a short while ago, part of which is now treated to yield an adhesive gum used in manufacturing paper goods and for general pasting purposes. Possibly the earliest use for corn cobs was to grind them—mixed with molasses, resulting in a good cattle feed.

Miles Gannon, commissioner of agriculture for Idaho, has published a statement to the effect that "farmers have a right to contract the sale of their wheat independently of the Government contract price." The commissioner seems to have made a tremendous discovery.

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

W. L. Duncan of the Samuel Hastings Co. is making a trip through the Southeast.

Carl Grindler has been appointed assistant to Ray Williams, traffic manager of the Board of Trade.

Receipts and shipments for the month of August have been poor, owing to unsettled conditions. Dealers report poor demand.

Heavy rains and cool nights the past week have been detrimental to the corn, but have been of benefit to pastures and fall plowing.

Arthur Thistlewood of Thistlewood & Co. is taking advantage of the lull in business and with his family is taking a motor trip to Chicago.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is no change to report in the straw market, but there is a fair demand for good, long oat straw at $11.50@12 a ton.

Receipts and demand in the shelled corn trade are both light and the market is very quiet. Best grades are quoted around $2.09@2.11 a bushel.

Practically no ear corn is arriving here, but a few cars have been shipped direct from Cumberland Valley and Maryland to destination. No. 2 yellow is quoted at $2.15@2.20 a bushel.

The local market for grain is heavily congested owing to unusually heavy receipts and a persistent lack of demand. The latter is believed to be the result of unsettled conditions everywhere, purchasers being satisfied to take on only sufficient supplies to run them for brief periods. Evidently there is a feeling that the market is too irregular for stocking up, and local dealers are having difficulty in moving the increased receipts even at some concessions in price.

The situation is revealed in the supply of new oats. Practically all the oats arriving at this time are new oats. The receipts during the last period of a week totaled 326,000 bushels as against 151,000 bushels for the same period last year. Shipments bulletined were 180,000 bushels, as compared with 80,100 a year ago. The demand for oats is extremely light, and the yards and elevators are rapidly filling up. Buyers are indifferent even to reduced prices and only a limited number of cars can be placed at quotations around 79@79½c a bushel.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 304 cars. Stocks at the end of the week were. Flour, 36,000 barrels, decrease of 5,500; wheat, 959,500 bushels, decrease of 9,500; corn, 103,000 bushels, increase of 8,000; oats, 270,000 bushels, increase of 98,000.

Southeastern corn mills report dull demand for meal. Mills with capacity of 135,000 bushels, reported output last week of 16,703 bushels, or only 12.3 per cent of capacity, compared with 13.9 per cent the preceding week. Quotations: Bolted meal, f. o. b. Ohio river points, per 100 lbs., $4.40; plain, $4.20.

Lloyd H. Hanes, assistant general freight agent of the Nashville, Chattanooga & St. Louis Railway, has been elected vice-president of J. H. Wilkes & Co., one of the foremost milling and grain concerns of the southeast. Mr. Hanes has been with the railroad 29 years and has resigned to devote all of his time to his new business. He is regarded as a strong acquisition to the grain and milling trade.

Mills in the Southeast have the largest stocks of wheat in their history, with prices maintained. Corn has been declining with moderate stocks, and quiet demand. Oats are in fair demand. Shortage of cars has curtailed movement of white oats from Illinois. Quotations: Wheat—No. 2 red, $2.25@2.28. Corn—No. 2 white, $2.05@2.10; No. 3 white, $2@2.05. Oats—No. 2 white, 81@82c; No. 2 mixed, 80@81c.

Fair demand for flour in small lots is reported by Southeastern mills. Large buyers have anticipated their needs for a month or more, and are not in the market. Some buyers have bought more flour than they are able to withdraw within the 60 days' time prescribed by the Grain Corporation, and it is expected mills will cancel all such contracts to escape a penalty of 25c per barrel. Southeastern mills, with capacity of 230,790 barrels, had output last week of 185,310 bbls., 80.2 per cent of capacity, which compared with 39 per cent the same week last year, and 96.6 per cent in 1917. Quotations: Best soft winter wheat flour, 98 lbs. cotton, f. o. b. Ohio river points, $11@11.50; standard patents, $10.25@10.55; 100 per cent flour, $9.95@10.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

WESTERN CANADA.

A. Caldwell, Correspondent.

The cash market is irregularly active. There is expected to be a strong demand from the East for feed grains on any easing up of prices. Wheat is at present going to the mills which were running very short of wheat stocks, and all of which are grinding on heavy flour orders.

On the whole new crop wheat of which some 300 cars per day are now arriving, is grading much better than expected. The grain generally is a small sample, but of good milling value, the bulk of receipts coming in are grading No. 2 northern with a fair quantity of No. 1 and No. 3. Only small amounts of the new crop oats or barley are moving as yet.

There is practically no speculative interest in the market here. Bullish arguments fall flat when confronted with the outcry against high prices, while many regard the bear side as dangerous in the light of the inevitable demand from Europe and the probability that final returns from the North American crops will show considerable shrinkage from latest published official estimates.

The futures markets have followed closely the fluctuations in Chicago corn, although weather conditions in the Canadian West have also been a factor that has mitigated against holders of long grain. Public sentiment is set very strongly against any advances in prices and it is realized that declines in cattle, hogs and poultry must be preceded and accompanied by cheaper feed grain.

The close of the past week saw threshing held up for a day or two by heavy rains that were general over Manitoba and extended well into eastern Saskatachewan. A continuation of dry weather will be welcome, although the rain will put arable land in excellent shape for fall plowing. The earliness of the season should with average conditions from now on see threshing practically completed in September and all preparatory work for next year's crop completed before the freeze-up.

DULUTH.

S. J. Schulte, Correspondent.

Jackson Bros. & Co. have been admitted to firm membership and the Hagen Grain Co. to corporation membership on the Duluth Board of Trade.

C. T. Mears of the Itasca Elevator Co. has been elected a member of the Duluth Board of Trade arbitration committee to fill the vacancy created through the appointment of W. B. Joyce on the board of directors.

The movement of oats from the country this way has so far been limited, amounting to only a few cars daily. In line with other grains, the quotation in spot No. 3 white oats was cut down 1¾c to 67¼@68¾c.

Elevator men and grain houses on this market are receiving advices from correspondents to the effect that a normal acreage will be sown to spring wheat over the Northwest for next season's crop. In the event of favorable fall weather, it is thought that the area of land plowed this fall will be fully up to the mark, in spite of the uncertainty regarding prices likely to prevail for wheat and other grains next year.

Rye continued to be an active trading product on this market during the last week. As had been generally expected, the run of flax this way has so far been in good volume this season, receipts in the last six days ranging from 43 to 78 cars daily. Attributed mainly to the high cost of living agitation, the rye market was again under the hammer during the week, the quotation in spot breaking 10 cents to $1.43.

Applications have been made for the transfers of a Board of Trade membership of G. H. Spencer to G. B. Hathaway, and of a membership of A. D. Thomson to G. P. Harbison. In both cases the persons to whom the memberships are to be transferred have been released from military service, and they are returning to assume their old positions on the trading floor, the former with the Consolidated Elevator Co. and the latter with A. D. Thomson & Co.

Receipts of wheat on this market have so far been only of a scattering nature, but operators are looking forward to good movement from over parts of North Dakota and western Minnesota developing during the coming week. Cash handlers are of the opinion that the new basis o discounts on off-grade wheat as announced by Julius H. Barnes will lead to better deliveries by growers who had been generally disposed to hold, hoping for a reduction in the penalties previously in effect. It is thought that the new basis will lead to proportionately larger receipts at this market and a corresponding checking up in the movement to Minneapolis and other milling points.

CLEVELAND.

F. R. Sowers, Correspondent.

Heavy rains throughout northern Ohio for the past ten days, occurring almost daily, have no doubt benefited the corn, but have prevented much threshing and caused considerable oats in shock to become badly damaged.

Oscar Trapp, of Shepard, Clark & Co., and Frank Roby, hay inspector, spent a day last week traveling in the country through the hay producing district near Cleveland looking over some large consignments of hay Shepard, Clark & Co. are interested in.

Electric heaters have been installed in the Grain and Hay Exchange laboratory for the moisture testing machine. Heaters have been secured from the Hess Warming & Ventilating Co. of Chicago, and are certainly a decided improvement over the old alcohol lamp system.

A. A. Kemper, of the Sheets Elevator Co., is on an extensive vacation trip, taking a rest preparatory to the coming of a large poultry feed and remedy business, due to the Sheets Elevator Co. having sold out their builders' supply and coal business and purchased the Conkey Poultry Feed and Remedy line.

The Grain and Hay Exchange have placed themselves on record, through their board of directors, as officially favoring the adoption of the National Grain Dealers' Association confirmation blanks and urges all members to use the blank prepared by the National Grain Dealers' Association, or one similar to it in all their transactions.

The board of directors of the Grain and Hay Exchange, in recognition of the increased cost of maintaining adequate and competent grain inspection, also hay inspection, decided to increase the rates of the following: All in-grain inspection, $1 per car; all out-grain, 50c per car; hay, $1 per car; these prices to become effective Aug. 16, 1919.

The office of the Grain and Hay Exchange has added to its library current issues of the Price Current-Grain Reporter, which are appreciated by the members of the exchange, and their employes as well as various callers at the office who like to keep in touch with the grain situation by using the publications available at the office of the secretary of the exchange.

C. W. Fairchild, of the Cleveland Milling Co., returned from New York last week. W. C. Seaman, manager of the Herrman-McLean Co., spent several days during the past week on a business trip to various points in Minnesota. Ernest Hart, manager of the Lake Shore Elevator Co. and the possessor of a summer camp on the Lake Shore east of Cleveland, has been entertaining the families of his employes at his camp the past month.

New oats in this market have practically replaced old, and for the past week no old oats have been moving out of this territory. Such old oats as moves are usually at a premium of about four cents over the new. Very little corn moving in or out of this market in the past ten days. There is a good movement of good, new hay into this market, and is easily taken care of by the demand. Hay prices remaining steady for the past week on a basis of $34 for new No. 1 timothy.

MEMPHIS.

George Williamson, Correspondent.

After several weeks of extreme dullness business in grain picked up a little during the past few days. It was confined chiefly to oats, and was largely in the red variety. Stocks had been allowed to get so low that a little buying was necessary, even though the market was very much unsettled.

The local inspection department of the Merchants' Exchange has been kept busy taking care of the oats coming in from Texas and Oklahoma. Receipts have graded around 3 or better, with a small proportion off grade. A large share of receipts have been sent on to the Southeast, for business with that direction has been better than anywhere else.

There is less Texas corn offering and brokers think that September shipments have about been exhausted. Two white September shipments sold around $1.79@1.80 f.o.b. Memphis and feed manufacturers were the principal buyers. Corn from other directions is not being offered yet and arrivals during the week were very light and all going to feed makers. Fairly well distributed rains in part of this territory have helped late corn a lot and prospects are improved.

John B. Edgar, of the feed manufacturing firm of Edgar-Morgan Co., has been chosen as a candidate for city commissioner. He is one of a citizens' ticket selected in an effort to get the city rid of factional political control. Edgar has filled several offices in the Merchants' Exchange and showed himself to be a fine campaigner and it is felt that he stands an excellent chance to win in the election which takes place in November. It goes without saying that the grain and feed trade will pull strongly for him.

Yates & Donelson, for about 20 years engaged in the milling business here, their plant having a daily capacity of 800 barrels of flour and 1,500 of corn meal, have closed a five-year lease with the Stout-Hunt Milling Co. The new company composed of C. B. Stout and C. B. H who for several years have been here representatives of the Portland Flour and they will take charge of the r Oct. 1. The owners of this property cided to lease their plant because of failing health of Mr. Yates and bec Mr. Donelson has been compelled to sume the management of a large co factor firm. He was interested the and was chosen president after both ior members died. Both Yates and D elson are among the older members of Merchants' Exchange and have been active in the grain and milling trade

The Marfield Grain Co. received sam of new corn from Edgerton, Minn., Th day. The corn was matured and ou the way of frost.

North Dakota reports say that the a counter-invasion of duck brought on the grasshopper invasion. The ducks eating the grasshoppers by millions.

C. W. Plain, a farmer near Milton D., had a field of flax that was snc under last fall before he had an op tunity to thresh it. After the snow off this year he threshed the flax ag the advice of his neighbors and sec $7,011.43 for it.

Minneapolis millers protest that cannot make flour out of thin wheat pr ably at the new Government prices. order to get a high grade patent they u use a larger quantity of thin wheat, unless they do use a lot of extra w the flour is of poor quality.

A meeting of grain commission men, vator managers and bankers was he the trading floor of the Minneapolis Ch ber of Commerce Thursday to discuss recently passed amendment to the regarding a uniform disposition order seems that the new order is causing of additional work for the commi houses, and in order to facilitate the m ment of grain the elevator companies to take financial risk. They demand turnover order before loading out they have taken in for customers. In of a turnover order they want a bon protect them against mishap. Ban are in favor of the new rule as it tects them. Attempts to modify the will undoubtedly result.

Cash Markets.

Wheat.—A big flood of wheat struck local market during the week past prices declined swiftly on the first Since then the demand has not been brisk, but prices have held well. The nouncement of the Wheat Corporatio light weight wheat helped to sustain market at the end of the week. Rec of new spring wheat are heavy and elevators are just beginning to take s of the stuff. They are buying the weight wheat at Government prices mixing purposes. In addition to a l quantity of winter wheat sent here on tracts there were liberal consignments the market was glutted with offerings several days. There is a fairly good mand for the choice winter wheat tha millers want to store, but owing to heavy supply of new spring wheat th

ssing the demand for poor winter wheat s low. North Dakota shippers are com- ning of car shortage holding up their n. Some of the elevators are filled up. 1 dark northern sells at $2.45@2.55, No. rthern at $2.30@2.45, No. 2 dark north- at $2.25@2.40, No. 3 dark northern at 0@2.40, No. 3 northern at $2.14½@2.30, nsas and Oklahoma No. 2 dark hard ter sells at $2.33@2.35, No. 2 hard at 8@2.32, Nebraska at $2.26@2.28, Iowa 2.20@2.23.

orn.—The demand for corn has been r of late and prices are declining sharp- Receipts have been fair. Samples of corn arrived from Minnesota during week and indicated good growth and ellent quality. This corn will be ready ship next month. No. 3 yellow sells at 5@2.78.

ats.—Most of the week there was an fferent demand for all but the best ies of oats and prices were easier com- d with the futures. In the past day or the demand picked up a little and the ket displayed a slightly firmer feeling. 3 white, old, sells at ½@3c over Sep- ber, new at September price to 1c er. No. 4 white sells at 1@3½c less n No. 3 white.

ye.—Elevator buyers were the chief ers of rye in the past week and the and has not been very keen. Mill buy- were on the lookout for choice stuff paid as high as October price for the ctions. Elevator buyers paid ½c under ordinary No. 2. No. 3 quoted at 1@1½c . Receipts fair and of good quality on average.

Some of the farmers in western Kansas, who borrowed money from the Government to provide seed wheat last fall, are having difficulty in meeting the payments, owing to disappointing yields. Governor Allen has been asked by citizens of Jetmore to petition Congress to cancel the notes of farmers held by the Federal Land Bank at Wichita. Producers seem to think they should not pay in cases where yields fell below six bushels an acre, though there was no agreement to that effect.

Owing to a shortage of threshing machines in the Panhandle region of Texas, the threshing of wheat and oats in that part of the state has been greatly delayed, according to C. D. McDowell of Clarendon, who was in Kansas City this week. "We had to wait until threshing in eastern Texas was complete and then buy the old machines," said Mr. McDowell. "The factories failed to ship the machinery we ordered early in the season." Mr. McDowell predicted the planting of another big acreage of wheat in the Panhandle.

One of the biggest rain and electric storms that ever visited Kansas City came Wednesday night and continued through most of Thursday. About 6 inches of water fell, and there was important flood damage in low sections of the city. A fair amount of precipitation was reported in eastern Kansas and northern and central Missouri. Later good rains fell in southern Kansas and Oklahoma. The situation as regards pasturage and fall plowing for wheat was greatly improved, but the cornfields had generally matured or passed the stage of possible redemption.

Record Wheat Movement.

August receipts of wheat in Kansas City made a new high record. The arrivals were 14,012 cars, or 18,916,200 bushels. This compares with the previous high total of 16,187,850 bushels, scored in August, 1918. There was a steady movement throughout the month, with the blanket permit system of shipping in effect the first three weeks and also at the end of the period. During the final week the permit system was temporarily suspended, but the movement began to increase, and coincidentally the shortage of cars in Kansas City for outbound shipments became pronounced. Therefore, the permit system was reimposed on the country, with an intention of limiting the incoming cars to about 310 a day until conditions show improvement. Efforts are being made to return empty cars from the northern and eastern markets with more alacrity. It is also promised that the Gulf ports will have a larger number of ships, which will relieve the congestion at Galveston and New Orleans and thus afford an outlet for some of the Government-owned wheat in Kansas City.

Due very largely to the heavy marketing of wheat at high prices, the August bank clearings in Kansas City amounted to $1,113,475,000, the largest ever known here. It is estimated that the next official statement will show an increase of 20 per cent in local bank deposits.

Receipts of corn in August were 305 cars, against 1,147 a year ago; oats, 704 cars, against 1,632; kafirs, 59 cars, against 26; rye, 67 cars, against 31; barley, 161 cars, against 2; millfeeds, 321 cars, against 47; flour, 253 cars, against 191. Shipments in August were: Wheat, 5,314 cars; corn, 276; oats, 360; kafir, 28; rye, 13; barley, 33; millfeeds, 729; flour, 1,108.

Cash Grain Markets.

Wheat.—Receipts for the week, 3,684 cars, against 3,154 a week ago and 2,171 a year ago. Increasing difficulty of the outshipping situation, resulting in yard congestion, led to a restoration of the blanket permit system on country loading. The lack of cars as well as of motive power restricted shipments eastward, and the blocked condition of the Gulf ports prevented the United States Grain Corporation from moving its stocks south. At the end of the week came the announcement of embargoes at the Gulf and Atlantic ports. Shippers in Kansas City, as well as flour millers, were buyers of wheat only so far as they were assured an outlet. The demand became very slow, and some red and lower grade hard went direct to the Grain Corporation on the guarantee price basis. Stocks increased 1,632,000 bushels, to 11,920,000 bushels, more than half of which is owned by the Government and the remainder chiefly by outside millers, who either do not desire or are not able under present conditions to take the grain out. Most of the Government-owned wheat here is red, while the millers and elevator men own the bulk of the hard. Prices of hard showed a net weekly decline of 1c to 9c, closing as follows: No 1, including dark, semi-dark and yellow, $2.19@2.25; No. 2, $2.14@2.27; No. 3, $2.10 2.25. Red wheat closed unchanged to 2c down, with No. 1 at $2.18, No. 2 at $2.15@ 2.16 and No. 3 at $2.11@2.12. The revised scale of discounts on grades below No. 1, as promulgated by the Grain Corporation after the New York conference, will become effective Sept. 2. It gives No. 3 an advantage of 1c over the previous discount under No. 2 and will help the relative prices of No. 4 and lower grades.

Corn.—Receipts, 126 cars, against 66 a week ago and 238 last year. Notwithstanding the fact that shipments reduced elevator stocks 29,000 bushels, to 42,000 bushels, there was a very slow demand for fresh arrivals, especially in the latter part of the week. Price broke 10@12c on white and yellow, while mixed declined 11@13c. Closing quotations were: No. 2 yellow,

$1.83@1.85; No. 3, $1.80@1.82; No. 2 white, $1.78@1.80; No. 3, $1.75@1.77; No. 2 mixed, $1.78; No. 3, $1.75@1.77. A depressing influence in the market was the offering of Texas new crop corn in territory as far north as Chicago. Samples of the Texas grain were exhibited here and it was said that some purchases to arrive were made. Rains late in the week, while not of much benefit to the crop of Kansas, Oklahoma and southern Missouri, were helpful to pastures. Advices indicated a bumper crop in Iowa and a fair yield in Nebraska. There would have been larger offerings of old corn from Iowa if cars had been more plentiful. The new crop of Kansas is estimated at 56,445,000 bushels, about 31,000,000 bushels less than was expected in July. This is 12,000,000 bushels in excess of the 1918 yield.

Oats.—Receipts, 155 cars, against 188 a week ago and 527 a year ago. The market felt the influence of weakness in corn and barley. Shipping demand was restricted by the car situation. Prices broke 1@4c, with white off most. The closing quotations were: No. 2 white, 70c; No. 3, 69@69½c; No. 2 mixed, 68c; No. 3, 67c; No. 2 red, 69@70c; No. 3, 67½c. Many of the cars sold were stored, with futures sold against them, as indicated by an increase of 59,000 bushels in stocks, which are 1,035,000 bushels, against 1,251,000 last year.

Kafir and Milo.—Receipts, 18 cars, against 11 a week previous and 9 a year ago. Affected by the action of other feed grains, the market receded 4c to 5c per cwt. on kafir and 2c to 7c on milo. Prices at the close were: No. 2 white kafir, $3.45@3.50; No. 3, $3.38@3.45; No. 2 milo, $3.45@3.48; No. 3, $3.35@3.42. New milo is offered by Texas at $2.90 for the first half of September shipment. Old crop California milo has about all been moved, but the new crop of that state will soon be available. While Kansas shows a decrease of 40 per cent in the acreage of sorghums, there are 1,881,000 acres in the state, including 729,000 of kafir, 227,000 of milo, 76,000 of feterita and 719,000 of cane. Conditions at the end of August were: Kafir, 67.8 per cent of normal; milo, 76.5; feterita, 73.4; cane, 76.9. Only the late growth is likely to be damaged by frost. Shipping demand in Kansas City during the week was good. Stocks decreased 1,000 bushels, to 6,000, compared with 162,000 a year ago.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Garlicky wheat will be discounted just as heretofore, 2c per bushel from the regular grade.

Exports of grain for the week ending Aug. 29 were 45,861 bus. corn, 1,588,339 bus. wheat, 169,976 bus. oats, 66,795 bus. barley.

Raymond J. Barnes, salesman for the Philadelphia Export Co., has been proposed for membership in the Commercial Exchange.

Smutty wheat will be discounted according to the degree of smut, but in no case less than 2c per bushel under the corresponding regular grade.

Samuel J. McKnight, the well-known grain merchant and ex-president of the Commercial Exchange, is spending the week end with his wife at Ocean City, N. J.

William J. Rardon, treasurer of the Philadelphia Flour Club, and wife, who have been spending the summer in Atlantic City, have returned to their home in Philadelphia.

Receipts of flour and grain for the week ending Aug. 30 were 600 bbls. and 8,718,045 pounds of flour in sacks; 1,569,481 bus. wheat; 59,811 bus. corn; 214,445 bus. oats; 10,278 bus. rye; 108,777 bus. barley, 22,500 bus. malt, and 160 tons feed.

Mixed wheat will be discounted from 2 to 5 cents, according to quality and condition of mixture, but unless otherwise instructed, the trade may count on our taking 2 mixed wheat at Philadelphia just as heretofore, i. e., 2 cents under the corresponding regular grade.

Rouel Fernandez Zanetti, importer and merchandise broker, Havanna, Cuba; H. K. Schafer, manager of Maney Milling Co., Omaha, Neb., and his son, Earl Schafer; A. E. Yardley, representative of the Clover Leaf Milling Co., Buffalo, N. Y.; Theo. Carstens, Buffalo agent for Taylor-Bornique Grain Co.; J. A. Walters, president of the J. A. Walters Milling Co., Buffalo, and J. Frank Webb, grain dealer of Smyrna, Del., were visitors at the Commercial Exchange during the week.

A. J. Dando, elevator agent, Girard Point Elevator, has notified the trade that owing to the present congested conditions and the large number of cars of grain on hand to be dried, it will be impossible for them to handle the two part sample grade cars now on track, and it will be necessary to forward them to the Keystone Elevator Co. for handling. For the present we will continue to handle as fast as drying conditions permit the sample grade wheat loaded in cars in bulk without separation.

The United States Grain Corporation has notified the trade that, effective Tuesday, Sept. 2, the Corporation's purchases of wheat will be based on the following schedule of discounts: No. 2 wheat, under No. 1, No. 3 wheat 6c under No. 1, No. 4 wheat 10c under No. 1, No. 5 wheat 14c under No. 1. For all wheat otherwise conforming to the specifications of No or better, but deficient in test weight, the discount from the No. 5 price will be 3c per bushel for each one pound deficiency in test weight. Wheat grading below No. 5 for reasons other than deficiency in test weight will be bought on its merits.

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts of grain during the past week have been rather light owing to car shortage and tie-ups in the railroads. The cash market for Des Moines has been about 70c for oats and $1.80 for No. 3 yellow corn and one to two cents over government price for wheat. Some sections report that they are now getting cars and we will expect a heavy movement of grain during the next few days

Mayer-Holbrook & Co. announce to the grain shippers of Iowa that they have opened an office in Des Moines, Ia., Hubbell building, telephone Walnut 2781, under the personal management of V. S. Beall, who is well known to the Iowa trade, having over sixteen years' experience to his credit in the grain business. He will handle business in consignments, sale "to arrive," and future hedging orders for Chicago, Des Moines, Milwaukee, St. Louis and other terminal markets.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The Milwaukee Chamber of Commerce was closed Labor Day, Sept. 1.

Flour production at the Milwaukee mills for the past week reached a total of 13,900 barrels, of which 11,900 barrels was wheat flour and 2,000 barrels rye flour.

Milwaukee grain shipments for the week were 582,054 bu. oats, 128,193 bu. corn, 161,579 bu. barley, 47,173 bu. wheat, 82,682 bu. rye; total, 1,001,681 bu., against 480,667 bu. the preceding week and 1,029,015 bu. a year ago.

Receipts of grain at Milwaukee for the past week were 329 cars of barley, 188 cars corn, 547 cars oats, 257 cars wheat, 56 cars rye, 8 cars flax; total, 1,385 cars, against 1,081 cars the week before, 996 cars a year ago and 881 cars in 1917.

Winona Malt & Grain Co. has been incorporated with capital at $1,000 to buy, sell and deal in malt and grains, etc. The incorporators are Kurtis R. Froedert, Walter O. Teipel and Edwin J. Gross. Mr. Froedert is president and Mr. Teipel, vice-president and secretary of the Froedert Malting Company also.

In the Milwaukee cash grain market values for the past week show declines for all commodities under an increasing movement of new grain, the Government's attack on high prices, and the slow export trade, due to the unsettled condition of foreign exchange. Barley for the week declined 8@10c, corn 13@14c, oats 2@3c, rye 8@10c and wheat 5@10c.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: W. Gregory, Palmyra, Wis.; C. H. Fintel, Genesee, Wis.; Geo. Plummer, W. J. Scott, R. A. Bodmer, Chicago, Ill.; C. E. B. Oldham, Bremerton, Wash.; A. H. Stumph, Chicago, Ill.; F. Johnston, Marquette, Mich.; H. E. Kenney, Indianapolis, Ind.; D. Utter, Lake Beulah, T. H. Cochrane, Portage, Wis. J. G. Martin, Sturgeon Bay; G. V. Dearing, Columbus, Wis.; F. Brongenske, Windside, Neb.; H. G. Harvey, Minneapolis, Min.; H. C. Shaw, Buffalo, N. Y.; C. H. Whitney, Minneapolis, Minn.; Geo. Marble, Max Cohan, Chicago, Ill.; J. C. Mitchell, C. A. Hillyer, Chicago, Ill.; C. W. Zastrow, Hawkeye; H. N. Hammon, Marshaltown, Ia.; G. K. Seeber, Waterloo, Wis.; N. R. Reasoner, Omaha, Neb.; H. W. Hellier, Minneapolis, Minn.; O. A. Neibuhr, Fall Creek, Wis.

BUFFALO.

E. Bangasser, Correspondent.

F. M. Turnbull, Philadelphia manager for Taylor & Bournique, Milwaukee, was on 'Change this week.

Peter V. Heckler, grain dealer of Toledo, Ohio, was on 'Change this week. Mr. Heckler had a good word to say for his home town.

Rye was not wanted by the local trade in carloads and exporters have taken about all there was for sale here in store. Carloads on track were quoted at $1.50 for No. 2, through billed.

Oats were cleaned up daily and the decline was steady from last week. Oatmeal mills took the good weights and occasionally paid a premium for heavy and feed men were good buyers of the regular run.

B. F. Schwartz & Co.

RECEIVERS AND EXPORTERS

WHEAT - CORN - OATS - BARLEY

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

On the whole, it was a very satisfactory market. Closing: No. 1 white, 77½c; No. 2 white, 77c; No. 3 white, 76c; No. 4 white, 75c on track, through billed.

Wheat receipts continue light and there was no difficulty in selling all the offerings, regardless of quality, at stronger prices than last week. The offerings were mostly red winter, and sales of No. 2 were at $2.28; No. 3, $2.24@2.25; No. 4, $2.20@2.22; No. 5, $2.16@2.18, on track, through billed. The receipts of spring wheat were mostly sold to arrive and at considerable over the Government prices.

There was really no corn market here this week, so few cars coming to hand for sale, and it was only when a buyer was in need of a car that a sale was made and then he had to pay some price. There was a sale of No. 1 yellow, at $2.09, early in the week and at the close several anxious sellers were trying to get $2.03 for No. 2 yellow. Possibly $2.02 would have found a buyer. The general opinion was that everything was ready for a big slide in corn next week.

Inspection track receipts for the week: No. 4 soft white, 3 cars; No. 2 red, 4 cars; No. 3 red, 22 cars; No. 4 red, 34 cars; No. 5 red, 6 cars; No. 2 mixed, 1 car; No. 3 mixed, 5 cars; No. 4 mixed, 5 cars; No. 5 mixed 1 car; No. 1 dark hard, 14 cars; No. 3 dark hard, 15 cars; No. 4 dark hard, 2 cars; No. 1 hard, 10 cars; No. 2 hard, 58 cars; No. 3 hard, 40 cars; No. 4 hard, 15 cars; No. 5 hard, 2 cars; sample, 1 car; No. 1 dark northern, 4 cars; No. 2 dark northern, 27 cars; No. 3 dark northern, 18 cars; No. 4 dark northern, 3 cars; No. 1 northern, 1 car; No. 2 northern, 1 car; sample spring, 4 cars. Corn—No. 1 yellow, 12 cars; No. 2 yellow, 8 cars; No. 1 white, 3 cars; No. 2 white, 2 cars; sample mixed, 2 cars. Oats—No. 1 white, 32 cars; No. 2 white, 98 cars; No. 3 white, 65 cars; sample, 3 cars. Rye—No. 2, 1 car; No. 3, 1 car.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen were numbered among the visitors upon the floor of the Produce Exchange: J. Stewart of Winnipeg, F. M. Turnbull of Philadelphia, James R. Ness of Toronto, Ont., and B. H. Trusseill, Joe Ball, H. J. Beam and J. R. Short, all of Chicago.

A meeting of the members of the New York Produce Exchange interested in Breadstuffs will be held on Tuesday, Sept. 2 at 3 p. m. in the managers' room to take suitable action in relation to unfounded criticisms appearing in the public press concerning the conduct of dealers in breadstuffs.

Oats on spot ruled weak, due more or less to the absence of export buying and in sympathy with corn. Domestic demand was fair early in the week, but toward the close sagged off and became rather dull. Quotations follow: No. 2 white, 84c; No. 3 white, 82@83c, and No. 4 white unquoted.

The death notice of Robert W. Rouse, Official Inspector of Provisions for the New York Produce Exchange, was posted during the week. Mr. Rouse was 61 years of age at his death, and his passing will be mourned by the Provision Trade of the N. Y. P. E. among whom he was long and favorably known.

There has been only a small trade in cash corn during the week, and the market was depressed owing to the continued weakness in the West, and a greater desire on the part of the country to sell part of their holdings of old corn due to competition of new corn from Texas. Agitation against high living costs also influenced holders. Prices as quoted are more or less nominal. No. 2 yellow, $2.02; No. 2 white $2.03; No. 2 mixed, $2.01.

Trade in the local flour market during the week was not active, and apparently buyers do not feel inclined to make large committments under the uncertain conditions now prevailing. Arrivals of flour are of moderate proportions, consequently stocks remain light. It is reported mills in both the Northwest and Southwest are more willing to sell, and even are disposed to shade their prices a trifle. Spring Patents were quoted at $11.35@12 and first spring clears $9.25@10.25, while soft winter straights ruled at $10.10@10.40, and Kansas straights, $10.80@11.25.

S. B. Cleverley, brother of E. L. Cl erley, New York Manager of Jack Brothers & Co., lately returned from rope, reports that economic conditions some of the Continental countries are ing exaggerated, but that in England chaotic labor situation is causing som take a very pessimistic view of the pi pects of early resumption of business its pre-war scale. Mr. Cleverley, h ever, is inclined to believe that conditi in England will readily adjust themse within the near future. He looks to the United Kingdom again assume prominent place in international trad

BALTIMORE.

Robert G. Neu, Correspondent.

Stocks of wheat in Baltimore eleva are now past the 3,000,000-bushel m but weekly clearances are also on a l scale.

A. A. Cunningham, of Sneath & C ningham Company, grain shippers of fin, Ohio, was a visitor on the floor of Baltimore Chamber of Commerce week.

The friends in the trade of George Jackson, second vice president of the U Grain Corporation, will regret to learn the death last week of his mother, a 80 years.

Nearly a half million bushels of g were loaded aboard the steamships E burn and Nervier by W. E. Harris & grain exporters of this city, last week delivery to Belgium.

The receipts of new water-borne wh in the Baltimore market so far this s son amount to 786,000 bushels, as aga 925,000 bushels arrived up to the co sponding time last year.

The Traffic Bureau is in receipt of vice that the Administration has iss freight rate authority for the publica on 30 days' notice by the railroads of duced rate of 27½c per 100 lbs., Baltin to Chicago and Milwaukee, and to po intermediate, on the usual percent basis. The B. & O. promises publica of tariff at the earliest possible date.

To facilitate the importation and h dling of Argentine corn through this p and to take care of the frequent shipm of grain westbound from this market Chicago and points in Ohio, Indiana Illinois, the Traffic Bureau recently m request upon the Railroad Administrat through the B. & O. Railroad, for the establishment of a special grain rate fr Baltimore to destinations in the ab territory.

Harold Anderson, Federal grain su visor of the Bureau of Markets, with he quarters at Baltimore, will give a pu demonstration of wheat grading, acco ing to Government standards, at the co house in Hagerstown, Md., on the af noon of Sept. 9. F. W. Oldenburg, of

BURLAP BAGS

Bosworth Bag Company

MEMPHIS, TENN.

tension Service of the Maryland Agri-tural College, will have on hand samples Maryland grown wheat and Mr. Ander-n will use the apparatus from his labo-ory to make the various tests of the mples and grades of wheat.

E. Steen & Bro., well-known Baltimore ain and hay receivers, who are con-antly adding to their equipment and cilities at their private warehouse and vator on Warner street, this city, last ek telegraphed their second order to e Weller Manufacturing Co., 1856 North stner avenue, Chicago, Ill., for a car der, the first machine of this kind they talled having given such satisfaction—d the business of the firm having grown —that the necessity for a second car der naturally suggested itself.

Walter B. Brooks, president of the Can-n Company, announces that within the xt two or three months the biggest pier the Atlantic Coast will be completed that company at Canton, in anticipa-n of a big increase in the export and port trade of Baltimore. The new struc-e will be 1,700 feet long and 270 feet de, with a depth of water on each side 35 feet. It will be able to accommodate 10,000-ton ships at one time and will equipped with the most modern appli-ces for unloading and loading vessels. ilroad tracks will run down its center d sides.

Pierce Ryan, track sampler of grain for e Baltimore Chamber of Commerce for ny years, and who was retired on full y some years ago in recognition of a g service well and faithfully performed, still hale and hearty at 86 years, and y be seen daily taking a stroll about his me on West Fayette street when the ather is favorable. Here is a man who s drawn more samples of grain from 's than any other official of the inspec-n department of the Chamber of Com-rce. In his day it was often necessary walk miles through the railroad yards locate a particular car that had not been "placed" for inspection, but when op" Ryan went after a sample he usu-y got it. Distance and weather had no rors for him, and every morning, for 35 rs, he was "on his job" at 7:00 o'clock. s regular habits in early life are prob-y responsible for his good physical con-ion at his present age, and he has a st of friends on 'Change who keep in nstant touch with him and wish him ny more years of peace and content-nt.

BOSTON

Robert S. Wallace, Correspondent.

Stocks of grain in regular elevators Aug. were as follows: wheat 45,208 bushels; s 378,948 bushels; rye 26,826 bushels; rley 313,216 bushels.

Receipts of grain and flour for the month August, 1919, were: wheat 493,930 bush-; corn 1,100 bushels; oats 1,236,860 bush-; barley 516,450 bushels; malt 5,880 bush-; cornmeal 3,110 barrels; oatmeal 1,200 es 8,600 sacks; flour 126,518 barrels.

Very little demand reported for nearby rn although offerings are extremely ht and held very firm at the following otations: No. 2 yellow corn at $2.08@2.10 bushel and No. 3 yellow corn at $2.06@ 8 per bushel.

The buying of oats during the past week s been rather light with prices quite ne lower than and quoted about as fol-ws: Old 40/42 lb. fancy oats at 89½c per shel; old 38/40 lb. fancy oats at 89c per shel; new 40/42 lb. fancy oats at 87 to ½c per bushel; new 38/40 lb. fancy oats 86½ to 87c per bushel; new 38/40 lb. ular oats at 85½ to 86c per bushel; and w 36/38 lb. regular oats at 84 to 84½c bushel. Receipts for the week ending g. 30 were 271,950 bushels.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

Arthur B. Lloyd has started construction a new flour mill at Providence, Ky., ich will have a daily capacity of 25 bar-s.

Wilbur N. Erskine, of the Atkin-Erskine ling Co., Evansville, Ind., died on Aug. according to a press dispatch. Mr. skine was 34 years of age, and had been bad health for some time.

Work is well underway on a new $50,000 proof seed house at the plant of the isville Cottonseed Products Co., which ently lost its seedhouse and a large ntity of seed in a bad fire.

A number of seedsmen are planning to ibit at the Kentucky State Fair this r in September, starting Sept. 8, but present street car strike will probably ult in the fair being a fizzle unless a promise is effected by that time.

Oats are in fair demand at top prices, No. nd 3 white being quoted at 80c a bushel. No. 2 mixed 78½c. There is a fair de-nd for oats, which have been moving l. Rye is dead, except seed rye which selling at around $1.90 a bushel in car .

For the first time in several months yel-corn is quoted at more than white, this ng due to a general slump in demand for ling corn. The market during the week was stronger than many men had expected. On Saturday No. 3 white corn was quoted at $2.06 a bushel, with No. 3 yellow and mixed at $2.08 each.

G. A. Breaux, of the Ballard & Ballard Co., Louisville, was named chairman of a joint publicity committee of the Southeastern Millers' Association and Southern Illinois Millers' Association at a meeting in St. Louis on Wednesday, at which time it was decided to spend $100,000 in a publicity and advertising campaign in newspapers to increase consumption of wheat flour. J. B. McLemore, secretary of the Southeastern Association, headquarters Nashville; Mr. Anderson, Acme Mills, Hopkinsville; Mr. Bryan, Liberty Mills, Nashville, and Mr. Bronson, Cole Milling Co., Chester, Ill., are the other members of the committee.

TOLEDO.

Carl Bryant, Correspondent.

Edward Frensdorf of the Hudson Milling Co., Hudson, Mich., was a visitor on 'change Friday.

Fred Mayer, president of Produce Exchange, returned Saturday after a week in Michigan.

Flour production of Toledo mills last week increased to 98 per cent of capacity. Mills produced 46,900 bbls., as compared with 44,500 the previous week and 24,214 last year. Production in August was 171,-768 bbls., as against 83,390 bbls. in August, 1918.

W. W. Cummings of J. F. Zahm & Co., returned to the floor Saturday after a 500 mile trip through Ohio and Indiana. He says elevators everywhere are loaded to the roof with wheat that cannot be shipped out because of car shortage. Farmers, he says, are inclined to hold back their oats pending more definite news on the corn crop.

Receipts of all wheat at Toledo during the month of August amounted to 1,187 cars, grading mostly No. 3. Receipts of smutty wheat amounted to 251 cars. Out of 551 cars of straight red winter inspected only one per cent graded No. 1; 15 per cent No. 2; 44 per cent No. 3; 31 per cent No. 4; 7 per cent No. 5, and 2 per cent sample grade.

While there was a slight increase in wheat receipts at Toledo during August over last year the total of all grain received was almost two million bushels less than the same period in 1918. The decrease is in oats which this year are being held back for lack of cars. Receipts were 500,300 bus., as compared with 2,585,200 in August, 1918. Toledo, on the other hand, gained considerable prestige as a rye market, receiving 240,000 bus. as against 70,000 a year ago.

Saturday was official burial day for the straw hat on the Produce Exchange, and fitting ceremonies were held. Straws that had served their owners so faithfully during the heat of the summer were ruthlessly maimed and utterly destroyed in such a manner as would make the profiteers chuckle with glee, and as a result shops down town did a land office business in the new fall styles. Many a dignified member of the trade lost his "lid" in the scuffle that followed the tank-like methods of the dealers to bust every stray, and was compelled to hie himself bareheaded to the nearest hat store. A Mennel, president of The Mennel Milling Co., was last to appear on 'change before the closing gong, and taking in the situation and the inevitable result, decided to "beat them to it." He took one look at his slightly yellowed straw and throwing it to the floor jumped on it to the hurrah's and hand-clapping of his associates.

CINCINNATI.

George Mosbacker, Correspondent.

Max Blumenthal has returned from his semi-annual trip to the Northwest. He reports gratifying results for his barley business.

Extensive enlargement of the Cincinnati plant of the National Biscuit Co. is indicated in a request made to the Chamber of Commerce for information on available sites for a new plant.

C. A. Custer, who has supervision of the local grain business of the Cleveland Grain Co., which also includes direction of their recently established hay department, left Friday for a ten-day visit to Indiana.

The merger of the Chamber of Commerce and Business Men's Club, after more than eight months of conferences and attempts to reach a mutually satisfactory understanding, has been declared off.

Total inspections of grain and hay at Cincinnati the past week were: Wheat, 222 cars, of which 39 graded No. 2, 87 cars No. 3, 62 cars No. 4, 29 cars No. 5, and 5 sample. Corn 63 cars, ear corn 10, oats 99, rye 20, and hay 245 cars.

A resolution not to call any strike within 90 days and favoring acceptance of President Wilson's offer of an increase in wages of 4c an hour was adopted by various branches of the Federation of the Southern Railroad shopmen here the past week.

E. B. Terrill, president of the Grain and Hay Exchange, received notice from Julius H. Barnes, wheat director, that if any local handlers of wheat have not applied for licenses they should notify H. D. Irwin, second vice-president, at Philadelphia, im-

mediately, explaining why they have not done so, and the nature of their business.

Lew McGlaughlin, of the grain and hay firm of Dan B. Granger & Co. will leave this week with a party of friends for a month's hunting and fishing trip along the south coast of Hudson bay in northern Canada. The party is encouraged at the prospect of shooting more deer and moose than on a previous trip as the game at this point is reported as largely increased in numbers.

The Cincinnati Chamber of Commerce has appointed a committee consisting of A. M. Braun, E. A. Seiter and George A. Dieterle to discuss the matter of bringing the grain and hay trade back into the chamber. The Grain and Hay Exchange, which was formerly a subsidiary organization of the chamber withdrew from that body in April, 1918, and established an independent exchange when the directors of the chamber declined to allow the grain trade full control of its own affairs.

Six suits against railroads entering Cincinnati were filed by the Early & Daniel Co. in Superior Court recently, seeking judgments for refunders of freight charges because of alleged delay in transportation, loss of weight in transportation and losses of value due to cars being broken open when in transit. The plaintiff seeks to recover a total of $6,815.59. Its petition against the Cleveland, Cincinnati, Chicago and St. Louis railroad company seeks judgment for $1,939.72; against the Baltimore and Ohio Railroad Company, $806.39; against the Cincinnati, New Orleans and Texas Pacific Railroad Company, $886.47; against the Pittsburg, Cincinnati, Chicago and St. Louis Railroad Company, $268.08; against the Norfolk and Western Railroad Company, $497.22; against the Louisville and Nashville Company, $2,417.71.

Cash Markets.

Wheat—The wheat market held an even tone, with no important changes in price throughout the week, but the underlying strength for good milling grain, which is showing greater scarcity favored higher prices. Receipts showed some falling off during the week, and some complaint was made of slower demand, but offerings were well absorbed each day. No. 1 red winter, track, $2.26@2.27; No. 2, $2.24@2.25; No. 3, $2.20@2.22; No. 4, $2.15½@2.17½; No. 5, $2.11@2.15; low grades as to quality, $2.05@2.18. Smutty wheat discounted from 2 to 4c per bushel as to grade.

Corn—The corn market suffered losses of 12 to 14c per bushel for all kinds and grades as compared with a week ago as a result of an indifferent demand and declining inclination of futures. White grades especially were dull and offerings had to be carried over from day to day for want of bids. Ordinary mixed was neglected, and only an occasional car of yellow or "nearly yellow mixed" found buyers. At the reduced prices a better demand prevailed toward the close of the week and the accumulation was fairly cleared. Saturday the market was dull and easier because of the approaching holidays. No. 1 white, $1.88@1.89; No. 2, $1.87@1.88; No. 3, $1.86@1.87; No. 4, $1.83@1.85; No. 5, $1.81@1.83; No. 6, $1.79@1.81. No. 1 yellow, $1.89@1.90; No. 2, $1.88@1.89; No. 3, $1.87@1.88; No. 4, $1.85@1.87; No. 5, $1.83@1.85; No. 6, $1.81@1.83. No. 1 mixed, $1.87@1.88; No. 2, $1.86@1.87; No. 3, $1.85@1.86; No. 4, $1.83@1.85; No. 5, $1.81@1.83; No. 6, $1.79@1.81.

Oats—The weakness of corn was to some extent reflected in oats, but a good demand throughout the week had a fairly sustaining influence and declines were only 2 to 2½c. Top grades of white of heavy weight commanded a slight premium. Mixed was scarce and in fair demand. Saturday the market was dull and easy. No. 1, white, ..@..; No. 2, 74@74½c; No. 3, 73½@74c; No. 4, 72½@73½c. No. 1 mixed, ..@..; No. 2, 72½@73½c; No. 3, 71½@72½c; No. 4, 70½@71½c.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Trade has been quiet all this week. Buyers all seem to be waiting developments before starting in to purchase their thirty or sixty day requirements.

Stocks here are very light in all lines and, as a result, track hay, oats, feeds, are selling at considerably more than quotations to arrive.

Prices quoted here, basis yesterday, 29th inst., were as follows: Wheat—No. 1 red, $2.34@2.35; No. 2 grade, 3c less. Corn—No. 2 white corn, $2@2.03. Oats—No. 3 white oats, 77½@78½c. Rye—No. 2 rye, $1.56@1.57. Hay—No. 1 timothy, $33; light mixed, $33; No. 2 timothy, $31.

September is usually a busy month with the Richmond buyers and shippers, and with stocks very light to start with, we look to see exceptional demand, especially for immediate shipments.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Cattle market was generally steady at the recent declines. Best grades of calves steady with others lower.

Oats receipts were 9 cars, with fair demand from shippers. No. 2 white, 71@71¾c; No. 3 white, 71c; destination weights.

Hog market at Peoria yards showed considerable strength Saturday, after a sharp decline of $3 to $3.50 per hundred the past few days. A good demand caused the reaction in the market and trading was active at the advance. Receipts were 500, with bulk of sales ranging from $18.00 to $18.75 per cwt.

Saturday's corn market at Peoria about unchanged from Friday, although sharp declines were frequent during the week and prices were 10 to 12 cents lower than last week's close. Local demand very dull, and the greater portion of offers were bought by shippers. Receipts somewhat larger but a heavy run of corn not expected. No. 1 yellow, $1.82½; No. 3 yellow, $1.82¾.

The members and friends of the Good Fellowship Club of the Peoria Board of Trade met at Glen Oak Park Thursday afternoon for their annual outing and basket picnic. Games and races for the youngsters and contests for the older folks as well, with an array of prizes, was part of the event. At 6 p. m. a basket picnic was served. The Club furnished ice cream and soft drinks to all. The picnic was followed by dancing in the pavilion. J. W. Bryan, president of the Club, is receiving many comments on the manner in which he is promoting the success of the Good Fellowship Club.

Corn Products Co., after being closed for several weeks, have reached an agreement with the members of the Corn Products Union, and all the employes are expected to return to work during the week. The mechanics who have a separate demand, including a change in classification to conform to the classification in force at the Argo Plant, were not included in the agreement, but it is expected that the matter will be adjusted so that the mechanics will return to work at the same time as the other employes of the company. 417 Postal Telegraph Bldg.

CHICAGO, ILL.

ST. LOUIS.

E. E. Reeves, Correspondent.

B. H. Lang, second vice-president of the Grain Corporation, returned Saturday from a meeting of his organization.

Southern Illinois millers and grain dealers are complaining of a scarcity of cars for loading grain and grain products.

W. G. Davison, secretary of the Ottawa Mills Co., was among the visitors on the floor of the Merchants' Exchange Wednesday.

G. A. Breaux, of Ballard & Ballard, the well-known millers of Louisville, Ky., was a visitor on the floor of the Merchants' Exchange last Wednesday.

The feed and seed house of J. B. Mueller at Florissant, St. Louis County, suffered a loss of $15,000 by fire last week, but the loss was fully covered by insurance.

Henry C. Yaeger, an old-time miller, who about 30 years ago was with the Anchor Mills in this city, was a visitor on 'Change last week, renewing old acquaintances.

J. M. Chilton, Federal supervisor of grain of the U. S. Department of Agriculture at Kansas City, Mo., was a visitor on the floor of the Merchants' Exchange Saturday.

The Food Administration Grain Corporation embargo on shipments to the Atlantic or Gulf ports had a depressing effect on business in the pit as well as in the cash grain corner.

W. B. Anderson, Jr., president of the Acme Mills of Hopkinsville, Ky., was a visitor in St. Louis Wednesday, getting posted on the market and shaking hands with many of his father's old friends.

M. F. Forsyth, who was formerly with W. J. Edwards & Co., but more recently was with the Food Administration at Cairo, Ill., was a visitor on the floor of the Merchants' Exchange last week.

J. B. McLemore of Nashville, Tenn., secretary of the Southeastern Millers' Ass'n, was a visitor on the floor of the Merchants' Exchange Wednesday. He was introduced by Joseph E. Dixon, of the Schreiner Grain Co.

Secretary Eugene Smith has let contracts for the renovation of the grand hall of the Merchants' Exchange to have it ready for the grain dealers' national convention, Oct. 13, 14 and 15. This hall is the largest hall in the country that is free of columns and has an unbroken floor.

Maj. J. A. Bushfield, who for the past two years has been chief of the Forage Branch of the Quartermaster General's office at Washington, D. C., has been discharged and will engage in the grain business in St. Louis. He will operate under the name of Bushfield Grain Co., with offices in the Pierce Bldg.

On Monday, Sept. 8, members of the Merchants' Exchange will vote on a proposition to prevent speculation and profiteering in membership certificates in the Exchange. This action was rendered necessary on account of the urgent demand for memberships in the Exchange, on account of the many new firms who are coming to St. Louis in order to take advantage of the many advantages and the wonderful increase in the grain and allied business of this market.

Lieut. Commander Norman Scott, son of Robert E. Scott of Goffe & Carkener Co., is in command of the American Eagle boats, now operating on dispatch service in northern Russian waters. Lieut. Scott was navigator of the Jacob Jones when it was torpedoed and sunk by a German submarine, Dec. 6, 1917. He was promoted for his courage and coolness in saving the members of the destroyer's crew. He is 28 years old and is well and favorably known on the floor of the Merchants' Exchange.

Good news for the grain trade in Mississippi Valley was contained in a letter to Congressman Igoe of St. Louis from John Barton Payne, head of the shipping board, which promised increased shipping facilities between New Orleans and European ports. This action followed representations made in behalf of the requirements of the Mississippi Valley producers. The schedule announced by Judge Payne provides the following monthly sailings of ships from New Orleans: Four to Liverpool, one to Manchester, two to Bremen, two to Havre and Bordeaux, two to London, two to Rotterdam, two to Glasgow, two to Gothenburg and Copenhagen, two to Hamburg, two to Genoa, two to Antwerp, one to Barcelona, and one to Trieste and Fiume.

IMPORT AND EXPORT PRICE.

Following are the import and export prices of below mentioned commodities on dates named, as averaged by the Bureau of Foreign and Domestic Commerce, import prices being values in foreign markets and export prices those at the time of exportation:

CHICAGO DISTRICT

Spring, Soft and Hard Winter Rye

Charles T. Peavey

327 S. LA SALLE ST., CHICAGO

We have a splendid connection on corn flour and can give the character of service in other flours that is required.

Death of James M. Jenks.

On Saturday, Aug. 30, James M. Jenks of the Nye & Jenks Grain Co., Postal Telegraph Bldg., Chicago, died after an illness of about two weeks at the age of 69 years. His death was a great shock to his family and many friends in the grade trade, for his illness was not considered so serious and it was thought that he would be up and about within a very short time. However, heart failure was the immediate cause of his death.

Mr. Jenks' experience in the grain business dated back some 35 years, he having started his career in Michigan. He removed to Minneapolis in about 1890, where he organized Nye, Jenks & Co. About 1893 the Nye & Jenks Grain Co. was organized in Chicago and Mr. Jenks became a resident of this city at that time and a member of the Chicago Board of Trade, continuing in active business until the time of his death.

His death will not affect the business as the corporation will be continued as formerly.

Interment was Monday, Sept. 1, at Harbor Beach, Mich., the former home of Mr. Jenks.

Omaha	324,000	369,000	839,000
Indianapolis	292,000	167,000	536,000
Total	2,883,000	2,024,000	5,077,000
Shipments	1,222,000	993,000	2,004,000

Getting Results.

It is only through careful planning and following up every detail of advertising and selling stock feeds that manufacturers today get the general results and broad business to which their product may entitle them. THE PRICE CURRENT-GRAIN REPORTER has in many articles emphasized the first importance, of course, of manufacturing a dairy ration, hog, horse, sheep and general purpose feeds from suitable ingredients, properly balanced, so that the guaranteed analysis on the bag be likewise just the quality from which best results will show in feeding operations. The Park & Pollard Co. of Illinois, with offices in the Webster Bldg., Chicago, and a model plant in the Chicago switching district, providing good facilities for prompt deliveries, is one of the firms realizing the importance of all of these things. They have carefully perfected the line of Stevens 44 Feeds and give exceptionally good service to dealers and to farmers in following up their sales force and showing how the feeds can be most profitably and yet economically used. A wealth of information of general trade value quite naturally accrues from such work, and if readers of this item are concerned regarding poor feeding results or complaints from their trade, if they are dealers, will address D. A. Badenoch at the above location, interesting and we are confident helpful suggestions will be forthcoming.

The Shanahan Report.

Commenting on the Shanahan report, printed in these columns about three weeks ago, the Pittsburgh *Leader* said: "The cheering feature of the report is that the drain upon American resources will be relatively light, barely more than the routine movement of before the war. The outstanding feature of the report is that Mr. Shanahan saw the crops and knows what they amount to, admitting to a happy surprise in the restoration of so much tillable soil which had been right up to the trenches during the war. In the illumination of what Mr. Shanahan saw, the source of Mr. Hoover's reported alarm seems to require some explanation, since it is evident that if more than 90 per cent of all the tillable area of Europe is in production, the shortage of foods cannot be so terrific as might be inferred from the Hoover interview. The food outlook in Europe for the coming ter should be distinctly brighter since 1918."

Collective Bargaining Conferen

The educational department of Farmers' Grain Dealers' Associatio the Middle West, as represented by *American Co-operative Journal*, called the first of a series of Insti on matters affecting national agr tural policy. The first Institute wi held in Chicago Sept. 10th at the Sherman. It will at 10 a. m. The ject set for discussion is *"Colle Bargaining for Farmers."*

Argentine Wheat Exports.

The following are the totals by w of the exports of wheat and flour Argentina for the past three years

Week—	1918.	1917.	1

Trade Mention

eon H. Brand, who for many years s identified with the grain cleaning lustry prior to his service overseas, s returned and is now associated h the Huntley Manufacturing Co. at ver Creek, N. Y.

. H. Smith, secretary of the Hunt- Manufacturing Co. at Silver Creek, Y., was a Chicago visitor last week. Smith reports business in the grain aning machinery line exceptionally d and looks for no letup for months come.

he Continental and Commercial Na- nal Bank has printed a pamphlet m the annual review of trade and p conditions mentioned here a fort-

ht ago. The report is quite compre- sive and well worth reading and serving.

mons, Day & Co., Chicago, have pub- ed a timely word on the business 's attitude toward the "reconstruc- " now going on in trade and indus- by Wm. C. Wiegand, entitled "What all about." It is stimulating read- and no doubt copies will be sent to nds who ask for it.

fertilizer formula finder is being ributed through the Soil Improve- t Committee through their Western e, Postal Telegraph Bldg., Chicago, he Eastern headquarters, Stock Ex- ge Bldg., Baltimore. It treats the mon grain and vegetable crops and great help to the present progres- farmers who have learned that it s more than a little rain and a sunshine to make good crops and et the most out of their soil. In nection with the latter the Commit- is always on tap for correct techni- advice to those who are not quite ain as to the fertilizer needs of farm or their dealers as to the icular analyses of bagged fertilizer h might most completely suit the nds of their contingent farm trade.

CONVEYING PROBLEMS.

Storage congestion in the East, which for the past several years has been staggering under the weight of commodities rushed from producing sections of the West, has been considerably relieved by those mill and feed warehouse merchants who taking "Speed" as their motto have recognized the "B-P" "Brown-Portable" way of "carrying on." These conveying and stacking machines performed appreciable patriotic service during the war and have since become permanent for handling quickly and economically boxed and bagged materials, eventually intended for European countries. But of first, and of even greater, importance is their disposition in domestic trade and to permit the full operation of man power for the other great work in providing the cargoes for coast wise merchant marine as have been numerous in Eastern ports and labor has been scarce also over the entire country, and although the latter consideration may soon be solved with well as for export business. Strikes the return of labor to rational behavior, nevertheless high wages create a situation which has necessitated the installation of machine power and labor-saving devices all over the country; and from now on to a greater extent than before brain rather than brawn will handle heavy loads. The "B-P" Conveyors never go a strike, as have their human competitors by the thousand over our country. They are so durable and strongly built, as well as simple in their mechanism, that they seldom have a sick call. They do not tire, and do not have to get their second wind. Weather does not impede their speed for they work throughout the dog-days and in the wet and blustery ones, with as good a will as when the tang of autumn spurs even the laziest man to a full day's work. The manufacturers, the Brown Portable Conveying Machinery Co., Otis Bldg., Chicago, Ill., will gladly furnish detailed specifications of their machines, stationary or portable types, upon application; and progressive handlers of bagged feeds, seeds, grain, meal of many kinds, etc., will do well to address a letter to them.

Would Pay Farmer's Losses.

An appropriation will be asked for from the New York Legislature to cover the losses of the farmers of that state on their corn crops caused by the invasion of the European corn borer. This insect, Charles S. Wilson, State Commissioner of Agriculture, explains, has kept the corn crop of some European countries down to one-third or one-half of normal, and its appearance in this country has caused the officials to enforce a quarantine order which prohibits the removal of corn from the affected areas for any purpose whatever. Commissioner Wilson thinks that the farmers should be reimbursed for losses caused by this order. Next!

For quick returns use our Market Place Department for wants and sale announcements.

BROOMHALL ON THE AMERICAN CROP.

It may be asked where are importing countries to find supplies of wheat to make good the undoubted losses which have lately occurred in North America? It would indeed be a happy experience if the losses in North America, or a good part of them, should be offset by exceptionally good mid-season crops in Argentina and India, and, as we have already indicated, such a compensation would be nothing more wonderful than the huge American winter crop of 1914, the Indian crops of 1917 and 1918, the Australian crops of 1915 and 1916, and the Canadian of 1915.

But assuming that the next Argentine and Indian crops are no better than normal and that the Australian is poor, as now seems likely, even in such case we have no need to fear actual scarcity. In our issue of July 29 we showed a total surplus of 117,000,000 quarters of wheat, and allowing for the latest losses this may be reduced to 106,000,000 quarters to meet requirements which we do not reckon more than 85 to 90 million quarters (680 to 720 millions) at the outside. Mr. Hoover put Europe's needs, without Russia, at 87 to 106 million quarters of wheat and rye (696 to 804 million bushels), and at present the chance of Russia importing is just about equal to the likelihood of Russia exporting. Let us bear in mind that last season Europe made do with a little over 480,000,000 bus., and although Germany and Austria will be buyers this season, yet Roumania and India may be sellers and not buyers, and Germany most assuredly wants meat, fat, oil, wool, etc., more than cereals; therefore she may well cut down her purchases of the latter, in order to get more of the former.

We regret to say that we think some further reduction of North American crop estimates is not unlikely, but provided the additional loss is not very great, there will still be a fair margin of safety, and in the meantime Eroupe is securing her harvest under very good conditions. It is with great satisfaction that we record that breadstuffs supplies still promise to equal requirements, but nonetheless the losses in America must cause keen regret to all buyers, for had the promised abundance materialized there would have been a good opportunity to bring prices down to a lower level, whereas under actual conditions the tendency has been to lift them still higher, with America holding firmly at the high official rate.—*Liverpool Corn Trade News.*

The Omaha *Journal-Stockman* says that to judge from the talk of some of the stockmen feeders for that market particularly from Iowa, Illinois, Indiana, Missouri, Wisconsin, etc., the cattle moving from the dry areas of Montana, Wyoming and Idaho have suffered from lack of feed to the point of emaciation, but buyers are very greatly surprised at their good condition. It seemed to be the common impression also that a great many more yearlings and very thin stockers were coming than could be used, but as a matter of fact this is not true. Dry weather in some parts of the Western range shorte summer feeding and did its gre damage in burning out lowland w pasture, consequently cattle ra shipped heavily this summer bec they did not have feed for the w and not because their stock starved ing the summer.

New York Oats Market.

New York Oats.—Receipts last week 306,500 bus. for five days. There at little change in the situation as owed a week ago. The downward ency of the speculative market has ed buyers to hold off, and commit- ts generally have been of small vol- . Jobbers and dealers have but stocks and will replenish only n compelled to do so.—*L. W. For- & Co., New York.*

Rye Flour for Export.

rgain prices on rye flour in the stic market are apt to disappear if rt buying of rye flour continues on same scale as was evidenced last , particularly as the foreigners willing to pay more than then rul- quotations for domestic use. In- ed output may also result in lower es for rye feed products as present prices have come primarily from nd exceeding the supply and low s, especially for whiter grades of lour, have been the direct result of priced feed.—*Blodgett-Holmes Co., sville, Wis.*

Tot. yr.	.....	.....	55,034,000	10,070,000

The H. C. L.

The Council of National Defense has issued a pamphlet entitled "An Analysis of the High Cost of Living Problem," which will be found summarized in some of the daily papers. The assistant director says:

"It is axiomatic that the present high cost of living goes very deep not only into national but into international conditions. The Council, therefore, calls attention to the fact that with the large amount of money and credit existing in the United States, with a reduced amount of production of the essentials of life and a very heavy demand for those essentials at home and abroad, it is primarily by production that we can hope to reestablish the balance between money and credit on the one hand and the needs of our people on the other."

It is somewhat gratifying to this paper to see that after many days and with "reluctant feet" the Council has begun to exploit a fact which this paper has been dinging into its readers' ears for weeks, until the subject is getting tiresome. Why the Government hesitated so long to begin this essential educational work is known only to the bureaucrats who infest Washington nowadays.

Farm laborers in Melun district of France went out on strike for 13 francs (about $2.50 per day), refusing an offer of 11 francs. The strike threatened also the harvest of the Seine and Marne districts.

Embargo Grain to Ports.

Grain shipments to Atlantic and Gulf Ports have been temporarily suspended, owing to a shortage of vessel tonnage and a resultant overcrowding of storage facilities, officials of the United States Grain Corporation announced here.

Prices of Foodstuffs in Belgium.

The average retail prices per lb. of various foodstuffs in Belgium during April, 1914, and during April, 1919, are given in the following table. These prices represent the results of the investigations of the Belgian Department of Industry, Labor, and Provisioning in all parts of Belgium, and were sent to the Department of Commerce by the American Trade Commissioner at Brussels:

Articles.	April, 1914.	April, 1919.	% increase.
Bread	$0.026	$0.069	165
Coffee	.251	.664	165
Eggs, each	.019	.097	411
Butter	.280	1.537	449
Beef	.257	.950	269
Pork	.198	.971	390
Lard	.170	.953	461
Potatoes	.011	.022	100
Sugar	.060	.777	[1]1,200
Rice	.055	.155	182
Beans	.049	.225	155

[1]Maximum best quality; cheapest grade advancing from 6c to 16.8 or 181%.

The quantity of wheat and flour measured as wheat and delivered for consumption in France during the first six months of this year were about 36,900,000 bus., somewhat less in 1913 and very considerably less in 1917 and 1918.

Fine weather has continued in France and threshing has been making good progress. The results generally confirm previous estimates showing a deficiency in quantity and poor quality of the wheat. The flour output continues very restricted, the mills being short of wheat and mill feeds are very scarce. The corn crop is promising well.

Snow-Bartlett Frazier Report.

The Snow-Bartlett Frazier Sept. 1 crop report makes the condition of corn 77.2, against 81.3 on Aug. 1, with an indicated crop of 2,725,000,000 bu. against an indication of 2,745,000,000 a month ago. On the basis of the Government acreage the present promise would be 2,780,000,000. Iowa and Minnesota are the only states of importance that show any material improvement. Ohio, Indiana and Illinois show unimportant change, while Kentucky declined 7 points; Missouri, 12; Kansas, 26; Nebraska, 17; and Oklahoma, 13. Northern and central Illinois show marked improvement while southern and southeastern counties show very poor promise. Missouri promises a fair crop in only a very few counties, while the Kansas crop approaches a general failure. Nebraska, south of the Platte, ranges from a complete failure to a very poor return, while north of the Platte a very good crop is secured. The crop is ripening early and frost danger this year is almost negligible.

Threshing yields of oats are below expectations, based upon harvest reports of condition, the average to date showing only 28.8, and making a production of 1,245,000,000 bu. The weight and quality are below normal.

Spring wheat condition shows a further heavy decline, standing at 46.9 against 58.0 last month, indicating a crop of only 201,000,000 bu. Winter wheat yields are not maintaining the early average, the figure to date being 14.6 per acre, or a crop of 714,000,000 bu.

The potato crop, second in importance as a food resource, shows further sharp loss and now promises only 331,000,000 against 400,000,000 bu. last year.

Contest of Authority.

The Embden Elevator Co. has refused to take out a state license to do a grain business on the ground that it is already under license by the Grain Corporation, a Federal corporation of superior rank. The company contends that when the Corporation assumed power to dictate how an elevator shall conduct its business state officials must stand aside. The state has begun suit to enforce the state law requiring e vators operating within the state o take out licenses.

Canadian Exports of Wheat.

The exports of wheat and flour, s wheat, reported by the Customs Dep ment of Canada:

	1918-19.	1917-18.	1916-
September	3,529,000	6,156,000	12,896
October	8,325,000	17,176,000	16,619
November	7,023,000	29,192,000	18,265
December	13,426,000	33,756,000	22,384
January	10,165,000	8,492,000	9,999
February	4,148,000	9,576,000	4,230
March	6,767,000	13,498,000	8,594
April	6,614,000	11,076,000	4,546
May	14,578,000	7,765,000	23,647
June	11,611,000	8,613,000	19,995
July		5,245,000	10,402

Showers have put Michigan soil i good condition for plowing for winter wheat and winter rye.

News of the Country Grain Trade

ARKANSAS.

Sphur Springs, Ark.—The local mill has been purchased by F. D. Gray & experienced millers from North Da- They are installing up-to-date ma- ry and will grind both flour and meal.

Le Rock, Ark.—The Bridwell Mer- e Co. has purchased the material ged when the old public school here razed and this will be used in the on of a flour and feed mill at this

Pe Bluff, Ark.—The Charleston Mlg. of Charleston, Mo., has leased the ing formerly occupied by the Riley Mfg. Co., and will establish a dis- ing plant here. Extensive improve- to the building are contemplated.

CALIFORNIA.

Co, Cal.—The Sperry rice mill and ouse will be opened for business the first of November in time to e this season's crop. This is not a buildng but the mill of the Sperry Co. at this place is being converted ndle rice and machinery suitable for urpose is being ordered now. The ouse will be capable of storing 100,- gs of paddy rice and the mill will a capacity of 2,000 bags of rice daily. is a center for the rice industry, situated in the midst of a 13,910-acre devoted to this crop.

COLORADO.

Hrose, Cold.—The Hillrose Mlg. Co. at lace has gone out of business.

ILLINOIS.

sburg, Ill.—Harry H. Woolsey has ased an elevator at Mahomet, Ill.

any, Ill.—The elevator owned by T. rams burst recently scattering about us. of grain over the Illinois Central .

oln, Ill.—C. A. Miller recently bought Lelland & Lewis of Springfield the Hildebrand's grain elevator for the f $8,000.

ton, Ill.—A new grain elevator com- was organized at London Mills re- capital $30,000, of which $7,000 has y been paid in.

, Ill.—Geo. R. Paul recently pur- the feed mill of Peat & Irvin as is the property of Raymond Irvin. sion has already been given.

ceton, Ill.—Manager Bass of the rs Elevator reports a satisfactory rop; light weight and chaffy winter yield and practically no spring in this territory.

kakee, Ill.—The Farmers Elevator planning to enlarge its elevator to bus. capacity. When the work is ted it will be one of the largest rs in the neighborhood.

ion Mills, Ill.—The London Mills rs Co-operative Ass'n was organ- ere and expects to either buy or n elevator there this fall. Directors company are as follows: W. A. on, John Luman, A. C. Timmons, Frank Reihm, Frank Welsch, Richard Harris, and John T. Culver.

Alexander, Ill.—A co-operative grain company has been formed here and it is expected a large elevator will be erected shortly. Directors of the company are Joseph Bergschneider, Henry Rider, John Luby, Geo. Ruble, A. W. Robertson, F. J. Kaiset, W. Barr Brown, F. F. Foster and John E. Erickson. Two-thirds of the $25.-000 stock has been subscribed by local men.

Rushville, Ill.—More than 250 farmers and business men of Schuyler county have subscribed to stock for a co-operative elevator to be built here at once. The company will be capitalized at $50,000 and will deal in grain and live stock as well as farm products. The following officers of the company were elected for the ensuing year: Pulaski Reeve, president; John L. Houston, vice-president; and G. W. Eifert, secretary-treasurer.

Jacksonville, Ill.—The pressure occasioned by 10,000 bus. of wheat within the elevator of J. F. Blackburn caused the elevator to burst open and the grain to rush from the elevator like a stream of water. Due to the car shortage the elevator had been loaded to capacity and was proved unequal to the strain. Cars were finally secured and the wheat was loaded out although some of it was restored a second time in the bins for drying and cleaning.

INDIANA.

Warsaw, Ind.—The Syracuse Flouring Mill is now owned by Columbus Disher, who recently purchased it from Eli Janekins for $10,000.

Linden, Ind.—Farmers in this vicinity are subscribing to a fund for the organization of a farmers elevator company. It is planned to build an elevator at the intersection of the Clover Leaf and Monon railroads.

Brazil, Ind.—The old water wheel method of obtaining power is used by Frank Cagle, who started a new flour and grist mill in operation on Mill Creek in Putnam county. The opening of the mill was delayed when a part of the dam was washed out in a flood last spring.

IOWA.

Edna, Ia.—The Edmonds Londergan Co. is erecting a large and modern elevator at this point.

Davenport, Ia.—Thomson & McKinnon of Chicago have opened a branch office here in stocks and bonds, grain and futures.

Fairfax, Ia.—The Farmers' Grain & Coal Elevator here was destroyed by fire recently. Fourteen cars of coal in the building were destroyed.

MICHIGAN.

Sandusky, Mich.—The Peerless Grist Mill, owned by F. A. Bickle, was totally destroyed by fire. Damage approximately $15,000.

Union City, Mich.—A mass meeting was held here recently in the rooms of the Congregational Church under the auspices of the Farmers' Co-operative Ass'n of the Northern Branch County. The purpose of the meeting was to complete the organization of a company to build a grain elevator at this place.

Sault Ste. Marie, Mich.—A custom mill to take care of Chippewa county's wheat is in contemplation and is being promoted by Jack Taylor, a miller of many years' experience, backed by the Soo Civic & Commercial Ass'n. The mill, which will be located in the central part of the city, will be of the Midget Marvel type, of 150 bbl. daily capacity. At the start machinery for a 50 bbl. capacity will be installed but as soon as business permits, additional machinery will be installed so as to handle 150 bbls. daily.

MINNESOTA.

Detroit, Minn.—C. W. Johnson has purchased the plant of the Andrews Grain Co.

Fairfax, Minn.—Henry Schuchard has taken a position as manager of the Farmers Elevator Co.

Wykoff, Minn.—Simon A. Healy, local miller here, was killed in an automobile accident near Canton.

Strathcona, Minn.—The farmers have al-

ready raised $12,650 towards the building of a co-operative elevator here.

Ada, Minn.—A. A. Pankratz, coming from Beulah, N. D., will be the new manager of the Ada Equity Elevator Co.

Albany, Minn.—The Kraker & Wertin Elevator has changed hands and the new owners are Messrs C. Garding and Warnet.

Hitterial, Minn.—The Great Western Elevator at this place has been sold to the Farmers' Equity Association of St. Paul.

Watkins, Minn.—The Farmers Elevator, replacing the one destroyed by fire recently, will soon be completed and ready for business.

Prior Lake, Minn.—Costello Brothers have sold their elevator and the company is now incorporated as the Prior Lake Elevator Co.

Greenbush, Minn. — The elevators at Greenbush and Gadger are soon to enter into the Equity Co-operative Exchange line of elevators.

Long Prairie, Minn.—The Farmers Shipping Ass'n has elected S. A. Sarf as manager to fill the vacancy caused by the death of Luther Sarf.

Minneapolis, Minn.—The Lemert Grain Co. has been incorporated with a capital stock of $50,000. H. D. Wells, of 3733 Clinton Ave., and others are the incorporators.

Akely, Minn.—McConville Bros., merchants here, will erect a modern elevator located on a site immediately east of the new Jordan warehouse now under construction.

Fountain, Minn.—A. K. Stephenson, son of Martin Stephenson of the La Crosse Grain Co., is in charge of the elevator at this place. Mr. C. E. Stockman, former manager, will go to Canon Falls, Minn.

St. Cloud, Minn.—The Erwin Milling Co. will erect an elevator on the right-of-way between the Standard Oil tanks and the Green feed store. The structure will be 30x50 and will be so constructed that additional stories may be added as the business requires.

Minneapolis, Minn. — The Government has again issued licenses to the thirteen mills and elevators of the Osceola Mill & Elevator Co. after having revoked them a month ago on the grounds that the company refused to give up to the Government the sum of $12,000.

Wabasha, Minn.—The Hickok Construction Co., of Minneapolis, is now at work on six large storage tanks for the Wabasha Roller Mill Co., which are to be just north of the main mill building. The tanks will have a capacity of 100,000 bus. and will be 82 ft. high and 20 ft. in diameter.

MISSOURI.

Montgomery (Montgomery City p. o.), Mo.—The Wellsville Mlg. Co. has been incorporated with a capital stock of $50,000. The shares are to be held by 98 farmers of the vicinity.

MONTANA.

Winifred, Mont.—The Winifred Mill & Elev. Co. has been incorporated with a capital stock of $150,000 and will erect and operate a mill and elevator here.

Lewistown, Mont.—P. F. Brown Co. will erect an elevator and engage in the general grain business here. This company is a newly incorporated concern, capital stock named being $100,000.

Helena, Mont.—The Montana Central Elevator Co., a Minneapolis corporation operating 26 elevators in this state, now finds it necessary to pay $390 for licenses in place of the $15 amount. The increases are effective September 1 and notices to this effect are being circulated now. Chas. P. Greenfield will collect the fees.

Lewistown, Mont.—The Montana Elevator Co., as the result of an amendment which was passed at a special session of the legislature, which makes it necessary for companies to pay a $15 license fee for each elevator doing business, now finds it necessary to pay $600 out in licenses as the company operates 40 elevators.

Bozeman, Mont.—The Bozeman Flour Mills have been sold to the Montana Flour Mills Co., of Great Falls, the consideration named being $375,000. The Story interests which have controlled the Bozeman Mills for many years will take over a large block of stock in the Montana Flour Mills Co. and T. B. Story will be one of the directors of the company. C. W. Sweet, former secretary of the Bozeman company, will be manager of the Gallatin Valley plants of the company. The capacity of the plant here it is expected will be increased shortly.

NEBRASKA.

Elyria, Neb.—A new flour mill of the Midget Marvel type will be in operation here October 1. The mill will have a capacity of 25 bbls. daily.

NEW YORK.

Buffalo, N. Y.—The Sunset Feed & Grain Corporation has been formed with a capital stock of $10,000. F. Alma, M. and Ottilia C. Colin, of Buffalo, are the incorporators.

NORTH DAKOTA.

Hague, N. D.—A farmers elevator has been organized here.

THE ERIE BARGE CANAL.

It may be of interest to those who are interested in the promotion of new waterways in the West to know what the new Erie Barge Canal, only just completed at a cost to New York of about 154 millions, is doing. The Albany *Knickerbocker Press* a few days ago said editorially: "The State Superintendent of Public Works made recently an inspection of a portion of the barge canal. He was accompanied by Mayor Charles A. Simon and other city officials of Schenectady. During the journey Mr. Walsh learned that only one firm in Schenectady is shipping goods by way of the barge canal. He was surprised, but Schenectady ought to be more surprised than he. Railroad service is demoralized. With the best of intentions, the railroad people cannot guarantee you much in respect of moving commodities from the Capitol district into New York. How could they? The tracks are clogged; the yards are jammed. They are not able to handle the local business. But the barge canal and the Hudson River are free and open. There is a natural route of transportation which is quite able to care for any business which is entrusted to it. Water transportation to New York is swifter than rail transportation. Some day, etc., etc., but right now there is a channel which ought to be used and which could profitably be used." But is not being used. Why?

Is there any connection of that fact with the Washington attempt to "regulate waterways like railroads? At any rate on July 24, Gov. Smith sent letters to the New York members of Congress asking them to assist in defeating an attempt to amend the Commerce law by giving the Commerce Commission regulation and control of canal transportation rates. This action followed the receipt of a letter from State Superintendent of Public Works pointing out the effect that the enactment of the legislation would have upon the state's 154,000,000 canal investment.

"If we are to meet with success in our efforts to rehabilitate commerce on our canal system," Superintendent Walsh wrote, "the rate making power must remain with the carriers and they must be free from any railroad training or regulatory influence. It might develop, if the bill becomes law, that the Commerce Commission could order the publication of rates via the water route on an equality with the rail rates from interior points, or establish water rates at such a small differential under the rail rate that the traffic would be diverted from the water route. In this manner the competitive influence of the waterway would be nullified and the primary purposes the people of the state of New York had in mind when authorizing the expenditure of $154,000,000 for the construction of the barge canal would be defeated. I am confident if this measure is passed by Congress it will do more to divert commerce coming to seaboard via Great Lakes-New York canal route to the Canadian water routes than any other factor."

If the amendment as introduced is enacted it will give the Commerce Commission power and authority:

(a) To regulate and control port to port interstate water rates; (b) to prescribe minimum rates; (c) to compel water carriers to publish their rates in tariff form and file such tariffs with the Commission; (d) to compel water carriers to observe any rule or form prescribed by the Commission for the keeping of accounts and records and of receipts and disbursements; and (e) to establish purely intrastate rates when the relationship of the inter and intra state rate is at issue.

ITALIAN TRADE IN CEREALS.

The Italian customs valuation of the trade in cereals, flour, fruits, vegetables, seeds, hay, etc., for 1913, showed imports worth $109,806,171, the principal items being cereals and dried vegetables, and exports worth $91,348,188, the principal items being greens, fungi, chestnuts, fruits and milled products. In 1917 the imports had increased to $658,440,514, and in 1918 to $740,601,803, whereas the exports had decreased to $58,251,190 and $42,752,960 in 1917 and 1918, respectively.

Italy's pre-war imports of the foodstuffs shown in this category came principally from European and South American countries and only in imports of flour and dried fruits had the United States any fair share. The war has done much to change this situation.

Exports of cereals and dried vegetables during 1913, a normal year, amounted to $7,000,000. Of the imports covered under the same head, wheat amounted to $77,000,000, corn to about $15,000,000, and dried vegetables to $1,860,000.

Field Seeds

Considerable clover has been cut for seed in Scott County, Ia.

The sweet clover seed crop this year is said to be very promising.

In Chickashaw County, the northeastern district of Iowa, farmers a week ago began picking seed corn.

County agents in North Dakota are distributing the rust-resisting varieties of wheat produced in Cavalier County.

E. C. Baum of the Northwestern Seed Co. at Dennison, Ia., is assisting a local committee to organize a seed company at Sac City, Ia.

The director of the Minnesota Experiment Station urges farmers who have good crops of clover to devote more attention to the seed.

County commissioners at Lewiston, Idaho, will distribute a bond issue of $500,000 for the relief of farmers needing seed assistance. They also desire to get into connection with those having seed grain for sale.

Late reports from London say that all interest in linseed there has been abandoned for the time owing to the contemplated action of the Minister of Food which "hangs like the sword of Damocles over the market."

Chile is an exporter of clover seed. Most of her surplus goes to Liverpool. C. A. King & Co.: "Stocks of red clover seed are exhausted. Our surplus will be very small. It would have been still less if a recent violent storm had occurred earlier in the season."

The Kansas Experiment Station has a limited quantity of new Kanred wheat seed, but farmers desiring this seed must apply immediately. The report from the station is that in 86 tests conducted by Kansas farmers this season Kanred yielded three and a half bushels per acre more than any other standard hard wheat.

Iowa seed dealer writes C. A. King & Co., Toledo: "Quite a timothy crop here this year, more than last season. Less clover than last year." Southwestern Indiana firm writes: "Only a third as much clover seed as last year." Central Indiana dealer says: "Clover acreage light. Yielding one to two bushels. Young clover best in years. Acreage large."

Clover Seed Imports.

The following statement of clover seed imports for June and 12 months ending with June is compiled from the Summary of Foreign Commerce by the Department of Commerce:

	June,		12 mos. ended June,

Other	577	8,786	432,717	146,031

Louisville Seed Trade.

Trade so far has been only fair. Conditions being unsettled, dealers are buying very conservatively. Stocks of clover generally are scarcer than they have been in many years. Grasses are more plentiful, but prices are at such high level they look dangerous from the viewpoint of investing. We hope that within the next 60 days that trade conditions will be more settled with a better movement of stocks.

At present we are having a good demand for seed rye, timothy and winter oats. The demand for red top, orchard grass and blue grass is also good.—*Ross Seed Company, Louisville, Ky.*

Seed Corn for Two Years.

That Ohio farmers should select corn for two years' seed is the opinion of agronomists at the Ohio Experiment Station. They point out that the time for selecting seed will soon be at hand and that whenever possible taking out representative ears from the standing corn proves to be the most successful method of getting good seed corn. In this manner ears may be selected that are apparently free from disease, the stage of maturity may be noted, and the corn may be stored away where it will be completely dried out before fall freezing begins.

Tests conducted at the Ohio Experiment Station show that the best results may be secured when the seed corn is dried by some artificial heat early in the season and then stored carefully to prevent destruction by rats or vermin. It has been found that severe winters will injure seed corn when it is not well dried out before severe freezing begins.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

Minneapolis Flaxseed Marke

Receipts of flaxseed have been light of late and in good demand lot of new Minnesota seed arriv to arrive contracts, and although better oil yielding quality than year's seed it did not contain as watergrass seed. Offerings to ar shipment to be made in September, ber and November, were quite le and in fair to good demand. Th break in the market did not check ing much. Bearish news from Ar tina brought considerable pressu the futures and as a result the mar broke very sharply. There was co erably hedging pressure to help break along. Spot No. 1 seed se Duluth September price to 3c ov arrive at 1@2c less.

DANISH SEED INDUSTR

Consul Dunlap, Odense, Denma a recent report, says that the Da seed industry has its center in th district of Odense where the largest firm in Scandinavia has its main o warehouses, and gardens, and there is general interest among their ers in seed raising. The dealer a seed growers here have been tie through many years and underst the importance of maintaining the standard of the various strains kn as Danish. The above mentioned fir was first started in 1850.

The dry summer of 1918 natu had its effect on the seed crop, sp cially the grass seed, the acreag which increases from 3,700 acr 1909 to 7,400 in 1919.

The main varieties of grass se grown are orchard grass, meadow f

Italian rye grass, English rye grass, and brome grass. The cultivation of clover seems to have been neglected. There are ordinarily used annually in Denmark about 7,700,000 lbs. of clover and other leguminous plant seed, which are mainly imported.

Of early red clover there are already three kinds available: Bohemian, of good quality; Russian, of an inferior quality; and Hungarian, much tainted with clover silk. Imports are made from America and France, but the supply altogether is short. Late red clover has been imported from Sweden in sufficient quantities and of good quality. Of white clover there is more than a normal supply but the quantity is inferior. Of alsike there is but one-third the customary quantity, and there is little prospect that more will be obtainable.

The spring supply of grass (excluding clover), root, and vegetable seeds was more than enough for home use. In fact, the dealers had large quantities on hand, which, owing to trading difficulties during the past two years, could not be exported to any extent.

The development of the flower seed industry has taken place in the past decade and especially during the past year. Firms in America, England and France that previously purchased flower seeds from Germany have during the past two years tried the Danish varieties. Bulbs of tulip and hyacinth were formerly imported from Holland about 30 years ago, and the acclimated strains have proved unusually good for forcing purposes. The home market now consumes all the available supply, but it is expected soon to have a surplus for export of a quality that will rival the Dutch originals.

Official statistics regarding the Danish seed exports are meager, but in 1914 about one-third of the firm's total output was sold in Denmark and two-thirds exported. In 1918 five times as much was sold in Denmark as was exported, a large quantity being also put in storage. But only one-eighth as much was exported in 1918 as in 1914, as during the last two years seed exports have been practically prohibited, a special license being required for such seed as was sent out.

Under ordinary conditions the exports are divided about as follows: To Germany, Austria, and Switzerland, 35 per cent, to the United States 25 per cent, England 20 per cent, to Norway 10 per cent, and Sweden 10 per cent.

Recent economic changes, difficulties in transportation, and governmental restrictions have completely changed this situation. For instance, of the large amount of grass seed exported in 1914, 30 per cent went to Germany, 30 per cent to England, 10 per cent to Switzerland and 10 per cent to Norway and Sweden, while the small amount exported in 1917 and 1918 went all to England. The future of the seed industry is uncertain, as the possibilities for export depend so much on the new order of things. Interest has recently increased in the co-operative movement that has resulted in the union of all seed-growing societies over the country into one national organization.

St. Louis Seed Market.

St. Louis, Aug. 30.—New seeds are beginning to arrive more freely, and there is a good demand for all kinds of field seeds. Prices are firm.

Clover seed is particularly firm, as the quality is somewhat better than the usual first receipts. Some timothy is offered, but most of the sales are "to arrive." Alsike is inquired for, but the market is entirely nominal. There is little alfalfa offered, and reports in regard to the crop are conflicting. Some red top seed of fair quality is offered, and is bringing good prices. Millet, sorghum cane and broom corn seed is dull and nominal.

Quotations are as follows: Clover seed, from $10 to $15 per 100 lbs. for poor seed to $40 to $46 for choice high grade seed. Timothy, good country run, $11.50 to $12 per 100 lbs.; choice worth more, and poor less, according to quality. Alsike $35 to $40 for good seed, choice more, poor less. Alfalfa, nominal, $15 to $26 per 100 lbs.; red top, $13 to $14 per 100 lbs. for machine cleaned; choice seed worth more. Millet, golden, $3 to $5 per 100 lbs.; common $2 to $3. Siberian, $2.50 to $2.60 per 100 lbs.

Louisville Seed Market.

Louisville, Ky., Aug. 30.—The demand for seed continues dull, prices being so high that retailers and consumers are not buying any seed in advance. Timothy buying is late, but should be active about September 10. No movement is being reported in Kentucky bluegrass or orchard grass, and onion sets are showing nothing. Late September should show the market in far more active condition. Seed rye is in fair demand, and a better demand for seed wheat is expected than that of last year.

Evansville, Ind., Seed Market.

Evansville, Aug. 30.—Trade in this market has been especially good on all kinds of seed. Fall demand for clover has been very heavy.

Red Top: The threshing is in full blast at the present time. Reports we have received from producing territories are that this year's crop will be materially less than last year's crop. There was a big crop of hay, but it seems same did not properly fill.

Orchard Grass—This year's crop of seed in Kentucky was very dark in color, and light in weight, quality not as desirable as last year. Demand has been very good on same, however, due to the fact that there was no carryover.

Blue Grass—Kentucky crop proves to be very light in weight cleaning out about 50.00% of fancy from rough seed. Missouri crop was much better in quality and is cleaning about 70.00% fancy. Dealers in this market report prospects very favorable and especially heavy fall business. This applies especially to timothy, red top, alsike and other clovers.

Kansas City Seed Market.

Kansas City, Aug. 30.—Seed trade showed no special developments this week. Blue grass seed, the most important crop thus far harvested, held firm at $10@14 per cwt. for rough and $19 @25 for cleaned. Dealers say that only scattered lots remain in farmers' hands. There is confidence that all seed in dealers' hands will be wanted during the coming year, some possibly for export.

New timothy seed is offered in moderate amounts, though dealers think a fair quantity was threshed, especially in Missouri. Prices are the same as for old seed. Dealers are paying $9.50 to $11 for country run seed, and are willing to resell recleaned seed at $12@12.50.

Holders of meadow fescue seed, who recently refused to accept bids around $34 per cwt., are not so bullish as they were. The best price now offered is $25, and dealers are indifferent about buying, as there are no more export orders.

The alfalfa seed situation continues uncertain, but the Kansas state report, issued this week, is more optimistic than the opinions previously given out by Kansas City seed houses. According to the official statement, three-fourths of the Kansas counties left some acreage of alfalfa for seed at the third hay cutting. This reserve possibly amounts to 3 per cent of the total acreage, which was 1,256,000 acres in the state. Nearly all counties in the eastern half promise to save some seed. Seed saving in the western half of Kansas will be limited to certain localities, especially in the northwest, that produce seed every year on a commercial scale. Kansas City dealers are hopeful that the seed offerings of Kansas will be supplemented by shipments from Colorado and Utah, but say the crops in Oklahoma, Texas, New Mexico and Arizona are light. A good demand for old seed is reported, as fall sowing is going on. Recent rains were helpful for ground preparation. Seed is quoted in Kansas City, as from first hands, at $17@23 per cwt.

No prices of forage grain seeds can be given for the reason that old supplies were long ago exhausted, while new cane and millet will not be available for some time. The Kansas state report says there were planted 719,000 acres to cane, or 144,600 less than in 1918. An average condition of 76.9 per cent is shown. The report makes no reference to millet, of which there is known to be a fair acreage. Sudan grass is credited with 108,000 acres, against 79,166 last year. The present condition is 76 per cent. Millet and Sudan grass are safe from frost, but some of the late cane fields may be caught.

Detroit Seed Price.

Closing prices on grass seeds Aug. 29 were as follows: Clover Seed—Cash, $29.50; October, $29.50; Timothy Seed, $5.50.

Lots of Timothy.

Chicago is having big receipts of new timothy, mainly from Iowa, receiving from 10 to 25 cars a day. Chicago firm writes us bearishly, saying bids in the country have been reduced and offers are much more free. Coming on top of good carryover, a large crop may make its weight felt. The foreign demand is still a question. It has not developed up to expectations.

While offerings of timothy were liberal at Toledo last week, there were supporting orders on each 2½ cent decline. If there is any merit in timothy, it is in this good old prime seed, which is selling at a discount under the deferred futures. Buyers of December and March are paying the carrying charge to be long.—*Southworth & Co.*

Government Hits Live Stock.

Armour & Co., reviewing the meat trade for last week say: Government propaganda against the high cost of living paralyzed business and has caused marked depression in the live stock prices, which has been reflected in all food commodities. Present prices for provisions of all kinds are much under manufacturing costs. Supplies in the dressed beef market have been liberal, with a limited demand, no doubt due to the high cost of living agitation, and consequently prices have slumped severely.

Missouri Seed Crops.

Mercer, Mo.—Timothy seed crop is very disappointing. Yields are ranging from 1½ bus. to 6 bus. per acre. The acreage considerably less than normal and a large percentage of meadows was cut for hay. Early part of the season was cool, with excessive moisture. All fields made rank growth and prospects were very encouraging. Extremely hot weather after June 15th, with heavy rains, while timothy was in bloom, interfered with filling out and reduced the yield and quality. Quality of seed is fair average. Most jobs are being threshed out reasonably clean, but some seed is partly hulled. Quite a large amount of seed will be held for home demand; most of the surplus has been marketed. Price to growers has ranged from $4.75 to $5.50 per bus. for country-run seed. There have been about ten cars shipped from our territory, covering about forty stations. Think there will be about five or six more carloads to ship out. Farmers will hold some seed back until spring.

Millet seed will be extremely scarce here; acreage very small. Season has been rather favorable for millet, but farmers seeded heavy to wheat and other grain. There will be very little if any millet seed to ship out from any of our buying stations.

There will be no surplus clover seed here. Cane and other forage crops have made excellent growth and condition

March	6.00	5.82½	5.82	6.00A

Chicago Seed Market.

The timothy market ruled easier last week in both the cash and futures. Country lots of seed were quotable 25c lower all round and clover too was on the downward trend the last of the week. Little or no interest was displayed in that market. Being the in between period of the season no market is established as yet on millet and buckwheat. Quotations on timothy and clover follow:

	—Sept.— Bid.	Asked.	—Oct.— Bid.	Asked.	Mar. Asked.
Aug. 25	$13.00	$13.25	$12.00	.....	.....
Aug. 26	13.00	.....	12.00	$12.40	$13.25
Aug. 27	.....	12.95	12.00	12.50	.....

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during the week ending Aug. 30, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts. 1919.	1918.	Shipments. 1919.	1918.
Timothy, lbs.	.....	60,000	46,264	330
Clover, lbs.	29,207	5,417	.....	1,300

Duluth Flaxseed Market.

DULUTH, Aug. 30.—Flaxseed was under heavy selling pressure last week, with the result that breaks extending to 62c were recorded during the six days' operations. The market was admittedly under the influence of the campaign directed against the high cost of living. Flaxseed prices have for some time been regarded as at dangerous levels, and it was noted that interests who had been prominent on the buying side during the long-extended upturn appeared to be willing to allow the market to find lower levels when selling appeared during the first three days of the week.

Selling from the country was reported for the first time in several weeks, and considerable seed was sold to arrive. A moderate rally came on Friday, attributed in a measure to short-covering operations after the break. Crushers also picked up seed to cover their linseed oil requirements at the low spots. It has been a subject of comment lately that the rank and file of traders have been letting the flaxseed market severely alone for some time back. Many are reported to have been nipped to a greater or lesser extent in that market during its kaleidoscopic movements. It requires considerable money to trade in flaxseed at around its advanced levels and fliers in it are asserted to have become unpopular on that account.

Reports from South Dakota and other sections of the Northwest, apart from western North Dakota and Montana, have been more encouraging of late as regards crop yields, and that contributed to bearish sentiment during the week. Provided frosts hold off, it is thought in some quarters that production will be better than had been counted upon. The harvesting of flax has been early in some parts of the country and a substantial movement of it is being counted upon during the next ten days.

Receipts of flaxseed during the week were small, amounting to just 8,463 bus., and stocks in elevators aggregate 45,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$5.32	$6.00	$4.27
To arrive	5.31	5.95	4.27
September	5.30	5.90	4.27
October	5.13	5.53	4.15½
November	5.10	5.43	4.11
December	4.95	5.38	4.08½
May	4.90	5.28	....

Clover Seed at Toledo.

Clover seed was very active last week at Toledo and prices crumbled quickly when liquidation got under way. General demoralization of the grain markets was reflected in seed without a doubt. Not that actual conditions have changed perceptibly, but sentiment did. The powers that be sent the word broadcast that old H. C. L. must get its deathblow, and many who owned grain dumped, and some of the seed holders followed suit. General declines occurred, but on the break the demand was too strong and prices recovered some, although there is a feeling present level discounts the prospective loss to the new crop, even though old stocks practically exhausted in this country.

Alsike followed in the wake of red clover last week, but timothy showed but little decline. This was remarkable too in a of the big drop in other field seeds much lower grain and hog markets, s F. Zahm & Co. Timothy shows wonc resistance. A lot of stuff was absorb considerable long seed came out, as as a general resumption of short selli

A western Texas financier says t west Texas farmers went over the with their grain crop and most of will pay off their debts this year. T cotton crop will be all velvet. The of autos in Ballinger, it is said, break the record. There is alrea steady demand for cars and much ing in second-hand cars.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Previous week	140,273,000	109,715,000
Increase for week, bu.	23,998,000	15,577,000

Grain Business in Montana.

The real development of the grain and milling industry did not start in Montana until about 1900. While it had been carried on in a small way for many years in some of the especially favored valleys, it was not until about that time that the real growth of this industry commenced.

The Bitter Root Valley was the first to start the raising of grain, and a small grist mill was established there about 1850. Then after the Civil War the Gallatin Valley was settled and farming was carried on in a small way until the Northern Pacific Railway linked the Gallatin Valley with the outside markets of the world. Grain was soon raised in commercial quantities, which eventually led to the building of small mills at Bozeman and Belgrade. The Beaverhead Valley and the Flathead Valley soon followed the Gallatin. The famous Jaw-bone Railway helped develop the Judith Basin, which shipped out its first car load of wheat in 1918. Since then the growing of grain in the state has become quite general and the industry is developing rapidly.—*H. N. Stockett, Sec'y, Great Falls.*

Grain Imports.

The following amounts of grain in bushels and flour in barrels were imported by the United States in June, 1918 and 1919, and during eleven months of the years named ending with May:

	June		12 months	
Grain—	1918.	1919.	1918.	1919.
Corn	45,412	1,353,763	3,193,420	3,311,311
Oats	528,314	115,913	2,591,077	551,255
Wheat	.....	.....	.....	.....

Corn from—				
Mexico	2,583	1,003	71,560	16,471
Arg'tina	38,540	1,251,403	2,396,252	3,001,143
Venez'la	.....	.....	417,672	5,793
Japan	.....	68,299	25,646	174,626
Other	4,289	33,058	285,290	113,178

The Michigan Weather and Crop Bulletin reports buckwheat in bloom in that state, but the grain stands on short straw owing to drought.

Feedstuffs

The Pacific Coast cities report the supply of milled feeds still inadequate although grinding by the mills is more general. The demand is very good and holders are firm. The last crop of old wheat has been cleaned up.

The Iowa weather and crop report reports that new corn is being fed to hogs in some localities and that hogging down of corn is about to begin. The crop is generally earlier than normal and if favorable weather continues the bulk will soon be saved from the frost.

"Farmers around Council Bluffs have four times as much feed as they had last year and indications are that they will do a great deal of feeding this winter," a local stockman reports. "The hay crop was very large. The third crop of alfalfa is now being cut and many of these fields will afford excellent pasture later on. It was dry for so long that it had a lot of us worrying, but with the recent rains the crop is bound to be big."

GAINS WITH CAKE FEED.

Feeding cottonseed cake to steers as a supplement to summer pasture in the South increases materially the rate of the gains made by the animals, causes them to finish more quickly, and take on a higher degree of finish, and increases the margin between the buying and selling prices, according to specialists of the Department of Agriculture, who made a report of experiments in fattening steers on summer pasture conducted co-operatively by the department and the Alabama Experiment Station. Present opportunities for live stock in the South and efforts to reduce production costs make the results of unusual current interest.

All the experiments were carried out under actual and typical farm conditions, consequently the results may be applied directly in many Southern regions to the management and feeding of cattle on pasture. In each experiment, groups of steers were kept on pasture alone, on pasture with a supplementary feed of one-half corn chop and one-half cottonseed cake, and on pasture with a supplementary feed of cottonseed cake. The average daily gains for each animal, which may be considered the most valuable standard in judging the efficiency of rations, were 1.49 pounds for the steers getting pasture only, 1.83 pounds for those on pasture supplemented by cottonseed cake, and 1.53 pounds for the steers getting pasture supplemented by the mixture of cake and corn chop.

The cost of gains of steers on pasture is greatly increased by feeding cottonseed cake, it was found, but the better market prices received for cake fed cattle usually pay for the additional cost of feeding cake, and return a greater average profit than is realized on the grass fed cattle. One of the distinct advantages on supplementing pastures for concentrates is the fact that steers so handled can be finished more quickly and can be marketed earlier than steers getting grass alone. Thus the cattle can be sold before the rush of grass fed cattle gluts the market and depresses the price. Moreover, when cattle are marketed early the pastures have time to recuperate and furnish good grazing for other stock during the fall.

There is only one case, says the bulletin, when pasture alone is preferable to pasture with concentrates. Steers of inferior quality may return more profit by grazing alone than by grazing with the addition of supplementary feeds, especially when they are on good pastures that are cheap. Scrub steers did not respond readily to the use of good feeds and even when well finished do not command satisfactory prices in competition with well bred cattle similarly finished. The better the quality of the steers the safer it is to give them high priced feeds.

FEED MARKETS.

MINNEAPOLIS.

Minneapolis, Aug. 30.—The demand for millfeed is broad enough to absorb the light offerings for spot and quick shipment and the millers are behind on old orders. Standard middlings are in light supply and it is this grade the millers are chiefly behind on. There is some inquiry for deferred feed, but bids are not very satisfactory. Shipping directions on maturing orders are prompt and the movement out is quite heavy. Brokers have little feed to sell now and millers practically control the market. Quotations in carload lots, f. o. b. Minneapolis, in 100-lb. sacks: Bran, $41@42; standard middlings, $54@55; flour middlings, $60@61; red dog, $66@67; rye middlings, $52@53; ground barley, $61@62.

BALTIMORE.

Baltimore, Aug. 30.—The spot feed market is unchanged. The demand for sacked bran and middlings is mainly of a jobbing character and offerings are therefore ample. Western advices, however, do not indicate any weakness in feedstuffs. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $48@49; Western middlings, per ton, in 100-lb. sacks, $59@60; City Mills' winter wheat bran, per ton, in 100-lb. sacks, $60; brown middlings, per ton, in 100-lb. sacks, $60; white middlings, per ton, in 100-lb. sacks, $70.

MONTREAL.

Montreal, Aug. 29—A feature in the trade this week was the announcement made by the Canadian Wheat Board from Winnipeg by wire that prices for car lots of bran from this date will be $45, and shorts at $55 per ton, including bags, ex-track, and no shipments can be made to the United States without a special permit issued by the above board. Shorts are quoted in this market at $55 to $56 per ton ex-track, and bran at $45 to $46 per ton.—Trade Bulletin.

BOSTON.

Boston, Aug. 30—The demand for feeds of all kinds continues rather light with prices quoted about as follows: Spring bran, sacked, $48.50@50 per ton; winter bran, sacked, $49@50.50; middlings, sacked, $63@66; mixed feed, sacked, $58.50@60; gluten feed, sacked, $75.12; red dog, sacked, $71; second clean, sacked, $74; stock feed, sacked, $69; oat hulls, reground, sacked, $32; hominy feed, sacked, $79.40; cottonseed meal, sacked, $79@82. Receipts for the week ending Aug. 30 were 70 tons; for the month of August, 1919 were 336 tons.

NEW YORK.

New York, Aug. 30—The market for millfeed in New York still maintains a firm tone with offerings in limited supply. Trade is on a small scale, however, as buyers do not appear anxious to purchase at present owing to the uncertainty of the situation. Western mills are offering only sparingly to Eastern consumers, and evidently, the demand in their own vicinity is sufficiently large to take care of their production. City bran was quoted at $48; middlings, $58; and red dog, $69, while Western bran was quoted at $47.50@48; standard middlings, $59.50@61, and red dog $73@74.

ST. LOUIS.

St. Louis, Aug. 30—Market firm, on spot feeds, with business mostly in wheat feeds. Demand fair, but futures are offered more freely and are selling at a heavy discount under spot prices. Quotations are as follows: Bran, spot, $42.50@44; with Oct. selling as low as $41.50 per 100 lbs.; gray middlings, $58.50@61; white hominy feed, $72; oat feed, $26@26.50; fine ground barley feed, $65; No. 1 alfalfa meal, $38.50@39; No. 2, $35@36 per ton.

DULUTH.

Duluth, Aug. 30—With the exception of shorts which scored an advance of $2, the market in feeds was easier during the last week, with declines of from $1 to $3 showing in bran, ground oats, ground feeds and cracked corn. Trade was small as the mills had little to offer. Buyers only picked up supplies to cover immediate requirements as the trade was generally counting upon lower prices. Quotations per ton follow: Bran, $42; ground oats, $48.25; No. 1 ground feed, $62.25; No. 2 ground feed, $58.75; No. 3 ground feed, $55.25; shorts, $56; flour middlings, $62.50; red dog, $66; Boston mixed, $51; cracked corn, $69.25; rye feed, $50.

PITTSBURGH.

Pittsburgh, Aug. 30. — Larger receipts marked the last period in the feed market with a total of 21 cars bulletined. This is the largest number recorded for several months. Most of the receipts consisted of ordinary mill feeds, with 6 cars white middlings, 2 cars of bran and 9 cars of feed included in the list. Prices are hi... ing strong and demand is apparentl... little better.

MEMPHIS.

Memphis, Aug. 30—Activity in feed ... still largely confined to the mixed va... ties. Manufacturers report that dem... is well sustained, with the Southeast ... the East best buyers. SUCRENE FEEDS

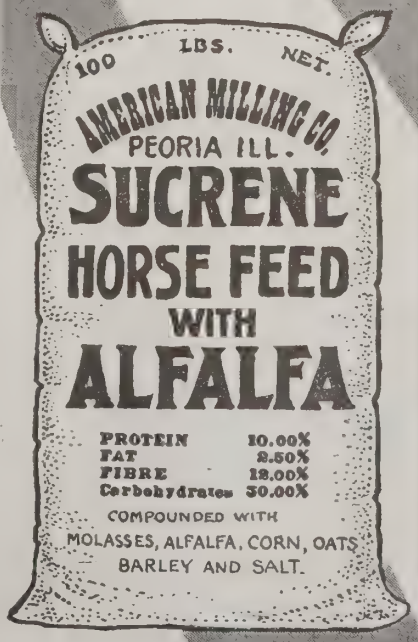
20th Year of Supremacy

Watch for our special message to Feed Dealers in the near future.



The greatest selling season Sucrene Dealers have ever enjoyed is about to open.

Our splendid new mills, more modern, and with greatly increased capacity, will take care of the larger demand for Sucrene Feeds, which for years taxed our manufacturing capacity to the limit.

SEND IN YOUR ORDERS NOW

for the complete line of Sucrene Poultry Scratch Feeds. We fill orders promptly in any quantity.

brewers dried grains, $63; all in 100 lb. sacks.

NASHVILLE.

Nashville, Tenn., Sept. 1—Demand is not so active for wheat and bran, but mills are behind with old contracts. Other ground feed is in fair demand. The general trend of prices has been some lower. Quotations: wheat bran, 100 lb. bags, per ton, $45.20; middlings or shorts, $60@61; horse and mule feed, $48@61; dairy feed, $56@66; hog feed, $66; poultry feed, $75@80.

PHILADELPHIA.

Philadelphia, Aug. 29—The demand for feedstuffs is limited but offerings are light and prices steadily held. The following quotations are for carlots in 100 lb. sacks, to arrive at cost per ton: winter bran, $48; spring bran, $47@48; standard wheat middlings, $62@63; flour middlings, $68.50@69.50; red dog, $73@74; shorts, $62@63; low grade flour, $74@75; rye middlings, $60@61; fine yellow hominy, $81@82; fine white hominy, $82@82.50; reground oats feed, $31.50@32.50; cotton seed meal, 36% protein, $78@80; cotton seed meal, 41% protein, $84@86; cotton seed feed, 20% protein, $58@60.

Cottonseed Feed Trade Dull.

KANSAS CITY, Aug. 30.—More inquiries are being received from the drouth stricken area of the Northwest for cottonseed cake, but the grazers are unwilling to take hold at the current level of prices. The market as a whole displayed dullness in Kansas City this week, with prices showing a slight downward tendency. Offerings of cake and meal of the new crop for immediate shipment are increasing.

THE FEED SITUATION.

FEEDER FAIR DEMAND.

WILMINGTON, N. C.—We really know nothing that we think would be of especial interest in the feed market. The demand is fairly good, but receipts have been ample to take care of the needs of our territory.—*Boney & Harper Mfg. Co., Wilmington, N. C.*

Buying Cottonseed Meal.

J. H. Avery, secretary of the Buyers' and Sellers' Live Stock Association of Texas, has issued a letter to the members of that association, in which he calls attention to the advance in the price of cottonseed cake and meal from $57 on June 30th to $76 a ton at the present time. The reason for this advance is that all the old crop cake and meal has been cleaned up, and that there will be little more available until after the oil mills have begun their fall and winter run. The mills do not wish to sell their cake until they have purchased their cottonseed, and thus know what the manufactured product is going to cost them, but the demand for quotations from feeders who fear higher prices is resulting in forcing up prices altogether too high. Prior to the war, the price of cottonseed meal averaged about $23 per ton, f. o. b. mill. It may not go down as low as this soon, but Mr. Avery thinks that if feeders will stop placing orders for a time, they will be able to buy the cake and meal considerably cheaper than they can now.

September in the Hog Market.

We think the top has been reached in hog and hog products. It was our opinion some time ago that the high time of the year would be in September, but agitation has brought about different conditions. A big export trade is about the only thing that would bring our hog and provision market back to former high prices, and as foreigners are too keen buyers to take hold of a market when it is on the down grade we have little hope of a very active foreign demand this fall.

September is a month when there is usually a good trade in hogs and hog products and we have no doubt we will have a better trade in September than we have now, for this is always the dull period of the year. One thing is certain, we have the largest crop of hogs on record back in the country. We believe next year's supply will be three to five million over this year. The South has made great progress in increasing its supply of hogs. A well posted stock yards expert, who is familiar with conditions in the South and who just recently made a trip through there, says he never saw the prospects for hogs as good as at present. They have gotten away from the razor-back hog and are now raising the well-bred hogs. He thinks the South will be practically able to provide its own requirements the coming winter. Therefore, we see ahead of us a record supply of hogs this winter.—*W. G. Press & Co., Chicago.*

Our own information does not quite coincide with Press & Co.'s that there is a record breaking hog crop on the farms, but that it is good only.

ALFALFA PRICES.

The Bureau of Markets reporting under date of Aug. 30 has the following as regards alfalfa prices:

SOUTHWESTERN.—Ft. Worth: Limited amount moving, stock yards largest purchasers, dmd. for ch. grades which are not obtainable. Some threshed alfalfa offered but not wanted, prices $21@23, No. 1 alf. $29@30; No. 22, $25@27. Houston: Rcts. decreasing, little ch. coming in, alfalfa $30@32 for ch.

SOUTHEASTERN.—Rcts. alf. hvy., dmd. fr., bulk. rcts. No. 2, which is $3@8 lower than No. 1 at $37.50. Western alf. $40.10. Savannah: No dmd. alf. Vicksburg, Miss.: Ch. alf. $33. Greensboro: Ch. alf. $37. Wilmington: Nothing doing in alf. Charleston: Alf. No. 1, $36, with stks. vy. lgt. and rcts. mostly from Kans. and S. W. Tex. Montgomery—Ch. alf. $37@40; No. 1, $37@38; rcts. dmd. lgt. Birmingham: New Mex. supplying bulk of alf., ch. alf. $35, No. 1 $33.50. Mobile: Ch. alf. $35, No. 1 $33, Colo. shipping bulk of alf., dmd. slow but improving. Tampa—Stks. rcts. alf. lgt. Pensacola: Ch. alf. $36, No. 1 $35. Jacksonville: Ch. alf. $37, No. 1 $36 with dmd. vy. lgt. $38.80. Birmingham—Clov.-tim. $34, No. 1 tim. $36, No. 1 John. $24. Mobile—No. 1 tim. $31.50, No. 2 $30, No. 1 lgt. mxd. $30, No. 1 clov. in poor dmd. quoted $30, No. 1 John. $23.50. Tampa—No. 1 tim. $38@40. Pensacola—No. 1 tim. $31.50. Miami—No. 1 tim. $44.50. Jacksonville—No. 1 tim. $35.50, No. 2 $33, No. 1 lgt. mxd. $34.

SOUTHWESTERN.—Ft. Worth — Prices steady, No. 1 N. Tex. prairie $20, No. 1 John. gr. $20, No. 1 Okla. pr. $20@22. Shreveport—Tim. rcts. about equal dmd. Houston—S. Tex. prairie coming on the market quoted $13 f. o. b. shp. point. San Antonio—Hay stocks gd., rcts. fr., no dmd.

HAY STOCKS.

The Bureau of Markets reporting under date of Aug. 30 has the following as regards hay stocks throughout the country:

SOUTHERN.—Atlanta—No. 1 tim. $37, No. 2 $34@35. Savannah—Gd. dmd. for tim., particularly No. 1 quoted at $37, No. 2 $35.50, No. 1 lgt. mxd. $35, No. 1 John. gr. $26. Vicksburg—No. 1 tim. $32, mostly from Ill. and Kans. Greensboro—No. 1 tim. $36.50@38, No. 2 $35@36, No. 1 lgt. mxd. $35@36, No. 1 clov. $33. Wilmington—No. 1 tim. $35@39, No. 2 $32@36. Charleston—Hay trade slow, buyers holding off expecting when N. Y. hay is offered freely market will decline, No. 1 tim. $35, No. 2 $33.50, No. 1 lgt. mxd. $33.50. Montgomery—Locally grown John. gr. offered for shpt. $25, No. 2 $22.50, No. 1 tim. $39, No. 2 $36, No. 1 lgt. mxd. $39.50, No. 1 clov.

Goodman's Sept. 1 Report.

The Goodman-Clement cash report for Sept. 1 indicates that further decline in crop prospects developed during August. Condition of spring wheat at harvest time was 46.2 versus 59 on the reports and 53.9 by the Government last month. The indicated yield is 195,000,000 bushels. Total wheat crop, 910,000,000 versus 917,000,000 last year.

Oats condition of harvest, 71.6 versus 78.6 and Government 76.5 last month, indicating crop of 1,206,000,000. The light weight of the crop makes the measured bushels equal to 1,100,000,000 commercial crop.

Corn condition improved in the northern third of the belt, but lost heavily in the West, Central and Cotton States. Average condition, 77.6 versus 84 in August report and Government 81.7. An advance of 1.5 bushels in the par value suggests a crop of 2,797,000,000 bus. comparing with Government 2.788,378,000 last month.

The total coarse grain crops is 5 per cent less than last year.

The number of hogs on the farm as reported is 63,110,000, which is 2,000,000, or 3 per cent, less than last year.

BROOM CORN.

Harvesting of dwarf corn is now in progress in the Southwest and the crop should show better quality conditions than a year ago. Late corn is making a good growth.

Offerings of new corn not expected before Sept. 10 owing to labor conditions. In the Lindsay, Okla., and adjacent markets buyers have been taking all offerings at prices ranging from $150 to $280, with $285 reported as the tip top. Old corn is being bought in a limited way in western Kansas and Colorado areas, with prices ranging from $50 to $120. Growers in these districts consider that new corn should bring them from $150 to $200, says *The Broom Corn Review.* Indications point to this year's crops showing up much better as to grade. In central Illinois $300 was the opening price on new Illinois corn. Buyers began taking crops in the sheds. The corn bought is fine high grade stuff. Old corn is selling from $150 to $250, with higher prices on best old.

Asked to Quit.

The grain trade at Wichita a days ago were surprised to learn t A. A. Dunmire, for six years assist state grain inspector for Wichita h been asked to resign and that a n from Kansas City, Kans., would s ceed him.

Mr. Dunmire was appointed assist state grain inspector in July of 19 He said that he did not know why resignation was asked for, neither the grain men. Some of the la think the difficulty came of the f that the equipment in the grain ins tor's office is not sufficient for spe work and that complaint had been m on the grounds of slowness, but t was in no respect the fault of Mr. D mire, they say. Thad Hoffman, pr dent of the Board of Trade is quoted saying he could speak for the Board saying the testing done by Mr. Dunm had been perfectly satisfactory that the organization had given official recognition of his ability.

Oats in Primary Markets.

Receipts of oats in eleven prim grain markets from Aug. 1, 1919, w comparisons with 1918:

	1919-20.	1918-
Chicago	11,179,000	24,207.
Milwaukee	3,434,000	5,549.
Minneapolis	2,428,000	3,166

Alfalfa Department

rmiston, Ore., is offering alfalfa 26.

mpa, Idaho, reports considerable fa moving now.

e third crop of alfalfa was about y to cut in Ida County, Ia.

lber, Nebr., reports second crop of fa hay unusually fine this year.

lgrade, Mont., reports No. 1 alfalfa d at $28. Lewistown reports $35. attle reports alfalfa fairly steady 27.50@28 for No. 1, but demand

embargo on alfalfa from Idaho on nt of weevil has been set up in on.

ound Ashton, Idaho, there are said e around 5,000 tons available for nent.

okane reports demand still very and alfalfa offered at $29 with only tle moving.

rk, Nebr., reports condition of all n that neighborhood good; yield of hay excellent; first and second of alfalfa both averaging good.

e Yakima Valley is said to be of- g large amounts of alfalfa in the and Snake River Valleys of ern Idaho, the chief shipping s of which are Nampa and Cald- which are making heavy shipments falfa at $23@25.

e Globe Mlg. Co., Oakdale, Calif., bought a portable alfalfa mill and w grinding alfalfa at the Stanislaus y Farms ranch between Oakdale Knightsdale. The company expects rind about 1,000 tons in this vi- y this year. After finishing up they move over to the Escalon to run the rainy season sets in. The y Farms Co. has over 300 acres is splendid crop.

HE ALFALFA SITUATION.

ALFALFA CROP SMALL.

DGE CITY, KANS.—The alfalfa crop is territory is very small and we ot believe there will be the quality rially this season, and most of the ers will retain their crop for feed oses.—*R. D. Flanagan, Mgr., Dodge Alfalfa Mlg., Elev. & Supply Co., e City, Kans.*

Kansas Alfalfa and Hay.

e State Report under date Aug. 29 that the second cutting of alfalfa, considerably delayed in many lo- es because of damage by cut is, returned a fair yield, aggregat- 1,056,000 tons of excellent hay, or 0.85 ton per acre. The third cut- where harvested, is considerably er and may average less than one- a ton to the acre.

obably three-fourths of the state's ounties left more or less alfalfa for d crop, amounting altogether to as perhaps, as 3 per cent of the total 56,000 acres in alfalfa. Nearly ev- ounty in the eastern half promises oduce some seed, although aside the usual seed-yielding centers in rest, it appears that few counties in western half will mature an alfalfa crop this year.

e yield of prairie hay promises to 86,000 tons, as against 694,000 tons 18.

stures are reported as "good" to ium" in all the counties of the except about a dozen, where they ated as "poor," as in several of the as river counties, and in the more tant grazing counties of Butler, n and McPherson. Stock water is lant everywhere.

orward Alfalfa Meal Sales Light.

NSAS CITY, Aug. 30.—Alfalfa meal rs and jobbers reported a liberal er of inquiries this week, but ap- tly little results, only a small vol- of business being transacted this week. Agitation over high living costs and general belief that prices for most commodities have reached their peak tends to reduce trade, causing a bearish feeling among the buying element. However, mills are bullish, and their views coincide with the trend of values in the alfalfa hay market. Some Eastern and Middle Western orders were filled, with Southern demand light.

Choice alfalfa meal closed at $39@41 a ton, in carlots, new sacks, a rise of as much as $1; No. 1 closed at $36.50 @$38.50; No. 2, $32@34.

The sharp break in hogs was a factor in the reduced volume of trade in the alfalfa mixed feed market. The hog producers are hesitant in buying feeds as a result of the changed market level of the pork animals. Demand was fair on the whole. Another factor in the trade was the declines in corn, which consumers consider the forerunner of losses in other feedstuffs. Prices showed little change this week, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50 @37; alfalfa grain molasses feed, $48 @60.

Colorado Alfalfa.

"The production of alfalfa on my land in Colorado will make three to four tons per acre this year," declared E. R. Boynton of the E. R. Boynton Hay Company, Kansas City, whose alfalfa land is located in the Eastern portion of the state. "Weather conditions have been favorable for the growth of alfalfa in the state. At the time we marketed our first crop of alfalfa the millers were paying around $15 a ton; on the second crop the market had advanced to $17.25, and today they are bidding around $18.25 per ton for alfalfa not yet baled. It is probable, too, that before we market our third crop of alfalfa, the prices will advance to $20 a ton. There is a keen demand for the hay, not only from mills, but from grazing interests of the Northwest, who are offering unusual competition for mills in the purchase of hay. We have been fortunate in gathering our hay, it grading generally choice. The labor situation in the state is a serious problem, a large number of producers being without sufficient, and certainly efficient, help to gather the hay and prepare it for market."

"Supplies of surplus alfalfa in Oklahoma are dwindling," declared W. B. Poindexter of North Bros. of Kansas City. "The same is true of New Mexico. These two states have been supplying the bulk of the requirements of alfalfa among the consuming interests of the South and Southeast, and, with stocks above the local consumptive requirements becoming exhausted, the important buying territory of the South and Southeast must turn to other sources for its hay. Kansas, more than any other state, will share in this demand, and it is probable that Colorado, too, will dispose of some of its hay into that section. Our experience in obtaining cars has not been as recent trade advices indicate, and while there is a shortage in the country, it is not yet acute."

Heavy Run of Sheep.

It seems the entire country has been unloading native sheep. Chicago last week had more than during any one week in ten years. Jersey City and Buffalo have been flooded with them, as well as Pittsburgh, Cincinnati and St. Louis. We attribute this to the fact that during the past two or three weeks most of the railroads had been unable to furnish cars; consequently we had light supplies and a very high market. Now this agitation about the H. C. L. has come into the game. All of our daily papers have their front pages lined up with it, and state that live stock is the first to break, quoting hogs, cattle and sheep from two to three cents a pound lower, which they are, but it all happened in two or three days, and has been the greatest raid ever made on the live stock industry, excepting during a panic, we ever knew in this country. When it comes about that the laboring man dictates to the producer it is time for the producer to strike, and unless conditions change the producer will strike and it will be a real strike.—*Knollin Sheep Com'n Co.*

Values in the Meat Industry.

Results of a survey made by the Institute of American Meat Packers show that the packing industry now outranks every business in the country in the total value of its products.

The leading packers paid a total of $61,351,905 for labor in 1918, compared with $18,489,037 in 1912, an increase in six years of $42,852,866, or 231.7. How the necessity of extraordinary production increased the number of employes in the industry is shown by the fact that sixteen packers in 1912 reported a total of 30,278 employers, while in 1918 the same companies reported 51,895 employes, an increase of 71.4 per cent, or 21,617 men.

The average increase in the hourly wage rate between January 1, 1916, and January 1, 1919, was 132.9 per cent. The actual average wage per annum in 1912 was $603.60, while in 1918 it increased to $1,163.44.

Inglis' Report on Corn.

John Inglis, crop expert with Logan & Bryan, on Aug. 30, said: "Conditions have been favorable the past month over most of the corn belt. Central and Northern states are exceptionally good, condition has been lowered in some important sections. Eastern Oklahoma, eastern Kansas, southern Missouri and southern Illinois have lacked moisture in wide areas so that the crop is spotted. Nowhere has loss been so severe as last year. The crop is maturing rapidly. Cutting will be general by Sept. 15. The quality promises to be the best we have had for some years and will be ready to move in November."

Marfield Grain Co.
MINNEAPOLIS, MINN.
General Receivers and Shippers of
GRAIN and FEED STUFFS

At any rate, we are not going to suffer at Thanksgiving and Christmas for cranberries this year. The three states of New Jersey, Wisconsin and Massachusetts will yield, it is estimated, 541,000 bbls. this year, compared with 370,000 in the three states in 1918, a gain of 46 per cent. One wonders if the price will do down.

BARLEY MARKETS.

AUKEE.—The local barley market eak and closed 3@4c lower. Re- are moderate and show increas- centage of new grain largely veight. Maltsters are reducing ns on old and the demand is hile light weight new is neglect- working towards an oats basis. e week prices declined 8@10c. ceipts for the week were 329 ainst 265 cars a week ago and 75 1918.

nt quotations are: Good to 48 to 50 lb., test, is quotable at .35; bright, $1.37@1.40; fair to 5 to 47 lb. test, $1.26@1.32; low, t lb. test, $1.19@1.25; feed, $1.15 Iowa quote $1.20@1.38 for light y; Wisconsin, $1.25@1.40; Min- $1.19@1.36; Dakota, $1.19@1.36; d rejected, $1.15@1.25.

ALO.—Barley dealers cleaned up ts to the local and outside trade, mostly the latter. Maltsters wanted the good weight old barley, fairly free from black oats but claimed they could not pay within 3 to 8c of the prices asked by sellers. Dealers here went to considerable trouble trying to get shipments around the low bids made and finally gave it up today. The offerings of the best new were of 45 to 46 lbs. and prices asked were as high as for the finest old. Old malting was quote at $1.48 to $1.55 and feed $1.38@1.44 on track or in store here.

KANSAS CITY.—Barley receipts showed another good increase this week, amounting to 82 cars, whereas the total a week ago was 64. A year ago there was one car offered. Difficulty in procuring cars for shipment eastward, where some of the new barley has been going lately, resulted in further depression of the market. Prices were also affected by the recession in corn. At the close, Saturday, the market was 14 @17c lower than a week previous, with No. 3 at $1.13@1.41 a bushel, and No. 4 at $1.12. Restriction in the shipping business was reflected by an accumulation of 52,000 bus. in the elevators, making the total stock here 59,000 bus., against 66,000 a year ago. Manufacturers of feed were limited buyers, as they are desirous of seeing barley reach a price level that will render ground feed salable below the level of wheat shorts. Barley feed can be made for 3 per cwt. or less, while wheat shorts range from $2.55 to $2.90. Feeders bought several cars of straight barley. The grain is much cheaper than corn, but this year's crop shows moderate weight. There may be some mixing of barley with oats.

DULUTH.—Trade in barley was light during the last week. Eastern demand was on the spasmodic order, and specialists reported that it appeared to be difficult to interest Eastern buyers. Receipts were comparatively small, amounting to 56 cars during the six days. Under current marketing conditions operators did not encourage shipments from the country. Quotations weakened 5@7c during the week, with the close for spot barley on Saturday standing at from 98c to $1.28.

MINNEAPOLIS.—The demand for barley has been critical and the ordinary offerings suffered a break in prices. There was little or no shipping demand for the elevator offerings and the elevator companies were not inclined to load up with fresh supplies unless they could hedge properly. For this reason the demand was best for the clean old crop offerings. Thin new barley was in slack demand.

SAN FRANCISCO.—The spot market was very dull, only small sales made, but there was some activity in the speculative markets. Futures however suffered a severe decline but gradually advanced during the week. December barley was quoted at $3.15—3.17 per cental.

CHICAGO.—The barley market last week was a very uninteresting affair. There was no material increase in the movement and very little demand. Maltsters occasionally took small lots, and there was a little feed interest but not very much. No shipping interest reported at all. Generally prices receded with jumps of 1@3c or 2@4c, the total loss being from 4@7c during the week. The low grades were very difficult to dispose of. Receipts for the week were 138,000 bus. and shipments 120,000. Prices are given in the table above.

PORTLAND.—The barley market is getting firmer and prices show some improvement since the last review. Receipts for the week however were light and the demand good especially for the limited offerings of choice barley. Ordinary barley, the *Commercial Review* says, is only in fair demand. Feed is close on the heels of blue and choice seed is anxiously sought for. Most of the barley arriving is heavy and of good weight. Values for No. 3 blue barley during the week $66 50 and feed $66.

Coming Conventions.

Oct. 13, 14, 15.—Grain Dealers' National Ass'n, annual meeting, St. Louis, Mo.

A cable from Australia says that a boom has begun in sales of wheat script in Australia, prices advancing sharply in anticipating of "American shortage."

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Aug. 29, and for the corresponding week last year, as reported by the Minneapolis *Market Record*, were:

	1919. Cars.	1918. Cars.
Minneapolis	276	201
Duluth	343	5
Chicago	137	73
Omaha	32	11
Milwaukee	58	18
Total	846	308

Closing outside prices of rye of standard quantity and spot cash for each day of the week beginning Aug. 22, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Aug. 22	1.52⅜	1.55	1.57¼	1.47	1.57

Nov.	.....	1,094,442	2,918,421	2,082,669
Dec.	.....	1,099,038	2,891,936	1,622,294
Yr.	.....	7,631,639	13,411,524	18,741,061

Acting on the charge that three Portland, Ore., flour mills were turning out weevil-infested flour, the city health officers two weeks ago ordered the plants closed.

The International Institute of Agriculture at Rome estimates the land area of the world, exclusive of the polar regions, as about 30,000,000,000 acres. The Institute has collected data from 36 countries having a total land area in excess of 15,000,000,000 acres, in which it is calculated 4,592,000,000 acres, or 30 per cent, are productive and 1,314,000,000, or 8.7 per cent, are cultivable and the grass lands.

Hay Department

Lewis County, Mo., made this year a very heavy hay crop.

Belgrade, Mont., is buying hay, No. 1 timothy being offered at $30.

The Ontario, Canada, hay crop has largely been lost because of excessive rains.

Wilbur, Wash., is buying both hay and oats; large amounts of both will be needed.

Chewelah, Wash., reports timothy hay being contracted for freely at $27@28 with alfalfa $25@26.

Jerome, Ida., reports the hay market weaker with less buying although a part of the surplus has already been moved.

Great Falls, Mont., reports fair movement of hay chiefly of upland stock, which is being offered at about $25 Montana rate points.

Three Forks, Mont., reports wild hay coming in from North Dakota with a small amount of local alfalfa moving at very high prices.

Hamilton, Mont., reports local hay moving to other Montana points, but farmers are not offering very freely; timothy No. 1 quoted $30@32.

B. F. Bills, representing the Fergus County Farm Bureau of Montana, is making a special trip to northern Dakota and Minnesota buying hay.

The greater part of the hay receipts at Portland, Ore., are cheat and oat hay with some alfalfa. The market is very quiet and with very good supply.

Grays Harbor County, Wash., has just completed the harvest of a very heavy hay crop, very little of which it is anticipated will be needed from outside points in that neighborhood.

About 500 tons of hay were harvested from Chanute Field near Rantoul, Ill., and were sold for $16,000, the Government making a profit of about $11,000 on the crop.

Toppenish, Wash., says there is a general lull in the hay market. Very little is moving on account of car shortage and customers are holding off waiting for a change and settling down of prices.

It is said about 4,000 tons of timothy and a like amount of alfalfa will be shipped from Colville Valley to points in Washington, timothy being quoted $28@30; alfalfa $35@36.

Broadview and Brady, Mont., report feeders buying both oats and hay with a very strong demand except at Brady, where the farmers are not able to buy except in small lots.

It is estimated that about 12,000 tons of hay and perhaps 15,000 cut in Minnesota will be moved into northern Montana during the fall and winter under the direction of the Great Falls Farm Bureau.

The Commercial Club of Cascade, Mont., is directing the purchase of about 1,000 tons of hay in South Dakota and a crew with two cars of haying machinery was sent by the club to Vivian, S. D., to cut and bale the hay.

The Commercial Club, Bemidji, Minn., has offered to deliver hay on cars on the Great Northern Soo Roads in lots of 100 to 500 tons from the Red Lake Reservation at $18@20 per ton. Most of this hay is cut on stumpage lands.

The Missouri hay report Aug. 30 says: Hay was 93%, indicating 1.27 tons per acre. The acreage of timothy cut for seed is greater than last year. Clover hay, 1.3 tons per acre, quality 91%; alfalfa, 91%; millet, 79%; grain sorghums, 85%; field peas, 80%; soybeans, 85%. Pastures, 84%.

Lloyd Evans, connected with the Omaha office of the Hartford Insurance Co., reports that both Iowa and Illinois have more pasture in hay "than they know what to do with." It is his opinion also that less corn will be allowed to mature in Iowa this year than ever before as silos are enjoying a great prosperity, and so many of them have been put up in the last two years that a farm without one or two of them is a rarity, and so much corn not cut for silage is hogged down that the husking peg remains unused from one year's end to the other. Still Iowa does ship some corn, averaging 28 per cent of her crop for the 10 years ending with 1918.

Oat Hay vs. Alfalfa.

Judging from the total amount of digestible nutrients contained, first quality oat hay ranks rather high in its comparison with alfalfa. Analyses show it contains 46.4 per cent digestible nutrients while the amount in alfalfa approximates 51.6 per cent. From this it would appear that when alfalfa is worth $30 per ton, oat hay would be worth in the neighborhood of $27. However, in practical feeding this relation does not hold true, though we believe oat hay would be worth at least $20. The proportion would depend, to some extent, upon the nature of the other feeds available.

Oat hay has its best value when cut in the early milk stage. At that time the stems and leaves can be cured into a bright, dust-free hay of good quality. If it is left standing until the grain is well formed or just before it is ready to cut for threshing, there will be a higher value in the grain itself, but the stems and leaves will be rather coarse and will be low in nutrient content.—*Hoard's Dairyman.*

Hay at Baltimore.

The Hay and Straw Committee of the Baltimore Chamber of Commerce, with the approval of the Board of Directors, has adopted the following new grades of hay conforming in description to the standards of the National Hay Association, and effective on and after September 10, 1919:

No. 1 mixed timothy and wild hay.
No. 2 mixed timothy and wild hay.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Rainy weather early the past week interrupted trading in hay on the plugging tracks of the Kansas City market for the first time in many weeks. But the wetness, while not general, means more fall pasturage and increased feed supplies for the Southwest. The moisture was welcome, but would have accomplished far more good if it had fallen over a larger area about a month ago.

Sensational declines in hog prices received attention among hay dealers the past week, owing to the fact that hog producers have been heavy buyers of alfalfa mixed feeds. The sensational drop in hogs, amounting to fully $10 a head on a matured porker weighin pounds, does not reduce the sup the country, but dealers are wond what effect the changed market have on the demand for alfalfa fe

With the opening of Septembe hay trade will witness the large mand of the year for prairie and a from stock yards of the Middle September and October will be th heaviest months in cattle receip stock yards, it is stated, with a p tionately heavy consumption of h

"Prairie hay prices would dou not be at their present level arour a ton were it not for the acute sh of cars in the important wild ha ducing sections of Kansas and homa," reported H. W. Elliott Peters-Elliott Commission Co., aft extended tour of the two states. plies of prairie in the country are the largest on record in many di of the two states. Practically all have been filled with hay, and th has not yet been harvested. In sections, the car situation is so that farmers are not cutting thei Many farmers advised me that would delay cutting their hay unt car situation improved, or woul cut until they found a buyer will bid on the hay in the field. The try is short of help and farmers other pressing work, so they a eager to gather their prairie crop ing no suitable storage facilities t it. The oil fields of Oklahoma an ther South, also the cotton plante good buyers of prairie now, the ding higher prices in instances re ly than prevail on the Kansas Cit ket."

Secretary Mohler of the Kansas board of agriculture repeats in hi 29 report his earlier estimate tha sas will have a prairie hay cro year of 1,186,000 tons, compared 694,000 tons in 1918. This is a increase. Other feed crops, howev not make so favorable a showing i duction in Kansas. "The secon ting of alfalfa," the report point "while considerably delayed in localities because of damage by worms, returned a fair yield, agg ing 1,056,000 tons of excellent h about 1,700 pounds to the acre. third cutting, where harvested, i siderably lighter and may averag than one-half ton to the acre. PRICE CURRENT-GRAIN REPORTER, 327 S. La Salle Street, CHICAGO, ILLIN

ported as good to medium in all unties of the state, except about a where they are rated as poor, as eral of the Kansas river counties n the more important grazing es of Butler, Marion and McPher- The corn crop may amount to 56,- bushels." Kansas probably will necessary to import corn this nd this may have some effect on rketing of alfalfa. The prairie on is bright from the standpoint iberal movement to the Kansas arket.

pping demand for hay continues reported E. H. Cash, head of ipping department of the L. C. Commission Co. "Inquiries from outh, Southeast and East are ning; in fact, sales are being n practically every territory that ly draws supplies from the Kan- y market. Dealers are preparing eavy demand from the Northwest ll and winter."

HAY SITUATION.

E HAY THIS YEAR THAN LAST.

ASKA (8).—The production of this district will be about nor- No excess for shipping purposes and has not for several years, believe there is nearer sufficient for local demands now than was the last year.—*The J. C. on Seed Co., Waterloo, Nebr.*

VERY LARGE HAY CROP.

EATELES, N. Y.—We have a very ay crop in this section this year. a top No. 2, light clover mixed, ike and timothy. The crop on a will run larger than last year. ut is yielding about thirty bush- he acre, and prices are from $2.15 3, according to the grade. There a very short crop of oat straw ood crop of wheat straw. cutting alfalfa was harvested in nape, but the second is slightly from wet weather.—*R. L. & Co., per W. J. Stewart, Skan- N. Y.*

AY GOOD—MOVEMENT SLOW.

(1)—All hay practically was put rst class condition; quality good, not large. Especially is this timothy, but the clover acreage irly large but thin on ground, st of this will be fed on the farm. s now no movement of hay what- lue principally to the farmers ating higher prices. Cars also een very scarce to move what here was ready for market. Oats will be very scarce in this section. vs are looking good since the rains. Young clover in some is looking good, but many places a poor stand.—*Raabe Brothers, nings, Ohio.*

Hay Markets

MONTREAL.

29—In this market local dealers re- uiet and weak market at $20@22 in on track as to quality. In this the 1919 crop of hay is a fair aver- o quantity, some reputed authori- the trade placing it at above an both in this province and in east- ario. In some districts, however, e writer has been through the crop rt, and some fields were ripe and when they should have been cut. in these districts said that No. 1 of this year's growth would be wing to the fact that the fields of generally were more or less mixed ver and other grasses. Consider- hay has been carted into the city rby points loose, a portion of which delivered to private parties. ceipts of hay during the last week eal were 7,300 bales, against 11,150 the same week last year. old hay is left is of very poor qual- the new hay is scarcely fit to ship Sales, however, are reported of ed hay at $20@22 for No. 2, for l trade. No. 3 new hay per ton, The quantity of new No. 1 hay will on the present crop owing to tim- being mixed with clover and other We quote as follows: s from New Brunswick report a op of hay.—Trade Bulletin.

Omaha Alfalfa Milling Co.

Omaha, Neb.

MEMPHIS.

Aug. 30—Activity in hay continues limited, but there is a firmer feeling in alfalfa and prices are a shade lighter. Receipts have been light, due in a measure to restricted demand, buyers holding off because of the unsettled state of the feed markets. Cash 1 grade is quotable around $32, with same grade timothy in transit at $31. Receipts of the latter have been light, but one reason has been that this market has been rather low compared with some of the others.

DULUTH.

Aug. 30—A good feeding demand was reported for hay on this market. Receipts were slightly better and were about sufficient to take care of current demands. Buyers showed a disposition to hold back awaiting lower prices, but in the opinion of operators recessions are not warranted at present owing to the small yields in parts of the West and the certainty that hay will have to be shipped from this territory out that way.

Quotations are unchanged as follows, per ton: timothy, No. 1, $27@28; No. 2, $24@26; mixed timothy, No. 1, $25@26; No. 2, $16@20; prairie, No. 1, $23@24; No. 2, $21@22; No. 3, $16@18; midland, No. 1, $19@20; No. 2, $14@16; straw, rye, $9@10; oat, $9@10.

DETROIT.

Aug. 30—Receipts show a slow and unsatisfactory increase and offerings are not yet liberal enough to bring lower prices. Dealers are inclined to quote an easy market because they expect liberal receipts in a short time. Quote: No. 1 timothy, $31.50@32; standard and light mixed, $30@31; No. 2 timothy, $29@30; No. 3 timothy, $25@26; No. 1 mixed, $26@28; No. 1 clover, $25@26.

BUFFALO.

Aug. 30—Dealers are doing practically nothing in hay, just waiting for something to turn up. It will be some time before the market gets settled down to a basis where they will take hold as conditions in all lines are too uncertain to take a chance. No. 1 timothy is quoted at $25@26; No. 2 $23@24, and No. 3 $20@21 per ton on track. There were sellers at those prices.

PHILADELPHIA.

Aug. 30—Baled hay and straw—Old hay is scarce but arrivals of new are moderate and with a fair demand; prices are steady, straw quiet and unchanged. Old timothy hay, according to location, No. 1, nominal; No. 2, $36@37; No. 3, $32@33; new timothy hay, No. 1, $37@38; No. 2, $35@36; No. 3, $31@32. Old clover mixed hay, light mixed, $36@37; lower grades, $31@35. New clover mixed hay, light mixed, $35@36; lower grades, $30@31. Straw, No. 1 straight rye, $13.50@14; No. 2 straight rye, $12.50@13; No. 1 tangled rye, $13@13.50; No. 2, tangled rye, $12@12.50; No. 1 wheat straw, $12@12.50; No. 2 wheat straw, $11@11.50; No. 1 oat straw, $12.@12.50; No. 2 oat straw, $11@11.50.

NASHVILLE.

Sept. 1—The hay market is without new features, with moderate demand, and ample supplies. Quotations: No. 1 timothy, $34; No. 1 clover, $32! alfalfa, $35@36. Receipts of hay at Nashville last week were 33 cars.

MILWAUKEE.

Aug. 30—The local hay market experienced a general price lowering the past week with greatly increased offerings of new hay, mostly mixed. The tone of the market is considerably easier and a fair demand exists. Choice timothy showed a drop of $3@4 while No. 1 showed a lowering of $3. Current quotations are: choice timothy, $30@31; No. 1, $29@29.50; No. 2, $27@28; No. 1 clover, $20@23; light clover mixed, $27@28; red top and timothy mixed, $25@28; marsh feeding, $16@17; packing, $11.50@12; rye straw, $10.50@11; oat straw, $9@10.

DENVER.

Aug. 29.—Quote today's prices for hay per ton: North Park wire grass, $29; South Park choice, $32; No. 1, $31; No. 2, $28; upland, No. 1 choice, $25; No. 2 choice, $22; choice prairie, $25; No. 1, $24; No. 2, $21.50; No. 1 Gunnison, $29; No. 2, $26; timothy, choice, $30; No. 1, $29; No. 2, $27; No. 3 and native mixed, $25; alfalfa, baled, choice, $21; No. 1 to choice, $20; No. 2, $16.

CHICAGO.

Sept. 2.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Aug. 30, also the total receipts and shipments of hay from Jan. 1, 1919:

	Aug.30, 1919.	Aug.23, 1919.	Aug.31, 1918.
Total receipts.....	4,909	5,360	6,055
Total shipments....	483	151	1,039
Rcpts. since Jan. 1.	161,356	156,447	224,025
Shpts. since Jan. 1.	35,384	34,901	67,229

Everything now points to an advance in prices. The quotations below held for several days with market strengthening. The trade now look for prices to advance and shippers are advised to ship now and let the hay earn money while in transit. All arrivals this week promise to come in on a much stronger market. Quote as follows at close of the week:

Timothy—No. 1, $28@30; standard, $27@28; No. 2, $24@26; No. 3, $18@22; sample, $15@20; threshing, $12@15.

Clover—No. 1 light, $25@26; No. 1 clover mixed, $24@26; clover, $23@26.

Prairie—Kansas and Oklahoma, $20@24; Iowa, Minnesota and Dakota, $17@21; marsh hay, feeding, $13@16; packing, $10@12.

Straw—Rye and oat, $9@10; wheat, $7@8.

MINNEAPOLIS-ST. PAUL.

Aug. 30—Quote hay prices for the Twin Cities as follows:

No. 1 timothy, $27; No. 2, $25; No. 3, $20; No. 1 mixed, timothy and wild, $24; No. 2, $23; No. 3, $16; No. 1 mixed, different grasses, $25; No. 2, $23.50; No. 1 clover, mixed, $24.50; No. 2, $23.50; No. 1 clover, $23; No. 2, $18; No. 1 upland, $26; No. 2, $24.50; No. 3, $21; No. 1 midland, $19.50; No. 2, $17; packing $10; No. 1 rye straw, $9.50; No. 1 oat straw, $9; No. 1 wheat straw, $9; No. 1 alfalfa, $33; No. 2, $30; No. 3, $24; standard, $32.

NEW YORK.

Aug. 29—The New York Hay Exchange reports the hay situation as follows: Receipts for week—Hay, 4,012 tons; straw, 250 tons. Receipts last week—Hay, 4,805 tons; straw, 240 tons. Receipts Sept. 1 to date—Hay, 226,597 tons; straw, 14,448 tons.

The situation has been, and still is, very irregular, values not well defined and market in buyers' favor throughout. New invoices are naturally showing marked decrease because of the embargoes on all principal harbor points excepting Bushwick station, but a good deal of hay is arriving by river barge, one boat coming forward last week and another being now due. A good deal of the hay is now new hay, and there is not much preference shown for old as most buyers are not willing to pay the additional price usually asked for it. The situation has been strongest at B. E. D. T. and Bushwick station where values have averaged from $2@3 a ton above prevailing prices in Manhattan and this has caused a number of buyers from across the bridge to

THE FITZGERALD BROS. CO., CINCINN OHIO

seek supplies in Manhattan because of the difference in price; but trade in Brooklyn is slow at the close and this difference in price will probably adjust itself soon. Our quotations as given in the tables below are meant to represent values in Manhattan, and even at that they are more or less nominal because of the very irregular prices being paid for like qualities.

A few cars of high grade old timothy hay are offered in Manhattan, No. 1 in large bales being held at $38 and not finding buyers at the price. No. 1 new hay sold a few days ago at $37 but it is doubtful whether $36 could be obtained now. No. 2 old hay ranges in value nominally from $32@35 in big bales though the outside quotation is becoming extreme, and we hear of business in No. 2 new hay in big bales down to $30 in exceptional instances even that figure being shaded. No. 3 and shipping selling at all sorts of prices though we think the bulk of sales are within our range of quotations. Small baled hay is selling a little closer to large than formerly. There is very little call for clover mixed unless showing a very light mixture.

Rye straw selling at the close at $17 both from boat and at Penn. yard, and oat straw sells at $14 generally, one or two sales making in Brooklyn at $13.

Quotations: Old hay—

Effective Aug. 26, the Lehigh Valley placed embargo on Pier 66, New York.

CINCINNATI.

Sept. 2—There was a radical change in the local hay situation the past week, with losses of $5.50 to $6 per ton for timothy, and $4 to $5 for mixed, but the market seems to have reached a better position by the reductions, which promises more stability and a revival of southern shipments as present values are again in line with competing markets for this trade. There was an unexpected heavy movement during the week, and with the demand entirely of a local consumptive and speculative kind without outer outlet, the break was unavoidable. Before the sharp declines, the market, however, was featured by new high record prices for clover, a car of which brought $36.75 per ton, the highest ever known in this market.

No. 1 timothy, $29.50@30.75; standard timothy, $29@29.50; No. 2 timothy, $28@29; No. 3 timothy, $25.50@27.50; threshed timothy, $14.50@16.50; light clover mixed, $29@30; No. 1 clover mixed, $28.50@29; No. 2 clover mixed, $27.50@28.50; No. 1 clover, $34.50@35.25; No. 2 clover, $32@33; No. 1 local alfalfa, $32@33; wheat straw, $8.50@9.50; rye straw, $11@12; oats straw, $8@9.50.

BOSTON.

Aug. 30—Arrivals of hay the past week were more liberal and there is now a slight accumulation of new hay at the various railroad terminals which receivers find some difficulty in moving. The demand has been of a hand to mouth nature and the trade is only meeting most pressing needs. The result is that there is some pressure to sell with little or no inclination on the part of the trade to purchase. Old hay is offering in a limited way at about $2 per ton above quotations on new but the amount offering is small and the market largely nominal. Some of the new hay arriving is showing considerable heat and out of condition and these grades sell at considerably under open quotations. No. 1 timothy of good quality is quoted at $37@39 per ton for large bales, wih small bales at $35@36; No. 2 timothy at $34@36 for large bales and $32@34 for small bales. No. 1 Eastern is quoted in the range of $32 @35 per ton, with No. 2 Eastern at $28@31. No. 3 hay is scarce and ranges at $24@27. Clover mixed hay takes a wider range, being quoted at $26@30 per ton for all grades. Fine hay ranges at $23@25 for poor to choice. Receipts for the week ending Aug. 30 were: local 220 cars.

The market on straw is quiet. Choice rye straw is quoted at $17 per ton and oat straw at $13@14. An occasional fancy car bringing a higher price. Receipts for the week ending Aug. 30 were 10 cars; for the month of August, 1919, were 2 cars.

ST. LOUIS.

Aug. 30—Receipts of hay at this point for the week were light, and consisted mostly of medium, to good grades of hay.

Timothy hay market is strong and higher on the better grades of timothy which are in excellent local request. The medium grades are in better demand, buyers being unable to supply themselves with the best grades have bought freely of the medium grades. Low grade hay, hay that is grassy and weedy is slow selling. The demand being very limited and values low.

Light clover mixed hay continues to rule firm with excellent demand for good No. 1 light clover mixed. Medium grades steady, the medium grades are dull. Heavy clover mixed hay scarce and in demand, hay grading No. 1 or No. 2 heavy clover mixed is selling readily here at full price. Pure clover in scant offering and excellent demand, anything offered is readily absorbed at full price.

Prairie hay market steady, offerings light and demand good, readily absorbing the offerings at fair price.

Alfalfa hay continues firm with excellent demand, every offering is being readily sold at full prices; particularly good No. 1 to choice leafy alfalfa on local dairy account and good dry green alfalfa for milling account. Medium grades are quiet.

Track prices were as follows: Timothy, No. 1, $34@36; standard, $32@34; No. 2, $28@30; No. 3, $24@25; Light clover mixed, No. 1, $31@32; No. 2, $28@30; heavy clover mixed, No. 1, $30@31; No. 2, $28@29; choice alfalfa, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $26@29; choice prairie, $26@27; No. 1, $24@25; standard, $23@24; No. 2, $20@22; straw, $7@7.50.

DES MOINES, IA.

Aug. 30—Hay receipts are very light for this time of the year and prices are ranging one to two dollars per ton higher than last week. Choice upland hay is quoted at $25.50, alfalfa $29.50, timothy $28.50.

KANSAS CITY.

Aug. 30—Weakness again developed in the market for prairie in Kansas City this week, while alfalfa and tame hay scored further advances. Prairie closed unchanged to $1.50 lower; the advance in alfalfa amounted to 50c to $1, and timothy and clover mixed closed about 50c higher than a week ago. Receipts of hay in Kansas City amounted to 978 cars, compared with 997 cars last week and 876 a year ago. The bulk of the offerings were of the wild variety and it was said the movement would have been far greater were cars available for loading the hay in the country. Demand

tations below are for new hay.) othy, $35@36; standard timothy, No. 2 timothy, $32@33; No. 3 28@30; No. 1 light clover mixed, No. 2 light clover mixed, $30@31; er mixed, $30.50@31; No. 2 clover @29; No. 1 clover, nominal, $25; er, nominal, $22.

PITTSBURGH, PA.

—With the exception of good er and No. 1 clover mixed hay, all grades are now in excess in the local market. The demand is poor and prices are on the sliding board. Unless there should spring up a better demand prices will be even lower, it is expected, within the next week. Storage accommodations are scarce and the yards are unequal to caring for the large number of cars coming into the market. Buyers, apparently, do not want anything but the finest grades of hay even when price concessions are offered, and are willing to pay the best prices asked for top notch supplies. Total receipts for the period were 1,368 tons, breaking record for the week previous and for the same week last year. Quotations follow: No. 1 timothy, $33.50@34; No. 2 timothy, $28.50@29.50; No. 3 timothy, $24@26; new No. 1 light mixed, $29@30; new No. 1 clover mixed, $30@31; new No. 2 clover mixed, $24@26; new No. 1 clover, $30@31.

SAN FRANCISCO.

Aug. 30—Receipts of hay for the past week 3,459 tons, last week 2,971 tons and the week previous 2,818 tons. The extra receipts were of hay by boat from the bay and river districts which has been exceedingly heavy and no doubt will continue that way for some time to come, as boats are available.

Most of the hay arriving has been of the red oat variety from the reclaimed districts and alfalfa from the river districts. Although this hay moved off fairly well, yet demand has not been as brisk as it was, as many consumers are becoming filled up and are therefore out of the market. Third cutting alfalfa hay is now being marketed from the river and is, as a rule, of a very fine quality and sells well.

There is considerable straw offering, but there is little demand and very little purchasing being done.

Fancy wheat hay (light 5-wire bales), $17.50@19; No. 1 wheat or wheat and oat hay, $15@18; No. 2, $12@15; tame oat hay, choice, $15@18; other, $12@15; wild oat hay, $10@14; barley hay, $12@16; alfalfa hay, $17@22; stock hay, $8@12; No. 1 barley straw, 50@80c bale.

It was reported from Alexandria, Egypt, at about Aug. 1, that during August and September three cargoes of Australian flour of 6,000 tons each will be unloaded so that by the end of September there will be in the Alexandria market about 18,000 tons of flour.

E. W. Graham, U. S. cotton futures attorney, has resigned and accepted the presidency of the American Cotton and Grain Exchange. He assumed his duties on Sept. 1.

Am. S. & W. Crop Report.

The crop report of the American Steel & Wire Company, dated Aug. 29, said that corn is holding its own and promises to ripen earlier than usual, thus insuring good seed for next year. Cotton may not exceed 65%. Irish potatoes are short and quality inferior; sweet potatoes good to extra good.

Corn, unless something unforeseen happens, promises to make a good average crop. This crop has suffered severely in Kansas from drought. From all reports corn is maturing more rapidly in the great corn belt than usual and with early September frost at least ten days to two weeks off, should produce a large proportion of well-ripened grain fit for next year's seed, if properly cared for.

Cotton has been handicapped throughout the year by unfavorable weather in the states where it is produced. The report figures still indicate that the crop as a whole will not exceed 55 to 65%. Boll weevils and weeds have aided materially in producing this low figure.

Wheat reports continue to show that the quality of wheat leaves much to be desired, but the greatly increased acreage will offset much of the loss, thus leaving about an average crop. Oats closely follow wheat, both having suffered from the same extremes in weather.

Forage crops as a whole are good. There are some localities that have suffered from drought and a few that have had too much water, but these conditions are localized, and it is safe to say that live stock over practically the entire country will not have to suffer for want of roughage.

In general weather conditions during the past week were favorable. Local timely showers have broken drought conditions, which proved beneficial to maturing crops.

Situation in General.

The action started by the Government against the H. C. L. is now bringing good results, prices of all foodstuffs are being lowered daily. The economy practiced by the housewife in refusing to buy high-priced meats, together with the Government's pressure on the packers, has produced a surplus stock of meat that is bound to mean considerably lower prices to the consumer. The cattle and hog market is badly overstocked, hogs have declined $3 this week and this has been one of the big bear factors in our grain market. The industrial situation is still causing grave concern; it looks today as if a general railroad strike may be averted, but the steel men have thrown down the gauntlet and there are many large strikes scattered over the country. Industrial peace will largely depend on the results of the present movement to reduce the H. C. L. within the next ninety days. The condition of our market is more bearish than we have seen it for a long time; sentiment has entirely changed; there is no buying power in the market except from shorts. The rally we had on Friday was short covering, started by the Kansas State report of a reduction of thirty million bushels in their corn crop as compared with the August 1st estimate. These reactions can be expected whenever the market becomes oversold. We think they will be temporary, as we believe this downward movement in foodstuffs is going to prevail.—*W. H. Perrine & Co., Chicago.*

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle*:

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Sept. 2.—A most unusual provision market was experienced last week. Hogs dropped $2.50@3 on Wednesday and Thursday. Liquidation and short selling was on in product with the pressure heavy and the buying power weak. Pork declined $2.75 for September from the high point on Wednesday to the low on Thursday, and on Friday dropped to the lowest of the season, or 50c under the close on Thursday, showing a loss of $16 from the high point of the season. Lard broke $1.25@1.60 per 100 lbs. at the same time, with a sharp reaction on Friday, and short ribs dropped $2.25. A good reaction came Friday and at the close on Saturday there were net losses for the week of $2.87½@3.50 on pork and $1.35@2.57½ on lard and $2.62½ on short ribs, with hogs off $2.35. From the highest point of the season there have been declines of $9.75@13.50 on pork, $8.55@15.70 on lard, and $7.87½ on short ribs.

Prices on cash meats dropped 1½@2c or more and for a time it was a question of buyers rather than sellers, the reverse of the situation prevailing for months. Little demand existed from any source, especially from abroad, as rates of exchange are too low to make export business profitable. Packers have large supplies of product made from high priced hogs and do not like to force values down any more than necessary to save as much loss as possible. There is a good sized manufacturing loss in product at present and prices on dry salted meats have declined to a point where some of the cash handlers believe that they are low enough for the present, but have not been able to convince buyers of this fact.

Heavy selling of lard was on for packing account and the shorts were most aggressive at times. On Friday the tone changed after an early break, as hogs recovered the loss of 50c made early in that day. This resulted in a sharp rally.

A packer discussing the price situation when asked what hog products were worth said, "all you can get for them." This best illustrates the situation. Shipments of lard and meats for the week were large and exceeded last year's. The fresh meat trade was of fair proportions and supplies of hogs larger, but prices did not decline to any great extent, although beef is off 1½@2c per pound. Retail prices were little affected and the question is where will the consumer be benefited by the decline which has been expensive to packers and live stock raisers.

Prices for the week follow:

Kansas City Provision Review.

KANSAS CITY, Aug. 30.—The sharply downward tendency of hog prices was a restricting influence in the trade in provision products on the Kansas City market this week. Buyers were unwilling to enter the market until the trade reached a more stable basis, making purchases in small lots and only sufficient to meet their immediate requirements. Loins and shoulders, and other fresh cuts, were off about ½c, while raw leaf and finished lard declined about 1c compared with a week ago. Trade with the East fell off slightly. Harvesting of cotton in the South is broadening the demand for dry salt and heavy smoked meat from that territory. Prices for these meats, however, were off rather sharply, closing as much as 2⅛c lower. Fancy hams and bacons were ½c to ¾c lower, with only a fair demand prevailing.

Summary of Live Stock Markets.

Top prices on hogs in leading markets for the week, as compiled by the *Daily Drovers Journal*, follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$21.65	$21.50	$21.10	$20.25	$19.50	$20.10

Live Stock Market

CHICAGO LIVE STOCK.

CHICAGO, Sept. 2.—Hog prices on the down grade, as were those live stock last week with the mo vere decline of the season, as well recent years. A break of $2.50@3 made from the high point on We day to the low on Thursday, wit additional drop of 50c early on F and a recovery, while on Saturda price was up. The average pric Friday was $16.75, or 95c under previous day's, showing a loss of for a week, and compared with $ last year. Supplies were liberal an several days from 10,000 to 14,000 carried unsold, making a big supp the market. Packers were indiff buyers and shippers only took moderately. Coarse heavy packing were down to $15 with heavy pa sows $15.25@15.75 and mixed pa lots $16.25@16.75. Prices have dr $4 from the highest point of the s and unless farmers shut off in shipments lower prices are to b pected. While the packing hogs the lowest of the season, the s between the coarse, rough grades the choice was $4.50 on Friday. plies were ample and purchase packers were not heavy, as com with normal.

With the Government contin after the packers, they are not dis to load up with hogs, cattle or she any extent, especially with the tinued talk of profiteering and the ernment's efforts to reduce the hig of living and at the same time about an advance in wages to pa house workers.

Cattle prices are off $1.50@2.2 the week, the slump being one o worst known, and was largely o medium grades. There were not choice steers on the market, and $18.50 was paid at one time prices lowered to around $17.75@18 at th with a liberal percentage of the at $13@15. There was an exc supply of cattle in all markets, cially in Kansas City, and reshipp to other markets were necessary. supply of beef was heavy and pric @2c lower on dressed lots, as com with early in the week. Cows heifers suffered along with the d in the general market. The trade was lighter and prices Calves dropped $1@2 with $20 for the best at the close.

Sheep were abundant and lost $ 2 for both sheep and lambs fo week. A heavy movement was o is expected to continue. At the good lambs sold at $14@14.50 with $14.75. Culls were mostly $8 Yearlings closed around $10.50. feeder trade was slow with good $13.50@14 and choice at $14.25.

Kansas City Live Stock Mark

Sanders Sosland, Correspondent

Kansas City, Aug. 30.—August clo the trade in live stock in Kansas Cit the most bearish week of the summ a weak feeling surrounding cattle, ho sheep. In the week just closed hogs the most bearish showing, experi sensational declines, the close sh losses of $2 to $2.75 per hundredweigh pared with last Saturday. Cattle los 75 cents and lambs as much as $2.

Few periods in the history of the in have shown so severe a break in h was recorded this week and during A The market today is as much $4 to hundredweight lower than at the cl July, when the highest figures of th were scored on hogs. Still, the Kans market continued to maintain an ab premium over Chicago and Omah average cost closing at $17.87, cor with $16.85 at Chicago and $16.45 Nebraska market. There was a decr receipts of 3,000, the run amounting 300 head, against 53,800 a year ago, was asserted by packers that domest export demand for the dressed produ fallen off sharply.

Receipts of cattle were 92,000 against 112,200 the preceding week a 700 a year ago, these figures inc calves. Corn-fed and grass cattle los 50 cents, and closed with the trade bottom level of the week. Grass stee

) between $10 and $16, with the bulk at $11 to $15. Veal calves lost as as $1.50, closing with a top of $14.50. cows sold around $9, and canners $5.50. Stockers and feeders moved ral volume to Iowa and Illinois, but states were moderate buyers, and ccumulations were reported today to ied over into next week's trade. Ner- ss over high price agitation in food s is a bearish influence, discouraging uyers of stockers and feeders. Losses :o $30 a head on many cattle coming ansas pastures are also discouraging er buyers.

arp increase in sheep and lamb re- ent lambs down as much as $2 and 5 to 50c. Western lambs closed with)f $14.50. Continued heavy supplies ected on the market.

)maha Live Stock Market.

uce McCulloch, Correspondent.

a, Aug. 30.—Monday of this week of cattle were 27,197 head, break- records for a single day, and the total of 61,021 head is the largest season to date. Not over eight or is of finished corn-fed steers were l week and local scarcity forced up 50c or more, though declines n order nearly everywhere else. earlings closed at $17@18.25, with cattle as high as $18, these prices igher even than those in force at Westerns made up the big end upply, and killing classes all broke closing at the lowest time of the

stockers and feeders were at no excessive supply, and closed steady week ago. Medium to plain grades ff on the close, under pressure of accumulation of plain cattle, and where from 25c to 75c lower than ek. Demand was broad through- choice to prime feeders at $13@ l to choice kinds going mainly at)0, with common to good grades at .50. Stockers of all classes sold @11.

y hog supplies were not abnor- eavy for this time of year, the run footing up 37,012 head. Else- iberal runs were the rule, and as were extremely bearish all week, ket suffered one of the biggest ver seen here in so short a period. ulk of the hogs is selling at $16.40 with the top at $17.50. These re $3.25@3.50 lower than a week l $5.25@5.50 below the figures in the close of July. The present)f prices is the lowest seen here tober of last year.

and lamb receipts continue very his week's receipts of 183,103 head ghtly larger even than last week's The supply for the month is an twice as large as the biggest August run. After having stood all month under the pressure of eceipts, the market gave way this th a crash, and in sympathy with l cattle, values touched the lowest the season. Declines were most fat lambs, which are $2.50 lower veek ago.

Worth Live Stock Market.

C. Murphy, Correspondent.

Worth, Aug. 30.—Conditions which about a depression in the dressed de at the Eastern centers were le for a sympathetic decline in e values here this week. During three days prices held steady on d were advanced 50 to 75 cents due to a shortage in receipts, closing days saw a general down- nd in values, steers settling at a f 25 to 35 cents, while cows and ost practically all of the early is applying especially to the good alves lost 25 to 50 cents Monday. regained part of the decline, the ng around steady to 25 cents

rsday and Friday the hog market ed very heavy declines, prices from $21 Monday to $20 Thurs- $19.65 on Friday. At the high sale was made at $21.50, l above the market. The loss for amounts to $1.75@2. Pigs gained ble strength early in the week, me high notch being $19.50, but opped rapidly later, the market lower for the week.

to heavy declines elsewhere, the n sheep and lambs closes with a t least $1. Receipts have been ral, but stockers have comprised end of the week's supply.

)uis National Stock Yards.

L. Wyatt, Correspondent.

l Stock Yards, Aug. 30—The cat- is week was very liberal, approxi- 000 more than in the preceding about 5,000 less than the corre- week of a year ago. There was a sprinkling of good qualitied cattle ulk ran to the plain grassy kinds fed corn cattle. Prices broke sly all week. Prime cattle are 50c a week ago. Medium and com- e are 50c to $1 lower. Oklahomas rns are 75c lower and in spots as $1 off. Butcher cattle choice ight yearlings furnished the only t in the market.

market experienced the severest eek that it has had in years. A c to 75c a day was common, and se it is around $2.75 lower than of last week. Disturbed com- nditions including the ever pres- ent labor problems have much to do with this, and it is exaggerated by the fact that Monday will be a holiday when the packers will not operate. The week's closing quotations are: Mixed and butchers, $19@19.85; good heavys, $19.50@19.85; rough, $15@16.50; light, $19@19.60; pigs, $15.50@19; bulk, $19.50@19.70.

As in cattle and hogs, the sheep and lamb market has also taken its bumps this week. The general market in the sheep house is $1 lower on all young stuff. Fat mutton sheep and good breeding ewes have declined about 50c.

Oklahoma Livestock Market

Thusnelda Haehnke, Correspondent.

Oklahoma City, Aug. 30.—Receipts in cattle are continuing to be light. Prices have been fully steady on all grades of steers with very few real fat ones coming our way. This week buyers were forced to fill their orders as best they could from the offering of butcher cattle. It is evident that killers demand a pretty fine article of grass-fat cattle now before they will pay over $10, while the $11 up basis calls for a healthy feed bill. Towards the close of the week on steers packer buyers contended they figured higher than a week ago, anywhere from 25@50c.

The bulk of receipts being common to fair quality averaging 900 to 1,000 pounds. $11.25 was paid for some cattle averaging around 1,150 pounds, with several loads averaging 1,050 at $10.75.

Prices on hogs have dropped considerably during the past two weeks. The market for this week is from 75@$1 lower. Thursday $19.25 was paid which was the lowest price since early last April. There are still very few hogs coming to this market, also stockers have been rather scarce. They are also considered $1 lower, with $17 the best basis.

Denver Cattle Market.

Denver, Aug. 29.—Heavy receipts of cattle here on Monday but about normal since. General trade on killing cattle 50c to $1 per hundred under a week ago. Stock and feeding cattle in light supply and near steady. Veals continue to be a drug on the market. The fall run of other cattle is on, and the trade see no general reason to hold for later market. Range of prices: Killers, $7.60@15.25; feeders, $9.25@10.50; stockers, $6.25@8.75.

Meat Exports From New York.

The Bureau of Markets reports the following exports of meats from the port of New York for week of Aug. 23 and since July 1, 1919:

Beef—	Aug. 23.	Since July 1.
Frozen or fresh	18,775,768	38,560,802
Canned and pickled	2,450,549	9,918,821
Pork—		
Fresh or frozen	21,048	36,401
Bacon, hams and shoulders	13,294,735	67,107,502
Lard and lard compound	5,412,109	68,083,865
Sausage	393,814	1,926,755
Dry salt and pickled	9,481,484	73,626,485
Lambs and mutton	1,114,083	1,478,397
Poultry and game	29,950	588,991

During this period the following live stock shipments were made: August 19, 105 horses, 275 cattle to Belgium; horse, 25 mules to the West Indies; 12 mules to South America. August 22, 60 horses, 1,021 cattle to Belgium; 30 mules to West Indies.

Provisions Prices Collapse.

A combination of circumstances—the campaign against the high cost of living, labor troubles the country over, and the lull in the export trade due to difficulties over foreign exchange and waiting for the arrival of the British Commission, coupled finally with the September liquidation which has been going on for two weeks, has brought about a smashing decline in Provision prices! The last item on the list, liquidation, has been the more drastic and complete on account of the other circumstances just at this time, even financially strong people throwing stuff overboard; but we believe the market has been thoroughly cleaned out. A substantial reaction has already set in, and we believe that a period of steadiness and possibly advancing prices is before us.—*Cross, Roy & Saunders, Chicago.*

Fall plowing is progressing nicely now. A good guesser puts the wheat acreage this year at two-thirds that of last year.—*H. I. Baldwin & Co., Decatur, Ill.*

The Civil Service Commission of the United States is ready to examine candidates for appointment as grain supervisors in the Bureau of Markets at salaries ranging from $1,800 to $3,240 per year.

O.W.RANDOLPH CO. TOLEDO, O. U.S.A.

MAY BUY AT MOST ADVANTAGEOUS TERMINAL.

The situation confronting Texas dealers in the handling of the new wheat on account of the export blockade is serious. In many instances wheat has been threshed and stacked up in the fields in sacks with nothing but straw over it and no granary or storage room available. Threshing is being stopped in many instances, in the Panhandle especially, due to the lack of sacks as well as for the need for handling the immense crop of maize. It is said that the farmers will be glad to sell their wheat at a greatly reduced price. Permission was asked of Mr. Piazzek, zone agent, to buy on New Orleans freight rate basis, but this was positively refused. Sec'y Dorsey of the Texas Association, realizing the seriousness of the situation and feeling that authority might be given if the matter was presented through the Association, wired Mr. Piazzek as follows:

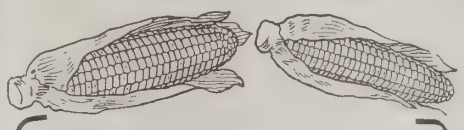
"Situation growing more serious. Wheat stacked up on farms all over Texas, no storage, threshing has been stopped in the Panhandle account scarcity of sacks in which to put the wheat from the thresher and stack out in the field and put straw over it. Threshing badly needed for threshing maize as well as the cars are needed for hauling it. Room in New Orleans for the wheat. Many farmers would be glad to sell wheat at twenty-five cents per bushel under government guarantee rather than let it lay in the field and rot after expense of threshing and I understand you or the Administration refuse to permit dealers to buy at even five cents under reflection of government guarantee to equalize the difference in freight to New Orleans. This seems unreasonable and in fact outrageous if true and will result in the absolute loss of millions of bushels of wheat. Understand Fort Worth party advising dealers to buy on this basis. Wire if such authority has been given anyone Something should be done immediately. You cannot imagine the seriousness of the situation. Am writing you fully today. Since farmers are anxious to sell on any basis rather than let wheat rot permission should be immediately given for the purchase on basis of New Orleans freight."

In reply to this wire the following message was received:

"Telegram received. Have transmitted substance to New York with urgent appeal for relief at Galveston and a statement of situation which I can give you. While I understand it is incumbent upon licensed dealers to reflect to producer the price at most advantageous terminal, don't understand that by private treaty producer wouldn't have right in order to avert loss to sell his grain on a basis other than the advantage terminal. For protection of dealer such cases should be in writing from producer. Nobody has authority to give advice you say Fort Worth party giving. Hope have something for you from New York soon."

And later another message was received which is as follows:

"If the most advantageous terminal of dealer or miller is embargoed and he has no unoccupied space in his elevator or mill he may purchase from the producer at producer's request on a basis of a proper reflection of the most advantageous buying terminal which may be open for shipment of wheat. Dealers are advised that any abuse or deception of relation to this temporary privilege would be a violation of both his license and agreement."



Sec'y Dorsey in his bulletin to his members says:

"You see, this gives you authority to buy from the farmer on the basis of the New Orleans freight rate, but you will notice the suggestion that this must be at the farmer's request, and I suggest that in doing this you have the farmer make the request of you to purchase his wheat on the basis of the New Orleans freight rate owing to the fact that there is an embargo on Texas City and Galveston and he desires to dispose of his wheat so that he can get at other farm work or for the reason that he has no protection against the elements for his wheat, and file this for your protection as suggested by Mr. Piazzek's telegram."

This action on the part of Sec'y Dorsey and the Association is surely worth a great deal to the members of the Texas Association and the grain trade generally and would no doubt not have been accomplished except through this organization.

Bumper Car of Wheat.

Seele Brothers Grain Co., Merchants Exchange, St. Louis, unloaded at their Mississippi Valley elevator Car 135237 U. P. No. 2 red wheat shipped on consignment by C. Fieker, Fayette, Ill. This car 100,000 capacity contained 163,200 lbs. of wheat or 2,720 bus. So far as we have been able to learn this is the record. Have you heard of a heavier load?

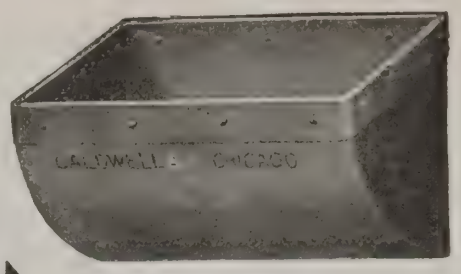
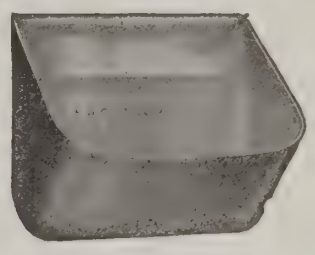
"See How Simply It's Built"



The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

MILLING WHEAT AT ITS SOURCE

A strict eye on the tailings and bran is the food program of the Nu-Way Mill. It occupies very small floor space; Uses minimum of power; Inexpensive to buy and to operate.

The Simplest, Most Practical, Most Economical Flour Mill on the Market

Cape Mill Manufacturing Company
10 S. Frederick St. CAPE GIRARDEAU, MO.

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

BUSINESS AND TRADE CONDITIONS

HE Administration is now committed to the theory, which the price index numbers for the present at least justify, that prices have passed peak and are on the decline. Food, as repre-ed by grain and live stock prices paid to farm-is certainly lower, although it is a long way the yards and the wholesale grain markets to etail butcher's block and the fancy bakery. It be hoped, however, that the workmen's craze end extravagantly and to force the money out e employer has nearly run its course, in which with returning common sense on the part of ucers, prices will assuredly recede and thus relief to all. High prices are no guaranty wages will be high and all who think know actual wages, as represented by the goods for mption, can never in the race quite overtake and advancing prices. It is only when prices to fall and goods are plenty and cheap that the ers find living easy.

ile during the past fortnight it has been ght by competent authorities that the price re-on has really begun, nevertheless, "due to the nued operation of the factors which resulted in present high prices, stabilization of prices at levels is approaching." At least this is the on expressed by the National Bank of Com-e in New York in its market letter in the Sep-er issue of *Commerce Monthly*, which says:

is the conviction of the business world that , or at least rising prices are evidences of a sat-tory situation. This conviction has a basis in in that high or rising prices stimulate increased uctive and commercial activity. Our high s are unquestionably the product of a world-curtailment of production and increase of con-otion as a result of the war, of those goods nec-y to a peace-time life; of an increase in the cir-ing medium and an expansion of credit which onflict through which the world has just passed ered inevitable; and of the increased margins rofit deemed necessary to meet the risks in-d in a period of rising prices. The era of ex-agance which has followed the restrictions of has also been a factor in raising prices. When buying public seems not only willing but anxious urchase, regardless of cost, prices respond as a t of what appears to be a shortage of stocks measured by demand.

ven though actual hostilities are now ten hs behind us, the causes which have resulted resent prices are largely operative and it seems y that stabilization at a new price level is ap-ching.

periods of rapidly rising prices, the commer-and financial activity resulting is likely to in-se out of proportion to the growth in productive ity on which it must ultimately be based. Al-gh the actual physical adjustment of American uction to post-war demands has been more l than the most optimistic could have hoped, uction has not yet expanded to what must be ormal post-war level.

rosperity has but one possible basis. That basis roduction. Volume of business in tons and s and bales is its true measure. There is now ndamental reason to deter production and not it has increased to its new peace-time pro-ons can we rest in the assurance that as far as ffects on our economic life are concerned the war has passed into history. To this end, every man and woman industrially or commercially employed must produce to capacity. Not only is production essential, but capital must be accumulated at a rate rapid enough to offset the destruction which took place during five years. The consuming public must recognize that it cannot continue indefinitely the scale of expenditure which followed as a reaction from the self-denial of war, but that thrift for personal benefit is as essential as thrift for one's country. When every individual capable of gainful employment is producing to capacity and spending conservatively, our economic adjustment will be complete."

The steady expansion of productive activities during the month justifies continued confidence in a gradual return to normal conditions. In regard to the agricultural situation *Commerce Monthly* says:

"While the crop outlook is not as good as it was six weeks ago, there has been a tendency seriously to over-emphasize the unfavorable aspects of the situation. The forecast for a wheat crop of 940,000,000 bushels is still well over the estimate for the same date a year ago, and while the corn crop estimate is below that for 1918, it is still a large yield, 2,788,000,000 bushels. Oats will probably even yet be near an average yield. The cotton crop will be short, but this fact must be considered in relation to the large carry-over. Summarizing the entire agricultural situation, it is satisfactory and not only will the buying power of the agricultural districts be ample but they will also have a surplus for investment."

Mr. Hoover has again broken into the market with the statement that food is rotting at Central European ports because it is not paid for, and that if Europe is to be fed the United States must finance the Old World to the tune of three to four billions. This is an old story. And it may or may not be good business to play the Prince Bountiful to those peopie. But there are those who are begininng to think that in view of the rapid spreading of radicalism in this country, due to high prices and the advantage agitators take of the fact, "charity begins at home," especially as the assistance so far given to Europe, outside of the Entente Allies at least, has had no perceptible influence in checking radicalism abroad, while it has certainly done much in the cities at least to lower the morale, or spirit of self-help, in some of those peoples.

The theory of financial help to Europe, which bankers and manufacturers and exporters generally endorse as sound, has had the usual effect on Western congressman, one of whom, Rep. Sheppard of Texas, not content with the numerous bills to facilitate exports by legislation to enable Uncle Sam to provide the money, or credits, for that purpose, now wants to take the further logical step of making Uncle Sam banker to the limit of a billion to make loans to all persons, citizens, who need money to expand their business. The leading bankers feel that the public not the banks or the Government, should provide the credits for the export trade in the way of foreign investments, and the banks are now financing the export trade to the extent that that trade is really wholesome and legitimate; but bankers insist that the domestic banks' duty is to enable sound business men to expand their business, a line of banking that should not be interfered with by the Government. To provide by law that the Government should finance either exports or private business strictly domestic in character would be to open the doors to all sorts of Government ownership schemes of which the country now stands in imminent danger. The farm loan banking system has already gone farther in that direction than is fair to other lines of business or is wholesome as a Government policy.

There may or may not be connection of grain and live stock prices and those of other commodities. Prices at best are relative, rarely absolute, *per se*. So as corn and oats and live stock prices decline it is probably more coincidence than otherwise that prices for clothing, textiles, shoes, etc., should be simultaneously affected, as the Federal Reserve Board and *Dun's Review* say they have been in the immediate past, although Dun's list shows as many advances as declines on commodities other than foodstuffs. If prices have indeed reached the peak and are declining, of course a new element has been injected into business. As the Board says, in the Review for August, "Whereas previously emphasis had been placed upon the great activity displayed by business, the problem of price readjustment and the difficulties connected with it now bulk largest."

There is little trouble in conducting a business when prices are constantly rising. Then demand is keen and the risk in carrying, or of making, commodities is small; but when prices begin to fall, the risk is increased disproportionately. Demand slackens and the desire to avoid carrying and producing is greatly increased. As at this time the labor problem, as shown in the unrest and the unreason of labor, bulks large in the discussion, and the adjustments necessary to falling prices, as they affect wages, become more difficult. Such difficulty cannot be avoided. Low and steady prices are the chief blessings of a high state of civilization, but attaining both after a period of rising and unsteady high prices is one of the greatest difficulties mankind has to encounter. Unfortunately such a situation is always complicated by the interference of economic quacks in parliaments, or congresses, and the readjustments are in consequence in that way made more difficult and drawn out; because few legislators really have business sense or economic wisdom commensurate with the requirements when a legislative cure is attempted; usually the mess is made more perplexing for the business and industrial factors involved.

French farmers last week gave a hint of what may become a universal complaint on the part of farm producers, when delegates representing 110,000 farmers in Central and Western France at Paris on Sept. 4 protested against "arbitrary measures to reduce the cost of living of which the farmers alone are the victims." "May we not" expect sooner or later to hear a similar protest from some one or all of the "farmers' organizations" now guarding the "agricultural interests" at Washington? What would be more natural? Do we not all recollect how that great economic quack, Mr. Bryan, rose to fame as the greatest blunderer of his time with just such an issue? And are not the agricultural interests already building the machinery which the French had in view when the Paris meeting "decided to organize in defense of farmers' interests by coördinating the work of all agricultural associations, which will be federated in regional committees"?

"The general business situation," the Federal Reserve Board says, "is at bottom strong." The country's only economic danger now is the injury that may result from the many effects in making to differentiate group from group and to secure thereby group privileges and benefits—always non-social—at

the expense of other groups, instead of all working in coöperation that all may benefit at the expense of none.

GETTING WHAT'S COMING TO HIM

THE address of G. I. Christie, lately Assistant-Secretary of the Treasury, at the Hay Convention at Detroit, printed on September 3, is departmentesque. He must have absorbed it there; because it is rather difficult to understand just what it means net. The claim that the farmer does not "get what's coming to him" is characteristic of the present Department, but it does not appeal much to those who have had dealings with farmers for any great length of time. Nor is it very plain why in Indiana farmers should pay in $10 each to an organization to create a fund of $200,000 to see that the farmer does "get what's coming to him." How is he going to get it with the money and what is it he is going to get?

Surely, Prof. Christie is cognizant of the fact that most of such funds are raised by discontents and spent upon professional grouches, "silver-tongued" spielers who arouse the anti-community feeling by pointing out to discontented and ignorant farmers the town houses which "he got from you farmers on grain." There is a certain type of farmers who like to be told that sort of rotten stuff. They prefer the farm papers which tell them that and cater to their meaner prejudices. The Equity and the cooperative monthlies all tell the readers that in one way or another, and the county agents, most of them now, whom grain dealers and other townsmen help to support, else the farmer would not spend money to have them, are telling them that sort of thing. County agents act as salesmen and brokers. They are that kind of farmers. They hold jobs, because they can't manage farms on their own account successfully.

Human progress depends on the coöperation of all classes to lighten human labor in the production and distribution of goods for human consumption; but practically all the recent farm organizations and county agents aim to saddle on the farmer himself the work of distributing his own products, which others being experts are more able to merchandise with less cost than he can. This kind of farmers may cooperate with neighbors sometimes, but they hold aloof from others. They want the advantage and relaxation of the towns and villages contiguous to their farms but they are not willing to coöperate with the towns in order that they may enjoy those advantages to the fullest degree. They "mail order" and drive local stocks of household goods out of the town where they used to be found and the county agents are working them now to mail order the grain man and the feed and seed and fertilizer and implement men out of town also, in the notion that they are stopping "middleman's profits" by doing so, when in point of fact the farmer is simply driving him from the home town where he is known and building up a few big concerns in the cities whom he does not know but on whom ultimately he will have to depend for all his supplies. This kind of farmer, in short, wants everything, but he wants Uncle Sam or someone else to "hold the bag" for him.

There is hardly a new farmers' organization in the country today that is not teaching its members and actively promoting the notion that the farmers are "the salt of the earth"; that they are different, and that like the paupers they have rights and privileges that other people ought not to enjoy. We like fair play; and we agree fully with the *National Stockman and Farmer*, always sane and liberal minded, which says:

> We believe that farmers should ask no advantages over other citizens in legislation or in anything else; also that they should tolerate no discrimination against themselves and in favor of others. If we understand the nature of the real farmers of this country they are not mendicants seeking for alms at the hands of other classes, neither are they unfair players of the game of business seeking for advantages over others. What real farmers want and all they want is to fare as other men do at the hands of lawmakers, executives and business organizations. Let us have a lofy ideal of independence for farmers rather than the degrading idea of favors or charity for them. These and other principles have led us to oppose special legislation exempting farmers from the operation of sound laws, freeing their bonds from just burdens of taxation, and any other advantage which would place them in the position of a favor-seeking or charity-asking class.

If this country is going to get back to wholesome ways of thinking, doing and living, the farmer must set the example of fairness; for should the rest of the country turn on him like the railway hands his sycophantic lobbyists would have a hard time to protect him. And the farmer lobbyist-politician is working the mendicant game pretty hard at Washington now, and that too in the face of the fact that a census is due in 1920. The last (1910) showed that each farm in the United States represented an evaluation of $6,444 against one of $2,881 in 1900, or 80.9 per cent gain in ten years. What will it be for 1920? The farmer can't be so very poor and play the pauper long at that rate and get away with it.

COLLECTIVE BARGAINING

THE Hersman collective bargaining bill is printed on another page. Its purpose is to amend existing laws against unlawful restraints and monopolies and for other purposes, to make it lawful for farm organizations to "sell their products collectively." Gov. Lowden, in signing a similar bill passed by the Illinois legislature last winter, said:

> The policy expressed in this bill, in my opinion, is sound. To deprive the farmers of the right of collective bargaining is to deprive them, in effect, of all right of bargaining. If the individual farmer must act alone in the sale of his products, he is compelled to take whatever price is offered. He, therefore, is not in a position to deal equally with the great concerns with which he must do business. The farmer is dealing largely with the product of his own toil. Therefore, to admit the principle of collective bargaining as applied to men employed in other industries and to deny it to the farmer is unjust discrimination.

The Governor is simply begging the question, as politicians will. So long as coöperative companies are legalized, as they are now in most states, it is hard to see why they have not all the "rights to collectively bargain" needed by individuals acting through such companies. To go farther and to permit the farmers' companies to "collectively bargain," which can be the only object of these laws, is as unfair and as gross a discrimination as to permit any other class of business institutions under the law to "collectively bargain." It is simply Americanizing, for the benefit of the farmers, the German kartel system, which was nothing other than legalized plunder of the consumer by groups of tradesmen.

AUTOCRATIC CONTROL OF PACKERS

ONE of the telling points against the licensing system for business was made before the Senate Committee on Agriculture on Sept. 2 by Patrick Brennan of Chicago, head of one of the "small" packing companies, who smashed the theory that the "Big Five" control the packing business, by saying that in competition with the five larger packing concerns "at their home base," his company had grown from a capital stock of $125,000 in 1905 to $1,500,000 with a surplus of $1,800,000 at present, while the firm's sales last year aggregated more than $27,000,000.

One objection he made was the vital one that, "I believe license restrictions will make it utterly impossible for the average small business man to obtain financial backing. Bankers are pretty shrewd business men. They have had experience with Government regulation of business and they know that it affects securities they hold. It is a hazard, and bankers and capitalists do not indulge in speculation."

Equally convincing—even more convincing to some—was the objection that—

> Under these bills, we would operate by virtue purely of the license issued by the Secretary of Agriculture, and if he believed or suspected that we had violated any of the regulations, he could revoke our license. Now I propose to show you some of the results. Dissatisfied employes might conspire to do some unlawful act, and against their concerted statements would be only the word of a company official. This the Secretary of Agriculture might believe or not, as he chose. The achievements of a lifetime, the investment of millions, a large business would be obliterated by the stroke a pen.

The convincingness of this objection is establi by actual experience. For the case cited by Culbertson of the Illinois Grain Dealers' Ass'n found on p. 18 (550) of this paper (number for 3), is a fair example of what has already happ but which Mr. Brennan cited as possible only. vious cancellations of grain licenses by the Agents might also be cited to show how preca would be the business existence of firms subje the caprices of petty bureau clerks to whom of n sity the Food Commission would look for the i mation which he would pass on to the Secreta Agriculture for final O. K. for the destruction business.

Grain men are deeply interested in this str of the packers for liberty—for that is what disguise it as one may by sophistical verbiage as sure as God made little apples, if the packer controlled by law by licenses as proposed by Se Kenyon the grain trade will follow so quickly it make grain men's heads swim.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

	Sept. 6.	Aug. 30.	Sept.
Wheat—			
Primary receipts	17,001,000	19,803,000	15,9

Conscious of its , the pleas to labor have had little so far, and the result in the end iean increased taxation. Germany d to be spending around $100,000,- er month in order to hold down of foodstuffs, while in this coun- has been the producer who has hurt by the propaganda to reduce ost of living. So far nothing has lone to check the cost of high liv- hich is a far greater evil. Money some extent lost its purchasing , as the forced savings during the ire now being spent. How long condition will prevail cannot be ld. Economists claim that busi- as already commenced to slow up, gh it will probably be the latter of 1920 before it becomes slack. is no reserve of commodities the over, and no material lowering ces is expected until one is accu- d. At the same time there is a disposition to run on small stocks on account of the high prices. Grains have declined in a drastic manner without the slightest benefit to the consumer, and it will probably be three or six months before it will be noticeable.

The corn crop is made, and the greater part of it is now out of danger from frost. The grain in the northern part of the belt matured early, weather conditions that severely damaged the wheat forcing it along rapidly; while in the main belt where the commercial crop is raised the dry weather, although reducing the yield somewhat, caused comparatively little damage. Iowa continues to have an excellent outlook, and the same is true in northern Illinois and to a great extent in central Illinois. The bulk of the commercial crop is raised in these sections.

Within a few weeks corn will have a balance wheel for the first time in some years. The prospect for an early movement of the new crop with quality very favorable is bringing in hedging sales in fair volume, and at the same time new grain is being sold for Eastern shipment later in the season. The hedging sales promise to check some of the wild fluctuations and the market's action will be nearer normal. Judging from the fact that the East is apparently willing to take new corn on the present basis, it would suggest that values have declined to a point where the consumer is satisfied to some extent. As compared with recent figures, corn for December shipment around $1.30 looks cheap. This is about the price that the trade had been expecting for the new crop for some months past, although few looked for it to be obtained in about a month.

Whether or not the signing of the peace treaty will improve the world's situation remains to be seen. There is a small surplus of food in some sections of Europe, due mainly to faulty distribution, while in others there is a great shortage that apparently cannot be relieved except by imports from North or South America. The British government has contracted for practically all of the Australian wheat surplus. Argentina has considerable on hand and is shipping freely, although the method of payment is not given out. North America promises to have around 300,000,000 bus. good quality wheat for export this season, of which a fair quantity has already cleared. The movement, however, is greatly curtailed by the congestion which prevails abroad, strikes and lack of coal being a factor. Movement of wheat to terminals is only fair, the shortage of cars being a big factor. The embargo on shipments to the East continues, and a little congestion is noted in Western markets. This will be relieved, however, by shipments to Chicago and Milwaukee, where the grain will be available for boats to take it East.

Oats prices declined with corn, but there was a better undertone. The country is inclined to hold back its grain, apparently following the example of other labor, and striking for higher prices. The movement is far below normal for this season, and purchases to arrive of late have been practically nil. Very little grain is expected to be moved from the Northwest to the East or more Southern markets this season, as the crop there is very short, and Montana and other mountain states need grain. Barley crop is much smaller than last year and light in weight, so that a good corn crop there may all be needed for feed. It is not to be expected that feeders will operate as extensively this season as last, which will cut down the inter-county movement.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7. 1918.
Wheat	17,001,000	19,803,000	15,955,000
Corn	3,680,000	2,883,000	4,669,000
Oats	5,757,000	6,999,000	9,935,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	26,438,000	30,559,000
Preceding week	29,686,000	33,794,000
Since July 1	203,386,000	259,709,000

Liquidation was on in corn futures early in the week and the deferred deliveries dropped to new low levels on the crop, at the inside figures showing 8½@18½c under the close of the previous week, with September leading. The pressure on the latter came almost entirely from scattered longs who found demand limited. Sentiment was decidedly bearish early, but later there was considerable change, and offerings were well taken, shorts covering freely. A sharp rally followed with the close at net losses of 13¼c on September, and 4½@5c on the distant futures.

Oats were affected by the action of corn and declined, with May at a new low for the season. Inside figures showed a drop of 2¾@3⅝c with September the strongest. Liquidations was on at times, but the undertone was relatively much stronger than in corn as there is little or no pressure from the cash grain. Closing trades were ½c higher on September which was bought by cash houses, and ½@1⅛c lower on the deferred deliveries.

Country offerings small, and shipping demand fairly active.

Good wheat sold readily at a small premium over the basis for the winter varieties. The Government took some of the low grades at the basic figure, being forced to buy for the first time. Choice springs were stronger with dark No. 1 Northern up to $2.60, or 34c above the basic, and Northwestern and Mountain states millers were buyers, as well as the East. Quality of the spring wheat crop this season is poor, and a good part of the arrivals are light in weight and generally undesirable. Flour trade rather slow. More or less congestion prevails at the leading markets, and there is some shortage in store room southwest. Inability to secure cars prevents the movement from assuming immense proportions. Range of prices the past week follows:

	High.	Low.	Close Sept.6, 1919.	Close Aug.30, 1919.	Close Sept 7. 1918.
Corn—					
Sept.	$1.77½	$1.59	$1.64¼	$1 77¼	$1.56¼
Dec.	1.37⅞	1.27¼	1.31⅞	1.36⅜	.....
May	1.34¾	1.25⅛	1.28⅝	1.33⅝	.....
Oats—					
Sept.	.70¾	.66¾	.70	.69½	.70⅝
Dec.	.73⅝	.69⅜	.72¼	.72⅝	.....
May	.77⅜	.72⅞	.75⅜	.76½	.....

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Sept. 6	132,511,000	137,847,000	37,945,000
P. shipments to Sept. 6.	47,886,000	55,128,000	20,866,000
P. stocks on Sept. 6	38,469,000	36,297,000	1,503,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Sept. 6	37,042,000	59,561,000	48,322,000
P. shipments to Sept. 6.	22,271,000	31,370,000	28,635,000
P. stocks on Sept. 6	15,076,000	18,675,000	6,025,000
P. consumpt'n to Sept. 6.	13,563,000	14,201,000	

NEW ORLEANS EXPORTS.

Geo. S. Colby, chief grain inspector and weighmaster of New Orleans, reports exports of grain from that port during August 1919 as compared to the same month in 1918 and the two months period July-August 1919 and 1918 as follows (000 omitted):

	Aug., 1919.	Aug., 1918.	2 mos., 1919.	2 mos., 1918.
Wheat	1,475	2,219	2,160	2,219
Corn	153	81	268	308
Oats	383	865	500	4,015
Barley	1,254	.....	2,622	122
Rye	.....	1	.....	1

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Sept. 6, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	35,098,000	37,119,000
Milwaukee	1,417,000	3,025,000
Minneapolis	20,899,000	20,262,000
Duluth	853,000	890,000
St. Louis	18,985,000	24,183,000
Toledo	3,352,000	2,705,000
Detroit	586,000	465,000
Kansas City	35,289,000	32,964,000
Peoria	1,348,000	2,497,000
Omaha	9,674,000	8,629,000
Indianapolis	5,010,000	5,208,000
Total	132,511,000	137,947,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7, 1918.
St. Louis	1,710,000	2,657,000	2,239,000
Kansas City	3,546,000	5,041,000	2,627,000
Omaha	1,329,000	1,445,000	837,000
Toledo	307,000	346,000	140,000
Detroit	152,000	74,000	19,000
Indianapolis	269,000	319,000	143,000
Peoria	143,000	150,000	192,000
Chicago	4,303,000	4,436,000	3,273,000
Milwaukee	520,000	306,000	351,000
Minneapolis	4,600,000	4,933,000	5,438,000
Duluth	122,000	96,000	696,000
Total	17,001,000	19,803,000	15,955,000
Shipments	4,871,000	6,193,000	6,448,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7, 1918.
American	6,541,000	7,225,000	4,801,000
Indian	.....	.....	190
Argentine	5,173,000	4,101,000	1,638,000
Australian	2,456,000	1,944,000	820,000
Others	89,000	89,000	50,000
Total	14,259,000	13,359,000	7,499,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	51,349,000	19,962,000	35,792,000
Indian	.....	1,360,000	3,439,000
Argentine	20,440,000	20,640,000	1,117,000
Australian	11,193,000	4,440,000	9,152,000
Others	327,000	280,000	281,000
Total	83,309,000	46,682,000	49,781,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7, 1918.
American	154,000	.....	359,000
Argentine	3,294,000	2,928,000	577,000
African	83,000	117,000	36,000
Total	3,531,000	3,045,000	972,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,707,000	26,958,000	42,582,000
Argentine	65,437,000	16,137,000	56,126,000

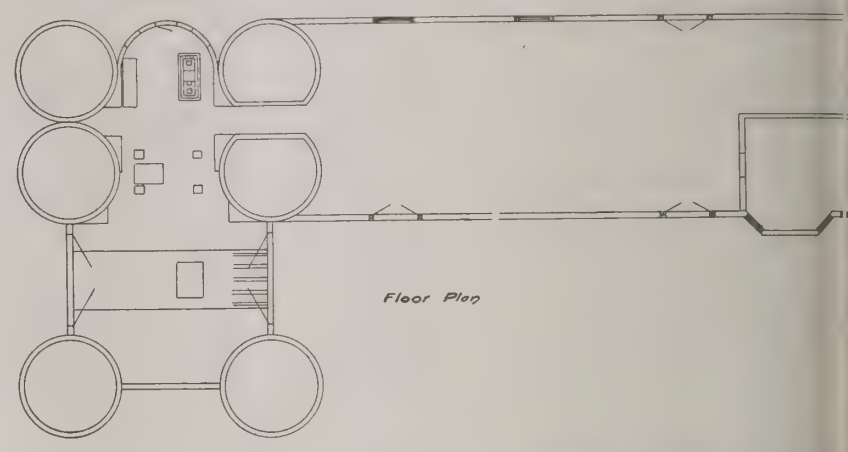
A FIREPROOF ELEVATOR

Showing Construction and Arrangement of an Up-to-Date Country Plant Built of Tile

"Build it fireproof" is the slogan that is now used by the grain trade, for they realize more forcibly than ever the value and necessity of having a permanent, modern business home, one which eliminates the fire hazard, as probably nothing is quite so disastrous to the country elevator man as a fire, and especially a fire that comes just during the heavy crop movement; for then the owner is not only out the loss of his property, but the loss on the season's business, which of course cannot be replaced. One of the successful and satisfactory methods of building grain storage plants, warehouses and grain elevators is the hollow tile; and we illustrate in the engraving herewith the new plant being erected for the Marion Coöperative Elevator Co., at Marion, Ind.



It will be noted from the picture that the manner and method of erecting this part of the construction is simple. The hollow tile used will keep moisture away from the contents of the bins as well as keeping them good and sweet in hot weather and at an even temperature during the cold weather.

It is certainly gratifying to note that so many of the new elevators which are being built this season are being erected of fireproof material. This is certainly a step in the right direction for the conservation of food products of the country. It was clearly proven during the war what a serious menace it was to the United States and our Allies to have thousands of bushels of grain destroyed by fire. Now that the war is over, the need of the grain buyer is greater than ever. It requires time and labor to plow, harrow and reap grain and to have the results of this effort from thousands of acres of land destroyed by the burning of a single elevator seems a calamity, and of course is one of the factors which tends to increase the high cost of living. It is to be hoped that the time is now at hand when all who contemplate the erection of new elevators will seek some method of fireproof construction and build a permanent business home.

The capacity of this elevator is estimated at about 20,000 bushels. It consists of a concrete basement to be used for the storage of salt, wool and other products handled by this firm, which would be better handled in such storage room. Over this basement is constructed a wareroom 20x50 feet in size, made of the Preston-Lansing Blocks with cement floor and cement roof, which will be used as a general storage wareroom for sacked feed and other products. In the basement off the main elevator will be located a power sheller, and space is allowed on the working floor for an attrition mill. The office and wagon scales are located in the wareroom at the opposite end of the elevator, while the dump is located between the main elevator and the cob and dust bin as shown on the bin plan.

These bins are located and constructed so that they may be used for surplus storage and emptied directly back into the pit of the dump, whence the grain is carried to the boot of the elevator leg in the sub-basement beneath the working floor. The main bins are 37½ feet high while the walls of the adjoining bins are built with special connected blocks, thus forming inter-space bins between the main bins. One of the bins will be divided into four smaller bins for the handling of small lots. The cupola also is built of the Preston-Lansing Ship-lap Blocks with cement floor and cement roof and contains the cleaner and automatic scale. Power is furnished by electric motors.

As the whole building is made of the Preston-Lansing Tile Blocks and cement, the building is completely fireproof. In the construction of the bins the twisted steel reinforcing is imbedded in concrete. Twisted steel rods show about 10 per cent greater efficiency than the same piece not twisted. The ceemnt grips the rod more securely. This union ties the entire building together in one strong, complete unit and prevents any bursting.

One thing that is making the grain business more profitable each year and the cost of handling grain less is the fact that the new elevators are being built with the idea of getting into "side lines" and the handling of imperishable products, such as coal, lumber, fencing, wire, salt, lime, feed, fertilizer, etc. This plant will be 100 per cent efficient in that respect, and it will enable the owners to not only cut down the cost of handling grain, but to keep their plant busy every day in the year.

TILE ELEVATOR OF THE MARION CO-OPERATIVE ELVTR. CO., MARION IND.

THE FUTURE OF AGRICULTU

Views of a Northwestern Banker on Future of American Farm Lands—T Reaction of an Optimist to the Present Unrest.

By THEODORE WOLD.[1]

[1]From an address to the annual mee of the Tri-State Country Grain Dea Ass'n, Minneapolis, on June 27, 1919.

The growth of farming in the Un States shows two distinct phases, lasting until 1860 and the other be ning about that time and not yet plete. Prior to the Civil War, farm was treated more as a method of sistence than as a business. Fertile was practically free to all. There little outside pressure and there little economic conditions to encou the farmer to preserve the produc ness of his lands, and agriculaural duction was always equal and somet in excess of the demands of cons tion, partially because transporta was limited and high-priced as pared with today. These condi have changed. Agriculture is no l a means of subsistence, but is a business and a matter of very vital cern to each one of the 110,000,0 our people. . . .

From many standpoints, the inc of production is a national nece Not alone have we the urgent resp bility of supplying the world th short of food, but we have a se responsibility arising out of econ conditions in the United States. creasing percentage of our peopl engaged in agriculture, not becaus number of farmers has not grown because the population in the indu centers is growing more rapidly 1800 only 4 per cent of the entire ulation of the United States liv cities of 8,000 people or more. In the population was about 40 per In the year 1840 77½ per cent the people who were engaged in ea a livelihood were employed in ag ture. In 1900 the percentage dropped to 35.7 per cent. In 191 Federal census lists only 6,361,00 sons as farm owners, managers o ants; and it notes that the numb tenant farmers was substantiall creased in the ten year period. would represent only 7 per cent population, or, using the multiple would mean that the farmers their families and all who live farms in the United States were i year only about 30 per cent of th ulation. Undoubtedly the coming c will demonstrate that the drifting from agriculture has continued, an the proportions that I have ind hold true at the present time. population grows at the present we shall have in the United Stat 1950 at least 200,000,000 people, ar demand for farm products require their subsistence will naturall double. Competent authorities est that to meet the demands of th creasing population, it will be nec to increase the production of eac at the rate of one per cent a y the future.

The land heritage of the people continental United States is 1,900,000,000 acres, of which about 000,000 acres is now considered

The Department of Agriculture ·ts that 873,729,000 acres have al- y been taken up and are in farms. e remain 76,271,000 acres not in s, and while from this remainder will be more or less coming under vation from time to time, what ins is relatively small. It is ibly hopeless to believe that in the nt partially developed condition of agriculture, we shall be able to nd maintain such a pace as is in- ed by the demand that farm pro- on shall increase at the rate of 1 ent per acre per year. Our salva- lies in the fact that out of 873,000,- acres that are in farms, and to I have referred, there is a very amount of land which is not ed, and that from this portion is a gradual and continuous in- e of production. This does not, ver, relieve us from the undeniable hat in the years to come we must substantially increased production all the land or we are either going short on food or be compelled, would be a serious humiliation, to t food in large quantities from nations. . . .

ear a good deal of discouraging owadays. People say that unrest road in the land and that social tions are changing and that even armers, who have profited greatly e high prices and keen demand for products during the past few , are dissatisfied, and that the n situation has in it elements that excite grave concern, and many e, and I think sincerely, that the k for the future is gloomy.

m not a pessimist. I cannot be- that so great a country as this, has carved out its patrimony in ndeveloped new world, and has a vast and powerful empire gh the force of its will, its brawn, its perseverance and determina- is going to either fall or become victim of disintegration from in- causes. . . .

l you go back with me for a nt to what Daniel Webster said 38 in a vigorous and forceful ad- in which he spoke about condi- at that time. He exclaimed:

ere are persons who constantly r. They complain of oppression, ation and the pernicious influence umulated wealth. They cry out against all banks and corpora- and against all means by which capitals become united in order oduce important and beneficial re- They carry on mad hostility t all established institutions. would choke the foundations of ry and dry up the streams. In a y of unbounded liberty, they r against oppression. In a coun- perfect equality they would move n and earth against privilege and oly. In a country where proper- more evenly divided than any- else, they rend the air shouting an doctrines. In a country where ages of labor are high beyond el, they would teach the laborer e is but an oppressed slave."

great statesman then demonstrat- th the peculiar power and con- ss that was his gift, that neither or complaint or radical agita- could change the fundamental ples on which the United States ment was founded, or deny to the people, so long as the constitution is unchanged, liberty to each in- al, equality of opportunity and m on the part of each citizen to his own life in accordance with nd reasonable law. In all the since, the constitution has re- l the unchanging monument of sdom, sagacity and farsightedness founders of this republic. I am ie of those who anticipate that clamor or agitation at this time ange it, or take from our people precious heritage from their an- . . . .

ust, however, vigorously combat ought that because some things ong, the future shows portents of id that the structure upon which ve built our national life is crumbling under us. That some things are wrong is only a spur to an intelligent man to exercise his citizenship, to lift his voice, and to devote his energy to the creation of better things. . . .

I beg of you, therefore, not to become discouraged. Our task is to deal patiently with those who think that everything is wrong. We must deal intelligently and thoughtfully with such remedies and suggestions as they propose, and we must regard our civilization, our national life and our business and financial customs open-mindedly and seek to learn whether in this new country we have succeeded in adjusting our practices in every respect so that they best meet the needs of our people. We are going into an era of great development and I think into a period of great progress. Our task will be to contribute, each according to his ability, first to the national efficiency through an increase of personal efficiency, and then to the development of the territory in which we live through our vigorous personal support of every sound measure and every sound plan that tends toward square dealing, clean business methods, mutually helpful relations toward each other, and the intelligent development of the territory in which we live. It was a fine land when we came into it. Let us be united in our determination that it shall be a finer land to live in when we leave it.

RESTRICTIVE LEGISLATION.

It is not often that this paper touches politics, but there are bills in the House of Representatives and Senate at Washington, D. C., that so materially affect the producer and the consumer that it is impossible not to say a word about them. On our desk lies a copy of the Kenyon bill. Similar to it is the Kendrick bill, but we refer specially to the former because it is at hand. It is the most drastic, one-sided piece of lawmaking it has ever been our privilege to read, and it deserves diligent attention from our farmers and ranchmen. Further, it is a blow at general business, and if carried to a logical end, it would mean chaos in business.

It is a bill fostered by producers, assisted by an ex-parte Federal inquiry at which one side had an inning and the people interested had not a word to say. As for instance, it is proposed to license packers, commission men and others to divorce you from your legitimate interests, the product of your brains, labor and thrift, without allowing one iota of defense. In other words, it is proposed to cripple the packers, to injure the financial institutions which have helped our live stock industry, to undermine the great business fabrics that have made success follow success in our farming and ranching districts. When we look on the days that clustered round the fatal year of 1887, when we think of top range cattle in 1889 at $4.10 per 100 lbs., compared with $18.50 per 100 lbs. in 1918, there is certainly reason to be thankful of the present days.

To us watching the horizon and sizing up the agitation on this subject the great fuss is made by a coterie of producers who, if you meet them either in stock yards or on prairie, are the closest buyers in the West. Not a word is uttered advising the licensing of ranchmen, of big feeders, of anything that pertains to production; no, that is not needed, but the other fellow requires disciplining. We are all a bit selfish, even farmers and ranchmen, and there is a movement on foot to bell the cat, and Kenyon and others are the boys employed to do this work. Then there are others who have paternal views, who wish everything run by Government, from making chewing gum to corned beef hash. They join in this hunt, not taking a lesson from our experience with the railroads, with the telegraph, the telephone, the cable, and the horrible condition of our postoffice service. How a Burleson can upset the teakettle and break all the cups and saucers of breakfast and supper table. And yet in the face of these horrible examples there is a party, a small one fortunately, who wish to shackle our great industries with further Government control.

In this line we have the marvelous proposal made of placing a $10,000 a year man to control, guide and harass the greatest and most technical industry of this country. It is not the packer alone. You must go deeper. If sauce is good for the goose it is good for the gander. If the packer has to be disciplined, it is reasonable that the farmer should be treated in a similar way. You must go to the logical end of the road. If you restrict others in their business, why not all? We all live under the same flag. We are certainly entitled to the same amount of justice, the same free field for our talents, our industry, our self-denial and achievements.

But in this line you find inconsistencies. In the section of the law referring to dairies and dairy products, if you transact business over $500,000 per year, you have to be licensed, otherwise not. Why such discrimination? The man who has a big business through his energy, knowledge and industry needs the guiding hand of the Secretary of Agriculture and his satellite, the Food Commissioner. The $500,000 operator needs a guardian, but the $499,999.99 man is scot free of the Government incubus.

As a matter of detail, perhaps the worst provision is in regard to refrigerator cars. The railroad cannot, or at least has not, provided them. The packers and allied interests have. It has been proved time and again that a packer car does double the work of a railroad car in this class of work. Yet under those bills we have to go back to the dark ages. Why not scrap the knitting machine for the needles of the old days, the spinning jenny for the weaver's shuttle, steam for sails and modern life for feudal days?

We compete against the packers every day; buy live stock against them in a dozen markets; loan money against them. We disagree in many points, but there are no conflicts, because we approach our business differences in a proper spirit. We turn over millions a year by word of mouth with scarce ever a dispute, and if there is one it is easily and satisfactorily adjusted. There is certainly no Rialto in any part of the world where business is on a higher plane than in our stock yards. They are peerless in cleancut trading methods, in honest dealing betwixt men. Who should be interested in the banks in the yards, in the collateral interests that surround our business? Why should not a firm like ours out of honest accumulations invest in lines with which we are familiar? Should the farmer be prevented from purchasing his adjoining farm or the ranchman his neighbor's brand? As to the packer controlling the financial situation, it is exactly the reverse. He is the largest borrower we have collectively in this country. No interest is so sensitive to the money market. They reach the ends of the earth in borrowing because the business calls for it. It is an open secret that their financial management does not approach in efficiency their other departments.

What we object to in these bills is first, their one-sided, drastic treatment of a flourishing business which has been tested in court, in the open field, in the parlor and has stood all tests. This we have spoken of above; but in the second place there is a great menace to our business foundation. Admit the principle of those bills and you stop to a greater or less degree initiative. You hamper individual effort. You stop the work of commercial conquest. The pioneer is relegated to the distant past. The same paralysis that crept slowly over our railroad, telegraph and telephone service under Government control, will appear in our live stock industry. It will go from packing house to ranch. It will become moribund. The progressive spirit will lose its energy, its aggressive methods. Are we to go back to the old days of the country butcher with his insanitary killing house, his wasteful methods?

Every attempt to discipline the packers while failing has reacted on the producer. Do not forget that the packer, the banker, the commission man and the others allied with them can defend themselves, can meet the issues as they arise; but the farmers and feeders, the ranchmen and flockmasters as units cannot defend themselves. Eventually they have to bear the burden of this useless class of legislation, which coming in the garb of a lamb is really a wolf in disguise.—*Clay, Robinson & Co.*

GERMAN FOOD CROPS.

The Chicago *Daily News* on Sept. 3 published a special copyrighted cable by Michael Farbman, giving a summary of the results of the German harvest for 1919 which has all the appearance of being dependable. The cold weather, Mr. Farbman says, has delayed the German harvest about a fortnight, but has not affected either its quality or its quantity. All of the crops have not been gathered, so it is not possible to give a very close estimate as yet of the outcome of the grain harvest, but it is estimated that the total yields will exceed the average wartime harvest. Summarized, the report says that the deficiency in rye as compared with 1914 is 2,000,000 tons; of wheat the deficiency is 3,000,000 tons; of barley the deficiency is 3,500,000 tons; of oats the deficiency is 3,000,000 tons: all told therefore about 11,500,000 tons of grain will have to be imported.

In 1914 the potato crop reached 52,844,000 tons. In 1919 the estimated yield for all Germany is 28,000,000 tons, or exclusive of the provinces ceded to France 23,000,000 tons, so that the deficiency for 1919 on a pre-war basis is about 16,000,000 tons. In brief, says the report, the darkest estimate for 1919 allows a slight increase over last year's rations, but in order to bring the consumption to the pre-war standard it will be necessary to import about 12,000,000 tons of cereals and 5,000,000 tons of fats.

Great as is the need for human food, the need of fodder in Germany is said to be still greater, especially corn, oil seeds and the oil cakes and rice hulls for cattle. The number of live stock is not so very much under that of pre-war times, there being in December last about 26,000,000 horned cattle, 3,300,000 horses and 10,000,000 pigs and 49,000,000 poultry. The greatest losses are in the swine and poultry, swine falling to 10,000,000 from 25,000,000 pre-war and poultry from 82,000,000 pre-war. Fodder imports in 1913 were practically as follows: Corn, 1,000,000 tons; bran, 1,400,000 tons; rice hulls, 200,000 tons; oil cakes and seeds, 500,000 tons. There is also a material deficiency in straw and hay of local production which declined from 40,000,000 tons of straw and 10,000,000 tons of clover in 1914 to 29,000,000 tons of straw in 1918 and 6,500,000 of clover in the same year.

TRADE ONLY WITH LICENSEES.

The U. S. Grain Corporation calls your attention to Clause Four of the United States wheat director's license.

This specifies that the licensee shall not knowingly deal with any person, firm, corporation or association, who does not hold at the time, such wheat director's license as may be required.

Due notice and ample time having been given to all persons requiring to be licensed, there can be no excuse for their failure to have procured a license, and you are herewith notified that any transactions with unlicensed dealers in wheat, wheat flour millers, flour brokers or commission merchants, wholesalers or jobbers of flour, bakers using fifty barrels or more of flour per month, are unlawful, and will subject your license to cancellation, and such other penalties as provided by law.

Licensees should promptly report to their zone agent all those requiring to be licensed, who do not now hold a Wheat Director's License.

'GETTING WHAT'S COMING"

A Comparison of Prices of Thirty Years Ago and Now for What the Farmer Gets and What He Pays—Views of an Eastern Farmer.

A farm paper which is never complaining, never apologizing, never asking special favors for farmers denied to other groups of the Nation's people, is likely to have some conservative and reasonable readers and contributors. It is something over a year ago that the following article was sent to the *National Stockman and Farmer* as a farmer's protest against the notion that farmers are not getting what is coming to them, but it is still timely and true. It was written by W. I. Chamberlain, Cleveland, O.

"The only way to compare present prices with the past is to go to the exact records, printed at the time, and to take a long period, and average the prices as I have done in the table below. That table cost me nearly a full day's time to look it up, copy the figures and average them. I took the 25 years 1886 to 1910 inclusive because in 1886 we had come down to a gold basis from the inflated-currency prices of the Civil War, and in 1910 we had fairly begun the inflated prices caused by the vast increase in output (or crop) of gold, through discoveries of new deposits and new chemical means of refining low-grade ores. It is a mistake to suppose that the price (purchasing power) of gold is a fixed thing or can be made so by government. Government can fix the tax-paying and debt-paying value or power of the gold dollar, but not its value or power to purchase goods or commodities; and a big production (crop) of gold for a few years will reduce (as it already has) the purchasing power of an ounce or a dollar of gold, just as a big crop of wheat will reduce the purchasing power of a bushel or a pound of wheat. This is true, though men are slow to believe it.

"Now for the table. Study it with care and cut it out or lay it up to look at occasionally and remind you of prices, for example, in 1894, wheat 55c per bu., corn 52c per bu., best hogs $5.25, live, per cwt.; best beef cattle $5.10, live, per cwt. as compared respectively with $2.26, $1.84, $16.50 and $16.00:

HIGHEST GRADE WHOLESALE PRICES, CLEVELAND, O., JULY 15-20, 1886 TO 1910 INCLUSIVE COMPARED WITH 1918 PRICES.

Year.	Wheat.	Corn.	Hogs.	Cattle.
1886	$0.84	$0.59	$4.75	$5.25
1887	.80	.42	5.25	4.20
1888	.88	.40	6.05	5.85
1889	.90	.39	4.75	3.50
1890	.91	.40	3.90	3.80
1891	.96	.66	5.40	4.50
1892	.84	.56	5.95	4.50
1893	.61	.47	6.00	5.00
1894	.55	.52	5.25	5.10
1895	.68	.56	5.35	4.50
1896	.59	.34	3.65	4.00
1897	.80	.32	3.70	4.75
1898	.76	.38	4.20	4.70
1899	.74	.38	4.15	5.10
1900	.79	.47	5.40	5.15
1901	.67	.50	6.00	5.15
1902	.78	.68	8.00	6.75
1903	.77	.52	6.00	5.10
1904	1.08	.53	5.75	5.75
1905	.95	.62	5.95	5.50
1906	.83	.58	7.05	5.50
1907	.95	.59	6.25	6.00
1908	.92	.80	7.10	5.85
1909	1.38	.78	8.10	6.25
1910	1.10	.68	9.60	7.00
Av. 25 years..	.83	.525	5.74	5.15
1918	2.26	1.84	18.50	16.00
Times as much	2¾	3½	3¼	3 1-10

"That is, we are now getting in Cleveland, Ohio, almost exactly 2¾ as much for wheat, 3½ times as much for corn, 3¼ times as much for live hogs and 3 1-10 times as much for live steers as we got on the average for them during the quarter century 1886-1910 inclusive. This is not guess work but actual facts, taken from the July quotations of a widely-circulated Cleveland paper.

WHAT THE FARMERS PAY.

"As to prices paid by farmers for things they do not produce, I have not space for another table like the above, but I vouch for the general accuracy of the following:

"Sugar, coffee, tea, rice, ready-made and tailor-made woolen clothing and year-wages of hired men, about 50 per cent more ('half-as-much-again') as in 1886-1910. Nails, barbed wire, hardware, machinery and its repairs, harnesses, blacksmithing, cotton work shirts, overalls, etc., about 100 per cent more (twice as much). Taxes, farm rent, interest on debts, scarcely any more. As to year-wages of hired men, I paid $36 per month cash and free rent of house, garden, milk and a few perquisites, to my head man the year round every year from 1886 to 1910. My neighbor, O. D. Bradley (and other farmers near here), now pays $50 per month, house and garden, etc., free. At 83c per bushel (the average price then) it took 43⅓ bushels of wheat for me to pay the $36. At $2.26 per bushel, the present government price, it will take only 22⅛ bushels of wheat to pay Mr. Bradley's $50.

"Farmers should fully realize that general high prices are in their favor, because they will have more dollars of surplus, and can pay more dollars of debts, taxes, interest, etc., and even of everything else (on the average), which they must use money for, as shown above. Farmers did not set these prices. They are not profiteering. They work hard and long and are entitled to all they get. But they have no occasion to be blue, and they can well afford to raise all the wheat and hogs and cattle they possibly can, both as patriotic duty and from proper self-interest because they can make money faster than ever before except during our great Civil War."

GRAIN AND HAY SHOW.

In connection with the International Live Stock Exposition to be held at Union Stock Yards, Chicago, Nov. 29 to Dec. 6, 1919, there will be held an International Grain and Hay Show for the Chicago Board of Trade premiums. The list of premiums, aggregating $10,000, which will be offered by the Chicago Board of Trade as prizes is now ready and grain and hay dealers should assist in circulating them.

The Board of Trade is deeply interested in the improvement of the grain and hay products of this country, and with this end in view, the committee want the help and coöperation of everybody interested in the grain and hay trade, to make this exhibition a success. This is the greatest educational venture that any grain exchange has ever attempted, and headed by Geo. S. Bridge, the Board needs dealers' assistance in interesting the farmers to furnish exhibits, and to induce them to attend the show. The committee welcomes any suggestions you may have to offer—they will receive very careful consideration. Send them to Geo. S. Bridge, chairman.

Grain Corporation Weekly Report.

The United States Grain Corporation bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Aug. 22, in comparison with the figures for the same period a year ago, shows the following:

	1919.	1918.
Wheat—		
Receipts from farms, bu.	43,322,000	30,030,006
Receipts previous week	42,349,000	30,093,000
Receipts, June 27-Aug. 22	289,048,000	243,781,000
Flour—		
Produced during wek, bbl.	2,837,000	2,499,000
Produced prev. week	2,633,000	2,387,009
Produced June 27-Aug. 22	16,374,000	14,436,000
Totals—		
Stocks wheat, all elevators and mills, bu.	189,353,000	142,963,000
Previous week, bu...	164,271,000	125,292,000
Change for week, bu...	*25,082,000	*17,671,000

*Increase.

The Farmers Union Convention at Yoakum, Tex., a few days ago adopted resolutions demanding a higher price for wheat for the quality delivered.

THE FUTURE OF WHEAT

The Influence of High Foodstuffs Prices—Speculation by English Experts on the Future Outlook for Lower Prices on the World's Crops.

It is plain to all, whether they be observant or non-observant, that the great need of every nation now is a reduction in the cost of living. Higher wages as a remedy have many advocates. This plan has been tried and is still being tried in many industries and callings. We have heard people assert that they found their increased earnings a good offset to their increased expenses for necessaries, and even for luxuries, but there is evidence on all hands that, speaking generally, higher wages have signally failed to reconcile people to the greatly increased prices, which are demanded for almost every article of food and clothing. The fact is the root-cause of the "dearness of living" is in the high prices demanded by producers of food, wool, meat, etc., in the big exporting countries, and especially in North America. To mention only wheat, growers used to be satisfied with 80 cents per bushel; now they say it does not pay at 220 cents! We want a reduction in the first-cost of all the leading staples, and if this could be made, there would be a good chance that the benefit would ultimately filter through every trade and eventually every one would benefit. We think such a movement must be heartily desired by every one who has the welfare of our country at heart; but our daily experience brings us the strongest conviction such a movement will be most difficult to effect. We think the majority of people are convinced that wages will never come down again, and it goes without saying that unless the cost of production can be brought down, the price of the article produced must be kept high or relatively high.

When the international economic position is viewed in its broadest aspect, one is driven to the conclusion that we need lower costs of production for every industry and trade, and we have sufficient faith in the inventive faculty of the human race to believe that eventually the legion of problems involved in this statement will be solved; let us suppose that science could furnish a solution of the difficulty of insuring larger and more regular yields of wheat by eliminating disease, would not this confer an enormous benefit on mankind and most certainly cheapen the cost of production of the article with which we are principally concerned.

As we were writing this review we received from Sir James Wilson, K. C. S. I., Edinburgh, a copy of an article on the "Probable Future Price of British Wheat" which contains some optimistic statements which are very comforting at the present time. Amongst other things, Sir James Wilson says the United Kingdom is certain to continue to be a large importer of wheat; and he considers the payment of a subsidy to the farmer will not have much effect upon the selling price of wheat in the United Kingdom except in so far as it reduces the demand for wheat from abroad and therefore tends to lower the world's price of wheat. He looks for the electors of the United Kingdom to stop the subsidy when the term for which the present Parliament may grant a subsidy to the grower has expired, and the price of wheat in the United Kingdom will then depend as before the war on (1) the world's price of wheat, and (2) the cost of transport.

Sir James Wilson looks for great improvement in transport at an early date and a reduction in the average charge for bringing a quarter of wheat to this country until it reaches 6/- per quarter ($1.82¼ per bu.). He expects the cost of transport by land to be not much higher than it was before the war, whilst extensions and improvements of communication by rail and water are likely to go on rapidly and to bring much larger areas of land capable of growing wheat within reach of the world's market. There is, therefore, he says, likely to be a rapid increase in the area put under wheat in a num of exporting countries such as Can the Argentine, India, Australia Russia. It also seems probable owing to the introduction of more entific methods of cultivation and extension of irrigation, the average turn of wheat per acre in many c tries will be appreciably increased that soon after peace conditions been thoroughly restored throug the world, there will be a great growing increase in the world's yield of wheat which will tend reduction in the world's price of wh On the other hand, as the mat prosperity of the world increases t is likely to be an increase in the sumption of wheat per head as wel in the number of the wheat-eating ulation, but already before the w large proportion of that part of population of the world which is l to develop the taste for wheat wa a position to obtain nearly as m wheat as it required.

We wish we could endorse all that James Wilson says with regard to prospective increase of crops in Can Argentina, India, Australia and Ru but we do not feel hopeful that t will be any rapid increase of pro tion in the countries mentioned. T is, of course, reasonable hope that present prices will encourage additi cultivation everywhere, and it seem us there is room for steady expan in Canada and Argentina. On the o hand, the climate of Canada is no tractive to many people and in Au lia there are big arid areas which require much time and money to b under cultivation. Russia and I are backward and have big popula to feed—it will probably need lon ucation to bring about a radical ch in the farming methods of the pe All must hope that more food wi produced in the coming years, an the meantime we trust that both Fr Germany and all importers will r ble efforts to increase home produ and thus lessen the demand on the plus countries. If settled govern could be established in Russia, we n expect that country again to pr 20,000,000 quarters wheat yearly fo port by the old methods and Dan countries 5,000,000 quarters to 10,00 quarters.—*Geo. Broomhall's Corn News.*

Corn in Primary Markets.

*000 omitted.

Certain factors of the above September crop report as issued by the Government are more than the ordinary dry compilations—corn gained 70,000,000 bushels and wheat showed a slight increase for the month. The trade recognizes in corn exceptional feeding values, as the early September hot spell was an excellent finisher, not showing even though it may not have been required in the Government figures. Quite general assurance prevails that the corn crop is stable at present figures and cannot be seriously damaged even in the Northern belt.

The first importance of corn finds a close second in the trade's consideration and criticism of the Government oats estimate, which does not recognize the decidedly low test weight of the 1919 crop, possibly averaging 28 pounds. The 1918 crop doubtless averaged 32 to 33 pounds, an appreciable difference, further reducing the feeding values of 1919 oats, decidedly short in the Government report and increased in value when considered with early Government estimates of 116,000,000 tons of hay, reduced in the August forecast to 111,000,000 tons and further reduced as above to 102,000,000 tons. Oats handlers with threshing data and country advices to guarantee their belief that the present crop is not worth 60 per cent of last year's are numerous.

Canadian Wheat Regulation.

By order of the Canadian Wheat Board, effective Sept. 4, there shall be paid the sum of 15 cents a bushel to the Canadian Wheat Board by the exporter. On wheat other than exported and for domestic use in Canada, there shall be paid to the Board, by the licensee making sale, the sum of 15 cents a bushel in addition to cash payment directed in the Board's regulations.

TRADE MENTION.

The Hess Warming & Ventilating Co., 1257 Tacoma Bldg., Chicago, Ill., is installing one of its good sized driers for the Globe Mill & Elevator Co., Ogden, Utah. The company is also completing the installation of drying equipment for one of the Peoria houses.

S. M. Osgood, for many years identified with the milling and feed trade of Minneapolis and Chicago, is now sales and advertising manager of the Hormel Packing Co., Austin, Minn. The company has acquired a flour mill of 1,500 barrels capacity and it is Mr. Osgood's job to handle the output, and with his wide trade acquaintance and friendship there is no questioning his ability to do so.

The Edward A. Pratt Audit Co. of Peoria, Ill., with Chicago offices in the City Hall Square Bldg., has a new brown line ledger in three standard forms, that will be sure to interest grain men desirous of simplifying their bookkeeping systems. To the many newly organized grain commission firms that have sprung into existence this past year we recommend investigation of the Pratt Tab-Cut Ledger with brown lines —"Easy on the Eyes."

"Sixty Dollars a Car Profit" is the title of a new catalogue just issued by the Maroa Mfg. Co. of Maroa, Ill., manufacturers of carloaders, grain conveyors, grain cleaners, grinders and poultry feed machinery. This catalogue is written in an entertaining way by the manager, Jas. A. Worsham, printed on nice enameled paper stock and is full of interesting information on the subjects mentioned. Copy will be sent to elevator men who are interested.

Charles T. Peavey, 327 South La Salle Street, Chicago, has recently closed an arrangement with the Miller Cereal Mills of Omaha, one of the highest class corn mills of the West, and is handling their Chicago distribution. Mr. Peavey's extended experience in the field is also available for millers of spring, soft and hard winter flour as well as rye and other specialties. Those who are not getting the volume of trade in the Chicago district to which they feel entitled might be justified addressing Mr. Peavey learning his plan of business and be better prepared than they may be at present to show the fall and winter volume which they desire.

The Richardson Scale Co., Passaic, N. J., with several Western warehouses and many branch offices located in the grain producing states, has just issued an interesting booklet, "Machinery *vs.* Man." It carries the progress of automatic weighing machinery for cereals and feedstuffs from the earliest days, and the Richardson Co. were pioneers in the business. It lists with suitable description automatic scales for every feasible need, and the catalogue will be sent to those who are making additions to their present facilities or contemplating new plants for handling grain, flour, feed, etc.

Insuring Employes.

The Washburn-Crosby Co. of Minneapolis recently purchased life insurance for some 3,000 employes from the Travelers Insurance Co., the face value of the contract exceeding $4,000,000. The schedule of benefits is a generous one. All employes who have been with the company as much as three months will receive $500 insurance; those who have completed six months will receive $750; and at the completion of a year the amount becomes $1,000, at two years $1,250, and so on until a maximum of $2,000 is reached. The schedule is retroactive, and the employer pays the entire premium.

The Washburn-Crosby Co. are makers of fine flour. In addition to the mill at Minneapolis, they have other plants at Buffalo and Louisville. Everybody in the organization is covered, from officers to laborers.

New Wholesale Grain House in Atlanta.

The Waldrop-Estes Grain Co. is the name of a new wholesale grain house that has recently opened for business in Atlanta, Ga. The company has bought the stock of hay, grain and feeds of the A. C. Frazier Grain Co., 268-270 Marietta street, which gives them a splendid location in the wholesale district with trackage in the N., C. & St. L. Ry. terminals. Both Messrs. Waldrop and Estes have had much experience in the feed business, having been for a number of years connected with the W. S. Duncan Co., which firm recently retired from business, selling its interests to T. H. Brooke & Co. The new firm will have a paid-in capitalization of $55,000 and will handle flour, grain, hay, mill feeds, molasses feeds and dairy feeds.

THAYER EXPANDS.

Every one knows C. H. Thayer and his long service on the Chicago Board of Trade with Western and Eastern connections is a part of the market's growth in which activities the firm C. H. Thayer & Co. has prospered. They now announce that A. C. Curry, for some time secretary of Mueller & Young

A. C. CURRY.

Grain Co., will hereafter have entire charge of the shipping department of the Thayer Co. Mr. Curry has also been associated with Chicago's activities for many years and is thoroughly versed in the business of merchandising grain, enjoying a broad list of friends and trade in points to the East and South. This shipping business will be kept amply supplied through the company's branch offices at Milwaukee, Minneapolis, Kansas City, St. Louis and Boone, Ia. Several traveling men are soliciting grain from this field and the company's business under the above plan should blossom out even larger than in the past.

New Oats.

New crop oats receipts are about 40% below the early 1918 movement. U. S. oats exports for past six months at around 25 are 40% below expectation. World shipping still reported scarce. Oats visible of 19 is not gaining as a result of the new crop receipts. The 1918 report showed only 10.8% of the oats crop fed to swine. Horses take 67.8%. The elimination of excess buying emotion is a serious factor. The attitude of Europe in refusing our prices and exports is a more serious factor.—*E. W. Wagner & Co., Chicago.*

Joseph Wild, of E. W. Wagner & Co., says that of the wheat fed on the farms in 1918 29% went to swine and 59% to poultry; of the mill feed fed 44% went to cattle and 41% to swine. Cattle took practically all the silage. Of the barley fed 60% went to swine and of the rye 53% went to swine and 26% to horses.

FROM WASHINGTON

Statement of President Gates of the Chicago Board of Trade at the Senate Committee Hearing on the Kenyon-Kendrick Bills—The Fundamental Principles Involved.

WASHINGTON, Sept. 6.—[Special Correspondence.]—The hearings on the Kenyon-Kendrick bills to license and control the "big packers" continued through the week; and judging from the nature of the testimony given by the stockmen and the "little" packers as well as retail distributors and disinterested interests all through the hearing, one can hardly see how the bills can still find a leg to stand on. The report of the Federal Trade Commission on the packers, on which the bills were founded, has been shown to be utterly untrustworthy, and it is beginning to be suspected here that the Commission itself, before this matter shall have been finally disposed of, will find itself on the defensive and asked to show why it should not be abolished as a meddlesome nuisance, or at least have its wings clipped and its power to harass and annoy business greatly curtailed.

President Gates's Statement.

To readers of THE PRICE CURRENT-GRAIN REPORTER the statement to the committee by Leslie G. Gates, president of the Chicago Board of Trade, who has been here all week, will be the most interesting feature of the week. As will be seen, it was quite dispassionate, a conservative and moderate but convincing statement of the fundamental principles which lawmakers ought, in his opinion, to keep in mind as essential to sound legislation in this particular case and generally. Mr. Gates in part said:

THE STATEMENT.

MR. GATES: Mr. Chairman and Gentlemen of the Committee, in appearing here on behalf of the Chicago Board of Trade, through your courtesy, I appear to present no partisan attitude towards this controversy that has arisen between the Federal Trade Commission and the large packers. But there are certain principles of legislation involved in some of these bills about which we have felt we would want to be heard, because we consider them a departure from the ordinary practice in peace time legislation.

On the theory, for which there is good authority, that our Government is one of law rather than of bureaus or commissions or executive departments, it is reasonable to think that our citizens may expect definite, specific legislation; legislation such that they may adjust themselves; legislation for which they may have respect. And I think that the people of the country generally have a desire to have respect for law; and there is a general disposition to obey the law.

Now, gentlemen of the Committee, does this legislation that is suggested—and I have read the Kenyon Bill as embodying, as I understand it, all that is in the other bills in the way of control through licensing, with some additional features—does this bill measure up to that standard?

It does not appear to us to do so. It appears to give blanket authority to a certain department of the Government, which department, through a commissioner of foodstuffs, shall control a certain industry. If enacted into law that will make for law by rules, regulations and executive orders instead of by specific and definite mandate. It puts the citizen in a position in which he does not know what the law is from day to day. Consequently he cannot adjust himself to it. It puts the executive department in a position where with a change of personnel you have a change of the law, because the regulations, rules and orders that will be promulgated will be such as will reflect the personality of the individual who is the occupant of the office for the time being.

How, then, gentlemen of the Committee, may a citizen respect the law, under these conditions? To illustrate, I will speak of one of the executive departments, or bureaus, which is remarkably efficient, comparatively speaking. That is the Internal Revenue Department. There was a Revenue Law enacted, a part of which became effective on the first of last April. That law empowered the Commissioner of Internal Revenue to make certain rules and regulations in regard to the interpretation of that law. Certain parts of that law affect our business. We have been working for five months under that law, and the regulations in regard thereto have not as yet been issued. And when they are issued they will be retroactive. Until those regulations are published we will not know just what is required of us. Of course we are disposed to obey that law, but we do not know what the law is. We do not know whether we are living in accordance with the law or not.

Gentlemen of the Committee, if that is true of that Department, is there any reason to think it would not be true of the Bureau which would have control of this particular industry?

This habit, or this policy, which seems to be becoming a habit, of legislating blanket authority, seems to be a hold-over from war conditions. It was objected to upon theory at the time, but the people of the country submitted to such laws and worked under them; in fact, did not make serious objection thereto, because they and we felt that it was only temporary and to meet extraordinary conditions. Under that sort of control authority that was not specifically given was assumed, if there was any desire to use such authority. We have had considerable experience, we of the grain business, of the Chicago Board of Trade, with Government control. While of course that control has been taken off as far as almost everything is concerned, we of the grain business are still working under that control. And there is a daily policing of trades in accordance with the request of the Food Administration.

Now, further, as compared with the supervision or control mentioned in the bill before your Committee, this control was benevolent. It was a control by men of large ability, men who were performing the service through purely patriotic motives, men who thoroughly understood the business, and consequently could bring to it an intelligence that will hardly be possible, I think, under the conditions outlined in the present bill. But under that control we have seen prices arbitrarily fixed, not only for our market but for all markets, and differentials fixed as between various markets which arbitrarily limited the territory from which any one market could draw. We have seen customers of our market compelled to send their grain to other markets; not that they wanted to do it, but the arbitrary conditions imposed compelled them to do it.

And we have seen a policing of the trade in this way, that we must be sure that we do business with no one except a licensed person. That means that any shipment we receive we must be sure comes from a man holding a license. The obligation is on us to determine it. And all these things are exceedingly hampering in business.

But these are things which we have endured, as I have said, without complaint, because we felt they were temporary. But now we are legislating for peace. If that was good war time legislation, all right; for peace times, no. It is not the sort of legislation that we have worked under in this country which has brought us growth and prosperity. What does promote growth and prosperity? What does stimulate industry? Certainly a law which takes away from industry the fruits of industry, the fair and reasonable fruits of industry, will not stimulate industry. What promotes initiative? Not a law that imposes Government control on the individual as well as the corporation. What invites the risking of capital? Certainly no fixing of prices; determination of profits; ability to appoint a receiver without adequate provision for appeal.

What, then, does promote prosperity? What is it? What sort of laws are they under which we have grown to be powerful and a prosperous nation? They have been laws that have been definite. They have been laws that have been just. They have been laws that have given equal opportunity by taking away special privileges. They have been laws that have eliminated unfair practices, and that have provided for open markets.

Now, gentlemen of the Committee, if this theory of licensing industry is, in truth, sound and good, why not expand it? The provisions of the bill are such that they control only certain factors in the production, distribution and consumption of products. Production is certainly more important than distribution. Why, then, if it is good policy to license the distributor and manufacturer, should not we also license the producer, and tell him just how much he may produce, so that there will be supplies that will just fill the bill?

The further we go with it, the better, if it is a good thing. And our feeling is, as we are opposed to such legislation in time of peace, that the time to register our protest and to ask you to consider our views as to whether or not this is good policy in legislation, is right now. We feel that we should make our protest now, because if this idea expands, it will extend to all industry. And our protest would be the same if the hardware business were affected by this legislation; or if the wool business, or any other line of business were affected, because our objection to it is fundamental rather than confined to the industry to which now there is an attempt to apply it.

But as applied to this particular industry, this bill pre-supposes a problem for solution. What is that problem? Is there in fact a problem? We want to be very sure, first, that there is a real problem—that it is not simply a trade war; that it is not simply a matter of re-hashing ancient history; and that it is not an attempt to fix on one industry blame for conditions which have arisen out of the war.

But suppose that we admit, for the sake of argument, that there is a problem to be solved; does it affect the entire industry? Is it something that is common to individuals and partnerships, as well as corporations engaged in the packing industry? If not, then why should we enslave individuals and partnerships because corporations might be to blame and put the entire industry under the blight of Government control?

Of course, I have not all the facts, and I confess to ignorance in regard to some of the problems which you may be considering. I can only suggest what those problems might be. If it is not a trouble with the entire industry, and if we may believe the papers that it is an objection to the practices of the five large corporations, then why not deal directly with the problem involved, instead of extending the licensing system over the entire industry, composed of individuals, partnerships and corporations?

Mr. Gates then reviewed briefly the trend of anti-corporation legislation and said that the present problem is one which concerns only a few corporations. A few and specific facilities all of which are already doing business and being conducted under laws which seem to be ample to prevent or to penalize all the practices complained of by the Trade Commission; or, if not, then the existing laws might be strengthened without invading the liberties and rights of individuals and corporations of whom no complaint has ever been made, but who would be affected by the proposed legislation. He then continued:

Now, gentlemen of the Committee, we thought, and I think we had good reason for that thought, that the licensing system and this sort of control was exceptional in time of peace. And the reason for thinking so was that there was a case some years ago that came up from California where they tried to control the Chinese laundries through a licensing system. I would like to read, if I may, a quotation from the decision of the Supreme Court of the United States, rendered at that time, it is the Yick Wo case:

"When we consider the nature and the theory of our institutions of government, the principles upon which they are supposed to rest, and review the history of their development, we are constrained to conclude that they do not mean to leave room for the play and action of purely personal and arbitrary power. Sovereignty itself is of course, not subject to law, for it is the author and source of law; but in our system, while sovereign powers are delegated to the agencies of government, sovereignty itself remains with the people, by whom and for whom all government exists and acts. And the law is the definition and limitation of power. It is, indeed, quite true, that there must always be lodged somewhere and in some person or body, the authority of final decision; and in many cases of mere administration the responsibility is purely political, no appeal lying except to the ultimate tribunal of the public judgment, exercised either in the pressure of opinion or by means of the suffrage. But the fundamental rights of life, liberty, and the pursuit of happiness, considered as individual possessions, are secured by those maxims of constitutional law which are the monuments showing the victorious progress of the race in securing to men the blessings of civilization under the reign of just and equal laws; so that, in the famous language of the Massachusetts Bill of Rights, the government of the commonwealth 'may be a government of laws and not of men.' **For, the very idea that one man may be compelled to hold his life, or the means of living, or any material right essential to the enjoyment of life, at the mere will of another, seems to be intolerable in any country where freedom prevails, as being the essence of slavery itself."**

After some interrogation upon the citations by Senator Kenyon, Mr. Gates continued:

In our business, gentlemen of the Committee, we see a good deal of speculation. We see some beneficent results, of wise speculation. On the other hand we see, occasionally, instances of dire results of unwise speculation. But as compared with such speculation, we say there is nothing that affects the country so much as speculation that goes on here in Washington, because you are speculating with the destinies of the American people. And it is fascinating, it must be, otherwise you would not be here. Because there is no material return which can compensate you for devoting your energies to this work.

That duty to speculate for the country is imposed upon you by the Constitution. If you devote your very best efforts to it seriously, and make your speculation the result of your experiences and such forecasts as you can make, then it is likely to be wise speculation. If you treat it as a game, then it does not deserve the name of speculation; it may be unwise or not. But there is no form or so-called speculation which would be so unwise as to give a discretionary order to an unknown agent, and that is what this bill proposes to do.

Now, gentlemen of the Committee, this legislation is intended to be corrective or curative. It is quite possible that the opposite result may follow, for certainly no competent man will be invited into the business. Nor will capital be invited into the business under conditions which would obtain if this bill became a law.

And what would be the result? You would have a gradual dropping out of those factors in the packing business which are now independent. Naturally men would become disgusted with Government control. So that you would ultimately have a real problem in monopoly. You would gradually sift the thing down to where you would have but a few large interests in packing industry.

We hear a good deal nowadays a under and overproduction, and it is portant. But it is not any longer en that we should merely produce corn; must produce the best corn that we from seed that is best suited to the that we have. It is not enough to n steel rails. We must produce steel from the best combination of ores, so a stand the strain that is put upon that ticular rail. And, so gentlemen of Committee, it is not enough just to n laws. May we not expect that such as are made now, when we are tryin get back to peace conditions, will r incorporate or be in line with the p ciples which have made this great cou of ours prosperous and enabled it to vance to the position which it now h laws which will make it still greater, make it continue prosperous if adhered You gentlemen are leaders in this ma We have no wish to have anything b very cordial respect for you as lea We feel that in this emergency, when are going back to peace conditions, ought to have legislation for times of p that will be a model to the country a what good production in legislation sh be.

And when legislation appears it sh be evident to all that it is a serious tempt to solve a definite problem. Th necessary, because in order to have a easily enforced you must have the p behind it. That does not mean that a shall be passed merely because of any lic clamor, but it does mean that a law, one that is recognized as just, is p tically self-enforcing.

We have had many instances of that of laws, which have been so recognize the people of the country, and acce even though contrary to general pra which had previously been in force. a law was the law in regard to rail rebates. While it had been the ge practice to apply for and receive rail rebates, when the law was passed t was such a general recognition of it just law that the proportion of offe against that law has been exceedi small.

I do not know that I can say anyt further in the way of representing the sition of the members of the Chicago B of Trade. Some of our members, as I already stated, have been partisans of packers; some are bitterly opposed to t Consequently, we speak not in a part way in this matter, but rather in regar broad principles of legislation, which and should be involved in any consid tion of this matter.

I want to thank you and to hope th have not wearied you gentlemen of Committee.

COLLECTIVE BARGAINING BILL.

The following bill to legalize co tive bargaining by farm organiza was introduced in the House of Re sentatives by Mr. Hersman and been referred to the Committee on Judiciary:

Be it enacted by the Senate House of Representatives of the Un States of America in Congress as bled. That section 6 of the Act of 15, 1914, entitled "An Act to su ment existing laws against unlawfu straints and monopolies, and for o purposes," be, and the same is her amended to read as follows:

"Sec. 6. That the labor of a hu being is not a commodity or articl commerce. Nothing contained in anti-trust laws shall be construe forbid the existence and operation labor, agricultural, vineyardists, d or horticultural organizations instit for the purposes of mutual help, that pay annually no greater divid on stocks or membership capital in ment than the minimum legal rat interest of the state where organ or to forbid or restrain individual m bers of such organizations from fully carrying out the legitimate jects thereof; nor shall such orga tions, or the members thereof, be or construed to be illegal combinat or conspiracies in restraint of trad commerce under the anti-trust laws

"Associations, corporate or other with or without capital stock, of f ers, horticulturists, vineyardists, p ers, ranchmen, or dairymen engage making collective sales for their m bers or shareholders of farm, orch plantation, ranch, dairy, or vine products produced by their member shareholders are not contracts, binations, or conspiracies in restr of trade or commerce.

"Contracts, agreements, arra ments, or combinations made by

cations or the members, shareholdofficers, or directors thereof in maksuch collective sales and prescribthe terms and conditions thereof not contracts, combinations, or conicies in restraint of trade or come, nor are they combinations or piracies to monopolize or to atit to monopolize any part of trade mmerce.

Nothing contained in this Act or in nti-trust or other laws shall forbid e construed to forbid the existence operation of assocations, corporate therwise, with or without capital , of farmers, vineyardists, hortirists, planters, ranchmen, or dairyengaged in making for the producthereof collective sales of farm, ard, orchard, plantation, ranch, or products, and, incidental thereto, ing, drying, churning, storing, ng, or otherwise processing or preg such products for market, or to d or restrain individual members, holders, directors, or officers of organizations from making such tive sales and prescribing the s and conditions thereof; nor shall organizations, or the members, holders, directors, or officers thereengaged in making such collective and prescribing the terms and tions thereof be held or be cond to be illegal combinations or concies in restrain of trade or come under the anti-trust laws; nor any of the Acts specified in this n be construed or be held to be tions of any law of the United s."

Ogden Armour in an interview at aul Sept. 2 stated that "the crest ie high cost of living has been ed, prices have already started ward and will continue. The drop will be considerable. Not only will roducts of the packers fall, but ther foodstuffs will decline in " said Mr. Armour. "Conditions point to a considerable drop later

Opening Trade Commerce.

The executive committee of the International Trade Conference has extended an invitation to 20,000 business men to attend a meeting called by the Chamber of Commerce of the United States to be held at Atlantic City, Sept. 31-October 3 for the purpose of conferring with delegates from England, France, Italy and Belgium about plans for the restoration of commerce to the end that production may be stimulated and demand supplied at home and abroad. The foreign delegation will number about 50 in all but it is expected that business men from every state in the Union will attend this meeting which promises to be of great interest.

Corn Ripening.

Rains although too late to greatly benefit the corn crop in southern Missouri, eastern Kansas and Nebraska will cause the crop to fill better and will increase the stand of fodder. The *National Weather & Crop Bulletin*, Sept. 2, says late corn made good progress in the greater part of the South, although suffering for moisture in some of the middle coast districts and in Kentucky. The crop in Minnesota and the Dakotas is mostly out of danger of frost having matured rapidly during the week. It will be about 10 days before the crop will be safe from frost in Michigan, two weeks in Wisconsin and from two to three weeks in Indiana. Cutting of the early crop has been begun in Michigan and harvesting is well under way in Texas although sprouting has been reported in some places due to heavy rains the previous week.

The *Fortnightly Review* states that economic foundations of Great Britain are rapidly being undermined by efficiency of highly paid American labor and growing ability of low-wage Japanese labor. Contends that British labor will learn necessity of intensive production and thrift only through experience of hard times.

When You Are Shipping Grain —

The Letter Box

Out of Business.

Price Current-Grain Reporter: I am no longer in the grain business.—*W. C. Curtiss, Plymouth, Ind.*

Trying Time Begun.

Price Current-Grain Reporter: Lots of grain moving, but there are no cars and no permits, and elevators are full of grain—another one of those trying periods for Mr. Elevator Man.—*Pierson Elevator Co., Pierson, Mich.*

Expect to Build.

Price Current-Grain Reporter: We would like to get in touch with some one on elevator and mill specifications. We expect to build a new elevator, but the time is rather indefinite. We will soon purchase some elevator supplies and a feed mill.—*Northern Hay & Grain Co., Rhinelander, Wis.*

Out of Seed Business.

Price Current-Grain Reporter: This is to give notice that effective June 30 we retired from the seed business and will in the future devote ourselves to the development of our wholesale grocery and cotton business.

As we have closed the seed department, and dispensed with all clerical and stenographic help therein, we take this means to advise our friends and customers that we will not be able to serve them further in the general seed business.—*Rumble & Wensel Co., Natchez, Miss.*

French Seed Report.

Price Current-Grain Reporter: Since our last report, the market has not changed much.

CRIMSON.—Qualities are not coming so fine and are more or less stained. Farmers will not sell any more at the actual quotations, which seem to them too low. They are now busy with the harvest and do not come very often to the markets. Inquiry is pretty good.

RED CLOVER.—Inquiries for seed of 1918 are still coming, and choice qualities are becoming scarce. England has paid very high prices and still wants to buy. The prospects for the new crop are not improving, and the seed quality will be under the average.

RAPE.—The Germans have been doing much sowing in the parts of France they formerly occupied in the north and today that crop is appearing on the market and prices are falling.

ITALIAN RYEGRASS.—The product as to quality is but middle; but on account of England's purchases quotations are advancing.—*H. Fauchet et Cie., Paris, France.*

$1.25 for 1919 Corn Crop.

Price Current-Grain Reporter: One of the greatest bear markets since the great war started culminated last Thursday. We believe that lower living costs are necessary, but our Illinois farmer should not be the only "goat." Two-dollar corn has declined to one dollar and fifty cents; in the same proportion eight-dollar shoes should sell for six dollars; forty-cent lard for thirty; ten-dollar flour for seven fifty, and other necessities likewise. A complaint will surely arise from this section unless such adjustments are made.

Many are asking as to the prices that will be paid for new corn. We believe that on this account alone corn raisers are vitally interested in the coming attitude and actions of labor this fall and winter. General strikes would tend to hard times and lower prices for grain; everybody working and producing to the utmost would tend to general prosperity and good prices; for example, miners working forty-eight hours per week instead of thirty as proposed would furnish an abundant supply of reasonable-priced coal for home and factory use, as compared to a skimper supply at exorbitant figures.

With good labor conditions, our guess is that Mr. Illinois Farmer will receive around $1.25 per bushel for his 1919 crop. As the price of corn comes down, the users come up in numbers, making a better demand.—*H. I. Baldwin & Co., Decatur, Ill.*

Purchased Malting Plant.

Price Current-Grain Reporter: We beg to inform you that we have purchased the Winona Malting Co.'s plant at Winona, Minn.; also their plant at Red Wing, Minn. The plant at Winona is considered one of the most modern and up-to-date plants in this country. It is absolutely fireproof throughout, and has a storage capacity of 750,000 bushels. It is located in Winona County where some of the best barley is raised. The Red Wing plant is located in Goodhue County. We expect to operate not only our Milwaukee plant but also these two. This gives us a capacity of over 4,000,000 bushels per year.—*Froedtert Malting Co., Milwaukee, Wis.*

New Firm.

Price Current-Grain Reporter: A. L. Chamberlain, former general manager and treasurer of the Michigan Bean Co., H. D. Jeffords, president of the H. D. Jeffords Co., Marlette, E. C. Holmes, who has been identified with milling .grain, hay and bean business at Mt. Pleasant, Marlette and other points, wish to announce their active connection with the new company organized in Port Huron known as the Chamberlain-Holmes-Jeffords Co. They have purchased the large terminal elevator, warehouses, docks and main office of the Michigan Bean Co. The firm will handle wholesale beans, grain, hay and feed, and having a string of elevators and warehouses throughout Michigan, are in splendid shape to take care of the business.

Every man connected with the new company has had years of experience both in a local and in a jobbing way. We are located advantageously for incoming and outgoing shipments, being on main trunk line of Grand Trunk, Pere Marquette, Detroit, Bay City & Western. The Detroit & Cleveland Navigation Co. boats, with connections to the North, East and South, stop regularly at our docks. We are the only Michigan bean elevator on deep water front, being on St. Clair River at the foot of Lake Huron, which bears all the commerce of the Great Lakes.—*Chamberlain-Holmes-Jeffords Co., Port Huron, Mich*

VALUE OF OFFICIAL CROP REPORTS.

Official crop reports are of direct interest and value to every farmer because:

1. Without such reports, speculators interested in raising or lowering prices of farm products would issue so many conflicting and misleading reports that it would be impossible for anyone, without great expense, to form an accurate estimate of crop conditions and prospects. The farmer would be left almost entirely at the mercy of the speculator.

2. Farmers would suffer most from such conditions, because they are not so well organized as other lines of business, nor are they in position to take advantage of fluctuations in market prices.

3. Farmers are benefited by official crop reports both directly and indirectly: Directly by being kept informed of crop prospects and prices outside of their immediate districts, and indirectly because the disinterested and unprejudiced official reports tend to prevent the circulation of false or misleading reports of speculators who are interested in controlling or manipulating prices.

The farmer can not, by refusing to report the condition of crops for his locality, prevent buyers and speculators from knowing the condition of the crop. It is well known that many speculators and large dealers in farm products maintain regular systems of their own for collecting information and would like to see official crop reports abolished. They have traveling agents and correspondents (usually local buyers) throughout the United States who keep them posted and these large buyers and speculators, in return, give these local buyers or correspondents information regarding general conditions and prices.

Some of the private crop reports which are published in the newspapers are honestly prepared and are more or less accurate, depending upon the extent and sources of information; on the other hand, misleading crop reports are known to be frequently circulated in order to raise or lower prices in the interest of speculators.

The farmer who reads the official estimates and forecasts as they are issued will be in position to judge for himself what the crop prospects are, as well as probable prices, so that he can decide intelligently how to market his products and how to deal with the local buyers. Even farmers who do not keep posted are indirectly benefitted by the publication of official crop estimates because these estimates automatically tend to check and lessen the injurious effects of false reports sent out broadcast by interested speculators and their agents.

The more certainty there is as to the probable supply and demand, the less chance for speculation and loss in the business of distributing and marketing the crop, which is a benefit to the producer and to the consumer. Where there is uncertainty the buyer must have a large margin of profit in order to protect himself against wide fluctuations in price.

The railroads need dependable crop reports. They must know in advance the probable size of the crop in order to provide a sufficient number of cars to handle it effectively and without delay. Cases are not infrequent where prices of farm products are reduced, or there is absolutely no sale for them because cars are not available for shipping, the farmer thus being one of chief sufferers.

All commercial and industrial fi and companies need dependable reports. Knowledge of crop prosp enable them to distribute their w economically. By avoiding heavy lo from improper distribution, they ca ford to sell on better terms with re ing benefit to farmers.

With crop information carefully scientifically gathered and compiled honestly distributed so that it ca depended upon to be as accurate as forecast or estimate can possibly be, relied upon as coming from an impa and disinterested source, the farm the merchants, the manufacturer, the transportation and distribu agencies of the country can act wi degree of prudence and intelligence possible were the information lack

Whenever a farmer furnishes ir mation for an official crop report, h helping himself as well as the o farmers of his community and state

Van Dusen Harrington Report.

In regards to the wheat crop of Northwest the Van Dusen Harrin Co., Minneapolis, in its weekly re dated Sept. 3 says that threshing is practically completed in Minne North and South Dakota but that wheat is being marketed very sl and a large portion of it will be ca on the farms or in country eleva until after fall plowing. The cro estimated at from 130,000,000 to 000,000 bus. for the three states. the farmers thereabouts seem pl with the new Government schedul prices fixing the discounts for the grades of wheat deliveries may be n liberal in the near future.

The *Iowa Weather Crop Bulletin* corn is maturing rapidly but more and higher temperatures during last two weeks would have incre the yield. Silo filling is beginnin many localities.

Are You Handling Feeds?

TRADE BICORN MARK REG. U.S. PAT. OFF.

Do you know that there is a great, unsatisfied demand for a real good hog feed?

BICORN Hog Feed surprises the farmer with its growth-speeding efficiency.

One dealer in Ohio has placed NINE REPEAT ORDERS for carload lots in the past two months.

BICORN is what YOU want—a self-selling, quick-moving hog feed, with satisfied farmers recommending it to their neighbors.

BICORN is the most up-to-date, correctly-made feed for growing pigs and breeding stock.

Write us for prices and full information. Will be glad to send our representative. The hog-feeding season is on—act now.

BARLEY MARKETS.

JTH.—Trading in the barley mar- e was again spasmodic during the eek. Only two buyers seemed to ill interested, and they came in ccasionally to fill special com- is. Receipts were light, amount- 85 cars, as against 11 cars dur- e same period last year. Quota- hanges were moderate and the losed 2c up at from $1 to $1.30.

EAPOLIS.—The market was weak unt of the decline in the futures demand for other than the clean s of the heavier type was poor. eral days the commission houses carry over thin and dirty barley. veries on contracts reported. Re- are running very light and the ovement is reported to be small.

ALO.—Barley dealers here filled maltsters with old barley early ek and there was little inquiry w, which is not offered in any y as yet. The feeling was easy. lting was quoted at $1.42@1.52; 1.32@1.40; new malting, $1.34@ eed, $1.28@1.32 on track or in

AUKEE.—The local barley market asy for the week, excepting for malting grades, which advanced Malting grades, both old and e scarce and wanted by indus- ow grades and thin stuff, which ites the bulk of receipts, which en lighter for a week, also sold eely. The market closed 1@2c or all grades. The demand from s and industries, old and new s good. The receipts for the ere 255 cars, against 329 cars a o and 106 cars in 1918. Current ons are: Good to choice, 48 to est, is quotable at $1.40@1.43; $1.44@1.45; fair to good, 45 to st, $1.34@1.40; low, 40 to 44-lb. 21@1.33; feed, $1.18@1.28. Iowa quoted $1.20@1.42 for light to fancy; Wisconsin, $1.30@1.45; Minnesota, $1.20 @1.42; Dakota, $1.20@1.42; feed and rejected, $1.18@1.28.

KANSAS CITY.—Offerings of barley this week, which were 33 cars, showed a reduction of more than 100 per cent, due chiefly to the embargo against wheat and the congested condition of the railroad yards. Shipments were mainly from Western Kansas and Eastern Colorado. The grading continued low, most cars going into the "sample" class, with weights from 30 to 36 lbs. Exporters could handle nothing under 45 lbs., and they got nothing for immediate use. Prices had a further decline of 2@5c, closing with No. 3 quoted nominally at $1.10@1.12 and No. 4 at $1.07. Ground was sufficiently heavy to grind into feed. There were some sales for shipment to feeders, and elevator men took the rest, hoping to be able to clean and mix the grain and thus raise the test weight and feed was offered at $2.80 per cwt., sacked, or 20c less than a week ago. Demand for the product was moderate. Stocks of barley increase 8,000 bus., to 67,000 bus., against 61,000 a year ago.

PORTLAND.—The barley market was on the decline last week, although offerings were light. The range of prices bid and asked were so ridiculous, says the *Commercial Review*, that no one took the same seriously. The demand was very light, most of the sales being made to feeders at outside points. The crop is said to be light in weight with uneven color and quality is reported better in some sections than last year with the reverse true in others. No. 3 blue barley is quotable $64 bid and $67 asked, feed barley $62 bid and $66 asked, No. 2 Eastern barley $58 bid and $60 asked.

SAN FRANCISCO.—The barley market was a very dull one throughout the week, and as to barley export trading in the interior, the *Commercial Review* says, "there has been nearly a deadlock." The foreign demand is there, but the question of exchange has put buyers in a waiting mood. Barley was quotable during the week at $3.05@3.15 per cental as to quality and grade.

CHICAGO.—The barley market opened the week's trading Tuesday with prices 2@3c higher for the better grades and a similar advance reported the next day, although the medium low and feed grades were easier in tone, which led to a decline of ½c on Thursday. However, there was a good demand all through the week for the heavy types of grain, both the maltsters and the feed men bidding for the better grades. On Saturday a better cleanup of the thin barley was noted and a scattering demand for the feed grades was a feature of Monday's market. The market the 8th was a strong one, choice grades being fully 2c higher than the close on Saturday and maltsters were in the market for the heavy types. During the day there were 18 cars of barley reported sold over a range of $1.25@1.38, with futures higher, Sept. closing at $1.26½ bid; Sept. new opening at $1.36 and closing at $1.35; Dec. opening at $1.25, selling to $1.27 and closing at that figure. Exports from Atlantic ports during the week were 1,311,000 bus., compared to 165,000 same period a year ago. Visible supply shown elsewhere.

The weekly report of the Van Dusen-Harrington Co., Minneapolis, under date Sept. 3 says that barley receipts have been exceptionally light for this time of the year and that inquiries for feed barley are numerous from the West. The county commissioners of Montana are figuring on various kinds of grain in order to help those who lost their crops during the recent drought.

Receipts of barley at Montreal during the past week were 382,718 bushels, against 382,096 bushels for the week previous and 2,500 bushels for the same week last year.

During the month of July there were 68,306 tons of barley moved from California to Gulf ports by rail and 20,892 tons by water.

BROOM CORN.

During the past week conditions have been favorable for harvesting in the broom corn areas of the Southwest and indications point to the early dwarf areas being marketed in better condition than for several years past. The quality thus far reported indicates an improvement on the past two seasons and early reports claim that a good percentage of the crop runs to good length. Late planted corn is said to be making favorable growth, but it will be several weeks longer of favorable weather to fully mature the crop. Field activity is confined chiefly to the Lindsay area, says the *Broom Corn Review*, as but a limited number of cars have been available in the dwarf districts. Buying has been active, all offerings on street markets having been taken readily, although receipts are increasing each week. In this district prices range from $125@260, with sales reported at $265, $270 and $280 on quality offerings of shorter corn. A top price of $300 was reported for a choice lot of five bales. Within a couple of weeks it is expected there will be activity in the markets of Elk City, Sayre, Strong City, Leedy and other nearby points, as growers will endeavor to get corn on the market as early as possible. At the Wichita market trading is chiefly in old corn and stocks are rapidly becoming exhausted, sales being reported at $90@120, and very little of the new crop is obtainable at field points in western Kansas. In central Illinois there is considerable activity reported in the new crop, manufacturers contracting for quite a number of crops at $300 as they go into the shed. The quality and color generally is reported good, with fair yield, the acreage running about 35 per cent of last year. Old corn quotable $200@300.

Condition of Barley.

Crop Reports

Compiled by GEO. A. WELLS

The compilations given below are based on the reports of our correspondents Sept. 3-6 and changes in climatic conditions since those dates should be taken into consideration:

SOIL CONDITION.—The soil condition is reported quite largely "too dry" in all of the surplus states, and in Nebraska, Kansas and Oklahoma almost entirely "too dry," although considerable portions of the other states report soil condition yet "favorable." It would seem that general rains are needed throughout the entire surplus grain territory.

TEMPERATURE.— The prevailing temperatures during the past two weeks have been almost entirely favorable for the growth condition and maturing of the corn crop, Kansas reporting, however, "too hot" to a considerable extent.

CORN.—Basing the Government term normal at 100, the average comparative reports of the growth condition as reported by our correspondents in each state is as follows: Ohio, 95; Indiana, 83; Illinois, 72; Missouri, 73; Iowa, 95; Nebraska, 68; Kansas, 52.

These reports show a flat depreciation of 2% during the last two weeks in these states, the crop showing improvement in the states of Ohio and Indiana, depreciation in Illinois, Missouri, Nebraska and Kansas with Iowa holding its own.

The percentage of the corn that will be matured and out of the way of frost by Sept. 15 is reported as follows: Ohio, 81; Indiana, 72; Illinois, 76; Missouri, 66; Iowa, 78; Minnesota, 86; North Dakota, 76; South Dakota, 86; Nebraska, 73; Kansas, 81; and Oklahoma, 100.

It would seem that the corn crop of the entire country promises to be well matured by Sept. 15 and that a very few days longer would finish the job.

FALL PLOWING.—The percentage of the fall plowing that has now been done is reported as follows: Ohio, 67; Indiana, 51; Illinois, 31; Missouri, 18; Iowa, 33; Minnesota, 26; North Dakota, 11; South Dakota, 41; Nebraska, 33; Kansas, 29; and Oklahoma, 11.

THRESHING.—The percentage of the threshing of small grain that has now been done is as follows: Ohio, 84; Indiana, 94; Illinois, 96; Missouri, 71; Iowa, 89; Minnesota, 51; North Dakota, 68; South Dakota, 58; Nebraska, 74; Kansas, 62; and Oklahoma, 88.

FARM SURPLUS.—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold by the farmers is reported as follows: Ohio, 68; Indiana, 72; Illinois, 83; Missouri, 60; Iowa, 70; Minnesota, 21; North Dakota, 23; South Dakota, 39; Nebraska, 58; Kansas, 42; and Oklahoma, 60.

Of oats: Ohio, 50; Indiana, 47; Illinois, 40; Missouri, 20; Iowa, 35; Minnesota, 14; South Dakota, 22; Nebraska, 35; Kansas, 60; and Oklahoma, 22.

General Reports.

The following general reports as to whether or not an increased or decreased acreage of winter wheat to be sown this fall is anticipated and as to whether or not the farmers are holding old corn to any extent are self-explanatory:

OHIO.

Bucyrus (4): There will be an increased acreage of wheat sown this fall. Yes, farmers are holding their old corn.

Greenville (2): Decreased acreage of wheat. Farmers holding some old corn and they are discouraged.

Xenia (3): Decreased acreage of wheat will be sown, largely due to high price of corn cutting. No old corn being held, so there is no surplus in this territory.

Eaton (2): There will be a small increase in wheat acreage.

Portsmouth (6): Think wheat acreage will be about as usual. About 50,000 bus. old corn being held by farmers; were offered $2; worth today about $1.60.

Agosta (5): O. K. for corn; too dry for plowing. About normal acreage of wheat. No old corn.

Sidney (2): Our farmers are preparing about the usual acreage for winter wheat. No surplus old corn in farmers' cribs here, but they will soon have plenty.

Delaware (5): Average amount of wheat will be sown this fall. No old corn is being held by the farmers.

Bryan (1): Reply to question No. 3, corn that will make an average yield is 100% growth condition, but we have considerable acreage that will never make corn.

INDIANA.

Rushville (8): Not so much sown. Very little old corn around here.

Waveland (2): Think the acreage of wheat will be less than last year. Very little old corn here; farmers are feeding it.

Portland (7): Acreage of wheat will be decreased. Very little old corn being held.

Jasper (3): In our estimation the wheat acreage will be about 10% less than last year. Farmers are holding old corn pretty much.

South Whitley (7): 40% decrease of wheat acreage this fall. No old corn in the locality.

Monticello (1): Expect decreased acreage of wheat sown from last year, but a normal acreage if plowing can be done. Old corn all sold.

Decatur (7): Decreased acreage of wheat. Ground too dry for fall plowing. No old corn held.

Frankfort (2): About normal acreage of wheat will be sown. No old corn of any consequence in this territory.

Princeton (3): Decreased acreage of winter wheat will be sown this fall. Farmers have no old corn, and small crop of new corn in sight, barely sufficient for home consumption.

Wabash (4): Will have decreased acreage wheat sown this fall. Farmers here have no corn to hold.

Angola (7): Normal acreage of wheat but less than was sown fall of 1918. No old corn here.

Tipton (5): Acreage will be somewhat less. No old corn being held.

Bloomington (3): All feeding their oats. Will be small acreage of wheat cut this fall, not even a normal acreage. Not much old corn in farmers' hands.

Winchester (8): Acreage of wheat will not be more than normal. No clover seed. Hog crop large, however, few on feed.

ILLINOIS.

Pocahontas (3): In all probability there will be 85% acreage sown of wheat compared with 125% last year. Corn was a failure this year.

Wenona (4): Very little wheat will be sown here this fall. Farmers are still holding 10% of marketable surplus of old corn.

Lostant (4): There will be a decrease in acreage of winter wheat this year. No old corn left around here to speak of.

Ashland (5): Acreage sown to wheat will decrease 20%. Considerable old corn to move when cars are available.

Eureka (1) Very much decreased acreage of wheat. Very dry for plowing but corn maturing well.

Decatur (5): Fine weather to cure corn, but a bit dry for fall plowing. Winter wheat acreage will decrease 25% or more compared with 1918. Farmers binning oats.

Freeport (4): Expect very little change in winter wheat acreage. Not much old corn held back.

Odell (7): Very little wheat will be sown this fall as land plows up in chunks. Very little old corn in farmers' hands, would all be sold if cars could be had.

Ashton (4): Winter wheat acreage will be doubled. Some old corn held on farms.

Tuscola (8): Decreased acreage on winter wheat account too dry for plowing. Farmers moving old corn.

Minier (5): Winter wheat acreage will be decreased 75%.

Highland (6): Expect acreage in wheat to be 25% less than last year. Last year it was 125% so that it would be about 100% this year—or about a normal acreage.

Princeton (4): There will be about 75% of a crop of winter wheat. Farmers holding corn because they can't get cars.

Mt. Pulaski (5): A little old corn back but most owners not willing to sell due to break.

Mt. Carroll (4): Decreased acreage. No surplus corn in this locality.

Mattoon (8): There will be decreased acreage of winter wheat sown account too dry to get ground in condition. Old corn all sold.

Marshall (8): Decrease. Too dry. Large acreage and poor quality last crop discouraging.

Sidell (8): Acreage winter wheat decreased 50%. Farmers not disposed to sell old corn at present prices after break in market.

IOWA.

Williamsburg (8): We anticipate large decrease in acreage winter wheat. All old corn has gone to market.

Whitten (4): Lots of old corn being held by farmers for the reason the elevators ar unable to get cars.

Jefferson (5): Very little old corn left here. The lightest amount we have had in ten years.

Marcus (1): Very little wheat will be sown as quality was poor of 1919 crop. Farmers stopped plowing as it is too dry and broke up lumpy. Waiting for rain. Pastures about bare.

Clarinda (3): 50% decrease in acreage of winter wheat to be sown this fall.

Kirkman (2): I do not think there will be as much wheat sown as last year. There is no corn to be held here; we only had a little corn last year.

Gilbert (5) Will be very little winter wheat sown. Farmers moving old corn as fast as elevators can get cars.

Arthur (2): No winter wheat. Very little old corn yet.

Washington (8) We anticipate a very much decreased crop of winter wheat. Farmers are anxious to sell all old corn.

Clemons (5) I think there will be decreased acreage in wheat as the yield was not satisfactory this year. There is some old corn that farmers didn't have time to market as they were too busy threshing.

Moulton (6): Our wheat crop was so near a failure that farmers will not sow as much as last year. No corn to hold.

Allison (4) Will be no winter wheat sown at this point. No old corn at all in farmers' hands.

Coburg (3) Seeding of fall wheat will decrease 25%. No old corn in the country.

Wall Lake (2): Look for a big decrease in acreage winter wheat this year. Holding some corn on account of car shortage.

Keokuk (9): Marked decrease in winter wheat acreage this fall.

Onawa (2): Winter wheat acreage will be about the same this fall as last. No old corn in the country here.

Hull (1) Decrease in wheat acr Are holding some old corn.

Belmond (4): Weather has bee hot for corn, or rather too dry. corn on thin soil fixed.

Wright (5): Owing to the very weather there will be a decrease o wheat acreage because the far can't plow.

Glidden (2): Think there will b creased acreage of winter wheat. ers are holding old corn becaus scarcity of cars.

MISSOURI.

Paris (5): Farmers will not pu more than 75% of last year's cr wheat. No old corn of conseq here.

Chillicothe (1): 50% decreas acreage of wheat. No old corn held.

Clinton (1): Decreased ac wheat. No old corn here.

Sedalia (5): Balance oats held feed.

Columbia (5): We look for 60 on wheat this year. Not much old held. Wheat yield 14-14½ per ac

Lamar (3): Believe the acrea wheat sown this fall will be about decrease. Very little old corn in ers' hands. Very little being sold.

Salisbury (4): Fall plowing is re ed account of wheat in shock in About 50% of last year's wheat ac

Harrisonville (1): Decrease in at least 72%. Not any old corn. menced to feed hogs new corn no

Higginsville (2): Decrease in acreage.

Carrollton (2): We have a wheat in shock all damaged. Co splendid and out of danger.

Springfield (3): No old corn. decreased acreage of winter whe

Mercer (1): Decrease acreage o ter wheat. No surplus old corn

MINNESOTA.

Henderson (6): Farmers will usual acreage of winter wheat. N corn to be sold here.

London (6): There won't be winter wheat sown here this fall. is no old corn here for sale now.

Donnelly (2): No winter whea no corn to sell.

Worthington (3): Not much old held here.

Albert Lea (6): No winter raised around here. Farmers are ing and have sold practically all t corn. The dry weather has cut the yield of new corn probably 1

Eden Prairie (6) No winter sown around here yet. Old corn h been fed.

Hutchison (6): Winter wheat ac will be about the same. Old co nearly all sold.

Minneota (3): No winter Farmers have been disposing of corn very freely during the last

Warren (1) None sown here corn matured here last year.

Farmington (9): No winter raised here worth speaking of. corn. New corn is the best in ove years and some is being cut. warm, dry weather keeps on till the 15th all the early planted cor be safe.

Prior Lake (6): Winter wheat age about same as last year. No sold in this community. All us feed.

NORTH DAKOTA.

Voss (7): There will be no wheat seeded here. No corn rais

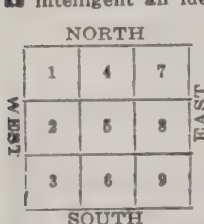
Blabon (7) Must ship in oats fo and some for feed. Barley very p

Carrington (5) No winter wheat. no corn for sale.

Casselton (8): Decrease.

Drayton (7): Threshing cor most favorable for small grain. threshing about started.

SOUTH DAKOTA.



Hurley (9): No wheat sown Corn is held by farmers and ele Absolutely no cars to do business

Flandreau (8) Decreased acrea all wheat, winter and spring. Ol all marketed.

Yankton (9): Very little winter sown here. There is considerab

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

t held back on the farms that will likely move in the next thirty days.
ell Rapids (8): Ground dry for plowing. O. K. for corn. Not much old corn on the farmers' hands. No winter at here to market.
k Point (9) If we don't get some there won't be any fall wheat n. Not very much old corn being here.
iller (5) No wheat to speak of here. corn pretty closely sold and fed.
itchell (8) Has been too dry for fall ing.

NEBRASKA.

atrice (9): Same as last year of at. Not holding old corn.
irmont (9): Rather look for slight ease.
huyler (7): Farmers seem more ous to dispose of surplus corn now when market was higher. Decased acreage of wheat likely.
braska City (9): Decreased acreon wheat. Farmers have been unto plow. Very little old corn back ie country.
hland (9): Decreased wheat acre- Very little old corn here.
innetoon (7): There will be a very l acreage of winter wheat sown. as ground cannot be plowed.
lden (7): **Roseland:** Corn will ma- better now without rain, escaping ible frost. Ground dry for plowing. e cannot plow.
perior (9): A large decrease in t acreage. If no rain soon will be tically no wheat sown. Last rain was June 24.
perior (9): Do not look for an inse, and if dry weather continues, it be short of 1918 plowing.

KANSAS.

hroyer (7): About same wheat as last year. Not much old corn.
dan (9) No oats to market.
neca (7): Decreased acreage of er wheat. Very little old corn in vicinity. Thousand of bushels of have been shipped in here since ary 1.
ainville (4) Farmers will hold for oats and barley.
eensburg (6): None sold. Farmers ing oats to feed.
ta Vista (8) No corn here this year. have to ship it in.
haska (4) Decreased acreage of er wheat account of too dry to plow. ld corn here.
gan (4): Owing to labor condition t acreage will be reduced 35 to There is no old corn on hand.
hol (4) Farmers will sow 20% less t. Very little old corn is being
tsburg (9): Not marketing account corn crop.
ellington (6) Unless we have good look for big reduction in wheat fall. No old corn here and will be little new.
chita (6): About 75% to 80% of a al crop of wheat to be sown this No corn raised to amount to any-
wego (9): Wheat crop will not be half of last year. Have no cars
xie (1) Quite a decrease in the ge of wheat account of dry her. No old corn in country.
iontown (9) Decreased acreage of t. Farmers have been too busy to No old corn to hold.
hland (3): Corn crop is almost a e. Acreage of winter wheat will duced fully 15%.

OKLAHOMA.

Reno (5) Farmers talk of about acreage as last year if conditions nue favorable.
ary (2): Will be considerable de- e. Now too dry for plowing and condition will tend to decrease acreage considerably if not changed soon.
Enid (4) Decrease of wheat sown account of too dry to plow. No old corn.
Altus (3) Too early to determine acreage of new wheat crop. Cotton taking their attention.

RECEIPTS AND PRICES ON RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Sept. 5, and for the corresponding week last year, as compiled by the Minneapolis *Market Record*, were:

	1919. Cars.	1918. Cars.
Minneapolis	236	337
Duluth	453	15
Chicago	79	154
Omaha	34	14
Milwaukee	56	9
Total	858	529

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning Aug. 29, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Aug. 29..	$1.43⅝	$1.45½	$1.46½	$1.35	$1.47
Aug. 30..	1.42⅝	1.43	1.36	1.34	1.47
Sept. 1..	Holiday.				
Sept. 2..	1.38⅜	1.39½	1.45	1.35	1.46½
Sept. 3..	1.35⅞	1.37	1.40½	1.25	1.40
Sept. 4..	1.33⅛	1.34½	1.36½	1.25	1.38½
Sept. 5..	1.35½	1.34¾	1.34¼	1.25	1.40

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 2,512,000 bus. last week and oats 291,000 bus. Corn decreased 1,000 bus., rye 152,000 bus. and barley 43,000 bus. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Totals.	Last yr.
Wheat	3,879	8,639	12,518,000	15,125,000
Corn	38	129	167,000	2,349,000
Oats	2,205	4,884	7,189,000	10,353,000
Rye	337	2,074	2,411,000	986,000
Barley	41	233	274,000	613,000

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Sept. 6, 1919 (000 omitted):

In store at	Wheat.	Corn.	Oats.	Rye.	Barley.

BUCKWHEAT.

Receipts of buckwheat at Montreal for the week ending Sept. 5 were 1,071 bushels. Last year, nil bushels. Buckwheat market steady.

Quotations at country points $3.45@3.55 per 100 lbs.—*Trade Bulletin.*

The Bureau of Crop Estimates under date Sept. 8 says buckwheat is nearing harvest in a fair condition, but is in need of rain.

If this paper pleases you, kindly recommend it to your neighbors in the trade.

WESTERN GRAIN DEALERS MUTUAL FIRE INSURANCE COMPANY

HAZARDOUS CONDITIONS

This is the season of the year when country grain shippers usually make repairs on their elevators preparatory for the handling of the next crop, and we urgently suggest attention to the following hazardous conditions, namely:

Windows:—Broken or open. **Doors:**—Out of order; no fastenings; not locked at night. **Siding:**—Openings in, or warped away from wall. **Roof:**—In bad condition. **Foundation:**—Openings in. **Cob Room:**—Not closed, or husks and dirt allowed to accumulate. **Dust Room:**—Accumulation of dust and dirt. **Pulleys:**—Wooden. **Gasoline Engine:**—On wood floor; gasoline leaking; torch ignitor; gravity feed; improper method of starting engine; supply of gasoline too near engine or not properly protected; accumulation of oil and dirt about the engine. **Electric Power:**—Not properly installed or neglect in use of. **Dust and Dirt:**—Accumulation in elevator. **Weeds and Trash:**—Allowed to remain around elevator. **Chimney:**—Defective. **Stove:**—Floor, walls or ceiling not protected. **Oily Rags or Waste:**—Thrown about the premises. **Bearings:**—Not oiled, allowed to become dry and heat. **Wooden Spittoons:**—Cigar stubs thrown in. **Lights:**—If electric, not rightly installed or protected. If lanterns, carelessly used.

The correction or elimination of all such hazards will materially reduce the danger of fire, will reduce the cost of insurance, and avoid serious loss.

JAY A. KING, President **M. E. DEWOLF, Treasurer**
F. D. MILLIGAN, Chairman, Executive Committee
GEO. A. WELLS, Secretary
716-720 Hubbell Building, Des Moines, Iowa

Canadian Visible.

Canadian visible supply of wheat increased 507,000 bus. last week, and oats decreased 164,000 bus. Last year wheat decreased 987,000 bus. and oats 1,033,000 bus. Details follow:

	This wk.	Last wk.	Last yr.
Wheat	2,855,000	2,348,000	3,263,000
Oats	2,049,000	2,213,000	7,370,000
Barley	1,623,000	1,759,000	868,000

After "Careful Consideration."

The self-styled Farmers' National Council asks editors to consider its reconstruction program and the financial benefits thereof to farmers. We have considered said program and conclude: That it should be called a destruction program; that its "financial benefits" to farmers will consist of tremendous losses to them; that it does not express the sentiments of the real farmers of America, but expresses the ideas of a group of radicals; that the Farmers' National Council misrepresents agriculture, and the sooner farmers denounce it and its propaganda the better off they will be.—*National Stockman and Farmer.*

CASH PRICES FOR GRAIN.

Following is a statement of the wee kly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Sept. 6:

CORN—	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.
No. 1 mixed.	166 @181½	.....	.....	160 @170	163 @165	166 @176

News of the Terminal Markets

SIOUX CITY, IA.

Paul Larson, Correspondent.

W. H. Harter, of the Quinn-Shepherdson Co., of Minneapolis, was a visitor during the week.

Receipts of grain have been very light the last week, due to the car shortage. Several country shippers report their houses full and unable to get cars.

The Flanley Elevator, Mystic Elevator and Martens & Ketels Elevator, are getting along towards completion as far as concrete work. It will be about thirty days before any of them will be operated.

A grain control committee, composed of S. A. Morrison, chairman, C. N. Curtis, railroad traffic assistant, and M. M. Betzner, representing U. S. Grain Corporation, was established on September 1st. This will give Sioux City the same status as other primary markets, and should be of much advantage in seeing that we are supplied with a steady flow of equipment, both from producing points to Sioux City, as well as shipments from this market.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts were 7 cars, with market 1 cent higher: 2 white, 70¼@70½; 3 white, 70 cents.

Car situation in this district has showed some improvement during the past few days and cars are showing up more freely for grain loading.

The large plant of the Corn Products Co. is again operating in full swing, causing a good local demand for corn. Their buyer took the greater part of the offerings Saturday at an advance of 3 to 4 cents.

Corn market at Peoria Saturday was quoted 3 to 4 cents higher after a dullness all week. Receipts were 25 cars and local demand very good, 2 white selling at $1.70, 1 yellow, $1.70; 2 yellow, $1.70; 3 yellow, $1.69½; 1 mixed, $1.70; 2 mixed, $1.69; sample, $1.63.

At the monthly meeting of the Peoria Live Stock Exhange Saturday eleven new members were admitted, bringing the total membership to 49. The increase in membership of the local exhange is said to be the greatest of any branch during the past year. Other matters of importance to live stock were also discussed. The Peoria Exchange is also a member of the National Live Stock Exchange.

OMAHA.

Leigh Leslie, Correspondent.

Cash handlers in this market and shippers complain of a shortage of cars in Nebraska, and that many of the cars furnished for the movement of grain are in bad condition.

Reports from various parts of Nebraska indicate that this state will produce this year a fairly large corn crop. Conditions in the northern part of the state are excellent, while those in the South Platte country are not so good.

Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, went to Washington last Friday to attend the hearing before the Interstate Commerce Commission on grain rates and other questions affecting the grain and milling trades.

There has been a moderately liberal movement of wheat to Omaha in the last week, while that of corn, oats, rye and barley has continued light. There are no restrictions on this market, nor is there any likelihood that any will be imposed. All grain that has come in has been handled promptly. The demand for all grains is sufficient to absorb the offerings.

To Enlarge Flour Mill.

Announcement was made last week by the Omaha Flour Mills Co. through its president, W. J. Coad, that its plant here will soon be enlarged by the addition of a new flour milling unit with a capacity of 2,500 barrels of flour per day. The addition will be seven stories high, will be of concrete construction and will cost approximately $6,000. Additional elevator storage of 300,000 bus. will result from the enlargement of the mill. Regarding this project Mr. Coad says:

"The new unit will be ready for next year's crop and when it is completed will give us a total production of 4,000 barrels a day. The buildings of the unit will bring an addition of $6,000,000 to the flour milling industry of the city, and will increase that of the Omaha flour mills to a total of $12,000,000 a year."

Omaha has twenty terminal elevators with a combined capacity of 10,600,000 bus. and is rapidly developing into a big milling center, already having four well-equipped flour and cereal mills with a daily capacity of 6,300 barrels, and two alfalfa meal-mills with a daily capacity of 2,000 tons.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

CAIRO, ILL.

J. E. Clancy, Correspondent.

Receipts the first week of September have been light. Shipments have increased. Dealers report poor demand.

The steamer Helen Blair has been purchased by Memphis parties and will make weekly trips between Cairo and Memphis.

The wheat acreage will not be as heavy as last year. Considerable plowing has been done and the ground is in excellent condition.

The corn in this part of the state is well matured with the exception of some early corn that was blown over by high winds and which has not fully matured.

The sharp decline in prices of grain, hogs and cattle is causing the farmer to talk of holding his grain and stock until the prices on articles he purchases show an inclination to become lower.

The car shortage is becoming acute and dealers here say country shippers are unable to get cars for loading. The car complaint seems general and could be remedied by increasing the minimum loading capacity of all cars.

Two of the new steel barges built for the Government Barge Line to run between St. Louis and New Orleans are aground in the Ohio River this side of Louisville. Tow boats have gone to their assistance. The river is falling and unless they are released soon will be damaged.

DETROIT.

John Barr, Correspondent.

Geo. Kelley, manager of the elevator at North Branch, Mich., was a visitor on 'Change Saturday.

Rye is inactive. Millers do not want it and shippers have been doing nothing for several days. The East is not buying. No. 2 is quoted nominal at $1.36.

Wheat is quoted 1c lower and quiet. A little shipping trade has developed, but local mills are not good buyers. No. 1 red is quoted at $2.26 and No. 1 white at $2.24.

Oats are quoted easy, but have not followed corn in its slump. Local demand has been helped out by a little eastern buying, but the market is far from active. Cash No. 2 white is quoted at 75½c and No. 3 white at 74@74½c.

Beans are dull and steady. Cash beans in this market are quoted at $8 and nothing doing. Some October sales are reported from country points at $8.50, but this price is considered high and it is probable it could not now be secured. The acreage in Michigan is short, but several points report a good outlook owing to favorable weather.

Corn is demoralized in this market. The price is off 25c for the week and not much demand at the break. Stocks and receipts are still small, although the latter show a little gain. When the corn got here it could not be sold without large concessions being made to purchasers. The millers say there is no demand for corn feeds and prices in mill goods are lower. Quote: No. 2 and No. 3 yellow, $1.75; No. 3 mixed, $1.73; No. 4 yellow, $1.73; No. 5 yellow, $1.72, and No. 6 yellow, $1.71.

CLEVELAND.

F. R. Sowers, Correspondent.

H. W. Robinson, president of the Grain and Hay Exchange, spent Wednesday and Thursday in Toledo and Green Springs on business.

J. F. Kemper, who was at one time in the hay business in this city, has gone out of the cartage business, and, so we are told, is buying some hay.

The week of August 3rd the Cleveland Grain Company received their first cargo of rye, which was the first cargo to be received in this market this year.

The receipts of corn, oats and wheat for the last week were the largest of the season, and, considering the car situation, were as good as could be expected.

A. W. Clark, of the Cleveland Grain Co., attended a meeting at Chicago, at which cross-lake rates were being considered, as a representative of the grain dealers of Cleveland.

P. A. Murphy, sales manager of the Cleveland Grains Drying Co., spoke at the Thursday noon luncheon of the Gyro Club on the grain situation and its reference to the cost of living.

The Exchange on Tuesday afternoon, September 9th, will engage in their annual clam bake which will be held at Miller's Road House, and promises to be the biggest occasion of the year among the grain and hay dealers of this city. The entertainment committee of the Exchange are putting forth an extra effort to provide not only a real clam bake, but some amusements that will be long remembered by those participating.

The market for hay continues good, with a tendency toward lower prices, and a demand for good grades of hay always existing. On the whole, the price this week is about $1 lower than last week on all grades of timothy.

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts have been rather liberal on oats and corn during the past week. The spot market on oats, 68c@71c. Corn, $1.78 to $1.82. Wheat basis No. 2 hard, $2.13 per bushel.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is sufficient straw arriving to meet the light demand and prices are holding steady.

Lighter receipts than the previous period have had no effect in improving prices here. Practically all grains, as well as straw and hay, are receding to lower levels. Demand continues indifferent and evidently buyers believe the market is destined to go still lower.

So far as shelled corn is concerned the receipts are more liberal than for some time, but while demand is somewhat better the prices are materially shaded, owing to sweeping reductions in the West. No. 2 yellow is selling at $1.98@2 a bushel; No. 3 yellow at $1.94@1.95. Practially no ear corn is arriving in the local market. Total receipts for the period were 16,900 bushels.

The receipts of oats, practically all of which are new oats, were about 30,000 bushels under the total for the same period last year, 242,000 bushels being bulletined for the week. This volume is heavy, however, for the demand and cars are going into storage to avoid the demurrage charges. Best grades are still quoted around 78@78½c a bushel, but unless demand increases prices will break within the next few days.

TOLEDO.

Carl Bryant, Correspondent.

John Monroe, miller, of Archbold, O., was on 'Change last week.

Frank Annin, of W. H. Morehouse & Co., is back on the floor after his annual vacation in northern Canada.

Kent. Keilholtz, of Southworth & Co., returned Monday from a week's vacation with his family at Clear Lake, Ind.

O. E. Richardson, of the Buckland Milling Co., Celina, O., was a visitor at the offices of J. F. Zahm & Co. last week.

Frank I. King, jovial head of C. A. King & Co., was heartily greeted by his many friends and associates when he appeared on 'Change for a few moments last week. Mr. King is recovering from an illness which has kept him away from the floor for several weeks.

Taylor's Peerless flour, made in Toledo by the Northwestern Elevator & Mill Co., carried off honors in the bread baking contest held here last week. The contest was part of Mayor Schrieber's plan to reduce the cost of living and was an incentive for more bread baking in the homes. There were 117 entrees and practically every brand of flour sold in Toledo was used by the contestants.

Announcement of the total stocks of seed on hand at Toledo was made at the close of 'Change Saturday. They were as follows: Red clover, 1,157 bags; alsike, 3,802; timothy, 69,654. Stocks of red clover and alsike were about as expected but the trade was surprised to learn that only 69,654 bags of timothy were stored here, as it was popular opinion that the warehouses here held close to 90,000 bags. This was construed as bullish, but how much effect it will have in sustaining values in face of the H. C. of L. campaign being waged, dealers were reluctant to guess.

Toledo grain dealers were host to about 150 members of the Northwestern Ohio Cooperative Association, at their regular monthly meeting here Monday evening. It was the largest attended of any of the monthly meetings of the association. Bill Cummings' band, composed of himself, John Luscombe, Paul Barnes, Joe Streicher, Lester Howard, Earl Slawson and George Forrester, had long anticipated the event and surprised the members with the variety and quality of music furnished. Some delegates thought they noticed considerable improvement since the band's last public appearance at Defiance, but this was probably due to Joe Streicher's substitution of a regular base drum in place of the snare drum he manipulated before. The visiting members were treated to a fine dinner at Kest's and at the meeting afterwards many important matters were discussed.

MEMPHIS.

Reports of grain for the week ending September 6th were as follows: Wheat, [illegible] bushels; oats, 49,935 bushels.

Stocks of grain in regular elevators September 1st were: Wheat, 276,700 bushels; [illegible] bushels; rye, 26,826 bushels; barley, 15,672 bushels.

The following were visitors on 'Change during the past week: S. J. Gray and N. Goldstein, Philadelphia, Penn.; Wilmot Hazard, Grand Bend, Kansas, and Parsons, Akron, Ohio.

The oats market shows a slight improvement on the demand during the past week, trade purchasing only for immediate requirements. No. 2 yellow corn, to arrive, is quoted at $1.87 per bushel; No. 3 yellow corn, to arrive, at $1.87 per bushel. Receipts for the week ending September 6th, none.

The demand for oats were fairly brisk, prices higher. Trade is not buying to any meeting present needs. The following prices were quoted at the close: No. 2 white, 61½c per bushel; No. 3 white oats, 59c per bushel; No. 4 white oats, 57c per bushel; regular No. 3 clipped white oats, 57½c per bushel; extra No. 3 clipped white oats, 58c per bushel; No. 4 clipped oats, 56c per bushel. Receipts for the week ending September 6th, none.

PHILADELPHIA.

C. A. Rudderow, Correspondent.

The president of the Chamber of Commerce of Lille, Hermitt France, has written to the Philadelphia Chamber of Commerce to advise them of dealers in this city who might be interested in exporting to that city to France.

The U. S. Grain Corporation has advised trade that effective immediately all orders for railroad permits to cover export shipments of the Wheat Director's regulations of shipper and date of issue of applicant.

Receipts of flour and grain for the week ending September 6 were: 700 bbls. flour, 1,875 bbls. of flour in sacks, 1,875 bbls. wheat, 25,475 bus. corn, 220,317 bus. oats, [illegible] bus. rye, 5,000 bus. barley; 1,000 bus. malt and 240 tons feed.

G. M. Chapman, representing Bartlett, Frazier & Co., Toledo; Nevins, Yorke-Calkins, Lancaster, Pa.; Geo. D. Emack, Boston, New York City, Kistler, flour and feed merchant, Lancaster, Pa.; Edmund E. Delp, of Harrington, Delp & Co., Chicago, and Edmund E. Delp, Grain Broker, this city. Mr. Delp motored from Harrington to Philadelphia in his car and joined Mr. Chapman up at Chicago.

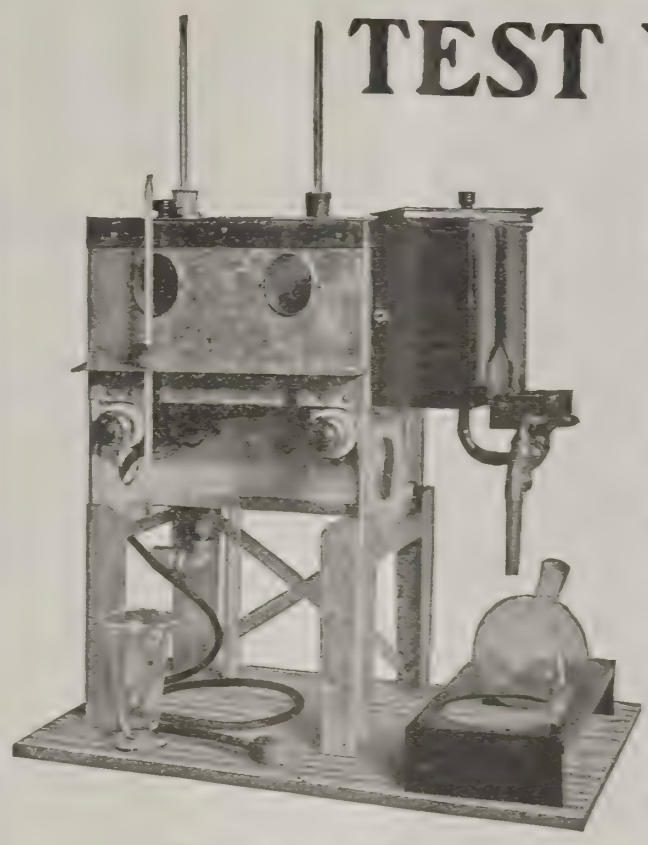
The following visitors were registered on the Commercial Exchange during the week: Ernst Nattkemper, formerly manager for the New York office of the American Hominy Company but now in charge of the home office in Indianapolis, Ind.; W. R. Nelson, sales manager for the Kansas City Hay Co., Kansas City, Mo.; W. J. Close, grain shipper, Schenectady, N. Y.; R. J. Graw, grain dealer, Chicago; Geo. W. Clapp, flour and grain dealer, Jacksonville, Fla.; C. W. Hartman, grain dealer, New Castle, Pa.; C. L. Riegel, flour and feed dealer, Durham, Pa.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 240 cars. Stocks at the end of the week were as follows: Flour, [illegible] barrels, a decrease of 3,400; wheat, [illegible] bus., increase of 1,500; oats, [illegible] bus., decrease of [illegible]; corn, [illegible] bus., decrease of [illegible].

The demand for corn meal continues extremely dull, with prices easier. Southern mills, with capacity of [illegible] bus., output last week of [illegible] bus., or [illegible] per cent of capacity, which compared with [illegible] bus. and 12.3 per cent of capacity for the preceding week. Quaker Belle meal, sacked, per 100 lbs., Ohio River points, $4.80; plain meal.



Announcement is made that J. H. Wilkes & Co., one of the large milling and grain firms of Nashville, will make an extensive addition to their plant. When the addition is completed the present large facilities of the company for storage and distribution will be doubled. The company is a large manufacturer of ground feeds and does business in the southeast has been increasing rapidly the past few years.

Offerings are well supplied with wheat, and receipts are not so large, with prices practically the same. Corn continued to show strength last week, with moderate supply and little demand. Oats were in fair demand. Shortage of cars continues to curtail receipts of white oats from Illinois. Receipts of red oats from the Southwest are liberal. Quotations: Wheat—No. 2 red, $2.25 @2.30. Corn—No. 2 white, $1.95@2; No. 3 white, $1.93@1.95; No. 3 mixed, $1.90@1.93. Demand for trade in the southeast is routine. There is a good volume of small orders, but few big car lots and less. Prices are a little easier, being as follows: Best soft wheat patents, 98 lbs. cotton, f. o. b. river points, $11@11.40; standard patents, 10.15@10.45; half patents, $9.65@10. Eastern mills with capacity of 264,100 barrels reported output last week of 164,704 barrels, or 79.8 per cent of capacity, which compared with 185,310 bbls. and 79.8 per cent of capacity the preceding week and 87 per cent the same week in 1918.

WESTERN CANADA.

A. Caldwell, Correspondent.

The Canadian wheat board is in session at Toronto this week and will not return to the West until the end of the month.

An early warning of the threshing season proves a most potent factor for fall plowing and consequently this work has already been done by farmers who had the good fortune to get through early.

The revised tariff of rail and water charges has been announced by the board of grain commissioners. It allows an increase on elevator charges of 1½c per bushel and cleaning charges are advanced from 1c to 1½c per bushel.

Farmers will be slow to market feed grains under present conditions. They are just as hard hit as the rest of the community by the present high prices on necessities and fail to appreciate being made to bear the brunt of reductions while the middleman's profits continue to be extortionate.

The weather during the week has been very favorable to threshing and returns are rapidly mounting up. On Saturday receipts of wheat were 441 cars and on Monday well over a thousand. Receipts of oats are moderate, while very little new flax is coming on the market. During the week the market has had to contend with very intense antagonism against commodity prices and consequent action on the part of those in charge of food control to bring about a decline, but during the period oats have stood the onslaught remarkably well and decline for the week in cash oats was only 2c, while lards had a decline of 5½c and flax 11c. The decline in flax is the outstanding feature in the market, with receipts of 1,000,000 bushels to dispose of all at a week yesterday without there being an offer made for it on the Winnipeg exchange for the reason that there was very little for sale. Now that there is prospect of new flax the same prices follow down as every one expected it would.

ST. LOUIS.

E. E. Reeves, Correspondent.

Michael J. Fremont, of the C. H. Adams Commission Co., has filed an application for membership in the Merchants' Exchange.

M. C. Peters, of M. C. Peters & Co., of Omaha, was a visitor on the Merchants' Exchange. He was introduced by W. B. Swyzard.

John Wellinghoff, who for the past two years was in the cash grain office for the Kehlor Flour Mills Co., will remain in Illinois for his company this season.

The Smith Construction Co., of Decatur, Ill., will construct a cylindrical concrete grain elevator for the Goldcrest Farmers Elevator Company, at Gilman, Ill. It will have a capacity of 14,000 bus. of wheat.

Bert H. Lang, second vice president of the U. S. Grain Corporation, advised the members of the Merchants Exchange that he has recommended to the Grain Control Committee the immediate lifting of the wheat embargo.

Reports to local brokers that a light frost occurred at Lawrence, Mo., on Sept. 2, caused considerable uneasiness in regard to the late corn crop, as while no damage was done it is feared that this is the precursor of early killing frosts.

Millard H. Ely, son of Asst. P. M. G. of the St. Louis district, who was severely injured in the Missouri Pacific wreck about two months ago, and his father, who was summoned to his bedside, were visitors on the Merchants' Exchange last week.

John Mullally and Morris J. Mullally, Jr., of the Mullally Hay and Grain Co., are applicants for membership in the Merchants Exchange. They come from a family who are extensively in the hay and grain trade, and no doubt will uphold the reputation of the family.

Ben Koontz, who recently returned from service, has resumed his former position in the grain office as assistant operator to Arthur Millmeyer, the official market reporter for the Exchange. He says that his experience abroad has prejudiced him more than ever in favor of American girls.

All but one of the Corn Products Refining Company's plants are running at capacity. Shipping conditions at the big Granite City, Ill., factory prevented it from doing so, however, but embargoes and negotiations are under way with the men who struck at the Pekin, Ill., plant to have them accept the same terms.

According to advices received by local grain men from various parts of the state, a large percentage of the wheat crop remains unthreshed on account of the scare-

ity of threshers. The wheat in the shock is of unusually good quality, as there has not been enough rain to cause any damage. In some parts of the state the heavy straw has delayed the threshing to some extent.

Henry Steinmesch, president of the Steinmesch Feed & Poultry Supply Co., of No. 10 N. Fourth st., for many years prominent in the feed and poultry supply business, died Thursday afternoon at St. Johns Hospital, from the effects of an operation for tumor of the kidneys. He was 69 years old, and was born in St. Louis. He was employed many years ago by the Plant Seed Co., and from 1876 to 1881 was in the seed business for himself. Mr. Steinmesch was superintendent of the Poultry Department of the World's Fair at St. Louis, and was one of the most noted poultry judges in the country. He is survived by a wife, two sons, and a daughter. Harry J. Steinmesch is secretary of his father's company, and the other son, Jesse H. Steinmesch, lives at Desloge, Mo. The funeral was held Sunday.

The special election for the members of the Merchants' Exchange to vote upon a proposition to amend paragraph 5 of section one, and sections 2, 15 and 16 of rule 13, which was to have been held Monday, Sept. 8, has been postponed to Monday, Sept. 15. The amendments relate to the transfer and redemption of membership certificates, and to the admission of minors, and the postponement was made in order to make the regulations more drastic against the speculation in membership certificates.

The decision of Director General of Railroads Hines to establish class and commodity rates from the Middle West to South Atlantic and Gulf Ports, on export traffic, which will be substantially the same as the rate to New York on domestic freight, will prove a big thing for St. Louis, and the other markets in the Mississippi Valley. They will equalize the charges so that the Southern ports can compete on equal terms with the Atlantic cities for the commerce of Central and South America.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

At Somerset, Ky., Peter Barlow has plans for erection of a twenty-five barrel flour mill in Nancy, western Pulaski county, near Somerset.

Louisville millers and grain dealers claim that the car shortage is becoming so serious that they are loading every car to capacity, and at that are having trouble in handling shipments.

The Democratic convention in Louisville during the week had as one of its platform planks the creation of a State Department of Labor, to aid in handling labor troubles. It also endorsed the action of the General Assembly last session in ratifying the Federal prohibition amendment.

Grain prices continued their downward trend during the week, with local handlers anxious to unload high corn, and not buying very actively. However, stocks on hand in this market are comparatively light. No. 3 grades of corn are quoted at $1.95 per bushel, car lots, selling, Louisville. No. 2 white oats are quoted at 80c a bushel; No. 3, 79c; No. 2 mixed, 78c, and No. 2 rye at $1.65@1.70. The grain market is so unsteady that dealers are playing a safe game all around.

Al. Edinger, of Edinger & Sons, has been on a vacation to Lake Wawassee, northern Indiana, leaving that point for Chicago during the week. He is expected back in Louisville within a few days. Mr. Edinger is one of a number of Louisville men who have brought proceedings against the McCombs Producing & Refining Co., Louisville, alleging that officers and directors of that company are holding a lot of treasury stock which was unlawfully voted to them without value being received by the company, resulting in the earnings being low, due to watered stock.

"Uncle John" Shell, of Leslie county, Ky., who claims to have celebrated his 131st birthday at the Bluegress fair on September 3, Lexington, Ky., claims that his father established the first flour mill in Kentucky in the early Indian days. Shell claims that he lived with his first wife for ninety years, and was a grown man when the War of 1812 was fought. He was married a second time six years ago to a young woman and has a son who is five years old. His oldest son is ninety years old. Such information is being generally carried by the Kentucky press and is not vouched for by the Price Current reporter.

Matt Cohen, Department of Agriculture, Kentucky, who is slated to become next Secretary of State, Democratic ticket, has issued a new crop report in which he estimates a crop of 77,000,000 bushels of corn, which is more favorable than earlier reports. Yields are estimated to average 23 bushels to the acre, on runs of 16 to 32 bushels. Cowpeas are given at 76 per cent acreage, and 79 per cent condition. Soy beans, 84 and 81 per cent. Buckwheat is reported fifty per cent short, July seeding being better than August. Alfalfa condition is given at 74 per cent, with third cutting average one ton to the acre. Pasturages are reported to be badly burned in some sections, and rain is badly needed.

Feed prices are still being maintained here, due to very light offerings, principally by resellers.

No local demand for rye and offerings only a few cars. No. 2 was quoted at the close at $1.40 on track, through billed.

Millers wanted wheat and took all the offerings, which were light, the receipts nearly all going direct to the mills. No. 2 red sold at $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $1.16 on track, through billed.

There was a big rush of oats and sellers were forced to take a decline of about 4c from last week's prices before a cleaning up could be made. All kinds of buyers were in the market, considering the price cheap enough, and at the close of the week there was a reaction of about 3c and offerings light. Closing: No. 1 white, 76¾c; No. 2 white, 76¼c; No. 3 white, 75¼c; No. 4 white, 74¼c, on track, through billed.

The expected decline in corn came early in the week, when there was a drop of 7c, followed later by 15c more, and very little trading at that. Buyers took only what they urgently needed and look for lower prices. No. 1 or No. 2 yellow sold at the close at $1.80; No. 1 mixed, $1.75, and No. 2 mixed at $1.75 on track, through billed. Sellers hung on at the close in the hopes of getting the above prices, but there were no bids. Receipts were quite liberal this week, compared with some time past.

Inspection track receipts for the week: Wheat—No. 1 red, 2 cars; No. 2 red, 8 cars; No. 3 red, 10 cars; No. 4 red, 19 cars; No. 5 red, 7 cars; sample, 1 car; No. 2 hard, 33 cars; No. 3 hard, 31 cars; No. 4 hard, 21 cars; No. 2 dark hard, 10 cars; No. 3 dark hard, 7 cars; No. 4 dark hard, 8 cars; No. 1 mixed, 4 cars; No. 2 mixed, 4 cars; No. 3 mixed, 1 car; No. 4 mixed, 2 cars; No. 5 mixed, 3 cars; No. 1 dark northern, 6 cars; No. 2 dark northern, 12 cars; No. 3 dark northern, 22 cars; No. 4 dark northern, 8 cars; No. 1 northern, 3 cars; No. 2 northern, 2 cars; No. 3 northern, 9 cars; No. 4 northern, 3 cars; sample, 2 cars; No. 1 dark Montana, 6 cars; No. 3 dark Montana, 13 cars; No. 4 dark Montana, 1 car; sample, 1 car; No. 2 soft white, 1 car. Corn—No. 1 yellow, 42 cars; No. 2 yellow, 30 cars; No. 3 yellow, 1 car; No. 5 yellow, 1 car; No. 1 mixed, 3 cars; No. 2 mixed, 2 cars; No. 3 mixed, 2 cars; No. 4 mixed, 1 car; No. 1 white, 4 cars; No. 2 white, 9 cars; No. 3 white, 1 car. Oats—No. 1 white, 44 cars; No. 2 white, 217 cars; No. 3 white, 71 cars; No. 4 white, 4 cars.

MILWAUKEE.

Erich E. Meyer, Correspondent.

J. M. Jenks, of Chicago, who died Aug. 29, was a member of the Milwaukee Chamber of Commerce since 1915.

The U. S. Grain Corporation will bring 2,000,000 bushels of wheat from Kansas City to Milwaukee, to go east via lake.

Milwaukee grain shipments for the past week were 388,825 bu. oats, 171,800 bu. corn, 52,350 bu. barley, 8,090 bu. wheat, 1,350 bu. rye; total, 622,415 bu., against 1,001,084 bu. the preceding week and 1,269,939 bu. a year ago.

Receipts of grain at Milwaukee for the past week were 255 cars barley, 428 cars corn, 454 cars oats, 398 cars wheat, 59 cars rye, 5 cars flax; total, 1,549 cars, against 1,385 cars the week before, 941 cars a year ago and 746 cars in 1917.

BURLAP BAGS

MEMPHIS, TENN.

B. F. Schwartz & Co.
RECEIVERS AND EXPORTERS
WHEAT - CORN - OATS - BARLEY
CONSIGNMENTS AND C.I.F. OFFERS SOLICITED
PRODUCE EXCHANGE NEW YORK

Wheat and rye flour production of the Milwaukee mills for the past week was 16,500 barrels, of which 11,500 barrels were wheat flour and 5,000 barrels rye flour, representing approximately 64% of mills' total capacity. Last week the production was 13,900 and 13,000 a year ago.

Geo. A. Schroeder, Albert R. Taylor and A. R. Templeton, members of the Milwaukee Chamber of Commerce, appeared before the Interstate Commerce Commission at Washington, D. C., Monday, Sept. 8, at a hearing on the general revision of rates on grain and grain products in northwestern territory.

Milwaukee flour stocks on Sept. 1, 1919, were 28,362 barrels, as compared with Aug. 1, 1919, 35,437; Sept. 1, 1918, 22,275; Sept. 1, 1917, 9,105; Sept. 1, 1916, 78,860; Sept. 1, 1915, 30,190; Sept. 1, 1914, 59,650; Sept. 1, 1913, 38,984; Sept. 1, 1912, 107,029; Sept. 1, 1911, 65,100; Sept. 1, 1910, 66,546; Sept. 1, 1909, 50,950; Sept. 1, 1908, 92,550.

In the Milwaukee cash grain market values generally were further depressed during the past week, due to the activities of the Government in reducing the high cost of living and the decline in foreign exchange. Corn suffered the most, declining 15@20c for this period, rye 7@10c, wheat 5@7c, oats 1@2c, while barley ruled easy, excepting for heavy malting, which is scarce and 5c higher. The movement and demand is fair. The closing was stronger with fair rallies from declines noted.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: H. C. Harrison, Buffalo; S. Knighton, New York, N. Y.; L. L. Gaultner, Kaukauna, Wis.; E. E. Strouts, Minneapolis, Minn.; Geo. G. Briggs, Conrad, Mont.; J. S. Price, Rio; O. H. Timme, Plymouth, Wis.; M. E. Grant, Minneapolis, Minn.; W. J. Breen, Grand Rapids, Mich.; H. Syverson, Tomah; J. R. Leadley, Pewaukee; M. J. Gosee, Palmyra, Wis.; H. S. Jewell, Buffalo; F. Feelyater, Columbus, Wis.; D. G. Jones, Randolph; C. Schaefer, Green Bay, Wis.; Jas. Riley, Chicago, Ill.

NEW YORK.

J. M. Nugent, Correspondent.

Visitors on the New York Produce Exchange: Mr. J. Stewart, Winnipeg; W. A. Coates, Montreal; Alex. Moore, Chicago; S. P. Chapin, Chicago; T. G. Crowell, Kansas; W. A. Campbell, Boston.

The campaign against the high cost of living and the big break in the coarse grain markets caused a noticeable hesitation among fewer buyers during the past week, and in consequence the volume of business was small. Prices, however, remained steady in most cases and in some cases mills actually were asking more money.

Grain Traders
have learned by experience that it pays to follow our service.
Hundreds of Grain Traders profited last week on opportunities afforded by our advices.
If interested in Corn and Oats write for Circular K.
Wall Street Statistical Service
(INCORPORATED)

The firmness in cash wheat had a tend to restore confidence to some extent, it was only natural that the trade sh hesitate about loading up with flour u existing circumstances and with so r disturbing factors in the whole comme situation. There were some lower p named by some of the mills but this g ally referred to flours of poorer qu while the best flours held firm.

Cash Grain Prices.

Corn—No. 1 yellow, $1.84½; No. 2 ye $1.84; No. 2 white, $1.85½; No. 3 w $1.85; No. 2 mixed, $1.83½; No. 3 m $1.83; all c. i. f. New York, domesti days' shipments.

Oats—No. 1 white, 83½c; No. 2 w 83c; No. 3 white, 82c; No. 4 white, 81c elevator.

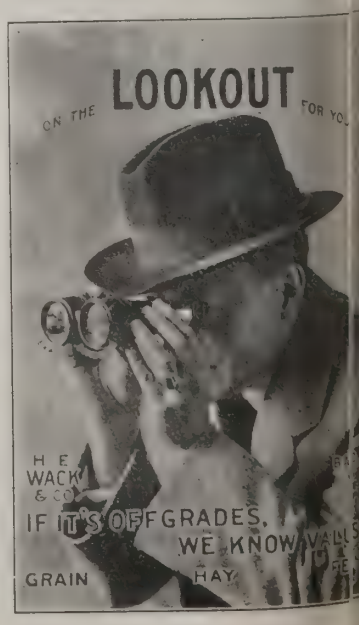
BALTIMORE.

Robert C. Neu, Correspondent.

Captain R. L. Piercey, of Melbo Australia, who was in active service there," was a visitor on the Balti Chamber of Commerce last week.

The receipts so far this season of water-borne wheat in the Baltimore ket are more than 100,000 bushels sho what they were up to this time last

In the first eight months of the cal year there have been exported thr the port of Baltimore 7,965,428 bus. of against 1,759,653 bus. in the correspo period of last year.



The "committee on hay and straw tations" of the Baltimore Chambe Commerce for the month of Septe consists of W. F. Macneal, Gustav H Jr., and Richard C. Wells.

The Grain Corporation last week no the Baltimore grain trade that, eff immediately, all applications for rai permits to move wheat must show Wheat Directors' License Number o shipper and also of the consignee or a cant.

Theo. Carstens, representing Tayl Bournique, grain merchants of Milw and other points, was introduced t members of the Baltimore Chamb Commerce last week by Mr. F. M. bull, Philadelphia and Baltimore ma of this house.

Hay Inspector C. B. Melcher, of Baltimore Chamber of Commerce, been appointed by President F. L. Y of the National Hay Association, member of the Grades Committee of organization. His colleagues on the mittee will be S. W. Kemp, of Spe ville, O.; G. W. Dafoe, of Sandusky G. Peters, of Kansas City, Mo., and Wright, of Weedsport, N. Y.

Already $130,000 of the $150,000 fund is being created to finance the g work of the Export and Import Boa

e of Baltimore has been raised, and it fidently expected to have the remain- hand within the next few days. This new organization formed for the pur- of encouraging, stimulating and ex- ng the flow of trade and commerce gh the port of Baltimore.

Insurance Rates.

ective from Sept. 2, 1919, insurance on grain in Locust Point and Port gton elevators, this city, were re- and are as follows:
ust Point, Elev. "B," $4.25 per $100.
ust Point, Elev. "C," $4 per $100.
t Covington, $0.25 per $100.
tificates dated Sept. 2 and thereafter e governed by the new rates.
e annual rate of insurance on grain in Canton Elevator No. 1 (Penna.) is $3.63. All grain stored in that tor and insured will be charged at a rate per $100 equal to one-thirtieth e monthly short rate of the annual and all elevator receipts covering so insured will be charged at the of .0242 cents per day per $100 on and Sept. 2.

DULUTH.

S. J. Schulte, Correspondent.

made the great bulk of the receipts e Duluth market during the last week, that grain was heavily traded in. arket was under pressure, there being wo or three intermittent rallies. Spot rye broke 5c to $1.38.

n D. Shanahan, formerly of the han Grain Co., with headquarters luth but latterly of New York, has ome time been away upon a trip gh the European countries that were ar with a view to reporting to the d States Grain Corporation upon and other grain supplies conditions. h friends received a card from him ly.

l M. White, of the White Grain Co., turned from a vacation, during which ade an inspection over Central Min- territory. He asserts that yields of and oats will fall far behind the esti- owing to the crops having been t by hot weather, in some cases only days away from the time that they have been ready for cutting. Wheat otherwise promised to grade up to the as shriveled up and runs lightweight.

ers on this market have been clamor- r wheat, especially Nos. 1, 2 and 3 rn and dark northern during the last ays. New wheat has so far been only ing in this way from the West and ills have been obliged to hold their tions down. As an illustration of how ade clamored for good milling wheat, y be mentioned that a car of No. 3 northern sold here early in the week 52, while four or five days before the t would have brought either here or nneapolis was $2.35. No. 1 northern t $2.58 on Saturday.

us H. Barnes, Federal wheat direc- pent last week on a visit to Duluth nection with his private affairs. In rsation with grain men here, he ex- d the opinion that supplies condi- in foodstuffs will adjust themselves e course. He pointed out that costs ing have already receded materially ne lines, and in that connection he attention to the recent break of 10 a pound in bacon. The new basis of nts on off-grade wheat, he consid- he fairest way to adjust a difficult ion, and he considered that it should out satisfactorily to both farmers illers.

ator men on this market already re- ifficulty being experienced in obtain- ain cars in good order. Railroad of- assert that their operations were n badly out of gear through the shop- strike. Large numbers of out-of- cars are on tracks at the terminals hat are only available at present for g the coarser lines of freight. As it y the general freight handling situ- is in a serious state on this market. t numbering 41 large freighters has tied up here for a month with coal s, that they have been unable to dis- owing to the coal dock men being ike. The shortage of lake vessels for rain trade at this market has not, er, yet become a factor as there is lightly more than 2,000,000 bushels of on hand to load out while the ca- of the elevators here is 35,000,000 s.

Flour sent to Cincinnati by the Trent Co., local representatives of a Minneapolis firm, was distributed here in an effort to reduce the high cost of living. The flour was sold at $2.82 per 48-lb. sacks or at a rate of $11.28 a barrel.

J. S. Bateman, who has an inmiate knowledge of all hay marketing conditions, reports an excellent trade, and that the business of his firm has been so enlarged, in the brief time of its establishment, as to embrace all the important buying and selling sections tributary to this market.

Ralph Gray, of Ralph Gray & Co., who has created a dependable hay shipping business by his annual tours to the South, left Saturday to be gone for 30 days. He will visit his old home at Newbern, N. C., before calling on his southern friends. The local business of the firm will be under the masterful guidance of Charles B. Hill.

E. B. Terrill, president of the Grain & Hay Exchange, has issued a call for a membership meeting of the exchange, to be held Thursday, Sept. 18, 1919, at 6 p. m. At the meeting a report, which has had the aproval of the board of directors, will be received from the committee on revision of the by-laws, which is composed of John H. Dorsel, chairman; H. Edw. Richter and F. F. Collins.

The records of the inspection department of the Grain & Hay Exchange of the number of cars inspected during the month of August, 1919, reflect a very flattering condition, as compared with the month of August a year ago, 1,496 cars of wheat were inspected during August, 1919, while 1,384 cars were inspected during the month of August, 1918, or an increase of 112 cars over the month of August a year ago. During the month of July, 1919, the department inspected 1,454 cars, and the succeeding month, compared with this record, indicates an increase of 42 cars over the month of July this year. Since the heavy movement of wheat this year 454 cars more have been handled than during the same period last year.

An embargo against shipments of hay to this market was threatened the past week, owing to the congestion of cars in the terminals, which accumulated receipts over the recent holidays had participated. Following a discussion of the situation with the local U. S. Railroad Administrator by exchange officials, it was, however, determined that no embargo was necessary, and that, instead, two pluggings at the yards with sales twice a day would be substituted in an effort to rid the market of the excessive offerings. This arrangement was satisfactory and gratifying of results, and on Friday more than 100 cars were absorbed by local and outside buyers in morning and afternoon sales without adversely affecting prices. At the close of the week less than 100 cars were reported as still in the terminal.

No business, in wideness of sphere of influence and pronounced development in Cincinnati is of more importance than the hay plugging market owned by the Cincinnati Grain & Hay Exchange. It is a steady, progressive combination of energy for enhanced power and prestige by local hay men who are keeping just a pace or so in advance of the times. Owing to the expansive growth, and inadequacy of the available space for plugging cars at the yards, it has become imperative to seek additional trackage, and at a meeting of the board of directors of the Grain & Hay Exchange the past week contracts were authorized with the L. & N. Railroad for extension of facilities of 37 cars, or to a capacity of 100 cars a day. The improvement includes widening of a roadway to be constructed of macadam, and with the extended trackage will cost the exchange about $3,500.

Industrial Traffic League.

The meeting of the National Industrial Traffic League at Pittsburgh, Pa., September 4th and 5th was largely attended by traffic men of the country. Important subjects were discussed at the business sessions which are of vital interest to the shipping public at large, and some in which the grain interests are particularly interested.

The grain trade of Cincinnati, represented by S. S. Reeves, traffic manager of the Grain & Hay Exchange, enlisted the support of the league members representing grain interests in a protest against the application of the clause known as the "Recourse Clause," as prescribed in the new form of bill of lading proposed by the Interstate Commerce Commission. The clause is not satisfactory to the grain trade handling consignments, and when shipments are sold f. o. b. destination, as the clause, when properly signed and executed in the bill of lading, the consignee must pay all freight and other charges, regardless of the time carriers present bills for undercharges, while the charges rightfully belong to the shipper.

The subject of the payment of loss and damage claims within a prescribed time as provided in the present uniform bill of lading, i. e., two years and one day, was discussed and the action taken by the league is of much interest to the grain trade, for the reason all members representing the various boards of trade and grain shippers and receivers have been made interventors in the suit filed by Jos. Decker & Sons, to be heard by the Interstate Commerce Com-

mission some time in the near future testing validity of the time limit in the bill of lading, and further on the grounds that legitimate loss and damage claims should be paid by the carriers regardless of the time limit in the bill of lading.

Cash Markets.

Wheat—Rail congestion, and consequent embargoed conditions in the East had a weakening influence on the local wheat situation early in the week, and prices, especially for the lower grades, eased off a trifle, but toward the close trading activity again developed under greatly enlarged milling orders, and previous losses were fully recovered. Receipts, including the accumulation over the holidays, were fairly large, and though mostly sent here on contract were quite liberal of consigned grain. Top grades of heavy weight were urgently sought at the close, the scarcity indicating higher prices. Low grades had the advantage of the new scale of guaranteed prices announced this week by the Grain Corporation. A feature of the market this week was the arrival of a car of No. 1 northern spring wheat, testing 59½ lbs. 1 per cent dockage, which sold at $2.30 per bushel. No. 1 red winter, track, $2.26@2.27; No. 2 red winter, track, $2.23@2.25; No. 3 red winter, track, $2.19@2.21; No. 4 red winter, track, $2.14½@2.16½; No. 5 red winter, track, $2.10@2.13; sample, as to quality, $2.05@2.15. Smutty wheat discounted from 2c to 4c per bushel, as to grade.

Corn—The downward trend of the local cash corn was unchecked the past week, and further declines of 18c, or over 30c for the past two weeks were recorded for all kinds. As is usual on a declining market, the demand was indifferent until the close of the week, when a change of sentiment developed with buying sufficiently active to fully sustain prices. Receipts were liberally increased during the interval of lowering quotations. No. 1 white, $1.71; No. 2 white, $1.70@1.71; No. 3 white, $1.69@1.70; No. 4 white, $1.66@1.67; No. 5 white, $1.65@1.66; No. 6 white, $1.64@1.65. No. 1 yellow, $1.71@1.72; No. 2 yellow, $1.70@1.71; No. 3 yellow, $1.68@1.70; No. 4 yellow, $1.66@1.67; No. 5 yellow, $1.65@1.66; No. 6 yellow, $1.64@1.65; No. 1 mixed, $1.69@1.70; No. 2 mixed, $1.69; No. 3 mixed, $1.67@1.69; No. 4 mixed, $1.65@1.66; No. 5 mixed, $1.64@1.65; No. 6 mixed, $1.63@1.64.

Oats—The oats market was weak in sympathy with declining corn prices until near the close of the week when a slight recovery of speculative strength again steadied the situation and prices advanced 1½c from the low point. Receipts were fairly increased, but offerings mostly of light weight. No. 2 white, 73½c; No. 3 white, 72½@73c; No. 4 white, 71½@72½c; No. 2 mixed, 72@72½c; No. 3 mixed, 71@72c; No. 4 mixed, 70@71c.

KANSAS CITY.

T. J. Tanner, Correspondent.

George S. Carkener, of Goffe & Carkener, is taking his vacation in California.

T. J. Brodnax, president of the Frisco Elevators Co., is back from a vacation of two months, spent mainly at Lake Miltona, Minnesota.

Owing to delay occasioned by labor troubles, the addition to the Norris Elevator, in the East bottoms, will not be completed before October 1. The new storage will be 1,000,000 bus., practically doubling the capacity of the house.

On charges of false statements in an application for a new license, the Kansas City zone agent of the United States Grain Corporation has ordered James M. Robinson, of Potter, Kan., to close his elevators at that place. Mr. Robinson's former license was revoked.

W. L. Richeson, head of the W. L. Richeson Co., New Orleans, was a visitor at the Kansas City Board of Trade on Wednesday. He said the port of New Orleans was less congested with grain than Galveston, but that enough wheat was en route to fill all storage unless ships became more plentiful. The tonnage outlook he regarded as unpromising.

The Kansas City Stock Exhange, organized three years ago, but dormant for the last 12 months, has decided to disband. At a meeting of members and officers Tuesday a committee consisting of John S. Knox, president; T. R. Shields, treasurer, and Kay H. Beach, secretary, was appointed to dissolve the association, convert the assets into cash and distribute the proceeds among the stockholders. At one time the exchange had 200 members. It had fine quarters in the Elmhurst building. Though the prospects of the exchange were brilliant, the organization found it impossible to develop centralized trading in securities. Lack of co-operation by local brokers is held responsible for the failure of the exchange. Some members still believe there is a good field in Kansas City for a stock exhange to stabilize dealings in local stocks and bonds as well as oil and mining stocks of the Southwest.

F. M. Corbin, of B. C. Christopher & Co., has returned from a trip to Southern California, during which he visited the Imperial Valley. Mr. Corbin is a kafir specialist. Therefore he investigated the growing crops of milo and kafir in the valley. "The yield this year is larger than in 1918," said Mr. Corbin. "The crop is very promising. However, the grain may not move immediately after harvest, as producers found it profitable to hold the 1918 production until after the bulk of the Kansas and southwestern grain had been sold." Donald Moffatt, of the Moffatt Grain Co., spent several days in Texas, returning this week. He went over much of the kafir and milo territory of the Panhadle region. "There is a big crop in Texas," said Mr. Moffatt. "It is in a belt running from the Panhandle southeastward. I think the estimate of 57,000,000 bushels recently made is conservative. The crop is being harvested and threshed. Shipping has begun, and there have been good sales for September delivery, mostly eastward. I heard that the Oklahoma crop would be about 30,000,000 bus. and that Kansas would have 30,000,000 or 35,000,000 bus."

Following the ordering by the grain control committee of an embargo against wheat shipments to Kansas City last Tuesday, to relieve the congestion of cars in the local

IN THE DISTRICT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF ILLINOIS EASTERN DIVISION

In the matter of STAR CEREAL & MILLING COMPANY A Corporation Bankrupt.	In Bankruptcy No. 27,944

Notice is hereby given that pursuant to an order of the United States District Court for the Northern District of Illinois, Eastern Division, the undersigned, Central Trust Company of Illinois, Receiver in Bankruptcy of Star Cereal & Milling Company, a corporation, offers for sale the property, real and personal, assets and effects of the said bankrupt.

The property to be sold consists of the following:

REAL ESTATE

The real estate situated at 410-420 N. Western Avenue, in the City of Chicago, County of Cook, State of Illinois, being a tract or parcel of land with a frontage of 126 feet on N. Western Avenue, with a depth of 126 feet.

BUILDING

The real estate is improved with a new four-story brick and stone, pressed brick front, mill-constructed manufacturing plant. In design the building is square shaped, with court in center, and covers a large portion of the land, with one private switch track adjoining the building, having a capacity of four cars. The building is equipped with modern steam plant, elevators, etc.

TANGIBLE PROPERTY

The personal property comprises a complete mill equipment for the manufacturing of flours, cereals, etc., also office furniture and fixtures, and electric motors, belting, shafting, pulleys, milling machines and apparatus, scales, and other equipment for the operation of a modern mill.

A detailed list of said property is obtainable by reference to the Receiver's inventory on file in said cause, and by application to the Receiver for a copy thereof. Real estate and Building is subject to a bond issue of $80,000.00. For details see the undersigned.

The above described property may be inspected at said premises from the second day of September, 1919, to September 15, 1919, between the hours of 9 A. M. and 5 P. M.

Bids for the above described property, assets and effects, as an entirety or in parcel, may be submitted to the undersigned Receiver at its office, Room 1818 Harris Trust Building, 111 West Monroe Street, City of Chicago, State of Illinois, on or before 9:30 o'clock in the forenoon of September 16, A.D., 1919, and which bids will be opened and reported to the Honorable Sidney C. Eastman, Referee in Bankruptcy, at his court room, 907 Monadnock Block, Chicago, Illinois, at 10 o'clock in the forenoon of the same day. Each bid must be accompanied by a certified check, or cash for at least twenty-five per cent (25%) of the amount of the bid. The Receiver reserves the right to reject any or all bids, in which event that said property will be sold at public auction or private sale, as said court may thereafter determine, upon such notice and advertisement as the court may require.

Knapp & Campbell,
Attorneys for Receiver.

yards and the accumulation of grain in the elevators, D. F. Piazzek, zone agent of the United States Grain Corporation, announced his intention to ship 2,000,000 bus. of wheat to Chicago and other centers for temporary storage. This amount was later increased to 5,000,000 bus. In the meantime the arrivals of wheat began to decrease, but stocks went on increasing until a total of 13,466,000 bus. was reached. It is expected that the grain will begin to move out during the coming week, after which the embargo will be lifted gradually. Congestion here is due primarily to the withdrawal of empty cars from the Missouri Pacific and 'Frisco roads for use in handling the northwestern wheat crop. This limited the outshipments. It is said, also, that many cars shipped eastward and northward with wheat were not returned promptly. The Gulf port outlet has proved disappointing, due to the lack of ships for export grain. More than half of the wheat in Kansas City elevators is owned by the grain corporation, which had not shipped a bushel until the present congestion developed.

Cash Grain Markets.

Wheat—Receipts for the week, 2,239 cars, against 3,684 a week ago and 1,978 a year ago. The chief event in the trade was the ordering of an embargo by the grain control committee on Tuesday to check the congestion and accumulation here until an outlet could be found. This was followed by an announcement that the United States Grain Corporation would move 5,000,000 bus. of its holdings to Chicago and other storage centers and ultimately to the Atlantic seaboard for export. This movement, however, has hardly started, as cars for outshipment are still lacking. Shipments to the Gulf ports are out of the question until more vessels arrive there. From the date of the embargo the only wheat received was grain started previously, and the number of cars dwindled to 149 on Saturday, as against 1,155 on Tuesday, following the holiday. Stocks increased 1,546,000 bus., to 13,466,000 bus., against 9,123,000 a year ago. The daily reduction of offerings stimulated buying by millers and shippers, who found a growing scarcity of the sorts they wanted. Early in the week a few cars of red wheat and low grade hard went to the Government on the guarantee price basis. Afterward the wheat was taken by other buyers, including elevator men. Prices of hard wheat stiffened as a result of competition and closed unchanged to 3c higher on the week, with No. 1 ranging from $2.19 to $2.26; No. 2, $2.17@2.26; No. 3, $2.13@2.23. Red wheat finished unchanged to 3c higher, with No. 1 at $2.18@2.18½; No. 2, $2.15@2.16; No. 3, $2.12@2.15.

Corn—Receipts, 41 cars, against 126 a week ago and 262 last year. The car situation and the fact of an embargo against wheat had the effect of cutting down the offerings. There was a very slow cash demand, in view of the bearish action of futures through most of the week and the talk about Texas new crop offerings. Prices declined 5@7c for the week, closing with No. 2 yellow at $1.76@1.78; No. 3, $1.74@$1.75; No. 2 white, $1.72; No. 3, $1.70@1.71; No. 2 mixed, $1.72; No. 3, $1.70@1.71. Shipments from elevators reduced the stocks 9,000 bus., to 33,000 bus., against 797,000 a year ago.

Oats—Receipts, 90 cars, against 155 a week ago and 667 in 1918. There was a fair demand for oats of good weight, especially white, but other kinds were weak and many cars went to store. White oats closed practically the same as a week previous, with No. 2 at 69@70c and No. 3 at 68½@70c. Mixed oats lost 3½@4c, ending with No. 2 at 63½@64c and No. 3 at 63½@64c. Red oats closed 3½@5c off, at 64@65c, for No. 2 and 64c for No. 3. Stocks increased 37,000 bus., to 1,072,000 bus., against 1,604,000 a year ago.

Kafir and Milo—Receipts, 5 cars, against 18 a week ago and nothing last year. Old crop offerings were very light and the car situation was against the movement of either old or new. Texas is said to have made large sales of new milo for the first half of September shipment, but not much to Kansas City. Buyers are holding off as much as possible in view of the large production in southwestern states, as well as in California. Frost possibilities are a factor in connection with the Kansas crop, but there is little anxiety elsewhere in this regard. Prices here declined 40@45c per cwt. At the close No. 2 white kafir was quoted at $3@3.05; No. 2, $2.95@3; No. 2 milo, $3@3.05; No. 3, $2.95@3. Dealers here think the new crop should sell down to $2, provided no disaster intervenes before the general harvest. Local stocks decreased 1,000 bus. during the week, to 5,000 bus., against 139,000 a year ago.

TAMPA, FLORIDA.

Leonard Selz, Correspondent.

R. W. Miller, president of Miller-Jackson Grain Co., is back at his desk again after a six weeks' vacation in the mountains of North Carolina. Mr. Miller's moustache—an institution among the Tampa grain and feed trade—was left somewhere among the balsam boughs of Buncombe County, N. C.

Florida corn is beginning to move freely and there is little demand for out-of-state corn. The Florida product shows considerable improvement in quality over last year's crop. No. 3 yellow corn is being quoted at $2.00 per bushel. Very little corn has been handled in this market during the past sixty days.

The Inter-Ocean Steamship Company of Tampa has been formed with capital stock of $500,000 by local people, and charter will be received by September 12th. Allocation of ships has been granted by the Government and it is hoped to start a cargo for foreign ports very shortly. Good solid business men are behind this company and its success is sure. The company will go in for foreign trade on an extensive scale.

No. 3 white oats quoted at 88c, sacked, 100 lbs., delivered Tampa. Receipts very light, totaling approximately 10,000 bushels during the past week. Demand continues fair from country points, but our dealers are buying lightly and timing deliveries closely with floor stocks which are lighter than for some time past. Considerable Texas oats reached this market but not meeting with entire approval of t in this territory on account of consider stain and heavy beard, though the were bought, shipped and inspected as 3 clips. However, the Texas oats rece here weighed around 35 lbs. to the bu and have excellent feeding quality.

"Frenzied Agitation and Cool After thought."

Under continual breaks in the corn oats market, and sharp declines in p tically every food product with the ex tion of wheat and wheat products. dealers have bought but little during past week, except for instant shipment then only to meet actual needs. Stock warehouses here are not in excess of tual needs, notwithstanding activitie Government agents to show otherwise sulting in several cases of libels to be against some of our trade. Just what stitutes "hoarding" is not known here, it is true that our jobbers' stocks are mal in view of the large territory to be from this market, and it will be pr that Tampa dealers are not, and have been, profiteering or hoarding in any A great deal of unsavory comment has made in publications throughout the c try—even motion picture news age have flashed the great news on scr throughout the country showing how Government was working against wholesale dealer "profiteer" in Tampa. under present conditions the people prone to believe and then exaggerate case of this nature. The Tampa da came forth in rare condemnation of ou cal wholesalers and are just now be ning to realize that "our local wholes were not profiteering after all," and done the unsavory publicity hastily g in their columns. Jacksonville dea with much larger stocks than those in Tampa, escape all published notor while it appears that Tampa is made scapegoat of snap-shot investigation is puzzling, to say the least, why the T pa dealers were singled out. Is it pos that the Government investigator in T pa was not a little bit too quick on trigger?—Leonard Selz.

MINNEAPOLIS.

iels, oats 840,000 bushels. No barley eries reported.

ie mill and elevators belonging to the man Milling Co., Bozeman, Mont., been sold to the Montana Flour Mills Great Falls, Mont.

ie United States Grain Corporation ht 80 cars of wheat in the Minneap- market on Tuesday and since then taken smaller quantities.

bert S. Hopwood and Frank L. Bur- have formed a company to carry on a lar stock and grain brokerage busi- The new firm will be known as Hop- l & Burnett.

ere is general complaint regarding the uniform disposition rule of the Min- olis Chamber of Commerce Associa- and commission house managers ex- trouble when receipts grow heavier.

E. Wilson, a recent Yale graduate, is associated with the Cargill Elevator He has a brother with the Hunter, nson Milling & Grain Co., a member ie Merchants Exchange of St. Louis.

L. Bisbee, of the Midland Linseed ucts Co., expects to leave this week an extended European trip. The firm a large business direct with foreign rs and all continental markets will be ed by Mr. Bisbee.

e Scroggins Grain Co. is the new cor- te name of a firm succeeding to the ness of the Scroggins-McLean Co. e is no change in the personnel of the pany, as Mr. McLean has not been ified or with the company since Aug. 18.

e following requests for transfer of berships in the Minneapolis Chamber of merce Association have been posted: n L. A. Howard to Robert B. Kinney; . McCord to Clarence M. Hales; David gaard to Eugene Askegaard; George ane to Arthur J. Lahiff; H. P. Watson William B. Ireys; Frank S. Butler to h W. Scroggins.

sh Wheat—At the beginning of last the wheat market was under pres- of heavy offerings and declined to low marks, but the setting of prices ow grade wheat by the government the purchase of considerable of it by United States Grain Corporation ed the tide and higher prices have pre- d since. Some of the local elevator panies have been selling wheat also before the week was half over the mil- began to show increased interest in offerings. Receipts are running fairly y and although some sections are tied by the car shortage, a continued ement of good proportions is looked for. of the commission houses say their ing notices have fallen off, while oth- ay they notice no difference.

e average quality of wheat is better the millers expected it would be, of the North Dakota dark wheat ing good milling quality. There is a demand for dark wheat.

e demand for durum wheat is good a large quantity of it has been taken shipment lately. The government is ig very little of it.

nter wheat was in dull demand for al days on account of the glut of g wheat, but as the week closed the accumulation was pretty well cleaned up. Lower grade wheat of the yellow variety is slow to move, but there is a good demand for dark offerings.

Corn—Weakness in all markets influenced prices here and the demand for offerings was poor most of the week. Receipts were heavier than local interests cared to look after and as other markets were out of line the shipping demand was poor. New northwestern corn is expected on the market this month.

Oats—Compared with September future prices for cash oats are stronger and there is a good demand for the offerings of the heavier type, either old or new. Elevator companies are the chief buyers. Thin oats are in fair to good demand. Buyers are basing their purchases more on the December future than the September. Offerings on spot and to arrive are light. No. 3 white sell at September price to 3c over, No. 4 white at 1@4c less.

Rye—The market for cash rye was good and prices were stronger compared with the futures. There was a good milling demand but the elevators took care of the bulk of the daily receipts. Millers paid ½c premium for the choice rye. Offerings very light. Elevator stocks show a further increase.

CHICAGO.

Three memberships have sold recently at $9,300 net to the buyer.

New Texas corn is now arriving here and is reported hot and full of weevils.

Rumors are around to the effect that about Feb. 1, 1920, there will be an open market in wheat.

Arthur Cutten is back from a Canadian trip. He has not been operating heavily for some time and does not contemplate doing so

"Win" Day, Simons, Day & Co., can't see the bearish side of oats, based on broad advices to his firm. Simons, Day & Co., that threshing returns are disappointing. He figures them on the pound to bushel basis, arriving at an approximate figure showing a crop this year of only 60 per cent of last year's.

To enable a large part of the grain crop to be moved to Buffalo via lake the Grain Corporation has arranged for a big shipping program which includes 10,000,000 bus. of wheat to be distributed between Chicago and Milwaukee. Much of this grain will be forwarded from other terminal markets which are badly congested.

Congestion is reported on many of the leading roads due to scarcity of cars. The Railroad Administration calls attention to the fact that cars are not being loaded as heavily as last year and estimates that had the cars been loaded as heavily as formerly there would have been a saving of 160,000 cars during the past seven months.

Mandel Meyer, secretary of the Star Cereal & Mlg. Co., has filed a petition in bankruptcy with the United States District court so that banks and others victimized by Herman Blumson, president of the company when he absconded to parts unknown, may recover some of their losses. Liabilities are listed at $364,025.91 with assets of $225,116.60.

Geo. W. Beman, until recently manager of the provision department of Simons, Day & Co., is now in business for himself at 739 Postal Telegraph Bldg. He will handle the full line of packing house products—all kinds of provisions, and with long experience in the meat packing and brokerage business should have no difficulty establishing excellent connections.

Norman W. Bartlett, son of the late William H. Bartlett, when he found that his days were numbered, took a special train to this city from the ranch at Vermejo, N. M., last week, desiring to spend his last days in this city, but death overtook the train and awaiting physicians were found to be unnecessary. The funeral was held Monday at Rosehill, marking the passing of a prince of fellows in forties who in his intercollegiate graduated with high honors from Although a member of the Board of T he had never been particularly active

A shortage of cars has compelled closing down of the Lysle Mlg. Co Leavenworth, Kans., temporarily.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	13,506,000	28,426,000
Milwaukee	1,438,000	6,508,000
Minneapolis	3,057,000	4,673,000
Duluth	243,000	37,000
St. Louis	2,832,000	4,123,000
Toledo	618,000	2,780,000
Detroit	209,000	859,000
Kansas City	1,273,000	4,011,000
Peoria	947,000	2,029,000
Omaha	1,250,000	3,146,000
Indianapolis	1,937,000	2,969,000
Total	30,310,000	59,561,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7. 1918.
Chicago	2,327,000	2,879,000	4,219,000
Milwaukee	1,004,000	1,253,000	959,000
Minneapolis	629,000	897,000	1,507,000
Duluth	12,000	29,000	4,600
St. Louis	650,000	634,000	518,000
Toledo	145,000	136,000	327,000
Detroit	37,000	39,000	88,000
Kansas City	155,000	313,000	1,048,000
Peoria	149,000	150,000	160,000
Omaha	294,000	252,000	708,000
Indianapolis	355,000	417,000	367,000
Total	5,757,000	6,999,000	9,935,000
Shipments	3,655,000	3,770,000	6,444,000

A Government survey of the exact location of the Take All wheat pest of Madison County, Ill., will be made by the Bureau of Plant Industry.

GALVESTON CONGESTED.

The Galveston outlet of wheat from Texas and the Southwest seems to be badly congested. Some of the grain dealers think that the elevators still have room enough to handle at least a million bushels more of wheat, but Galveston authorities stated that the elevators were filled with export wheat and that it is impossible to move it out for want of vessels. Moreover, the embargo made effective by the Southern Export Committee on Aug. 18 does not permit movement to Galveston for wheat which was not loaded or in process of loading at the time the embargo was placed. Sec'y Dorsey of the Texas Association has been endeavoring to get the embargo relieved.

Rye vs. Wheat Values.

Rye is today about 30c per bu. under the high price on this crop and about 20c per bu. under the price paid by the Grain Corporation for the bulk of the last crop. The recent liquidation has been mainly in sympathy with lower prices for coarse grains, none of which are "bread" grains. As a "bread" grain rye ordinarily sells about 30c under wheat. The discount under Government basis for wheat is now 84c. Yet the main export demand for rye is for bread purposes. If our wheat prices are world values, rye is too cheap.—*Blodgett-Holmes Co., Janesville, Wis.*

It is reported from Montgomery, Ala., that the State Department of Agriculture and Immigration has received communication from Immigration Office in Duisburg, Germany, seeking to learn whether German labor is wanted in Alabama.

Visible Supply of Oats.

Official statement of the visible sup of oats weekly, compared with sa weeks of previous three years:

elevator is being installed and other small repairs are being made.

Pleasanton, Kans.—The new elevator of the Cummins Grain Co. is now in order and ready for the receiving of grain. B. E. Bradley is manager.

Lyndon, Kans.—On account of the sale of the Corner Feed Store Bldg., Anstaett Bros. have moved their feed and grain business to the Lyndon Elevator.

Protection, Kans.—The Arkansas City Milling Co. has plans in progress for the construction of an elevator to cost $20,000. The Burrell Engineering Co., 604 Security Bldg., Kansas City, Mo., are the engineers and contractors.

Wichita, Kans.—C. W. Winslow of Kansas City has received the appointment as assistant inspector in the Kansas State Grain Inspection Department with headquarters in Wichita. He succeeds A. A. Dunwire, who recently resigned.

MICHIGAN.

West Branch, Mich. — The Ogemaw County Grange has purchased the site for a co-operative elevator in this city.

Freeland, Mich.—Fire destroyed the grain elevator of the People's Grain Co. at Freeland, entailing a loss estimated at between $60,000 and $65,000.

Lansing, Mich.—The Madison Milling Co. has been incorporated to deal in flour and other grains; capital $25,000. C. R. Madison is among the incorporators.

Pinconning, Mich.—The East Michigan Bean & Grain Co. has been organized with an authorized capital of $40,000, of which amount $30,000 has been subscribed.

Grass Lake, Mich.—The Grass Lake Farmers Elevator Co. has been incorporated for $40,000 and will conduct a grain elevator recently purchased in Jackson county.

Coopersville, Mich.—The Coopersville Co-operative Elevator Co. has been incorporated with a capital of $20,000. Geo. Wallis is president; Frank I. Stephens, vice-president; Everett Collar, secretary; Warren Jasper, treasurer.

Hudson, Mich.—Kefuss Bros. have sold their milling business, known as the Hudson Milling Co., to a stock company recently incorporated with a capital of $60,000. Among the stockholders are James L. Mahoney, S. B. Gaskill and others.

MINNESOTA.

Henning, Minn.—E. P. Tschabold has purchased the John Whiting elevator and residence.

Wadena, Minn.—Work has begun on the new farmers' flour mill. Foundation is about completed.

Litchfield, Minn.—The Equity Society purchased the Monarch elevator. G. S. Skeim will be in charge.

Clarkfield, Minn.—The Clarkfield Roller Mill was destroyed by fire about a week ago. Property was insured.

Moose Lake, Minn.—John Florin is soon to build a flour mill at Moose Lake. It will have a capacity of 75 bbls.

Blakeley, Minn.—The elevator at this place has been practically rebuilt during the summer and is now ready to receive grain.

Oslo, Minn.—The Oslo Grain & Fuel Co. has acquired the local interest of the Atlantic Elevator Co. and will continue to operate same.

Detroit, Minn.—The Detroit Grain & Fuel Co., owned by C. Steinkop, on the Soo Line, has been bought by C. L. Hollpeter of Wooster, Ohio.

Elysian, Minn.—Geo. T. Murray has received plans and specifications for a new elevator, 24x40, 18 ft. basement, three stories, modern equipment.

Winsted, Minn.—The flour mill at this place has been purchased by J. A. Thompson of Minneapolis and is being repaired and new machinery installed.

Little Falls, Minn.—The offices of the Northwestern Milling Co. are being moved to Minneapolis, Minn. Headquarters will be at 206 Corn Exchange, where Mr. Stephenson will be in charge.

Spooner, Minn.—The Collins Flour Mill was burned to the ground by fire of unknown origin. Loss, $20,000; insurance, $16,000. J. W. Collins, owner, plans to rebuild as soon as matters can be arranged.

Argyle, Minn. — The Argyle Farmers Grain Co. has been organized and has purchased the National elevator. L. B. Riopelle is president; Joseph Vexiena, secretary. Mr. Barsaloux will be in charge of the elevator.

Bricelyn, Minn.—The Bricelyn Farmers Elevator Co. has been incorporated with a capital stock of $25,000 to operate elevators and deal in grain, fuel, lumber, etc. Incorporators: H. E. Gullord, John K. Melan, R. J. Havnen and A. E. Larson.

Minneapolis, Minn.—The Anamoose Grain Co. has been incorporated with a capital stock of $50,000 to operate grain elevators and warehouses and deal in grains and cereals, etc. R. P. Woodworth, 1808 Depond Ave., Minneapolis, is among the incorporators.

MISSOURI.

Jamesport, Mo.—The mill and grain elevator of Homer Musselman was entirely destroyed by fire recently.

Chesterfield, Mo.—The Farmers Elevator & Supply Co. will install a Boss Air Blast car loader, manufactured by the Maroa Mfg. Co. of Maroa, Ill.

Bethany, Mo.—The elevator at Bethany burst recently and scattered about 1,000 bushels of grain on the ground. Insurance was carried on the grain.

Kansas City, Mo.—Plans are under way for the construction of a large flour mill with a daily capacity of 2,000 bbls. by Geo. W. Hoyland Flour Co.

Rich Hill, Mo.—The Mead Grain Co. and Moss & Weing have incorporated and will enlarge their extensive business by building a flour mill at Nevada.

Foster, Mo.—Frank Hennon is the new manager of the Farmers Elevator of Foster. The elevator was recently purchased from Barr & Weller by the Farmers company.

Wellsville, Mo.—The Wellsville Milling Co. has been reorganized and now has the following directors: Edw. Knipfel, Edw. Shocklee, John Whitehead, J. L. Bell, E. E. Marlow and others. Capital stock is $50,000.

St. Joseph, Mo.—The Logan Grain Co., with offices in the Corby-Forsee Bldg., has been organized by Milton Logan. The company will do a brokerage business. Mr. Logan will have the active management of the concern.

Columbia, Mo.—A grain testing laboratory, which duplicates in all essential detail the federal grain supervision laboratories in Kansas City and St. Louis, has been installed in the University of Missouri College of Agriculture.

St. Louis, Mo.—Fire, believed to have been extinguished, sprang up again and destroyed the building occupied by the Geo. A. Gerling Milling Co., 412 N. Main St., with a total damage of approximately $13,000. Damage to contents is estimated at $8,000. The building was used as a spice and herb grinding mill.

Kansas City, Mo.—The Terminal Elevators, one of the largest grain handling organizations on the Kansas City market, has added a cash grain consignment department with Robt. Y. Smith as manager. Mr. Smith has held a similar position w the Eugene Cox Grain Co. Paul Uhlma is manager of the Terminal Elevators.

Ashland, Mo.—V. C. Elmore advises t practically no cars are available for houses full of wheat—30% of the wheat still to come, a conservative estimate fr this well posted Missouri grain dealer. Elmore says corn is in fine condition, trifle late but a large crop. An avera wheat acreage is going in and spri wheat is not a factor.

MONTANA.

Billings, Mont.—The Occident Eleva at this place burned to the ground recent Loss is about $25,000.

Dixon, Mont.—The Montana Central evator Co., with headquarters at Dix will operate elevators at Ravalli, Per and Dixon.

Belt, Mont.—Work on the new mill storage tank of the Farmers Mill & Ele tor Co. is progressing more rapidly si the building of a 60-foot tower and installation of a hoisting machine for purpose of elevating concrete.

Ravalli, Mont.—Contract has been for the construction of an annex to Ravalli Flour & Cereal Mill Co., wh doubles capacity of storage rooms. of annex, $13,700. Cost of warehouse, $1 000. It will have a capacity of 235. bushels.

NEBRASKA.

Eddyville, Nebr.—The Farmers Co- erative Co. has been incorporated with capital of $100,000.

O'Neil, Nebr.—The Farmers Union evator Co. has let the contract for erection of an elevator.

Sheldon, Nebr.—A. C. Thomas of Greel Colo., will take charge of the office of Trans-Mississippi Grain Co. at this pla

Ogallala, Nebr.—The Leypoldt Pennh ton Grain Co. of North Platte has p chased the elevator at Ogallala. Ch Snoddy of Burlington, Ill., is the manag

NORTH DAKOTA.

Jud, N. D.—Ed Johnson will have cha of the Farmers Elevator here.

Aurelia, N. D.—J. E. Walsh is the manager of the Farmers Elevator Co.

Ransom (Mail to Cayuga), N. D.—Grebb is in charge of the Atlantic eleva here.

McVille, N. D.—H. E. Zeeveld Grain has purchased the elevator from H. Kniefel.

Plaza, N. D.—Jacob Vib is building elevator on his farm about six miles sou west of Plaza.

New England, N. D.—F. A. Weist is new manager of the Farmers Equity change elevator here.

New Salem, N. D.—O. C. Hauter is new manager of the Occident Eleva taking the place of Geo. Mason.

Sykeston, N. D.—C. D. Dale of Hea has been succeeded as manager of Farmers Elevator by Ed Schmitt.

Carrington, N. D.—J. O. Stearns Grand Forks has bought a half interes the local flour mill. He will be manage

Casselton, N. D.—The Farmers Co- erative Mill & Elevator Co. has taken the Chaffee mill and elevators. W. Movius is manager.

Walhalla, N. D.—The Society of Eq has purchased the Imperial elevator this place, for many years owned and erated by J. W. Harvey.

Dunn Center, N. D.—T. M. Haley Montana arrived here to take charge the Dunn Center Equity Elevator wh is now open for business.

Ellendale, N. D.—The stock for a f milling company is being put out by C Wahl and C. E. Dinsmore. It is propo to capitalize the company at $20,000.

Inkster, N. D.—W. P. Storms of Pemb is the agent for the Equity Elevator which recently purchased the elevator longing to the Great Western Grain Co

town, S. D.—February 4, 5, 6 have nounced as the dates for the an- vention of the South Dakota Corn in Growers' Association, which will at Watertown.

TEXAS.

waite, Tex.—J. C. Street has a grain business on Fisher street.

ne, Tex.—The Custom Mill is now tion. Morgan W. Peacock is man-

Tex.—Fire partially destroyed the t of the Alice Mill & Gin Co. here Total loss is about $9,000, cov- insurance.

, Tex.—The Venus Mill & Elevator been organized here with W. E. Tolleson, president; W. A. Shirley, vice-president; G. B. Russell, secretary; and G. C. Barton, treasurer.

Sherman, Tex.—The Gladney Milling Co. has awarded a contract for the construction of an additional frame warehouse at their mill plant. The new house will be 54x74 feet and will cost $4,500.

Beaumont, Tex.—H. A. G. Hutchinson and Russ Daniel have formed a company for the purpose of installing a flour mill in Beaumont. Machinery has been purchased and mill will soon be in operation.

VIRGINIA.

New Haven, Va.—The New Haven Midget Milling Co. has been incorporated by H. F. Fry and associates to build flouring mills at New Haven.

Richmond, Va.—Chas. M. Glenn Co. of Richmond has been incorporated with a capital of $10,000 to deal in flour, meal and grain commodities. Charles M. Glenn, president; P. Hampton Eubank, secretary.

WEST VIRGINIA.

White Sulphur Springs (R. R. White Sulphur), w. Va.—The People's Milling Co. has been incorporated with a capital of $50,000. Incorporators: W. R. Bowling, J. H. O'Farrell, H. H. Tuckwiller and D. W. Huff.

WISCONSIN.

Ladysmith, Wis.—The Morgan Produce Co. is building a large addition to its warehouse.

Milwaukee, Wis.—The Diversified Food Products Co. will build a plant 376x88 feet. Plans are being prepared.

Clintonville, Wis.—George Huhn, who retired from business several months ago, will again open his warehouse and deal in grains, etc.

Milwaukee, Wis.—The Winona Malt & Grain Co. has been incorporated with a capital of $1,000. Incorporators: Kurtis R. Froedtert, Walter A. Teipel and Edwin J. Gross.

Amherst, Wis.—The Jackson Milling Co., besides building a new concrete dam at the mill in this city, is repairing its dam at Nelsonville and will install an electric lighting plant in that village.

Fitchburg, Wis.—The mill and office buildings of Lappely Bros. were destroyed by fire which started in the engine room of the plant. Considerable feed, flour and some farm machinery standing nearby were also destroyed. The men had been working until late into the night and had left the place but a short time before the fire started.

Hog Population.

On 10 and 12c hogs in 1917 the hog population was growing toward 70,000,000. The Jan. 1, 1919, total on the farms was 75,600,000. The 17 to 23c hog price probably never added more than 3 or 4 million hogs. The U. S. has forgotten that the 1912-16 Chicago hog price average was 9 to 10c. Thus there is room for 13 to 15c hogs. Hog prices have remained above 17c for two years and the weakness of super prices as a breeding argument rests in the fear of reduced levels. All U. S. markets have been dealt a heavy blow by waning of foreign war urgency demand.—*Jos. Wild, with E. W. Wagner & Co.*

COTTON CROP.

The Bureau of Crop Estimates reports the condition of the cotton crop on Aug. 25 as 61.4 per cent of a normal, compared with 67.1 on July 25, 1919, and 68.4, the average on Aug. 25 of the past ten years.

W. L. PERKINS GRAIN CO.
Oklahoma City, Okla.
We are Buyers and Sellers in Car Lots of CORN, OATS, KAFFIR, MILO MAIZE, FETERITA, HAY AND FEED
WRITE OR WIRE US FOR PRICES

A condition of 61.4 on Aug. 25 forecasts a yield per acre of about 159.8 pounds and a total production of about 11,230,000 bales. That is, the final outturn will probably be larger or smaller than this amount according as conditions hereafter are better or worse than average conditions. Last year the production was 12,040,532 bales, two years ago 11,302,375 bales, three years ago 11,449,930, four years ago 11,191,820, and five years ago 16,134,930 bales. Comparison of conditions, by states, follows:

Field Seeds

A new seed store has been opened at Palatka, Fla., by H. S. Hodge & Sons.

John A. Sutton at Findlay, O., has begun a campaign to test all seed wheat before planting.

Frank Leckenby, vice-president of Lilly & Co., Seattle, Wash., has been elected president of the Washington State Seed Association.

Seed dealers of Texas held a conference at Dallas on Aug. 30 to make a study of the new seed law which goes into force immediately.

Excavation for the seed warehouse of May & Co. at Shenandoah, Ia., has been finished and the work of erecting the superstructure has begun.

The Montana Wheat Growers Ass'n modeled after the Canadian Grain Growers' Ass'n have taken up the question of saving seed wheat for next crop planting.

A Darmstadt seed firm writes C. A. King & Co. that Germany has no seed carryover; that stocks are exhausted and crop prospects not favorable. Many grass fields have been cut for hay.

The Ohio Valley Seed Co. of Evansville, Ind., will erect a five-story mill and elevator some time this fall at the corner of Indiana and Rowley streets. Plans have already been drawn and it is expected the contract will be awarded within a short time. Capital stock has been increased from $25,000 to $100,000.

In a survey of 6,700 acres of wheat, oats, barley and rye conducted last spring in Colorado in order to check up results of the smut eradication it was found that there was but little smut when the seed had been properly treated, but where seed had not been treated infection ran as high as 25 per cent.

The soil continues too dry for best results in preparing seed-beds for winter wheat in Virginia, portions of Kentucky, Indiana and Illinois as well as generally in Iowa and the Western Plains area according to the *National Weather & Crop Bulletin* dated Sept. 2. However seeding of fall grains is progressing in the western Lake region and some wheat has been sown in western Kansas but little has been done in the Northwest due to continued dry weather.

Fitzsimmons & Hertel Co., the members of which have long been identified with the Southwestern seed trade, have engaged in business at 339 Pierce Bldg., St. Louis, Mo. Although they will specialize in field seeds a general business in grain and feeds will also be undertaken. B. J. Fitzsimmons was formerly secretary of the A. W. Schisler Field & Garden Seed Co., and F. Hertel was manager of the Garden Seed Department of the same concern in St. Louis.

Ed. F. Mangelsdorf & Bro., wholesale field and grass seed merchants of St. Louis, Mo., report that their new warehouse and mill is now practically fully equipped. Cleaning machines are now working and the full necessary machine installation will soon be ready. Ed. F. Mangelsdorf of the company who with Albert H. Mangelsdorf have been long identified with the seed trade recently organized this firm entirely distinct from the Mangelsdorf Co. of Atchinson, Kans. Ed. F. Mangelsdorf by the way was recently married and has just returned from a honeymoon trip.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during the week ending Sept. 6, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs..	350	30,000	.....	212,515
Clover, lbs....	18,591	12,002	.....	.....

Minneapolis Flaxseed Market.

MINNEAPOLIS, MINN., Sept. 1.—Spot offerings of flaxseed are light and in good demand and there is a fair amount of seed offered to arrive. Receipts are running fairly heavy, but the bulk of the arrivals are taken on old to arrive trades. Farmers are not selling as freely as they did when prices were higher, but enough seed is being delivered to keep the crushers going. Threshing is about over and some of the reports are very favorable as to quality and yield. No. 1 seed on spot and to arrive sells at 2c under to 2c over Duluth September price. Minnesota seed is showing a lot of watergrass seed this year again.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chica for the months and weeks named in 1919 and 1918, in pounds (000 omitted)

Chicago Seed Market.

Receipts of timothy seed the past week have been large, and coupled with the lack of export demand, there was a downward tendency to the market. Country lots of timothy were quotable Saturday at $8.50@11, according to quality. Clover seed was on the downward slide throughout the week, price changes having been greater than for some time past. Quotations on timothy and clover follow:

Timothy—	Sept. Asked.	October. Bid.	Asked.	March. Bid.
Sept. 2.....	$12.75	$.....	$12.50	$12.00
Sept. 3.....	12.75	.....	.....	12.00
Sept. 4.....	12.75	.....	.....	12.00
Sept. 5.....	12.75	11.75	12.25	12.00

Clover, contract prime—

Sept. 2.....	$49.50	Sept. 5.....	$47.60
Sept. 3.....	49.10	Sept. 6.....	46.50
Sept. 4.....	48.30		

Duluth Flaxseed Market.

DULUTH, Sept. 6.—Operations in flaxseed market slowed up during last week. Receipts from the coun almost dried up and growers over territory did not show much disp tion to negotiate for the marketing their crop, contrary to general expe tions. It had been predicted that s would begin to move in some volu by this time from South Dakota poi where a large proportion of the thr ing was reported to have been c pleted. It was intimated in advices ceived by specialists from their co spondents that growers are relying u prices being maintained through present crop year as a result of short crop over the West, and the ited carry-over from last season. they view it, linseed oil is one of products that should command its p owing to the stringent supply and mand conditions.

The market weakness in evide during the week was considered to h been mainly due to the lower trend other grains attributable to the h cost of living agitation. The cont ance of fairly high temperatures the Northwest going to assure the sown seed coming to maturity was

Louisville Seed Market.

UISVILLE, KY., Sept. 6.—There has
a better demand for field seeds
g the past ten days, rye seed still
active, while timothy for fall
ing is moving well, and there is
little demand for clover. The
is so high that it is not selling
, however.
hard grass is sluggish, and farmers
olding for high prices. Jobbers are
ng recleaned seed as low as $3.15
hel. Bluegrass is also inactive, due
olding tactics of farmers, but
ed seed is now on the market, with
seed quoted at $3.05 and 21-lb. seed
.25. Onion sets are dull, farmers
being offered four cents for yellows and four and a half for whites, while dealers prefer that the farmer keep on holding sets.

Kansas City Seed Market.

KANSAS CITY, Sept. 6.—Anticipation of the arrival of new crop millet seed is a feature of the local seed market. There have been some reports of threshing, but no shipments have been announced. Handlers expect a good run of hog millet, but say the information pertaining to the finer sorts is vague. Nobody cares to set a price on the seed until more is learned about the quality and the size of the crop.

Cane seed from southern territory is due to arrive coincident with kafir and milo. Texas has been asking for bids on the first half of September shipment. Cane in Oklahoma is practically made, but the Kansas crop must have more time and immunity from frost. Prices are held in abeyance.

There are favorable reports on the Sudan grass crop in most of the Southwest. The crop in Texas is about ready for market. Proportions to be used for hay and seed are yet to be determined.

As all alfalfa seed must come from the third crop, the first two having been given over to hay, the calculations include a consideration of the possible effects of frost. Much alfalfa in southwestern and western Kansas was so damaged by grasshoppers that little seed is expected from it. Recent weather conditions have been very favorable for development of the seed crop in territory where growth was not restricted by drouth or insects. There is a fair demand for old seed for fall sowing. Prices, as from first hands, are quoted at $17 to $23 per cwt.

It is too early for new clover seed to appear in the market, but reports indicate that a fair supply, considering the acreage, is to be saved. Seed is sure to bring good prices, as there will be a large demand for seed to fertilize wheat fields and to restore pastures. A nominal price given by one of the seed houses this week was $35 to $45 per cwt.

The movement of new timothy seed continues light, as farmers evidently don't like the ruling prices of $9.50 to $11 per cwt. for country run. Some dealers say they believe there is a fair-sized crop, especially in Missouri.

Producers of meadow fescue seed are waiting for another boom in prices, but dealers are doing nothing and say the market is not likely to again reach the level of $34 per cwt. reported some time ago. At present the market is quoted nominally at $20@25.

Except a few isolated lots, the bluegrass seed crop of the Southwest—mostly in Missouri—is out of farmers' hands. Dealers also declare they have cleaned and sold much of the seed, the demand having been urgent. Prices bid for seed in the rough are $10@14 per cwt., as previously stated. Cleaned seed is quoted at $19@25.

SEED SITUATION.

SEEDS NEEDED LOCALLY.

OREGON.—Practically no red clover for export. All will be needed for local use.

Alsike is in better supply, but very little will be spared for shipment, owing to high price of wheat. Very little clover seeded.—*M. Sanders, Albany, Ore.*

ALFALFA SEED CROP.

UTAH (5).—It is a little early to judge just what our alfalfa seed crop will be in this section at the present time.

Some seasons we have an early frost which reduces the quality and crop considerably. At the present time conditions look favorable for a normal yield and good quality. The season has been dry, which is rather inducive to first-class seed. A little later on we will be able to give you more information than at the present.—*The Wm. M. Roylance Co., Provo, Utah.*

GRASS SEEDS IN ILLINOIS.

ILLINOIS (9).—Regarding red clover seed, there will not be one-half the red clover in this section that there was last year and not one-fourth the amount of alsike clover.

As to timothy seed, the writer made a trip through the timothy section having a warehouse located in the center of the producing section, and finds there will be as good a crop as there was last year.

We are located in the heart of the redtop producing section, with traveling buyers all over the producing territory, and therefore are in touch with actual conditions all the time.

Thirty days ago it looked as though there would be a fine crop, but since threshing has come on, we found that there are various amounts of seed produced, some seed making two bags to the acre, while others only half the amount that was produced last year. This caused considerable flurry in the market and quite a little excitement. For instance, one buyer has started out paying from 15@17c for redtop and has been taking all that he could get hold of at these prices.

In figuring up the amount of bags handled for the past 10 years, we find from returns which we have had that our crop is not one-fourth in and that we are going to have more seed than two years ago. In fact, there is going to be enough to fill local demands this year, taking into consideration there is practically no export demand. It is probable there will be no seed exported this season. With plenty of seed to fill all local demands, we see no reason why redtop should be more than 12c per lb. It looks as if some one is going to get hurt and looks to us that red clover—in fact, all seeds—will have to take a drop from the way the move is at present prices.—*Schultz Seed Co., Olney, Ill.*

Clover Seed Crop.

The lack of carry-over continues to place an enormous burden on the new crop, according to Southworth & Co., Toledo, and suggests relatively high levels throughout the season on the basis of very short yields in practically all sections.

Stock on hand—	Sept. 1, 1919. Sept. 1, 1919.	Year ago. Year ago.
Clover	1,157	1,669
Alsike	3,802	5,172
Timothy	69,654	77,945

Swedish Seed Demand.

Sweden generally imports seed from Russia. Russia is raising hell instead of crops which forces Sweden to look elsewhere. Dealer there writes: "Red clover crop will be short. Timothy and other grass seeds promise well. All stocks are nearly exhausted and America will have to provide considerable. Everyone looks for lower prices, sooner or later. We will have to import clover from central Europe and alfalfa and timothy from America."—*C. A. King & Co., Toledo.*

St. Louis Seed Market.

ST. LOUIS, Sept. 8.—Offerings of spot seeds are light and the demand is fair, but on account of the decline in cash grain prices, the market is weak and prices generally lower. Most sections in this vicinity report that they will have only enough seed for their home requirements, and this makes the offerings light. Quotations are as follows: Timothy, from $11.75 for choice to $10.75 for poor per 100 lbs.; clover, from $10 for poor and trashy to $32 to $40 for average country lots and $41 to $44 for choice, high-grade seed; alsike, $12 to $40, according to quality; alfalfa, $15 to $26; redtop, $12 to $15; other seeds are nominal.

The Clover Seed Decline.

Liquidation was on continually. Reactions were short lived and feeble. Why the sudden change of front? From a strong, stubborn market, due to world's stocks being depleted and American prospects very poor with few exceptions, it ran into a weak, sick affair with longs dumping and bears more bold than for a long time.

In keeping with the one big topic of the day, headed by our own Government at Washington that prices of everything are too high and should no longer be on a war basis, declines started in the grain and pork markets, and followed by other commodities with few exceptions. Seed finally felt the effect of this change of sentiment and joined the procession of lower values. Developments this week show that offerings have been made from the other side and some purchases have been made. Italy, France and Bohemia have made offers of good qualities on a great deal better basis than prices ruling in this country. A Western friend of ours sold quite a little December seed, stating

Clover Seed Prospects.

The *Seed Reporter* under date of Sept. 6 has the following as regards the clover seed prospects:

"The quantity of old seed in the hands of growers and country shippers was reported to be extremely small because high prices and a brisk demand last spring and this summer induced the growers and shippers to dispose of their seed. The stocks of seed carried over by dealers, according to the general seed survey figures, amounted to 4,242,443 pounds on June 30, 1919, as compared with a carry-over last year of 11,320,640 pounds.

"The prospective production of sweet clover seed is estimated to be about 80 per cent that of last year. Because this crop is produced to a large extent along irrigation ditches and in waste places it is very difficult to obtain close estimates of acreage and yield. Doubtless the high price and scarcity of labor will tend to reduce the quantity of this seed which will be harvested, especially in sections that harvest most of the crop by hand. A larger acreage than normal is expected to be harvested in Utah and Nebraska. Some concern is expressed by correspondents lest too much of the seed has been shattered because the seed matured earlier than usual, due to the dry, hot weather that prevailed in some of the most important producing sections. This would tend to decrease the yield per acre considerably. The only state that reported a decreased production of sweet clover seed because of too much rain was Mississippi.

"Some of the factors that have affected the alfalfa seed crop, and which were mentioned above, have also affected the production of sweet clover seed. The prices that have been offered this season for sweet clover seed have not been so high as those which prevailed at a corresponding time last year. In some sections the offers have been from $1 to $2.50 per 100 pounds less than last season. Prices which were current on Aug. 22 ranged from $13 to $17.65 per 100 pounds for hulled country-run seed and $14.75 to $19.70 for hulled, recleaned seed. In Kentucky and Mississippi, where the seed is sold unhulled, prices of $10 per 100 pounds for country-run and $12 to $15 for recleaned seed were being paid.

"Very little sweet clover seed was carried over from last year by growers and country shippers. Dealers reported stocks on hand on June 30, 1919, as 862,075 pounds, compared with a carry-over last year of 1,217,976 pounds."

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Publicity for Food Prices.

Publicity regarding retail food prices and stocks of food in storage would tend to reduce high prices, the House Appropriations Committee was told on Aug. 25 by officials of the Department of Agriculture, who urged an appropriation of $50,000 for that purpose. Present high prices were said by Herbert C. Marshall of the Bureau of Markets to be the result of inflated currency, with waste and profiteering contributing causes. Information regarding supplies of fruits, vegetables, dairy and poultry products, meats, fish and other food products on city markets would, he said, tend to stabilize the market, prevent loss and result in more money for the producer, with cheaper prices to consumers.—*National Provisioner.*

The Bureau of Markets has been publishing this "dope" for a year. Its "Food Survey Reports" were elaborate in the extreme, printed in tabular detail to the last degree of analysis at very heavy expense for clerk hire and printing. But all the time this was going on prices kept going up, and discontent the louder, while th ports kept flowing on like a river weeks and months behind the mar obsolete before they saw light, lik Government "dope." The fact is Department hasn't made good at thing in this line of endeavor and to be patriotic enough to acknowl or quit it.

General conditions over the co say the Elmore-Schultz Grain Co. Louis, and the possibilities of a eral railroad strike, seem to have alyzed all incentive for buying "We should go slow."

eans and Potatoes

a potatoes continue to deteriorate, o dry weather, and unless rain immediately much of the acreage e practically a total failure.

m central Oregon reports come of ellent potato crop with an acreage ng 30 per cent in excess of last

the week ending Sept. 6 the crop of the American Steel & Wire Co. tes that the potato crop is yield- mewhat better than was expected e of the Northeastern States, but more favorable from the major n of the country.

potato supplies of the Chicago t have been moderate so far this , owing to a recent decline in There is some rot reported from n potato sections and Eastern ts advanced during the past week 10@25c per cwt.

Michigan Weather and Crop Bul- reports beans in that state in ondition, some of the crop ready l, but in the principal bean coun- will be a week yet before the s fully matured. Late potatoes ue fair to promising.

m Santa Monica, Calif., comes the of a lima bean crop, but one- of normal due to light rainfall ack of moisture. This crop was 11,000-acre tract which, with the ion of a few hundred acres, was gated land. The beans on the ed land were a very heavy crop.

Alfalfa Seed Outlook.

Several hundred reports received about Aug. 22 point to a production of alfalfa seed in the United States about one-third less than that of last year. Drouth in most of the important seed-producing sections, together with grasshopper ravages in Kansas, Nebraska, Oklahoma and South Dakota, is responsible for the reduction in acreage and the decreased yield per acre that are expected. The army and web worms have also done considerable damage to the alfalfa fields in Kansas. The only two states which usually produce large quantities of alfalfa seed that indicated that a larger acreage than normal would be harvested for seed are Utah and Idaho, and the production in these states will offset in part the decrease in production in some of the other states. In Kansas, either the first or second crops, or both, were partially or completely destroyed by grasshoppers, worms or drouth. There is a possibility that seed may be obtained from the third crop wherever pests are not at work, provided that killing frosts do not occur early. A very small percentage of the Kansas and Oklahoma crop was harvested by the end of the third week of August and hulling operations had not commenced. The shortage and high price of hay in Montana will cause many of the alfalfa fields to be cut for hay instead of for seed. The acreage devoted to alfalfa seed production in California this season will fall about 25 per cent below that of last year and about 50 per cent below normal. The prevailing high prices paid for hay are responsible largely for this reduction in California. In the Yuma project, Arizona, the threshing and recleaning were nearly completed and the seed was ready for shipment by Aug. 22. In other sections of the South Pacific division harvesting and threshing were just beginning and little or no movement of seed had taken place. The average prices of alfalfa seed offered to growers on that date ranged from $13.75 to $20.95 per 100 pounds for country-run seed and from $15 to $24.75 for recleaned seed in the states and districts noted in the accompanying table. In Arizona, where the early crops nearly always sell at a premium, the prices were somewhat higher than the more or less nominal prices quoted elsewhere. In that state $25 to $27 per 100 pounds was paid for common alfalfa seed, $28 to $30 for Smooth Peruvian, and $34 to $35 for Hairy Peruvian. In sections that produce Grimm alfalfa seed, offers of $30 to $40 per 100 pounds have been made.—*Seed Reporter.*

Feedstuffs

T. H. Speaker of Richmond, Ill., has sold his flour and feed business to his sons.

The R. E. Housholder Co. has purchased the feed business that has been conducted at Tampa, Fla., for the past ten years by Hester & Hughes.

O. O. Howiler, local feed dealer of Caldwell, Ohio, has removed to more commodious quarters in the Watson Bldg. on Cumberland street.

Arthur Horr, who has been identified with Anderson Bros. Co. at Portsmouth, Ohio, resigned Sept. 1 and became associated with his brother, Charles, in the feed business at this place.

The Berkley Feed Co. of Norfolk, Va., has been incorporated with a capital stock of $30,000 to conduct a general feed and builders' supply business. J. T. Forehand is president and Geo. W. Daughtry secretary of the company.

Edwin L. Solfisburg of the Golden Grain Milling Co., East St. Louis, Ill., returned to his desk last week following an extended illness which began during the several days of the American Feed Manufacturers' convention last June. We are all glad to see him back.

Cottonseed Feed Buyers Hold Off.

KANSAS CITY, Sept. 6.—Buyers of cottonseed cake and meal show little inclination to enter the market for supplies. The market in Kansas City last week displayed a slightly weaker tone, offers of 43 per cent protein cake being reported from Texas common points at $72 a ton, basis mill, immediate shipment. Prices were off about $2 generally. The movement of new cake and meal is expected to be 30 days later than normal. Exporters are inquiring as to future prices, but have made no purchases thus far.

GROUND FEED STOCKS.

The Bureau of Markets reporting under date of Sept. 6 has the following as regards ground feed stocks throughout the country:

SOUTHERN. — Atlanta — Dmd. good early in wk. but quiet at last due to anticipation of lower prices now that grains are lower. Prices lower from Kansas-Okla. mills but steady from Northwestern mills, quote bran $46@47, spg. wh. middlings $64.50 nominally, $67 for 36% c. s. meal, $63.50 cake 36%, $8 for hulls blk., 30% peanut meal $58, vel. bean fd. $54. Augusta—Bran $48, brown shorts $64, gray shorts $68. Columbus—Bran $50, middlings $67, brown shorts $63, 7% c. s. meal $70 for immediate shpt. Vicksburg—Stks. bran-middlings sma., quote bran $44, gray shorts $62. Montgomery—Bran $49.75@52.50, middlings $65@70, brown shorts $62.75, 32% peanut meal $63, 7% c. s. meal $73, 20% c. s. fd. $56.80. Mobile—Bran $44, middlings $50, vel. bean fd. $60 with sup. ltd., peanut meal 33% immediate shpt. $71, 36% $73, 7% c. s. meal $78, 20% c. s. fd. $59, market generally unsettled and trade only moderate. Jacksonville—Dmd. pr. for peanut meal, no vel. bean fd. available, bran $46, brown shorts $61, gray shorts $62, 7% c. s. meal $72.60, 20% c. s. fd. $56.50. Wilmington — Middlings $63@64.50. Tampa—Bran $49.80, middlings $64.50, stks. peanut and c. s. meal, also vel. bean fd. exhausted, dmd. gd.

Damaged Wheat as Feed.

With corn selling at record prices, and the emergency for saving wheat for human consumption relieved, farmers may find it profitable to feed their damaged wheat to fattening hogs. Whether it will or will not can best be determined by local conditions, which include a careful comparison of prices and feeding costs.

In a series of feeding experiments at the University of Missouri College of Agriculture, extending over two years, and which are reported in Bulletin No. 136, it was found that hogs fed wheat made more rapid gains than did hogs fed corn. In terms of pounds of grain required to produce a hundred pounds of gain, the hogs fed wheat made the more economical gains. It required 483 pounds of wheat to produce a hundred pounds of gain, as compared with 582 pounds of corn under similar conditions.

The addition of tankage to the wheat ration showed a decided advantage during the first part of the feeding trial. For the first seventy-eight days of the test, the ration of ten parts of wheat and one part of tankage produced an average daily gain of 1.55 pounds, while the wheat-alone ration produced only an average daily gain of 1.25 pounds. For this period, 424 pounds of the wheat and tankage ration produced a hundred pounds of gain, while 455 pounds of the wheat alone was required for each hundred pounds of gain.

During the last forty-two days of the trial, the hogs fed tankage in addition to the wheat again made more rapid gains, 1.53 pounds per head per day, as compared with 1.26 pounds. The gain, however, was scarcely economical. For this period it required 543 pounds of wheat alone to produce a hundred pounds of gain, or 562 pounds of the wheat and tankage ration.—*Wallaces' Farmer.*

No Hoarding of Feeds.

The Government has resumed its efforts to disorganize the distribution of feeds by an order that some feeds (wheat feeds, cottonseed products, linseed meal) may not be held unsold for more than 30 days. As this is the season when stocks in second and consumers' hands should accumulate, and when their accumulation is no criterion whatever of next winter's dealer prices to consumers, the effect can only be bad. The order may help some wise consumers who have the cash to do it to get in now and stock up, but the order can't in any way enlarge the supply of feeds. Linseed meal tumbled $8 on Aug. 22, but that is no assurance that the quantity is excessive or even ample for the winter's needs. One would think that the experience with this anti-hoarding fallacy in the past by the dairy and feeding interests would have taught our politician-officials something; but they all seem to be still true Bourbons who forget everything and learn nothing.

FEED MARKETS.

PHILADELPHIA.

Philadelphia, Sept. 6.—The market for feedstuffs is dull and lower. Offerings are moderate but the demand is limited as buyers are holding off for lower prices in view of the recent decline in coarse grain. Our quotations are for carlots, to arrive, in 100-lb. sacks, at cost per ton: Winter bran, $47@48; spring bran, $46.50@47.50 per ton; standard wheat middlings, $61.50@62.50; flour middlings, $67.50@68.50; red dog, $72@73; shorts, $61.50@62.50; low grade flour, $72@73.50; rye middlings, $60@60.50; fine yellow hominy, $79@80; fine white hominy, $80@81; reground oats feed, $30.50@31.50; cottonseed meal, 36% protein, $76.50@78.50; cottonseed meal, 41% pr $81.50@83.50; cottonseed feed, 20% pr $60.50@62.50.

NEW ORLEANS.

New Orleans, La., Sept. 5.—Offeri bran continue to be limited. At the time the demand is very slow. D here have stocks and are selling a the Western quotations. Bran quoted $2.20 to $2.25. Shorts scarce and range from about $2.80 to $2.90 for and grey, respectively.

DES MOINES.

Des Moines, Ia., Sept. 6.—Mill feed remain fairly steady. Dealers and j have considerable feed coming from ern and Western mills, and as so shipping conditions get in shape should be a good supply of feed. Th prices on mill feeds now are due to facilities. Oilmeal and cottonseed me being exported at present prices an too high for feeders in the Middle S There is a big demand for molasses and prices were considerably lower other high protein feeds.

BOSTON.

Boston, Sept. 6.—Demand for feeds was light during the past buyers purchasing only for imm needs. The following prices were q at the close: Bran, spring, sacked, per ton; bran, winter, sacked, $46.50; dlings, sacked, $63; mixed feed, s $56.50; gluten feed, sacked, $74.78; red sacked, $72; second clear, sacked, stock feed, sacked, $66; hominy sacked, $76.40; oat hulls, reground, s $32; cottonseed meal, sacked, $79. ceipts for the week ending Sept. 6 w tons.

PITTSBURGH.

Pittsburgh, Sept. 6.—The feed m shows little or no change since the report. More feed is coming into the ket than for many weeks and price irregular. No effort is being made owing to the uncertainties of the fee uation, to establish any regular quota but they are ranging from $36 to $60 according to various conditions affect the local market. There is a demand for mill feeds, No. 1 and white middlings and a fair inquir

MEMPHIS.

Memphis, Sept. 6.—Activity in feed of all is less than it has been. Manufacs of the mixed varieties are not booksuch business, but are still filling that on some time ago. Prices are holdfairly well but on new business there is sition to shade in certain lines. The is apparently waiting to see further ies. Mill feeds are scarce and almost gh as they have been. Bran is selling at $42 spot here and gray shorts are d at $62.50 for spot and $59 for early ment. In cottonseed meal there is not doing, due to the unsettled state of eneral market, but quotations are begradually reduced. For 7 per cent meal uotation today is down to $68@68.50 The sharp break in cotton during ast few days and better crop pros, together with the general declining in feedstuffs, have served to unsettle market and future business is not yet.

LOUISVILLE.

Louisville, Ky., Sept. 6.—The demand for continues good and supplies are still Mixed feed is scarce and middlings hardly to be had. Bran is in fair y. Corn feeds are not active. Some s now being ground into stock feeds. Quotations are: Bran, $47 a ton; mixed $56; middlings, $65; hominy feed meal, cracked yellow corn, $70; cracked corn, $70, sacked and packed, Louis-

MINNEAPOLIS.

Minneapolis, Minn., Sept. 6.—The demand mill feed is not as strong as it was prices are beginning to waver. Mills sold ahead and most of them are g firm prices for the small amounts have for sale. Most of the present lg is in mixed carlots. There is some nd for deferred shipment offerings, most of the millers are asking more the buyers care to pay, so business is d. Quotations in carload lots f. o. b. apolis, in 100-lb. sacks: Bran, $40@ andard middlings, $52@53; flour mid-s, $58@59; red dog, $62@65; rye mid-s, $52@53; ground barley, $62@63.

DULUTH.

Duluth, Sept. 6.—While the markets in al feeds were steady and unchanged g the last week, ground feeds weak-$1.25@2.50 and cracked corn $3.75 a Trade was slow with buying by deal-n an immediate requirements basis. here are operating at only a minimum ity owing to the delayed run of grain sway. Prices per ton follow: Bran, $42; d oats, $48.25; No. 1 ground feed,); No. 2 ground feed, $57; No. 3 ground $54; shorts, $56; flour middlings, .; red dog, $66; Boston mixed, $51; ed corn, $65.50; rye feed, $50.

MONTREAL.

Montreal, Sept. 5.—The chief business in is in mixed cars. In carlots it is d at $45 per ton and shorts at $55 on. Business on the whole is quiet teady. A dealer stated that business tailed for want of supplies. Bran, $45, shorts at $55 per ton, including bags, ack.—Trade Bulletin.

BALTIMORE.

Baltimore, Sept. 6.—The feed market is with ample offerings of sacked bran middlings to satisfy the present modi demand in evidence and sales prin-y of a jobbing character. Quotations : Western spring bran, per ton, in . sacks, $47@48; Western middlings, n, in 100-lb. sacks, $57@58; city mills' r wheat bran, per ton, in 100-lb. , $60; brown middlings, per ton, in . sacks, $60; white middlings, per ton, -lb. sacks, $70.

CHICAGO.

Chicago, Sept. 6.—Bran is in good supply quotable easier at $42 sacked, with ings at $56, the latter being scarce. nseed meal and linseed meal are firm, rmer being quoted at $79.

NASHVILLE.

Nashville, Tenn., Sept. 5.—No material e is noted in wheat bran and shorts, being engaged chiefly with old orders. ground feeds are a shade lower and ly fair demand. Quotations: Wheat 100-lb. bags, per ton, $45.20; mid-or shorts, $61.20; molasses horse $48@60; dairy feed, $66@70; hog feed, oultry feed, $75@79.

NEW YORK.

New York, Sept. 6.—Mill feed was quiet prices were easier. The decline was rgely to increased offers by the mills eflected the influence of the reduction e price of feeding grains and the ion to reduce the cost of living. City was quoted at $47: middlings, $57, and og at $69. Western bran was $46; ings, $59; red dog, $71.50.

MILWAUKEE.

Milwaukee, Wis., Sept. 6.—The mill feed et in Milwaukee is slightly lower, ng price concessions in several in-es. Buyers are still hopeful for lower and are buying mainly for immediate wants. However, the demand is fair and broad enough to absorb the comparatively light offerings. Bran showed a lowering of $1, standard middlings dropped $1.50, while red dog, hominy feed and rye feed are firm and steady. Current quotations are: Bran, per ton, $41.50@42; standard middlings, $55.50@56; flour middlings, $60@61; red dog, $65@66; hominy feed, $73.50; rye feed, $54@54.50; old-process oilmeal, $87.50; cottonseed meal, $86@93; brewers' dried grain, $63; gluten feed, $69, all in 100-lb. sacks.

TAMPA.

Tampa, Fla., Sept. 5.—There is practically no demand here just now for millfeeds of any description. Millers are not offering freely for prompt shipment, and prompt shipment is the only sort that our trade are interested in just at this time. Gray shorts are offered for last half September and first half October at $65.00 to $66.00. Standard shorts at $64.00 from the West. Bran at $48.50, sacked, 100 lbs., stamped-tagged, delivered Tampa, via rail and water. Alfalfa meal is moving well, and is quoted for September at $46.00 for No. 1 green meal in new bags. Cottonseed feed meal is quoted for October-November shipment at $53.25, f. o. b. Memphis. Our trade are not interested in deferred shipment of any commodity.

ST. LOUIS.

St. Louis, Sept. 8. On account of the weakness in grain and hay, the mill feed market is dull and lower. Offerings of spot feeds are light, but consumers had bought so freely to arrive that they are pretty well supplied, and are holding off. Prices are as follows: Bran, spot, $41 to $43 per ton; futures as low as $41.50; mixed feed, $53 to $53.50; middlings, gray, $56 to $58; white hominy feed, $68; oat feed, $26; alfalfa meal, No. 1, $38 to $39; No. 2, $34 to $34.50 per ton.

THE FEED SITUATION.

WOULD BUY.

NEW YORK.—I do not consider my ideas in the feed business worth much to any one else at this time because conditions are such that the experienced man is of little value to himself or others in any line.

With unsettled war conditions, government agitation, and theorists trying to run the largest business proposition in the world—the U. S. Government—the business interests are bound to suffer.

Grain has now taken a great slump and ordinarily, I would advise the buying of either corn, oats or both, as I am an advocate of buying anything on a declining market, thereby endeavoring to buy at the bottom.

One would naturally think that the recent slump had discounted all unfavorable conditions for some time to come. If so, a reaction upward will now take place and feeds will not decline a great deal, especially in the face of the coming feeding season close at hand, when demand is bound to increase.

I do not look for corn or protein feeds to drop much until we get some new corn, as the old crop is used up and certainly commodities cannot be lowered with not enough to supply a small demand as at present.

I do not look for lower prices in feedstuffs before Dec. 1, 1919.—*Chas. L. Carrier, Sherburne, N. Y.*

MILL FEEDS.

The mill feed situation at Portland and Seattle is rather slow, although the demand shows a continued improvement. At Portland a small amount of stock is available at $38.50@39 with fair demand. At Spokane the demand continues strong, chiefly from Montana, and old stocks are pretty well cleaned up, with no particular change in prices. Montana is still depending largely upon Washington for supplies, demand fair. Chopped alfalfa meal with molasses is quoted in Montana in fair demand at $40 in car lots. At Portland the demand for meal is slow, one car reported sold at $32, but generally reported at $33@33.50.

The alfalfa feed demand is reported lighter than a week ago, with quotations running $40@58.

Broom corn, as well as other corns in the vicinity of Tracy, Minn., will have a record crop this year. Ben Hughes, local grower of broom corn, has a large field which averages from ten to eleven feet tall. The heads are well filled and it is said to be the finest corn of the kind ever raised in this district.

Acreage of Corn and Oats in Iowa, 1919.

During the last two years acreages have made unusually rapid shifts from one crop to another, and in such cases, it seems that township correspondents have a tendency to lag behind the changes. For that reason, last year's estimates differed greatly from the assessors' reports. Much time and care have been devoted to checking the assessors' reports from every possible angle, and while some errors in these that cannot be remedied are known to exist, in their general aspects they are believed to be nearly correct.

Corn.—The largest surprise is in the corn acreage of 1918 which assessors' reports place at 9,303,514, or more than 1,000,000 acres less than estimated by any Government, state or private agency. This tremendous decrease is all accounted for in the increases shown in small grains, spring wheat leading, though not much ahead of oats. Based on assessor's reports and the percentage estimates of the township reports of the Iowa Weather and Crop Service, the 1919 corn acreage is 9,499,700, or 196,200 acres more than in 1918. This allows for 193,900 acres planted in the spring that were drowned out later in the season.

Oats.—Area seeded, 5,670,500 acres, or 152,400 less than last year; practically all harvested.—*Weather-Crop Bulletin, Ia. Section.*

Alfalfa Department

Portland, Ore., reports alfalfa offerings at $30@30.50 with cheat hay at $18@19.

The Iowa Weather Crop Bulletin says the third crop of alfalfa is yielding well and being put up in fine condition.

The Denver Alfalfa Milling Co. has installed a large dust collector costing $2,000 in its plant at Abilene, Kans.

Seattle reports the alfalfa market as fairly steady but with a weak undertone, No. 1 quoted $26.50, standard $24.50, No. 3 $19.50.

The controlling interest in the Dodge City Alfalfa Mill, Dodge City, Kans., has been purchased by L. D. Flanagan, who will be active in the management of the affairs of the mill.

Jerome, Idaho, reports fair shipments of alfalfa during the week, the local surplus showing some increase due to heavy shipments of cattle and sheep, No. 1 being quoted at $24@26 f. o. b.

Caldwell, Idaho, reports the local hay situation adversely affected by the report of the sheep men at a recent meeting at Pocatello who decided on a maximum for alfalfa of $12.50 in the stack.

Generally speaking the American Steel & Wire Co., Chicago, state that the alfalfa growing sections of the country report the crop as having done well and that there should be at least an average amount of this valuable stock food in producers' hands.

In Millard County, Utah, farm bureau members sprayed 250 acres of alfalfa for control of the alfalfa weevil at a cost of $1.10 per acre. As a result it is estimated that 500 lbs. of hay were gained to the acre in addition to the elimination of the cultivation and brush drag methods formerly necessary.

Alfalfa Meal Buyers Bearish.

KANSAS CITY, Sept. 6.—Buyers of alfalfa meal manifest a bearish attitude toward the future trend of prices, and are taking only sufficient to meet their current needs. Only in scattered instances were contracts made for deferred shipment this week in Kansas City. Millers, on the other hand, look for higher prices, and have turned down bids on meal for shipment late in the year made on the basis of current values. Offerings of alfalfa meal in Kansas City were light, coming almost entirely from Kansas and Colorado. Prices showed little change.

Choice alfalfa meal was quoted at $40 @41 per ton, in carlots, new sacks, basis Kansas City; No. 1, $37@38.50; No. 2, $32@34.

Declining tendency of corn, oats and other feed grains, caused a less active trade in alfalfa mixed feeds. Still, the volume of sales was comparatively large for this period of the year. The straight molasses mixture was unchanged, maintaining a firm tone, while the grain mixed feed was off in sympathy with lower corn. Hog producers are making rather liberal purchases. Prices closed as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $43@54.

ALFALFA SITUATION.

CROP 30% SHORT NORMAL.

COLORADO.—The farmers are extremely "bullish" in their ideas of prices and we have been able to contract very little alfalfa for our mills thus far this season, but we look for better conditions in the near future.

Our alfalfa crop in the northern half of this state, where we operate, is about 30% short of the normal tonnage, but owing to the dry weather this summer, it has gone into the stack in excellent condition and we will have a large tonnage of high-grade meal to offer. We are handling the output of sixteen mills this season and in addition to this are just about completing an up-to-date mixed feed plant in Denver and anticipate a big trade in our mixed feeds in the Rocky Mountain region this fall and winter. While grain markets have materially declined during the past few weeks, we cannot see lower prices on alfalfa hay and meal, as the supply of good quality is considerably short this season. We are having at this time a very satisfactory demand for meal, which we believe will continue throughout the season.—*The Great Western Alfalfa Milling Co., Denver, Colo.*

ALFALFA PRICES.

The Bureau of Markets reporting under date of Sept. 6 has the following in regard to alfalfa prices throughout the country:

SOUTHERN. — Atlanta — The lower grades of alfalfa sold at a discount amounting to as much as $4@9 per ton under the price of No. 1. Quote No. 1 $37@38 with some very good stuff at $39, No. 2 $30@34. Augusta—Stks.-dmd. alf. lgt., Okla. supplying bulk of alf., ch. alf. $39.50, No. 1 $38.50. Vicksburg—Rcts.-dmd. lgt., ch. alf. $36. Montgomery—Stks. alf. ample, mostly locally produced with some Western stuff, ch. alf. $37@42, No. 1 $36.50@38.50. Mobile—Stks.-rcts. alf. lgt. with Colo. supplying bulk of this hay, some locally produced available for shpt. at $33, quote ch. $35, No. 1 $33@33.50. Jacksonville—Stks.-rcts.-dmd. ltd., ch. alf. $37, No. 1 $36.

H. C. Stevens, assistant cashier of the National Bank of Commerce in New York, and Geo. W. Curtis of the foreign department have sailed for Europe to study financial and economic conditions in the Central Empires.

GRAIN MOVING AT NEW ORLEANS.

The recent mix-up as to rates of grain from the West to New Orleans has been readjusted through the efforts of Carl Giessow, general manager of the New Orleans Joint Traffic Bureau, who announces that the Railroad Administration has authorized a 56c wheat rate to New Orleans from Intermountain points which places New Orleans on a par with Galveston and Pacific ports for handling the grain from the Northwest and the Inland Empire.

The first movement of this season's grain through New Orleans began during the last week in August, when the S. S. Lake Ontario sailed for Liverpool with 98,000 bus. of barley and a large number of grain bags on board, being the first of seven vessels recently allotted for the movement of grain from New Orleans.

The announcement that embargoes had been placed on the movement of corn, oats, rye and wheat by the Southern Export Committee has not affected receipts at New Orleans and W. L. Richeson of the W. L. Richeson Co. explains that the embargo does not mean that grain shipments to New Orleans have been stopped, but that on the contrary grain will continue to move as fast as it can be handled through the local elevators. In explanation Mr. Richeson says:

"If a shipper wants to release a number of cars through New Orleans, he wires a local exporter, who has the request sanctioned by C. B. Fox, second vice-president of the Grain Corporation. The permit for the movement of the cars then is issued by W. M. Rheet, local member of the Southern Export Co.

"The system is splendid," said Mr. Richeson. "It has been applying all this year on barley shipments and is far more advantageous than the year before, when local exporters were required to obtain release permits from New York. The establishment of a local representative by the Southern Export Co. greatly helps the grain men in handling their business."

Each elevator in New Orleans has a standard capacity, said Mr. Richeson, and permits for inward grain shipments will be issued as often as released, if sanctioned by the Grain Corporation. "This Corporation has superseded over the allotment of space," he said, "and if requests exceed the storage capacity, it is only natural that the shipments will not be sanctioned."

The Remedy.

McCullouch of Ohio is much because the Grain Corporation some millions of dollars in prof- The 17c per bushel profit taken Grain Corporation and paid by nsumers of bread did not go to oducer, but to a Government mid- ," said the congressman. "The medy is production with freedom le. Any policy that curtails pro- n will force prices up in the end. nterference with the freedom of such as arbitrary restrictions, un- agreements, either to raise prices or curtail production, will increase the cost to the consumer. If the producer knows that he will be permitted to secure a reasonable return for his labors in a fair and unrestricted market, he will be encouraged to produce, and if the consumer knows that he will be protected against profiteering by strict government regulations and the prosecution of persons who engage in unlawful practices, he will be satisfied to pay what is the reasonable price for the products he consumes.

"Artificial interferences must be removed and we must get back to normal just as quickly as it is possible for us to do so. It may take some time, but the attitude of those in executive and legislative authority should be along those lines."

The world's bookkeeper

Modern National Cash Registers are recognized throughout the world as labor-saving machines.

They are used wherever money is handled and accounts kept—in every line of business, in all parts of the world.

National Cash Registers are the result of 35 years of study and invention.

To make them requires 7,100 people, 21 buildings, 40 acres of floor space, and 2,475 patents covering 35,000 claims.

Considering workmanship, materials, and what it does, the National Cash Register is the lowest priced piece of machinery in the world

Free Time on Grain Sampled in Indiana Yards.

To promote car efficiency, an understanding has been reached with the Illinois State Grain Inspection Department to inspect grain coming in over the New York Central, Erie, C. & O. and Monon at their break-up yards across the state line in Indiana, instead of bringing the cars to Englewood in the case of the N. Y. C. and to 51st Street in the case of the other three roads, necessitating a back haul in many instances when final dispositon was given.

It takes longer to get the samples of the grain to the Board of Trade under this arrangement; therefore we have advised the four roads named that the free time of 24 hours allowed for disposal will be calculated from the time the inspection is reported by the Inspection Department. This arrangement to be subject to change on notice, if it does not work out mutually satisfactorily.—*J. H. Brinkerhoff.*

This arrangement took effect about Nov. 1, 1918, and all demurrage bills not in conformity therewith should be sent to this department for readjustment.

Recent arrivals of burlap in two cargoes were reported in New York from Calcutta, a total of 8,640 bales.

Hay Department

At Creswell, Ore., cheap hay is now offered at $17@18.

Garfield, Wash., reports No. 1 timothy being offered at $22.

Stevensville, Mont., reports timothy offering there at $27@29.

Great Falls, Mont., reports a light demand with no particular change in hay prices, upland being offered at $25.

The Spokane hay market shows a weaker tendency and generally the season is rather early for the lively demand.

The warehouse of the Western Grain Co. in the suburbs of Ft. Smith, Ark., suffered a fire loss recently at which time 120 tons of baled hay were destroyed.

Seattle is quoting No. 1 timothy at $33.50; demand however is still a little slow. Receipts have also been moderate owing to difficulty in securing cars for shipment.

Prosser, Wash., reports present demand for hay light but with a good outlook for the future. The market is weak and growers are not offering at present prices.

The hay barn with 120 tons of baled hay of the Western Grain Co. at Little Rock, Ark., burned about a week ago. Neighbors think the premises were set on fire by incendiary.

Miles City, Mont., reports not only hay but mill feeds and feed grains being shipped in in response to active demand with stronger demand ahead as stocks of feed are very low at the present time.

L. E. Ross of Montrose, Colo., has been appointed inspector to stop shipments into that county from districts infested by alfalfa weevil. He is operating under the direction of the State Entomology Department.

The American Steel & Wire Co. in its crop report for the week ending Sept. 6 says that forage crops are in good shape over practically the entire country although there are some reports of local dryness. However such reports are not alarming as the time for fall rains is fast approaching.

It is said that the staff in the Dominion Land Office at Battleford, Sask., is working overtime to keep up with the number of applications for hay permits. The farmers and ranchers from all parts of Saskatchewan and Alberta are now moving as far north as 200 miles beyond Battleford to find feed for their stock.

John H. Devlin of Albert Miller & Co. is recuperating from an illness that has been of several weeks duration. His son with others handling the large hay business of the company states that "the pater" is restless to get back on the job and to participate as he has for a lifetime in the big hay business that opens up in the fall.

George Train of the First National Bank of Chisholm, Minn., says that the hay crop raised by Balkan farmers, now ready for the market, is valued at $15,000. It is available for farmers of Western states hit by the drought. The hay acreage was increased nearly double, as farmers have made rapid progress in clearing the stump lands.

The *National Weather & Crop Bulletin* for the week ending Sept. 2 says that the weather was mostly favorable for haying and the harvest generally made good progress in the South and the cutting of alfalfa was carried on rapidly in the West. Stock are showing the effects of dry weather in most of the West and feeding has been necessary in some more Eastern districts.

In a late issue of the *London Grain, Seed and Oil Reporter* the statement was made that the government had no present intention of commandeering or controlling the distribution of the 1919 hay crop. Should prices rise to an unreasonable level the Board of Trade would have power to fix prices under the profiteering Act but as yet the government which is maintaining a careful watch over the situation does not consider such action necessary.

The New Orleans *Times* says that the automobile in that city has reduced the local hay business 50 per cent in the past two years. It quotes figures to show that in 1912 the number of cars handled in January, February and March were 1,003 cars and same months of 1919 only 424. In 1915 the number was 998. A large part of hay now being received at New Orleans is sold to dealers in the country. During recent months a large part of the alfalfa shipments has been billed direct to New Orleans from Colorado.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

C. F. Arnold of C. F. Arnold & Co. has returned from a fishing trip, which constituted his first vacation of any extent since the entrance of America into the European war. Two sons of Mr. Arnold, members of his firm, were in the army during the war. Now both are home, so Mr. Arnold enjoyed his vacation.

Capt. Nelson L. Coombs, who has been serving the Forage Branch of the United States army almost since its inception, was a visitor in Kansas City the past week, coming here from Chicago. It is said Captain Coombs expects his early discharge from the army. He has served the Forage Branch ably, and his record in the army is one which will always commend him to the hay trade and one over which he has reason for being unusually happy. Service in the army has meant a great personal sacrifice to Captain Coombs.

Improvement in growing hay crops and pastures is reported in the Southwest, rains having been almost general, according to weekly weather and crop reports of the surrounding states. Kansas—"The long drouth was broken over all the eastern half of Kansas by soaking rains, but only scattered showers fell in the western half. Pastures are greening up and alfalfa resuming its growth where rains fell." Missouri —"Rains, excessive in some localities, fell over most of the state. In Platte and Buchanan counties the last crop of alfalfa is making fair growth. In all central counties grasses and late forage crops have been greatly benefited by the recent rains." Oklahoma— "With rains during the week, soil moisture is now good practically over the entire state. The drouth that lasted since early in July in the eastern and north-central portions has been bro-

ken. Alfalfa and pastures impr

"Article X must stand!" "Sha will come out all right!" "No, i never do, you are wrong!" One think these and other exclamatio confined largely to the floor c United States Senate at Wash and to the halls where Presiden son is speaking for the League tions. But the foregoing and exclamations emanate from the of the secretary of the Kansas Hay Dealers' Ass'n when dealer gregate during their spare mo which are rare. The Kansas Cit trade has weighty problems to sc determining whether alfalfa is higher or lower, whether to ship Northwest or not, whether to storing of prairie, and whether t chase timothy in Iowa. But the many dealers who are capable tending efficiently to the hay bu on the largest market in the wor at the same time to find leisure signally to discuss the League tions. And how they are debatir discussing! They are engaging oratorical combats. It is probabl as a result of these combats, B. F. will soon be dubbed the Senator and C. M. Funk the Senator Hit of the hay men's "meetin's."

Maintaining that the stricken area of the Northwes not be a heavy buyer and tha year's production in the United shows an increase of 20,000,00 C. D. Carlisle of the Carlisle Co sion Co. believes a downward tr hay prices probable. "Many ha ket interests have forecasted a demand for alfalfa, prairie and varieties of forage from Montar surrounding states which are su from drouth," declared Mr. C "But that territory has thus far only scant purchases of hay, and ticipate no important broaden the Northwestern demand later year. A comparatively large a of hay that has already been into the Northwest has been reje buyers. A large number of ca the suffering areas are being m more favorable pastures in Min Wisconsin, other northern state into the Southwest, including Also numerous herds are findin way into market channels and taken by packers for slaughter. is an enormous amount of hay

Hay Markets

PHILADELPHIA.

Sept. 6—Baled hay and straw supplies are increasing and with only a moderate demand the market for hay is weak and lower. Straw quiet but steady under light offerings.

Timothy Hay—No. 1, $35; No. 2, $32@33; No. 3, $29@30. Clover mixed hay—Light mixed, $31@32; No. 1 mixed, $29@30.

Straw—No. 1 straight rye, $13.50@14; No. 2 straight rye, $12.50@13; No. 1 tangled rye, $13@13.50; No. 2 tangled rye, $12@12.50; No. 1 wheat straw, $12@12.50; No. 2 wheat straw, $11@11.50; No. 1 oat straw, $12@12.50; No. 2 oat straw, $11@11.50.

DETROIT.

Sept. 6.—Receipts of hay have materially increased during the past few days and an easy market is quoted at a decline of about $2. Demand is active. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $25@26; No. 1 mixed, $24@25; No. 1 clover, $24@25 per ton in car lots.

BOSTON.

Sept. 6.—Receipts of hay were heavy during the past week and as the holiday interferred with business to a considerable extent a generally quiet demand prevailed. As a result of increased arrivals and lack of demand, there is now a considerable accumulation of new hay at the various railroad terminals for which there is very little inquiry. Weather conditions also have been unfavorable to the local movement of hay. Buyers are taking advantage of the depressed condition of the market and buying in most cases at concessions from asking prices. As receivers are anxious to move cars in order to stave storage charges the market at the present time is in favor of the buyer with some pressure to sell. Some of the new hay arriving is out of condition, showing considerable heat and sells at considerably under open quotations. Old hay is offering in a limited way at $1.00 to $2.00 per ton above quotations on similar grades of new hay. No 1 timothy hay is quoted lower at $35@36 per ton for large bales and $34@35 for small bales. No. 2 timothy hay ranges at $32@34 for large and $30@32 for small bales. No. 1 eastern is quotable at $31@33 and No. 2 eastern at $26@29. No. 3 hay is scarce and held at $23@26. Clover mixed, all grades, is quoted at $25@29 and fine hay at $22@25 for poor to choice. Packing is quoted at $17@19. Receipts for the week ending Sept. 6 were 214 cars.

A steady market on rye straw at $17 per ton for the bulk of the offerings. Oat straw a shade firmer with most offerings held at $14. Receipts for the week ending Sept. 6 were 6 cars.

DES MOINES, IA.

Sept. 6.—Receipts of hay have been somewhat heavy during the past week. Western upland hay is now being received in quantities sufficient for the demand. Upland hay is quoted at $24.50. Alfalfa, first cutting at $23.50. Wheat straw, $9 per ton, and oat straw, $10 per ton.

NEW ORLEANS, LA.

A new ruling relative to shipping grain for export from Oklahoma City is expected to bring to that station 2,000 more cars annually than heretofore, permits now being issued to bring grain to Oklahoma from El Reno as well as over the Wichita Falls & Northwestern Road.

THE HAY SITUATION.

HAY CROP SHORT.

INDIANA.—Crop 20% short. Quality not better than No. 2. Producers not inclined to sell at prevailing prices. Wheat acreage cut 40 to 50%.—*Collins & Swallow, Lake, Ind.*

100% CROP.

NEW YORK.—The 1919 crop of hay in Cayuga Co. in New York State is a 100% crop, and while some became overripe before cutting, it was mostly secured early in good condition.

Farmers have been free sellers and the crop is moving out rapidly.—*Crowninshield Mill, Cato, N. Y.*

AVERAGE CROP.

INDIANA.—Replying to your favor of the 3d, regarding the hay crop in this section, beg to advise that we have an average crop of timothy and clover hay. The timothy hay is fair to good, but the clover is over-ripe and not more than 25% fit to market. Not much hay moving, as farmers are busy and holding for more money.—*Oscar A. Cook, Boonville, Ind.*

MAINE HAY.

SOUTH BREWER, ME.—Hay in this section is about an average crop, the larger part housed in better condition than for the last two or three years on account of more favorable weather for cutting. Prices are quite high, loose hay of first quality bringing from $20 to $25 per ton delivered, and many are looking for still higher prices. Stock of old hay very light and demand limited.—*F. H. Brastow & Son, South Brewer, Me.*

GOOD-SIZED CROP.

CONNECTICUT.—Relative to our opinion on the hay situation, we would say that after careful inquiry we believe there was a good-sized crop of hay raised in this section, the new land and land seeded to clover yielding big. Of course, the stocks of old hay in farmers' hands were reduced to a minimum. We do not believe that there is any very large stock of baled hay in this section, but in spite of that do not look for very much of a demand for the new baled hay for some time to come.

In the past two or three years there has been some hay baled by the farmers hereabouts and they have already started baling this year. New hay can be bought for less money than the Western hay can be laid down here for. Although this does not anywhere near take care of the demand, it takes the edge off, and with the strong feeling in the trade that the new hay is too high, we doubt whether anything more than a hand-to-mouth business will be done until prices work to a lower level.—*The Coles Co., Middletown, Conn.*

up on hay, but receipts at New Orleans have been fair and old stocks are being gradually reduced. Quote No. 1 from $34@35; No. 2 from $32@33 and No. 3 from $31@32.

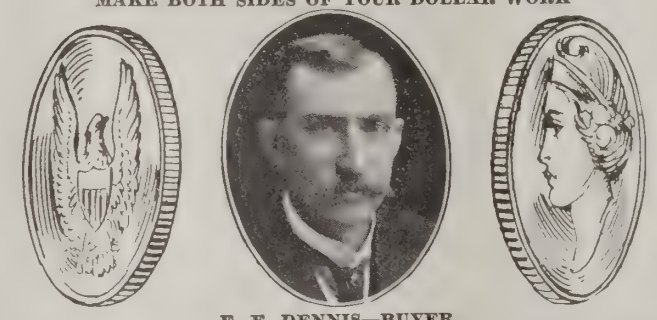
CINCINNATI.

Sept. 9.—The recent high values current here, poor shipping demand, and heavy accumulation of hay over the holiday, was mainly responsible for a congested condition in the terminals the past week which threatened an embargo against further shipments to this market unless the tracks were immediately cleared. Following a discussion of the situation with the local U. S. Railroad Administrator by exchange officials later, it was however determined that no embargo was necessary at present, but that instead, two pluggings at the yards with sales twice a day would be substituted in an effort to rid the market of the excessive offerings. This arrangement was gratifying of results, and on Friday more than 100 cars were absorbed by local and outside buyers in morning and afternoon sales without adversely affecting prices. Early in the week losses of $2 per ton were recorded for timothy and light mixed, though exceptional quality on all days realized a premium. Heavy mixed, clover and even low grade stuff and straws were in urgent demand at well maintained prices.

Saturday the market was active and firmer, with 67 cars sold, or a total of 173 cars in two days. Receipts for the week were 241 cars, there is still considerable hay in the terminals.

Extension of the plugging yard trackage to an additional 37 cars has been authorized by the board of directors of the Grain and Hay Exchange in a contract with the L. & N. railroad. The addition will increase the capacity of the plugging tracks to 100 cars of hay daily and will greatly facilitate handling of the enormous quantities consigned to this market. The improvement includes widening of a roadway to be constructed of macadam. and with the extended trackage will cost the Exchange about $3,500.

No. 1 timothy, $29.50@30.50; standard timothy, $29@29.50; No. 2 timothy, $28@29; No 3 timothy, $26@28; threshed timothy, $15@17; light clover mixed, $29@29.50; No. 1 clover mixed, $28@29; No. 2 clover mixed, $27@28; No. 1 clover, $35@36; No. 2 clover, $33@34; sample, grassy, $23@25; No. 1 local alfalfa, $35@36; wheat straw, $8@8.50; rye straw, $11@12; oats straw, $8@8.50.



PITTSBURGH.

Sept. 6.—Owing to the holiday period receipts were abnormal on the reopening day, and prices slumped on all grades except good green clover and No. 1 mixed clover hay. Low grades are unmarketable here at any price and are not wanted as they merely add to congestion. Quotations follow: No. 1 timothy, $33@33.50· No. 2 timothy, $28.50@29.50; No. 1 light mixed, $29@30; No. 1 clover mixed, $30@31; No. 1 clover, $30@31; No. 2 clover mixed, $24@26 Total receipts, 1,572 tons, compared with 1,700 for the same week last year.

MEMPHIS.

Sept. 6.—Hay conditions are without special feature, and the buyer and seller are disposed to do little both sides trying to see what the other will do. There has been limited demand and offerings have as a rule been above the value ideas of those who would buy. Alfalfa handlers say that the difference is around $9 a ton. The other varieties are similarly affected the result being a quiet week. For spot stuff quotations are about as follows: No. 1 timothy, $33; No. 2, $28· No 3, $26. Light clover mixed was $31 bid on call today, while 1 clover mixed was offered at $32, and $31 was bid. No. 1 alfalfa is offered at $33@33.50 but for New Mexico No. 1 $34 is asked and $32.50 bid. Standard was $31 bid and No. 2 sold at $29. Some dealers say they can see signs of better business soon.

LOUISVVILLE, KY.

Sept. 6.—Hay has been moving in much better during the past week, daily receipts average twenty cars. Demand is fair for timothy and timothy mixed with clover, Clover is dull. The clover crop promises to be a short one, but Kentucky alfalfa production is heavier all the time, and looks especially good this year.

Quotations are: No. 1 timothy, $31 a ton, baled, car lots, Louisville; No. 2, $29; No. 1 mixed, $29; No. 2, $28; No. 1 clover, $27; No. 2, $25; wheat and oat straw, $10; rye straw, $12; local alfalfa, $35; Western, $38@39.

DULUTH.

Sept. 6.—The hay market has been slow and draggy of late and prices in timothy and midlands eased off $1. Feeders were said to be obtaining sufficient loose hay to cover their immediate requirements. The call for the top grades was, however, sufficient to take care of the limited receipts, but the off grades were found difficult to dispose of. The recent good rains over this part of the country have promoted luxuriant pasturages. Quotations follow, per ton: Timothy, No. 1, $26@27; No. 2, $24@25; mixed timothy, No. 1, $25@26; No. 2, $16@20; prairie, No. 1, $23@24; No. 2, $21@22; No. 3, $16@18; midland, No. 1, $18@20; No. 2, $14@16; straw, rye, $9@10; oat, $9@10.

BUFFALO.

Sept. 6.—No demand here, and there were offerings of No. 1 at $26; No. 2, $24@25, on track. Regular hay buyers are not anxious to get into the market until general feed conditions are more settled.

OMAHA.

Sept. 6.—Receipts of prairie hay heavy and demand quiet has caused the market to become easier and lower. Alfalfa receipts light and prices remain unchanged.

No. 1 upland prairie hay, $22@23; No. 2 upland prairie hay, $17@20; No. 3 upland prairie hay, $10@13· No. 1 midland prairie hay, $20@22; No. 2 midland prairie hay, $16@18; No. 1 lowland prairie hay, $14@16; No 2 lowland prairie hay, $11@13; No. 2 lowland prairie hay, $8@10; choice alfalfa, $27@29; No. 1 alfalfa, $26@27; standard alfalfa, $24@26; No. 2 alfalfa, $19@22; No. 3 alfalfa, $16@18. Oat straw, $9@10; wheat straw, $8@9.

NASHVILLE.

Sept. 6.—Hay trade was routine last week. Stocks are ample with moderate receipts. Quotations: No. 2 timothy, $34; No. 2 clover, $32; alfalfa, $34@35. Receipts of hay at Nashville last week were 14 cars.

KANSAS CITY.

Sept. 6.—A firm tone prevailed in the market for hay in Kansas City this week. Prices closed mostly unchanged, with the exception of timothy and clover mixed, which scored an advance of 50c to $1 a ton. Receipts amounted to 927 cars, compared with 876 cars last week and 595 a year ago. Demand for alfalfa continued active, inquiry from the South, Southeast and East being heavy. Some alfalfa is moving into the Northwest, but this territory is playing only a minor factor in the trade thus far. Timothy receipts were light, probably the smallest for a week on the new crop, while quality of the offerings was generally poor. Good color timothy hay met with a good demand. Straw was in scant supply with prices showing a rise of 50c to $1 a ton.

Straw, $8@9.50.

MONTREAL.

Sept. 5.—The local market is easy, sales being reported at $19@20 for No. 2 ordinary and $21 for good No. 2 on track. Two cars of good timothy hay mixed with clover are reported sold at $19 on track. The new crop of hay is undoubtedly large, but is somewhat indifferent quality. The quality above No. 2 is very small, and consequently we have not yet heard of any sales of No. 1 new hay in this market. New fields of clear timothy are said to have been gathered into the barn which it is expected will grade No. 1, and are said to be held at prices above what buyers will pay.

As regards the crop in the northwest provinces, some sections are reported to be very short, and already shipments of fairly good hay have been shipped from Ontario and Manitoba and Alberta. Most of the hay in this province, it is said, has been cured red in such a fine and dry condition that what is already baled is fit to ship. In any rate quite a few cars have gone across the border.

The receipts of hay during the last week at Montreal were 4,473 bales, against 9,451 bales for the same week last year.—Trade and Commerce.

BALTIMORE.

Sept. 6.—At the decline in prices the local hay market is about steady, with a more consistent buying in evidence, and the quality and condition of current receipts showing improvement. On everything below No. 1 timothy, however, prices take a wide range, and the movement of common, bad and mixed hay is very draggy.

Straw of all descriptions is fairly firm and unchanged, with limited spot stocks and a more or less constant inquiry in a jobbing way. Quotations follow (all quotations being for new hay), per ton: No. 1 timothy, $34.50@35; standard, $33@34; No. 2, $31@32; No. 3, $25@28; No. 1 light clover mixed, $30@31; No. 2, $28.50@29.50; No. 1 clover mixed, $28.50@29.50; No. 2, $26@28; No. 3 clover, nominal, $25; No. 2, $22.

Straw, per ton: No. 1 straight rye, $17@18; No. 2, $15.50@16; No. 1 tangled rye, $14.50@15; No. 1 wheat, $12@13; No. 1 oat, $14@15.

MILWAUKEE.

Sept. 6.—The new hay crop, which was slow in getting started and has kept market prices high and steady for the past month, is being received in increased shipments and again this week brought about a general price reduction of $1@2 per ton. A fair demand exists and receipts were about sufficient to supply current demands. Choice timothy and No. 1 each showed a price drop of $1. Current quotations are: Choice timothy, $29@30; No. 1, $28@28.50; No. 2, $26@27; No. 1 clover, $20@23; light clover mixed, $26@27; red top and timothy mixed, $25@28; marsh feeding, $14@15; packing, $10.50@11; rye straw, $11@11.50; oat straw, $9@9.50.

CHICAGO.

Sept. 8.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Sept. 6, also the total receipts and shipments of hay from Jan. 1, 1919:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7, 1918.
Total receipts.....	4,010	4,909	3,187
Total shipments....	602	483	537
Rcpts. since Jan. 1.	165,366	161,356	227,212
Shpts. since Jan. 1.	35,986	35,384	35,921

Receipts were noticeably increasing during the week but there were not sufficient arrivals of the better grades to satisfy the keen demand. Prices advanced during the week and were quotable Monday, the 8th. as follows:

No. 1 timothy, $30@32; std., $29@30; No. 2 timothy, $25@27; No. 3 timothy, $18@22. No. 1 light clover, $26@27; No. 1 clover mixed, $24@26. Sample hay, $15@20; threshed timothy, $12@15; clover, $23@26. Kansas and Okla. prairie, $20@24; Ia., Minn., Dak., prairie, $15@24. Marsh hay, feeding, $13@16; marsh hay, packing, $10@12. Rye straw and oat, $8@9; wheat, $7@8.

NEW YORK.

Sept. 5.—The New York Hay Exchange reports the New York hay market as follows:

	Hay, tons.	Straw, tons.
Receipts for week (5 days)..	3,471	230
Receipts last week.....	4,012	250
Receipts Sept. 1, 1918 to Sept. 1, 1919	228,554	14,578
Receipts Sept. 1, 1917 to Sept. 1, 1918	199,042	8,422

Market continues irregular and while prices have declined still further on most grades the situation seems somewhat healthier at the close and the tendency is to hold prices fairly steady on the present level of values. New invoices are naturally running very light as practically all of the principal harbor points are now embargoed, but there is still a liberal quantity of hay rolling and supplies on the market from day to day have been sufficient to care for all requirements. Most of the hay now arriving is new and our quotations as given in the table below are meant to cover that class of goods, only a few buyers now willing to pay a premium for old hay. At 33rd St. shed there were 78 cars unloaded from Friday to Thursday of this week, trade irregular and market still somewhat in buyers' favor at the quotations though top qualities are held steady, most of the hay arriving grading from a poor No. 2 down. Very little hay available in Harlem and prices nominally are about on a par with 33rd St. In Brooklyn prices have averaged almost $2.00@3.00 a ton above other harbor points; but at the close trade is slow and values are gradually adjusting themselves closer to a parity with values at other points.

There is scarcely any No. 1 timothy available and it is doubtful whether $36.00 could be exceeded at the close though we hear of some recent business in bang-up old hay at a higher price. In No. 2 hay some recent business in top quality goods is reported up to $34.00 though that figure is very extreme at this writing, and some very ordinary No. 2 has sold down to $31.00 in one or two instances even lower. No. 3 and shipping range mostly $27.00@29.00 and $24.00@26.00, respectively, rarely higher and lower. Small baled hay is averaging $1.00@2.00 a ton lower on medium and top qualities and $3.00 lower on poor hay. There is little call for light mixed hay in about the range of prices quoted, but heavy mixed is not wanted. A little straight clover has worked out in Brooklyn at $25.00@31.00 as to quality.

Rye straw somewhat easier with some business reported at the close down to $16.00. Oat straw scarce and wanted.

Quotations.

	Large bales, per ton.	Small bales, per ton.
No. 1 hay.....	$35.00@36.00	$34.00@35.00

No. 3	.....	24.00

ST. LOUIS.

Sept. 6.—Receipts of hay during the past week liberal, consisting mainly of medium and low grades of hay.

Timothy hay market rules firm on No. 1 and standard grades which are in excellent local demand. Medium grades slow and low grades dull and difficult to place, some accumulation on market remains unsold. The tendency is for lower values on hay in line with decline in other feed stuffs. Threshed timothy dull and slow.

Light clover mixed hay steady with a good demand for No. 1 light mixed hay, but off grades dull, slow and irregular in price.

Heavy clover mixed hay scarce and in urgent demand, offerings readily salable at full prices.

Pure clover hay in scant supply and excellent request, when offered is readily sold at full values. Off grades, if sound, selling comparatively well.

Prairie hay steady, receipts light and demand good for sound grades.

Alfalfa hay continues to rule firm with an active local demand for choice No. 1 and standard alfalfa, but lower grades are in liberal supply and quiet.

Straw, steady.

Track Sales. Timothy—No. 1, $32@35; standard, $30@31; No. 2, $27@30; No. 3, 23@24; headed, $23@25; threshed, $15@18. Light clover mixed—No. 1, $30@31; No. 2, $27@28. Clover hay—No. 1, $32@33; No. 2, $28@30. Heavy clover mixed—No. 1, $30; No. 2, $27@28. Prairie hay—Choice, $26@27; No. 1, $24@25; standard, $22@23; No. 2, $20@21. Alfalfa hay—Choice, $36; No. 1, $33@35; standard, $31@32; No. 2, $28@29. Straw, $7@7.50.

TAMPA, FLA.

Sept. 5.—The Tampa hay dealers have sufficient hay on hand for immediate needs, but there is a steady demand from country points steadily diminishing warehouse stocks. Receipts during the week amounted to about 27 cars, all shipped as No. 1 timothy and grades running fairly good. There have been very few cases of rejections on the new hay crop. No. 1 timothy is quoted freely at $38.00, representing a decline of from $1.00 to $2.00 per ton during the past week. Very little trouble is being experienced with hay becoming heated en route. However, there is room for improvement in the baling of hay coming to this market, and the use of three wires is warmly advocated by Tampa hay dealers.

August Hog Statistics.

Following is a statement of receipts, weights and market for live hogs received at Chicago as compiled by John Tredwell & Co., Chicago:

	August receipts.	August ave., lbs.	Ave. price first Tuesday. Sept.
1919	384,068	251	$18.55
1918	434,363	243	19.50
1917	351,853	233	17.90
1916	604,489	232	10.90
1915	465,494	246	6.90
1914	430,043	248	8.92
1913	592,184	233	8.51
1912	453,041	240	8.32
1911	506,511	239	7.14
1910	464,373	255	9.25

The above shows that hog receipts for past month were the lightest for August for ten years, excepting 1917, and the weights the heaviest since 1910.

The first carload of Minnesota wheat of the 1919 crop delivered at St. Paul graded No. 2 mixed and brought a price of $2.70. The manager of the elevator immediately hustled off to New York to complain to the Grain Corporation that the farmers were not getting "what was coming to them."

The *Michigan Weather & Crop Bulletin* reports corn in fair condition and early corn cutting begun by Sept. 1. The bulk of the crop however will not be saved until the 15th. Ensilage corn cutting is quite general.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Sept. 8.—Provision prices had a wide range yesterday and while declining early on liquidating and short sales, rallied and closed well toward the outside prices with September pork up $3 and October up $1.62½. September lard lost 17½c, October 55c and January 85c. September ribs gained 59c and October 32½c. A great deal of the selling was by grain interests who were bearish and by the smaller packers here and in outside markets who were hedging against the output of their houses, owing to the slowness of the domestic and foreign demand. At the low point lard was off $2.10 for October and $2.40 for January, with September $1.72½ under the close of the previous week, while in ribs the low was 82½c on September and $1 on October. It required little pressure to depress prices for pork at times, especially for the October, while the September advanced $1 at times with very little trading, especially after the early decline. Continued low prices for foreign exchange and an erratic hog and corn market were bearish factors.

The provision situation is a puzzling one. With the Government after the packers and trying to decrease the high cost of living, there is no inducement to buy provisions in expectation of a big advance, and the bulge from inside prices was attributed largely to shorts covering and operations by the packers, several of the larger local houses buying openly toward the last, which had a stimulating effect on values by forcing shorts to cover.

A little inquiry for lard from abroad was received late in the week and cash lard was September price to 12½c over at the close. There were deliveries of around 2,000,000 lbs. of lard during the week and 650,000 lbs. of short ribs.

Monthly stock reports showed large decreases in lard and meats during August, but supplies are liberal. In some quarters there is a slightly better feeling on dry salted meats. Supplies of short ribs are small, but of short clears, backs and bellies are liberal. Reports from abroad indicate that there are fair supplies over there, but the low rate of exchange is against the export business. There continues to be a heavy loss in cutting hogs.

A point is made by specialists that January product is selling on the basis of $15 hogs, while the September and October are based on $20 to $22 hogs. They question the advisability of discounting the future to such an extent. If P. S. Goodman is right, with his estimated decrease of 2,000,000 hogs, or 3 per cent, supplies will not be burdensome. Prices for the week follow:

Kansas City Provision Review.

KANSAS CITY, Sept. 6.—Lower prices were recorded in the trade in provisions on the Kansas City market this week. Pork loins were off ¼ to ½c, while the cheaper cuts of fresh pork showed a recession of ¾c to as much as 1¼c compared with a week ago. Local buying of fresh pork was good, and liberal shipments were made to the East. A good movement of frozen cuts also was reported to the East. With harvest operations progressing in the South, packers made heavy shipments of dry salt and heavy smoked meats to that territory. A decline of about ¾c to 1c was quoted on dry salt meat. Fancy smoked hams and bacons were off ½c, though sales in instances were about steady. A fair demand prevailed for lard, with prices down about 1c. Cooking oil and other substitutes also met with a fair demand.

Stocks of provision products in Kansas City decreased from 76,558,700 pounds at the opening of August to 63,414,000 pounds on September 1. A year ago the holdings amounted to 51,381,000 pounds.

Export of Hog Products.

The past week's export clearance of hog products, compared with corresponding time last year:

	Sept. 6, 1919.	Aug. 30, 1919.	Sept. 7, 1918.
Pork, bbls.	1,140	560	290
Pork, lbs.	216,600	106,400	188,100
Meats, lbs.	27,752,000	28,404,000	25,054,000
Total meat	27,968,600	28,510,400	25,242,100
Lard	10,749,000	5,491,000	1,311,000
Total products.	38,717,600	34,001,400	26,553,060

Receipts and Shipments.

Receipts and shipments of live stock at Chicago the past week compare as follows:

	Hogs.	Cattle.	Sheep.
Receipts—			
Past week	74,896	54,020	142,070

Av. 1911 to '18	$10.00	$10.95	$ 6.75	$10.20

Meat Exports.

The Bureau of Markets reports the following meat exports from New York for week ending:

	Week Aug. 30.	Since July 1.
Beef—		
Frozen or fresh	316,355	38,877,137
Canned and pickled	694,305	10,213,126
Lamb and mutton	3,586	39,987
Pork—		
Fresh or frozen	824,355	5,302,752
Bacon, hams and shoulders	3,837,647	70,945,149
Lard and lard compounds	4,625,781	72,709,646
Sausage	53,753	1,980,508
Dry salt and pkld	5,216,516	78,843,202
Poultry and game	400	589,391

During this period there were exported six horses to England, nine horses and 402 cattle to Belgium, 130 horses to France and two mules and six horses to Bermuda.

Ed. S. Walsh, state superintendent of public works in New York, advocates state ownership of grain elevators located on the canal at Buffalo and New York City. Mr. Walsh thinks that state ownership is a cure for all deficiencies in the canal business. Very likely he is mistaken.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	1919. To Sept. 6.	1918. To Sept. 7.
Chicago	3,451,700	3,503,700
Kansas City	1,409,600	1,368,800

For the week	294,000	389,000
Preceding week	402,000	382,000

Weights are reported as follows: 200, 251, 241, 216, 184, 196, 275, 242, 213, 225. Reports of quality: Four "good," one "fair to good mixed," one "fair."

Cash Meats.

On Monday there was a weaker tone to the hog products market affecting mess pork, lard and ribs although there was a moderately active trade in pork with a rather light trade reported in the latter products. Mess pork declined $1.25@2.50 but rallied to the extent of 25c before the close. Exports of lard were rather large with fair inquiry reported. Trading in ribs was mostly in the October and January deliveries. Quotations follow as of Monday, Sept. 8:

Live Stock Market

CHICAGO LIVE STOCK

CHICAGO, Sept. 8.—The supply of hogs last week was better than average and the range smaller though the market fluctuated sh throughout the week, and the clos not as high as the best figures. t was a larger proportion of w ished hogs offered, shippers ho back the poorer lots and there more heavy and less packing g while light weights and common lots were not so plentiful. Top on Saturday was $20.25 and the av $9.15, or $1.15 higher than the pr Saturday, and the spread at the was $1.10, being the smallest Aug. 13. The top of the week $21, or 65c lower than the pr week and 60c above last year's average was $18.45, or 25c lower the previous week, and 80c under year. For the week averages fluc about 40c. Average weight was 2 compared with 262 lbs. the pr week and 252 lbs. last year.

Packers bought 69,000 against 1 the previous week and 86,800 last The Armour interest took 19,400, 15,000, Wilson 7,100 and Morris Receipts for the week were 72,9 unusually small run, and the smallest since the beginning year. Shipping orders were liber the outward movement was 9,5 ing restricted by car scarcity an pared with 70,675 last year. twenty markets had 340,000, a l 101,600.

An advance of from 50 to 7 made in the better grades of catt week, although the plainer grade little changed. The bulk of the was rather poor and top prices $17.85 for heavy weights and yea while good steers generally sold to $17.75, with comparatively above $17. The bulk of the steer around $14 to $16 for the fair to with the commoner lots down and poor around $10. Average week was $15.75, or 15c lower th previous week and 50c under last

The market early in the wee weak, with receipts heavy, but th was 53,900, or 22,100 less than t vious week and 30,700 under last There were 19,400 rangers in, 23,500 the previous week and last year. The twenty marke 338,400, a loss of 61,300 for the For the year to date the run ha 9,813,500 cattle.

Choice heifers sold up to $ there were more that sold at $ below than above the latter figu the range for the bulk of the o was $9 to $13, with the poores and heifers down to $8 and Bulls were 50 to 75c higher i week, although the market wa most of the time. Lighter s toward the last brought the a Bolognas sold at $7.25 to $7. butchers' grades ranged up to the best. Canners and cutter to $7.75, calves gained 50c wit wanted more than any other kil ranged up to $21 at the last for The heavy calves were slow sal

Stockers and feeders were not to any extent with supplies of and Western liberal. Western stock of good quality sold 50 under dehorned of the same The average for the week was or 25c higher than the previou

Sheep finished the week 25c with the average $8.75, a gain compared with $11.90 last yea bulk of sales was at $8 to $9. the top $10, against $11.25 the l week. Fat native lambs were $15, or $1 higher than the l week, and the average was against $16.20 the previous we $17.40 last year. Receipts twenty markets were 637,600, crease of 32,000 for the week.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Sept. 6.—Bearish sentiment dominates as the live stock market nears to a close this week. The trade is waiting for heavy supplies of cattle and hogs in particular the remainder of the month and through October, and will not be surprised if the records of a year ago in cattle runs are equalled. As for hog supplies, offerings are light now, but the run of matured spring pigs are expected to be heavy next month. Bearishness was caused by the fact that cattle displayed weakness this week in the face of reduced receipts. The week's arrivals of hogs and sheep increased, the movement of sheep being a little more than double the volume of a year ago. A liberal number of drouth cattle from the Northwest, and it is reported that some of the extensive pasture districts in Kansas are experiencing dry weather, which is stimulating their desire to make shipments.

Shortage of cars is restricting the movement of cattle to a degree. There are many unfilled orders for cars in Kansas, Oklahoma and Texas, and New Mexico is beginning to call for equipment to make shipments. The Santa Fe railroad put on an embargo for a few hours Wednesday on loading shipments from Kansas City in order to save cars on its own lines to meet the Southwestern demand. The Southwest drouth-stricken areas are making a drain on the car supply for market cattle and for moving cattle to other feeding districts, including Kansas City territory.

Cattle prices declined mostly 25c to 50c. The better grass-fat cows showing the least one. Kansas grass steers sold between $9 and $16.25, and the top on corn-fed was $18.75. Some grass-fat cows sold at $11, but the bulk ruled between $6 and $9. Veal calves closed $1.50 higher. Killer and feeder supplies were heavy, with large accumulations. Iowa and Illinois were the best buyers, and prices lost 25 to 50 cents. The bulk of the Kansas and Oklahoma pastured cattle are losing large numbers to the graziers who have handled them at $20 to $30 a head losses being common.

Hogs were erratic, advancing $1 at the start and losing the gain later. Offerings were of common quality. The average cost of droves for the week was $18.61, compared with $19.39 the preceding week, this difference being explained partly by inferior quality. The top for the week was $19.60 and $19.60 at the close.

With the largest receipts of the season, cattle and lambs closed 25 to 50 cents lower with prices early $1 to $1.50 lower.

Oklahoma Live Stock Market.

Susnelda Haehnke, Correspondent.

Oklahoma City, Sept. 6.—The week started out with a pretty fair run of cattle but gradually got less towards the close. Receipts were scarce in both quantity and quality. The light receipts were due in a measure to dressed beef conditions in the east. The steer market was considered steady for the week. Although there was a decline in prices the fore part of the week, it was made up at the close. Several loads of steers averaging around 1,000 to 1,250 lbs. have been 11c and some choice good light steers from $9.50 to $10. Common light grades $8@9. The supply that went to packers was not very large but those that did go went at fully steady prices.

The butcher supply this week was fairly large. The beginning of the week some choice fair grassers went at $10. Several loads of cows brought $7.75@8.25 but those sold around the extreme were the best prices here in many months. The butcher stock trade was active towards the close of the week and some good heifer beef went at $9.50.

Calf prices are steady for the week with the exception of cows being from 10@15c lower. Canners and cutters are going around $6, canners and cutters, $4.50@5.50, with some old bulls at $4.25. There were very few calves here and those went at steady prices. Stocker and feeder market was a rather quiet affair, a few good yearlings and heifers selling around $9. Stock cows and heifers are going up to $7.

Hog receipts here along the hog line have been good, but the market is lower. Not since the third week in June have local receipts totaled as much as they did on Wednesday. $19.70 was the top here during the week, although quality was of fair average, it was not as good as could have been used. Good butchers had no trouble making $9.25@19.55 the latter part of the week. Stockers are steady. A week ago tops were $19.25; bulk, $18.35@19, while a few extra good the best brought $19.75.

Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

Omaha, Sept. 6.—Cattle receipts were fairly liberal here all week, though the week's total of 45,500 head is 16,000 short of last week and near record run. Cornfed receipts were light, most of them on the medium order. Best broke 50c with plain to medium off in extremes. $16.50@17.50 is paid for best heavy steers, with yearlings up to $18. Butcher stock recovered part of last week's decline, and bulk of the sales of prime cows at $8.50@11 is 25@50c higher than a week ago. Calves at $13 and bologna bulls at $5.50@6.50 are practically steady for the week. Western stuff sold a little higher Monday and Tuesday but eased off on closing days, and while kinds are no more than steady with a week ago, while common to fair steers are as much as 50c lower. A few prime heavy steers are bringing $13.50@15, while $11@13 buys bulk of the good to choice offerings, and plain to medium kinds sell from $10 down to $7 and less for common canner steers.

Demand was less eager for stockers and feeders, and after advancing 25@50c Monday and Tuesday the market broke sharply the balance of the week, closing 50c@$1 lower than the early high time, or mostly 50c under a week ago. A spread of $10.50@12 is buying most of the good to choice feeders, only a few prime fleshy steers selling up to $13 or better. Medium feeders and best stockers sell around $9@10.50 with the plainer stuff on down.

Under the influence of much lighter receipts at all points, hogs reacted from last week's bad slump. Locally the week's supplies footed up only 16,500 head, and the market is closing with most of the hogs selling over $1 higher than a week ago. Heavy shipper buying has featured this week's trade, and shipper kinds are $1.75 higher than a week ago. Top today was $19.25, and bulk is selling at $17.35@18.

Receipts of sheep and lambs set a new high mark for the season this week of 197,000 head, but since Monday and Tuesday, when best fat lambs sold down to $14, prices have been on the upgrade and current values are on the average 50c higher than a week ago, or in some cases $1 above the low spot. Bulk of the killer offerings sold at $14@15 on the close. Old sheep showed no change and closed with ewes at $6.50@8, wethers at $8.50@9.25, and yearlings at $9@9.75. Feeders failed to share the recovery of killing grades and are 75c@$1 lower for the week, with lambs going to the country largely at $12.50@13.75.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Sept. 6.—Receipts for week ending Sept. 6, 1919: Cattle, 26,391; hogs, 43,256; sheep, 10,823. The receipts of cattle this week show a small decrease when compared with last week's receipts, due to the demoralized condition of all markets, however, there has been slight improvements in prices this week. There has been a fair demand for good cattle both in the steer and butcher line. Stock cattle, excepting extra quality, are about steady with last week's close, best grades being 15@25c higher. Our receipts of grass cattle from Oklahoma were light but the prices realized were more encouraging than last week's. Veal calves have shown a marked improvement in prices. On Thursday the best grade of these animals sold for $20.50, which is the highest price veal calves have ever sold for on this market.

The hog receipts for this week do not show as large a decrease as the cattle. The market for the week has been steady to strong, the biggest improvement in prices being on pigs. The market is closing today 50@75c higher. Today's quotations are: Mixed and butchers, $18.90@20; good heavys, $19.40@19.75; rough, $15@16.25; light, $19.25@19.75; pigs, $15@19; bulk, $19.15@19.85.

The receipts of sheep like cattle and hogs have shown a decrease this week as compared with last week. The market has been fairly steady on sheep but lambs have shown an advance, the best market being on fat stuff and lambs of good quality. There has also been an active market on breeding ewes.

Ft. Worth Live Stock Market.

T. O. Walker, Correspondent.

Fort Worth, Tex., Sept. 6.—Live stock receipts for the week are about the same as last week: cattle, 13,800, against 13,600 a week ago; calves, 6,850, against 7,000; hogs, 2,500, against 2,550; sheep, 7,000, against 6,000.

Hogs have been coming in very limited quantities, and quality has been absent. The best hogs of the week sold Friday at $20, and nothing near the price or quality shown then has been in evidence during the six-day period. The market is quoted: Good to choice heavy, $19.50@19.75; medium, $19@19.50; lights, $18.75@19.25; mixed, $17.75@19; razorbacks, $12@16; pigs, packers, $8@12; shippers, $15@17.50.

The small supply now coming is not enough to fill packing needs and this market is relatively higher than river markets.

Hogs slaughtered during the week, 2,062.

Cattle have sold with comparative freedom during the week, the chief demand being for butcher stuff, with this end of the trade closing around 25 cents lower than a week ago. Common to medium weight steers are closing the week steady, with good, heavy steers in light demand and selling 25 cents lower than a week ago. Calves closing steady to 25 cents lower; top, $13.25.

Increase in sheep receipts is due to direct receipts of packers. Few killing sheep and lambs now coming. Stocker sheep and lambs selling steady; muttons and lambs lower at the close.

Canadian Livestock Market.

Montreal, Sept. 4.—The market opened Tuesday at a decline of 50c over the price for select hogs Saturday and the $19 mark held throughout the week although it was thought that if receipts were any way heavy there would be a still further slump in values. The poorer qualities were also cut in price and buyers were noted as grading particularly heavy. There were considerable inquiries for lights during the week but none crossing the scales. Business in the cattle market was slow and draggy at the opening of the week but some improvement was noted later on. Very choice fat steers brought $12 but the bulk of the heavy weight butcher steers changed hands at $10@11.

Movement of Cattle.

Weekly receipts and shipments of cattle and calves at Western centers week of Sept. 6, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at our command at most reasonable rates.

Hotel La Salle

Chicago's Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person	*Per day*
Room with detached bath,	$2, $2.50 and $3
Room with private bath,	$3, $3.50, $4 and $5
Two persons	*Per day*
Room with detached bath,	$3, $3.50 and $4
Room with private bath—	
Double room	$5 to $8
Single room with double bed	$4, $4.50 and $5
Two Connecting Rooms with Bath	
Two persons	$5 to $8
Three persons	$6 to $9
Four persons	$7 to $12

USINESS AND TRADE CONDITIONS

HE speaking tour of the President recalls An- drew Johnson's "swinging 'round the circle" in the middle 1860s, when he too found it ient to appeal to the people from an obstrep- Congress. President Johnson had attempted tinue Mr. Lincoln's "reconstruction policy," in ndeavor to restore the Southern state govern- to functioning and do it in a way to rebuild cial and economic relations of a divided people quickest time possible and reduce to a mini- the animosities created during a generation of ors ending with four years of war. But this met with the fiercest opposition at the hands arles Sumner in the Senate and Thaddeus s in the House, both men who hated the South an intensity which had no fixed limits. Some- of the same sort of bitterness of feeling has njected into the present struggle. It is more neans of breaking down the apparent political of Mr. Wilson than a sincere attempt to save ation from disaster in its foreign relations that epublican leaders have begun anew the "twist- f the British lion's tail," which Americans ng no hyphen had begun to believe had per- tly ceased to be an American politician's di- n.

President himself has undoubtedly gained r approval for the Treaty—probably he had efore he began his tour. The people are sick red of the war in all its protean phases and a legal as well as a *de facto* peace. The mate- ndition and the moral welfare of this Nation t improving as the Senate plays its own pol- The game as the Senate plays it does not rue—there are too many false notes. And esident for his part has not entirely satisfied ends by his own appeals to popular delusions scontent. Ratifying the Treaty will assuredly restore normality to business and industry hout the world, but *per se* it will not reduce st of living here at home. And altering the will not *per se* isolate us from the rest of the any more than accepting it as it stands will, Senate objectors say, eventually plunge us ar. The President has come to consider the as the *summum bonum* of all things political aterial, while the Senate has allowed itself to nto (or to affect) a provincialism that is even because the changes in the form and sub- of the treaty as proposed by the Lodge com- would undoubtedly create a difficult situa- many respects. As regards Japan alone, it stinct notice to that people that the Senate at nd technically the Nation, has no regard for idence in their pledges to return Shantung in rse to China. The whole matter during the eek drifted still farther out into the whirl estic party politics and away from the more nd safer pools of statesmanship. And the l of the present struggle with that of Presi- ohnson already referred to promises to go to ther length of ending in misfortune to the now as it did in 1866 and after; for undoubt- e defeat of Johnson in his reconstruction work radicals of that era delayed the recovery of th materially for some years and the restora- the good will of the section by many more. wounded Mercutio exclaimed: "A plague on ur houses."

spectacle at Boston during the past week is y the most impressively ominous that has occurred in this country in recent years. That the guardians of the peace should conspire to and actually abandon their posts like street cleaners as the result of conspiracy was enough to show how little such men realize their responsibilities to society, and that the defection of the police with their abandonment of duty should be followed immediately by mob violence and organized plundering by an influx of criminals tells the story of the short distance many men have traveled away from savagery. It is also the answer to the sentimental claptrap that the cure for the evils of democracy is "more democracy" and the deadly peril of a democracy without education of the right sort to sustain it. The men who have made the Russia of today went out from just such a nest as plunged the civilization of Boston in a day into chaos and the week's excesses show that the tribe did not all get out of this country or take their doctrines with them, when Lenine and Trotzky left America's shores behind them. It is a remarkable coincidence that the American "cradle of liberty" should have become a hot-bed of anarchy and democratic criminality. It is a still more significant fact that Mr. Gompers should be appealed to by any one as the savior of law and order, from citizens who for a time defied both the Mayor of the city and the Governor of a "sovereign state." Such a situation should be impossible. The constituted authorities, not a private citizen, should rule and command public obedience to the law.

Unionism seems to have put itself on its trial. At Washington two weeks ago the police made a similar threat to strike and leave the city without police protection if their demands as unionists were not granted forthwith; and certain local papers of the baser sort went into an excess of condemnation of the Commissioner who forbade police unionization with affiliation with the American Federation of Labor, and doubtless only the presence of Congress restrained a rupture. The Commission took the proper position, which the Federation ought to have but did not suggest, that the police cannot claim the right to strike or to form union connections which would enable them, as proposed at Boston on Thursday last to call on all labor not occupying positions where they are personally responsible for the protection of society to throw their influence on the side of public disorder. Such action is tantamount to rebellion. Toward the municipality the police occupy the position and are subject to the same moral responsibilities as do the soldiers of the United States; and Senator Myers of Montana is justified in his position that police unionization and affiliation would mean the end of our Government in its present form. The maintenance of the public order and the power of the municipality to continue to protect property and life, the processes of distributing food, water and fuel are fundamental. Boston's and Liverpool's previous experience has shown that without police protection these primary functions of communal life cannot go on; and the poor suffer first and last and all the time the most. There has therefore been precipitated in this country by the Boston affair, as by the Winnipeg and Liverpool fiascos, the issue direct, between society and unionism in its radical forms, whether society shall bow to the minority or rule it for the safety of all; and to that issue there can be but one ending. Society will rule because the interests of all will rise above the demands of any organization speaking for a minority only. In the field of unionism the radical leader-politician has become as imminent a menace to the working man's security and welfare as the conscienceless politician is becoming in the larger field. Indeed, often the two evils are merged in one and the same persons who belong to all parties.

The strike of steel workers said to be set for the 22d inst. may create more disorder, but it will doubtless be local only. It does not originate with the majority of the men, who have much to lose and little to gain; but the movement is simply one more effort on the part of professional organizers to strengthen their own professional position by connecting up the workers of all industries. The strike seems predestined to failure, for it may be assumed that Judge Gary, head of the Corporation, is well advised in his position that less than 15 per cent of the corporation's men are immediately concerned in the present demands of leaders purporting to speak for all. Therefore the Corporation does not consent to parley or to any proposition which may commit more than 85 per cent of the whole body of workers to the dictation of less than 15 per cent. The mills are proceeding without the slightest reference to the proposed strike. The corporation is booking orders, and, as the *Iron Age* reports, "mill operations are proceeding as if the labor agitators were of another continent."

The President's industrial conference called for October 6 is not likely to settle the industrial problems which are in issue. "Safe and sane" leaders are not numerous just now, and verbal conferences go but a short way when the rank and file of those concerned with and upon whom the practical work of reaching final settlements know nothing of the details of the conference, proceedings and discussions. There is of course always a residuum who are fighting radicalism, but their influence is small in times of hysteria like the present or at any time until after a long series of discussions and tentative efforts toward a working program shall have been developed which even then must be followed by slow and painful steps toward the desired goal. The western world has been on the road toward industrial liberty and comfort for five hundred years and is still groping its way. Since about 1850 progress has been rapid and would have been still more rapid but for the impatience of the masses who have failed to realize what they have gained in half a century and have done most to impede their own progress by following false leaders who promised to gain in a moment what wise men know can only come through the operation of natural law and "after many days."

If industrial peace depends on lower selling prices in the face of rising wages and stationary production, and if these depend on the action of the Government, then the outlook, in spite of the repeated declaration by the Department of Justice, that prices some time ago reached the peak and are now falling, is not wholly encouraging. While prices of live stock and cereals to producers have fallen, due in larger part not to natural causes so much as to sentiment aroused by Government action, *Bradstreet's* index number as of Sept. 1, published on Friday last, was 19.472 as against the 20.001 of August 1. Notwithstanding this reduction of more than 2½ per cent, the September average is still the highest of any month on the record excepting August. The average had risen from 18.896 as of July 1, and the 19.162 of July, 1918, was the highest war-time figure. It would not, therefore, seem from the *Bradstreet* comparisons that a very great impression had yet been made by the Government's campaign.

Indeed, the accompanying statement shows that out of 105 separate articles averaged only 30 de-

clined in price, while 51 were unchanged and 24 advanced. The declines, however, included such groups of commodities as breadstuffs, provisions, textiles and leather—important factors in the cost of living—and it must also be remembered that, whereas these comparisons are restricted to wholesale prices, it is on retailers' profits and retailers' prices that the official "profiteering" crusade has admittedly made the most impresson. But the full test will have tc await the later winter months.

TRADE INFORMATION

THERE seems to be no limit to the soaring imagination of those who discuss the H. C. L., but with due credit to the natural desire to know the truth of the matter, we all know that an interesting story loses nothing in the telling, and that things may not be as bad as they seem. One of our friends has, for instance, figured out that stock feeds are worth present prices because butter costs over $1,000 per ton. Another, who had farmed some of the fertile prairie of Illinois, recently sold out for $540 per acre. Farm machinery costs real money; and the practical owner figures his interest, endeavoring to justify an expense of approximately $1,000 for even the smallest farm tractor. He questions the actual business justification back of the purchase of a $5,000 tractor by another Illinois farmer, saying that such things go well enough in the Canadian wheat belt where gang plows will turn over a field in a very few minutes.

However, the facts in the case have rather consistently shown us that almost every one has been getting his full share of the profits at home, but that deflated monetary values abroad make the export of feedstuffs a decidedly different matter than before the war. The present uncertainty of financing such exports affects domestic markets for feedstuffs of all kinds, and no one is quite sure of values, the status of which may be vitally affected by some at present unknown method of credit extension. It is therefore only good business judgment to read your trade papers, which try to get down to bed rock on subjects of vital interest to your business. THE PRICE CURRENT-GRAIN REPORTER pays considerable real cash to outside correspondents at home and abroad in order to submit weekly data that you may be informed on trade affairs.

HANDLING SIDE LINES

THE handling of side lines is a part of grain elevator service which this paper has urged all elevator operators to take up and push to the limit. Few elevator men advertise. They should. It gives them a better status with the local newspapers, and, better than that, advertising creates demand—that is its object and justification. All successful merchants are persistent advertisers, not to let people know where they are, but to create a demand (and demand must be created for most things and services) for the merchandise to be sold.

As has been pointed out herein, the farmers' companies soon found they had to carry side lines to make their business pay. Side lines carried the overhead of the grain business and more. But it happens that the farmer companies are not content to do their side-line business as other elevator men, their competitors, are compelled to do it, but are now beginning an active propaganda for another special privilege denied other business men, to-wit, the "right of collective bargaining." An "institute" will be held at the Hotel Sherman, Chicago, on Sept. 10 to discuss "Collective Bargaining"; and that active proponent of class collectivism, the American Coöperative Publishing Co., largely maintained by the patronage of grain men, says of this subject, in putting out the call for this meeting:

As you know, collective bargaining is one of the rights [?] now greatly endangered, so far as agricultural producers are concerned, although there is no question about it as regards organized labor. At the present time there is national legislation known as the Capper-Hersman bill pending, which has for its purpose modification of the Federal anti-trust legislation so as to give farmers just [?] exemption. It appears that the original intention of Congress was to give the agricultural producer the same exemption privileges as were granted to organized labor, but somebody slipped an awkward phrase into the Clayton amendment and the authorities are now dubious as to whether farmers do have exemption.

Further, there is little uniformity of legislation in the various states in respect to farmers' right [?] as to collective bargaining. Just now prosecution is being made in Illinois and Ohio of the milk producers by the state authorities. This condition of uncertainty endangers the rights of farmers to bargain collectively for the sale and purchase of supplies and weakens the whole co-operative structure in America. Do you want such a condition to continue?

It is the purpose of the Institute to develop a free discussion of the merits of collective bargaining and to send a representative or representatives to Washington to advance to Congress the conclusions reached by the delegates present. This committee will also propose its findings to the semi-annual meeting of the National Board of Farm Organizations, which will be held in Washington, Sept. 17th, in the new home of the Board.

There is no need of saying more here. The special privilege here to be asked for is the aim of the Federation of Farm Associations in Indiana, now raising a fund of $200,000 to see that the farmer "gets what's coming to him." It is all as distinctly non-social—class differentiation—and as objectionable on a score of business fairness among the different groups of our people which necessarily exist as would be a similar privilege granted to any other group of merchants.

MORE HOT AIR

ON THE publication of the Grain Corporation wheat discounts, Rep. Young of North Dakota rushed into print with the statement that the lower gradings and smaller discounts "will result in Northwestern wheat growers, particularly those in Minnesota, North Dakota, South Dakota and Montana, receiving many millions of dollars more for their crops this year." Railroad Commissioner Aandahl of North Dakota said it would save "$10,000,000 for North Dakota farmers," all of which is, of course, pure flapdoodle.

The value of the low grade wheats in milling cannot be made more or less by enactment or order than they are actually worth. Light weight wheat will make good flour, of course; but Dr. Ladd of North Dakota, who is responsible for the uproar of the ignorant and deceived in North Dakota, and who erroneously thinks he was the discoverer of the fact stated (which millers have known for two thousand years, more or less), has, in the midst of all his propaganda against the miller and the Government as a wheat inspector, taken right good care not to tell anyone out loud what he must know to be true, that it takes more light weight wheat to make a barrel of flour than heavy wheat. Dr. Ladd knows this, of course. Why, then, doesn't he be fair enough to tell North Dakotans so? Why should he rush off to New York at public expense to try to flimflam Mr. Barnes, who, too, of course, knows it, and Dr. Ladd knows that he knows it? Dr. Ladd as a teacher of youth is quite inexplicable—outside of North Dakota.

BUREAU OF MARKET REPORTS

THE Bureau of Markets says that owing to the reduction of appropriation, the Weekly Market Reviews issued every Wednesday, "an emergency activity during the war," will probably be discontinued about Oct. 1. Some newspapers, perhaps not many, will miss these reports; merchants and farmers probably will not. Ourselves have used them as we have used the data of other correspondents after much condensation and elimination, but an inquiry of our own readers as to the original value of the reviews to them has elicited only discouraging replies—only one firm out of 50 to 60 enquired of said the reviews "ain't worth a d——;" the other 49 to 59 would not commit themselves. For the most part people in the business do not care to antagonize any one attached to the Government with whom they imagine themselves likely in the future at any time to come into contact.

The "reviews" apparently were instituted on the assumption that the daily and weekly market letters and newspapers do not give reliable information, or enough of it, and do not reach "the farmer." Nothing could be farther from the truth. Farmers whom chiefly they were compiled and publishe had marketing interest enough to make their and reading worth while, are generally subs to the regular market reporting organs or ge information through their commission house tions. The only drawback of these to the fa the damnable laxity of the postoffice hand newspaper mail, on whose reception no one pend, save that it will be slow and uncertain. trade sources of information are prepared by to meet exactly the wants of the men who m markets and their business, and those who miliar with marketing conditions know th regular daily and weekly market newspaper and commission house letters are incompara perior to these bureau-made reviews becau are more comprehensive, although less ency perhaps, and are coördinated to give the r sweeping view of the whole market and n particular "cabbage patch" assigned to the charge of a field station. The reviews in f not worth, except to newspapers, perhaps, the fraction of their cost, and the average ne man has no right to expect Uncle Sam to su more or less efficient corps of correspondents f

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figure various statistical exhibits appearing weekly in d "The Price Current-Grain Reporter," these figures senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Sept. 13.	Sept. 6.	Sept.
Wheat—			
Primary receipts.....	14,604,000	17,001,000	18,5

wever, there is now more dispo-
town in Europe to get to work
to strike. Governments cannot long continue to support the people unless they will start to produce commodites to exchange for food. This is one of the factors that have depressed exchange as much as it is, but the exchange rates will rise as conditions become more normal, and manufacturing increases. While it may be a hardship to this country to be forced to curtail exports it will all be for the best in the end. There is little hope of foreign sales of corn due to the high ocean rates and low exchange. Argentina will be forced to furnish the bulk of the corn that enters into international commerce, and has plenty of it. The Argentine government is considering making a loan of $100,000,000 to Europe in order to facilitate business.

Old corn is pressing for sale, and the old adage of a short crop having a long tail is proving correct in this season, as there is now more corn coming forward than many in the trade believed there was in the country. The shortage of cars is acute, although less grain was loaded last week than last year at this season, but there is little actual congestion at any of the leading markets. The blanket permit system prevents this, although in many cases shippers do not approve of it. An immense number of country stations are closed due to inability to ship the grain already on hand.

Five states raise the bulk of the commecial oats of the country, and the total this year is the smallest since 1914, and when everything is considered the yield is probably smaller than at that time due to the light weight of this year's crop, which has been averaging around 29 lbs. per bu. The prolonged drought in the Mountain states with an extreme shortage of supplies there for this winter may turn a considerable quantity of oats from the Northwest into the less favored sections, which will cut down the amounts available for the East. The latter suffered from the same causes as curtailed the yield in other sections, and there is still a strong feeling that oats are destined to ultimately sell comparatively high.

Europe would undoubtedly take a large quantity of oats and barley were conditions right, but of late there have been no sales reported. A liberal quantity, however, was sold some time ago, and the clearing up on the situation might result in heavy exports for a time. Movement from the interior is very small for this season.

How high wheat will sell this season depends to a great extent on the amount of ocean room available. The Grain Corporation has the right to sell wheat on credit, but whether it has done so cannot be determined. Exports have been averaging around 1,000,000 bus. per day for some time past, but the rush from farms to terminal markets has been so great that the supply in the show windows has been increasing by leaps and bounds. Millers have been paying fancy prices for choice spring wheats; in fact prices are now higher in the Northwest than they were before harvest. Canada must move the bulk of its crop before the close of navigation, but through Canadian ports. This may result in Europe either being forced to take American wheat or going without. If the quality of the grain is as poor in the spring wheat sections as reported, and there seems to be no doubt but what it is, the amount fit for milling is much under the estimated crop.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Sept. 13, 1919.	Sept. 6, 1919.	Sept. 14. 1918.
Wheat	14,604,000	17,001,000	18,819,000
Corn	4,109,000	3,680,000	4,940,000
Oats	5,214,000	5,757,000	8,690,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	24,927,000	32,449,000
Preceding week	26,438,000	30,559,000
Since July 1	228,313,000	290,158,000

New low levels for the season were made on the deferred deliveries of corn as the result of continued liquidation and an utter lack of support except such as came from shorts. News was of a depressing character and there was nothing in sight on which to base a belief in an upturn of more than a temporary nature. Between the unsettled financial and political situations the trade is somewhat at sea as to the ultimate outcome of values, although there has been a decline of nearly 50 days with the cash article off about 75c per bu. The crop is made and the quality promises to be excellent. Lowest prices of the week were made about the close with the finish at net losses of 11⅛@28¾, the latter on the September.

Oats held within a range of 6½@7¾c and closed within a fraction of the bottom with net losses of 5½@6⅛c, September showing the most strength due to the removal of hedges against liberal sales to Eastern domestic distributors. Nothing was heard regarding export business, but there is little or no pressure from cash grain, as the country is not selling freely and the movement is far below normal for this season. Prices are now well below those prevailing a year ago.

Winter wheats sell readily when choice but there is too large a percentage of low grades in the arrivals, and the Government took the greater part of the latter at the basic figures, while the good sold at ½@1½c over to elevator interests. Springs were in keen demand when choice with the average somewhat higher than the previous week. Good Northern spring wheat promises to become scarce before another crop is raised. Flour business is fairly active, with Government purchases now running around 200,000 bbls. per week. Range of prices for the week follows:

			Close—		
			Sept.13,	Sept.6,	Sept.14.
Corn—	High.	Low.	1919.	1919.	1918.
Sept.	$1.64¼	$1.35½	$1.35½	$1.64¼	$1.54⅝
Dec.	1.32½	1.18½	1.19½	1.31⅞	.....
May	1.29	1.16⅝	1.17½	1.28⅝	.....
Oats—					
Sept.	.71	.64½	.64½	.70	.71⅛
Dec.	.73¾	.66	.66⅜	.72¼	.....
May	.76⅛	.69⅛	.69¼	.75⅜	.....

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to Sept. 13	163,376,000	260,441,000	214,405,000
P. shipments to Sept. 13	97,945,000	134,356,000	118,580,000
P. stocks on Sept. 13	1,219,000	4,351,000	378,000
P. consmpt'n to Sept. 13	68,329,000	121,908,000	96,296,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Sept. 13	147,115,000	156,666,000	43,535,000
P. shipments to Sept. 13	55,197,000	61,502,000	22,703,000
P. stocks on Sept 13	44,165,000	44,181,000	2,093,000
P. consumpt'n to Sept. 13	50,695,000	51,209,000	23,028,000

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended Sept. 12, and for the corresponding week last year, as reported by the Minneapolis *Daily Market Record*, were:

	1919, cars.	1918, cars.
Minneapolis	220	515
Duluth	432	95
Chicago	51	89
Omaha	24	11
Milwaukee	170	39
Total	897	749

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning Sept. 5, were:

	Mpls.	Duluth.	Chi.	Omaha.	Milw.
Sept. 5	1.35½	1.34¾	1.30	1.25	1.43
Sept. 6	1.38⅜	1.30	1.40½	1.29	1.43
Sept. 8	1.40¾	1.40¼	1.41	1.31	1.43
Sept. 9	1.41⅝	1.42	1.43¾	1.32	1.45
Sept. 10	1.39¼	1.40½	1.44½	1.35	1.45
Sept. 11	1.39¾	1.39¾	1.44	....	1.45
Sept. 12	1.39	1.41	1.44½	1.34	1.44¾

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Sept. 6, 1919, with comparisons with 1918:

	1918-19.	1917-18
Chicago	39,789,000	40,914,000
Milwaukee	1,827,000	3,520,000
Minneapolis	24,783,000	25,622,000
Duluth	1,228,000	3,836,000
St. Louis	20,960,000	26,066,000
Toledo	3,830,000	2,910,000
Detroit	649,000	492,000
Kansas City	36,706,000	35,833,000
Peoria	1,494,000	2,663,000
Omaha	10,597,000	9,605,000
Indianapolis	5,252,000	5,305,000
Total	147,115,000	156,766,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Sept. 13, 1919.	Sept. 6, 1919.	Sept. 14, 1918.
St. Louis	1,975,000	1,710,000	1,883,000
Kansas City	1,417,000	3,546,000	2,869,000
Omaha	923,000	1,329,000	976,000
Toledo	478,000	307,000	205,000
Detroit	63,000	152,000	27,000
Indianapolis	242,000	269,000	97,000
Peoria	146,000	143,000	166,000
Chicago	4,691,000	4,303,000	3,795,000
Milwaukee	410,000	520,000	495,000
Minneapolis	3,884,000	4,600,000	5,360,000
Duluth	375,000	122,000	2,946,000

FROM WASHINGTON

More About the Packing Hearings—Foreign Financing Bill—Effort to Compel Railroad Administration to Maintain Freight Rates on Grain at Lowest Level.

Hearings on legislation for the regulation of the packing industry are developing some remarkable features. Seldom, if ever, has there been such an overwhelming array of testimony in opposition to any proposed measure. Those espousing the Kenyon and Kendrick bills accuse the packers of organizing a powerful lobby but have been forced to admit that the witnesses have been genuinely representative of the different interested groups. The effect of the blows dealt against the proposed legislation is apparent. A distinct shift of sentiment among members of Congress is noticeable, particularly among some Southern senators who at first were inclined to take what they thought was the popular side of the case, but as their constituents have arrived to express their views on the subject have begun to waver. It has been a matter of comment that members of the committee who were somewhat pronounced in their opposition to the packers early in the hearings gradually lost interest in the proceedings and now rarely attend. That the personnel of the committee is such that a regulatory bill will be reported appears probable. There appears to be reason to believe that some of its teeth will be removed. Concessions will have to be made to get the bill out of committee. If it should be passed by the Senate, which is by no means certain, it is doubtful if it can survive attacks in the House, whose committee on Interstate and Foreign Commerce, before which hearings were held last winter on the bill recommended at that time by the Federal Trade Commission, was plainly against radical legislation. This time the Kenyon-Anderson bill is in the hands of the House Committee on Agriculture, which is rather more conservatively constituted than the Senate committee. Its attitude probably will not be much different than that of the committee on Interstate and Foreign Commerce.

The situation has sifted down to a point where the controversy lies chiefly between the packers and wholesale grocers. The latter have various grievances against the packers and are pushing the Kenyon bill. That the American National Live Stock Association is not a unit in support of the bill was developed before the committee during the past week in a statement by Dr. J. M. Wilson of McKinley, Wyo., member of the association's executive committee and president of the Wyoming Wool Growers' Ass'n. He charged that the market committee of the association had conspired with the Federal Trade Commission in the investigation against the packers and that members of this committee were actuated by selfish interest. The propaganda conducted in favor of the legislation has centered about the assertions that the big packers were stifling the operations of the independent packers and that they had the live stock producers at their mercy. With scarcely an exception independent packers have opposed the bills while representative live stock producers have denied that they want such legislation. One of the notable features of the past week has been the appearance of live stock producers of Iowa, the home of Senator Kenyon, who expressed the belief that his efforts were misguided. P. S. Haner of Taylorville, Ill., former chairman of the Illinois State Live Stock Commission and a stock raiser himself, one of the witnesses of the week, said:

"I am strongly opposed to these bills. I am opposed to Government control. We had a sad experience with Government control of railroads and a burnt child fears fire. I have been in the markets every week for twenty years and have never observed lack of competition or any unfair practices on the part of the packers. In regard to the stock yards I don't care who owns them. All I want is service and I get that now, so I see no reason why things should be disturbed. I have talked to many shippers and farmers in my section of the country and I have yet to find a single man in favor of this legislation." That sponsors for the bill realize their case has been weakened was evident in the testimony of Edward L. Burke of Omaha, member of the market committee of the American National Live Stock Ass'n and one of the chief supporters of legislation directed against the packers. Mr. Burke undertook to explain why so many of the producers had appeared in opposition to the bills. Incidentally he frankly admitted that many important producers had been in the list of witnesses, and that the attitude of some of the large producers who have come here to testify against the bill is rather easily understood. "They have large bunches of cattle to market. It is to their personal interest to be on friendly terms with the packers. There is no question but what the influence of the packers on the large producers is almost irresistible. I know that some of the largest producers in Kansas and Nebraska have been here. It has been stated that their cattle were receiving quite favorable treatment on the markets. One of the vice presidents of our association, M. K. Parsons of Salt Lake City, has come out in an open letter opposing regulation. The matter is rather hard to explain until you find out that his son is manager of the stock yards at Salt Lake City," also said Mr. Burke. The effect of the constant attack upon the Federal Trade Commission for its methods of investigation of the packers was discernible when Senator Harrison of Mississippi proposed to the committee that public accountants be employed to go over the books, records and papers of the packers to get at the truth about the marketing of meat products and the profits derived therefrom.

"Charges have been made against the packers by the Federal Trade Commission," said Senator Harrison. "Many witnesses have come in here and said the charges were unjustified; the packers themselves claiming that the commission was prejudiced for some reason that has not as yet been disclosed. We ought to find out what the actual truth is and the only way we can do that is to have a fair and impartial investigation of the industry. We can get that if we look into the thing ourselves or get some trustworthy agency to do it for us."

Opposition to a continuation in peace times of war-time regulation of industries which manifests itself against the proposed licensing of the packers cropped out on the floor of the Senate during the week in the consideration of the food control law amendments.

The Senate passed the bill previously passed by the House strengthening the war-time food control act as desired by Attorney General Palmer to combat the high cost of living. Some of the senators made it plain that they would not be willing to perpetuate any such control in peace time.

Even Senator Kenyon remarked:

"I am willing to vote for this proposed law only for the time of the war or until peace be declared, which I hope is not far away. If there was any permanent policy proposed, I should not vote for it."

"I am satisfied of that," said Senator Thomas of Colorado. "I do not think anyone, with the possible exception of the senator from Oklahoma, Mr. Owen, who wants to see a provision of that kind inserted as a part of the permanent statutes of the country, would be willing to vote for it. I certainly should not."

Senator Thomas commented on the fallacy as he viewed it of fixing a guaranteed price of wheat without also controlling the price of all commodities.

"We are trying to accomplish the impossible," said Senator Thomas. "Any law which assumes to deal with prices, and which does not include every commodity that mankind uses, will operate unjustly and unequally, for there can be such a thing as class legislation as to things as there can be as to persons.

"When the price of wheat was provided for in the bill of which this is amendatory, I objected to it unless, instead of being confined to wheat, it should be extended to all commodities. I thought, and so did others in the Chamber, that if wheat were held at a fixed price, the substitutes for wheat, because of the increased demand upon them would at once rise in value or at least in price, and that what was lost by the arbitrary prohibition of the statute regarding one commodity would be compensated for through the opportunity given by the absence of that prohibition upon other commodities, and that is precisely what occurred."

In the passage of the Edge foreign financing bill by the Senate exporters of grain as well as other commodities feel encouraged over the prospect of stabilizing present unsettled and adverse foreign exchange conditions. The bill is to be considered by the House Committee on Banking and Currency next Friday, and opposition is expected in the House from those who are flatly opposed to anything designed to stimulate exports. Eighty-five votes were mustered recently in the House against another bill relating to foreign trade, permitting national banks to invest five per cent of their capital and surplus in foreign financing corporations. The same members are expected to oppose the Edge bill. Its eventual passage is expected, however, permitting the formation of corporations with a capital of not less than $2,000,000 to do a foreign banking business under the supervision of the Federal Reserve Board. It is intended that these corporations shall sell debentures issued against foreign securities.

The foreign credit situation, which has caused a slump in exports, was responsible for a cut in ocean rates made by the Shipping Board during the past week on a long list of commodities from United States North Atlantic to French and Dutch and United Kingdom ports. In some cases the reduction amounted to nearly 40 per cent. Rates on flour to Antwerp and Rotterdam were reduced from $1.45 to $1.25 per 100 pounds. Provisions were cut from $1.55 to $1.25. Instead of a reduction, rates on flour and provisions to Havre and Bordeaux were increased, jumping from $1.45 to $1.50 per 100 pounds. It was stated that the reductions were made to stimulate business in particular kinds of cargo. The effort on the part of farmers of Middle Western states to compel the Railroad Administration to maintain freight rates on corn, oats, rye and barley on a lower level than wheat has been unsuccessful. A report by John T. Money, examiner for the Interstate Commerce Commission, recommends that the commission dismiss the complaint filed by the National Council of Farmers' Cooperative Associations. Prior to June 25, 1918, the railroads maintained lower carload rates on coarse grain than on wheat from and to certain points in Illinois, Minnesota, Iowa, Missouri, Oklahoma, Kansas, Nebraska, North and South Dakota and Colorado. On that date the rates were increased 25 per cent, maximum six cents per 100 pounds, and the rates on coarse grain were made the same as the increased wheat rates.

In his report to the commission he says:

"This action resulted in increasing the rates on coarse grains from about 25 per cent to as much as 100 per cent or more, the average increase being represented by complainant to be between 40 to 50 per cent. In justification for increasing the rates on coarse grain to the level of the wheat rates respondents contend that coarse grain loads materially lighter than wheat; that the same transit arrangements apply on coarse grain and wheat and that the difference in the value of wheat and coarse grain does not justify a lower basis of rates on coarse grain than applies on wheat. Respondents state that the lower basis of rates on coarse grain was establ and maintained in some of the sta large corn production to comply state laws or orders of railroad co sions, voluntarily by the carrie other states adjacent thereto in to equalize the rates in adjoining tories, and in other instances at t stigation of state officials. This done to encourage the consumpti corn at a time when the value th was very low. It is stated on beh the respondents that many of the on both wheat and coarse grain Southwest prior to June 28, 1918, unduly low, due to water and c competition. Upon consideration the circumstances and condition rounding the movement of coarse from a transportation standpoint not convinced that respondent be required to maintain rates on grain lower than those maintain wheat. The fact that lower rates been maintained on coarse grain on wheat from and to certain for many years is not sufficient t demn the present basis of rat coarse grain. The lower rate bas coarse grain was applicable in c sections of the country only and be said that this constituted a dep from the general practice of carr maintain the same rates on all ki grain throughout the entire co The record shows that in ma stances the lower basis of rat coarse grains resulted directly o rectly from state action, that is, legislative enactment, under or railroad commissions, or at the of the administrative officials, a not voluntarily established and tained by respondents. The comm should find that respondents hav fied the rates assailed and that t plaint should be dismissed."

A report to the Bureau of F and Domestic Commerce from Commissioner Nels A. Bengst Christiania, Norway, states tha country has a wheat crop up average and probably above, growth of rye in most sections, b low normal in the north but ab average in the west and south, fairly good, about an average hay, a large yield of peas, a ver promising crop of potatoes, and a nea mal growth of turnips. The wheat yield in Norway from 1915 was 30,674 bus., in 1918 29,583 bus., while the estimated y 1919 is 31,000 bus.

Getting Ready for the Na Meeting.

Sec'y Quinn of the National tion is lining up his program an for the big St. Louis convention held Oct. 13-14-15 at the Planter St. Louis, Mo. He has recently a bulletin telling of the plans program.

Hon. David R. Francis, Ameri bassador to Russia, has accepte vitation to address the twenty-t nual convention. This will re the first public appearance of bassador since his return from He has been resting at Rye Be H., all summer following an o which he underwent in Engla spring. He will tell the cor about Lenine and Trotsky and t Russian revolution, the Bolshevi the red terror and the blind att the 160,000,000 Russians to "fin selves" after they had thrown autocracy of the Czar. This wil of the greatest speeches ever d to a convention in this country

Julius H. Barnes, United Wheat Director, will also be on gram of the St. Louis conventi will take advantage of this opp to confer with the trade on dling of this year's wheat cro complaints that you have may up with Mr. Barnes in the d that will follow his address.

Then there will be other spe great note and great interest. them are Hon. James P. Goodr ernor of Indiana; Hon. Fred

er, governor of Missouri; Hon. Clark, interstate commerce commer; Chas. F. Curtiss, dean of the Agricultural College and president International Live Stock Expo-; J. W. Shorthill, secretary of the nal Council of Farmers' Coöpera-ssociations, and others.

RRAY ELEVATOR DE-ROYED BY DUST EXPLO-SION.

lve men were killed, including Martin, Harvey King and Thos. nson, who died Sunday night at s City hospitals, six possibly were injured and ten others hurt by losion and subsequent fire in the y elevator, a 1,500,000 bushel house rth Kansas City, Saturday after-September 13. The accident, sup-y due to a dust explosion in the of the elevator, occurred at 2:10 . It was the most appalling ca-he that ever visited an elevator l in Kansas City. The property estimated by H. J. Smith, presi-of the Federal Grain Co., at 0, which covers damage to build-d contents, consisting of 250,000 overnment owned wheat, 800,000 artlett-Frazier wheat and 50,000 ats, a total of 1,100,000 bus. de-l. The elevator was owned by , B. & Q. Ry., but the Federal Co. was the operator of the plant, ch concern it is said the Bartlett-r Co. of Chicago has an interest. . Reed, grain dust explosion and evention inspector for the United Grain Corporation, chanced to Kansas City inspecting grain ele-in the effort to prevent just such ons as this.

ever, officials of the Federal Co. attribute the disaster to the f Mr. Reed in ordering a clean-is insistence causing a force of be put to work at once, and the was that a great quantity of dust ised which undoubtedly caused losion.

e was a heavy rumble that shook ire structure when the explosion ed, rocking men on their feet aking walls sway. Flames shot h the elevator proper at the west f the plant, turned and swept the roof structures over the ins.

whole building, though of fire-onstruction, was a mass of in-flames in a flash.

explosion tore away the sides of vator and wrecked the stairway, ng it in flames, through which l workers, already burned, must heir escape or stay to die.

is crashed from the twelfth floor elevator onto the loading shed at de side, setting fire to three cars and lumber used in pre-cars for grain shipments. These materially hampered the work men attempting to dig out the of the dead.

power house to the south of the r was wrecked by falling terra ricks, with which the elevator ed, plastered onto a steel frame. y-eight men were working in the r at the time of the explosion. e accounted for definitely, with eption of one man still thought buried beneath the wreckage. odies have already been re-from beneath the wreckage.

ers were blown entirely clear of ilding by the explosion. One eorge Garzee, was picked up t away from the building, hav-n thrown the entire distance, ng to witnesses who saw him horugh the air.

alls of the house were weakened explosion and heat. A large the bins' foundation was blown n the east side, farthest away e point of explosion, indicating bins were all more or less dam-

vest side of the structure is not l to stand, as the burning cars enveloped it in flames for urs.

Most of the men employed in the elevator were residents of the neighborhood. The explosion caused wives and children to rush to the scene, where pathetic sights were witnessed.

Clay County officials will hold an inquest to fix responsibility for the inquest and Vernon Fitzsimmons of the Bureau of Chemistry Department made a hurried trip from Minneapolis to conduct an investigation as to the cause of the explosion.

International Hay and Grain Show.

It is reported by the Chicago Board of Trade Committee having in charge the furtherance of the International Grain and Hay Show which is to be held November 29th to December 6th, in Chicago, in connection with the International Live Stock Exposition, that a widespread interest is being shown in this forthcoming show, evidenced by the large number of calls they are receiving for premium lists, which have already reached nearly 200,000. This would indicate that there will be a large number of exhibitors. In addition to this, it is expected that the National Government and practically all the agricultural colleges of the country will have special exhibits.

CHICAGO CONFERENCE OF AGRICULTURAL COLLEGES WITH FEDERAL GRAIN SUPERVISION.

H. P. Cooper, Asst. Prof. Massachusetts Agricultural College; O. W. Dynes, Instructor Farm Crops, New York State Agricultural College; F. E. Robbins, Assoc. Prof. Crop Production, Purdue University; John B. Wentz, Prof. of Agronomy, Maryland State College; Clyde McKee, Assoc. Prof. Farm Crops, Iowa State College; E. M. McDonald, Asst. Prof. Farm Crops, Missouri State College; Jay B. Park, Prof. Farm Crops, Ohio State University; C. J. Willard, Asst. Prof. Farm Crops, Ohio State University; E. J. Kinney, Prof. of Farm Crops, University of Kentucky; J. P. Cox, Prof. of Farm Crops, Michigan Agricultural College; A. L. Bibbins, Asst. Prof. Farm Crops, Michigan Agricultural College; J. C. Hackleman, Assoc. Prof. Crop Production, University of Illinois; W. L. Burlison, Prof. Crop Production, University of Illinois; W. H. Darst, Assoc. Prof. Agriculture, Pennsylvania State College; W. C. Etheridge, Prof. Farm Crops, University of Missouri, and E. G. Montgomery, Prof. Farm Crops, New York State College of Agriculture, met in the conference room of General Field Headquarters of the Federal Grain Supervision, Chicago, and perfected organization for this conference only. The chairman, Prof. E. G. Montgomery, of Cornell University, stated that the conference was called in response to an expressed desire on the part of a number of colleges to secure practical concrete information for use in introducing and maintaining grain grading courses in the agricultural colleges. Grain supervisors connected with General Field Headquarters and with the district supervision office, explained the origin and development of commercial grain inspection and the application of official standards, as well as the detailed procedure in sampling and inspection of grain.

The professors visited the Irondale Elevator in a body accompanied by supervision officials, for the purpose of examining into the methods employed in sampling and inspection of cargoes. An incident of this trip was a survey of the elevator conducted by the elevator superintendent.

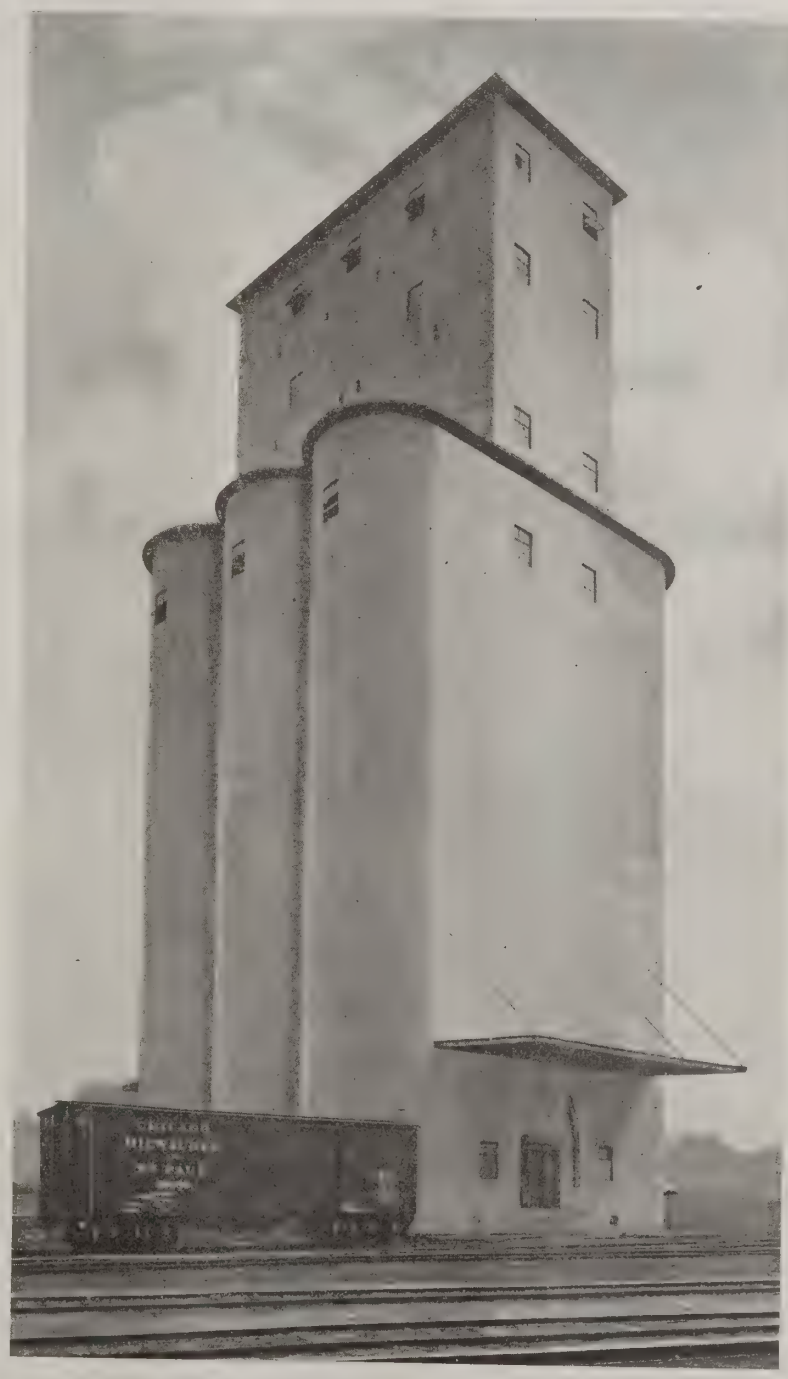
A trip was then made to the hold yards of the Chicago & Northwestern Railroad at Proviso, Ill., where grain supervisors explained the steps in sampling as exhibited by the employes of the Illinois State Inspection Department, and also assisted the professors in drawing samples of their own, which later were inspected by them in the office of the supervisor of the Chicago District.

Visits were made to the office of the State Inspection Department to gain much interesting information relative to the procedure of that office and the manner in which its records are kept.

Secretary Mauff of the Board of Trade took the members of the conference onto the floor of the Board of Trade and explained to them very thoroughly the methods of trading in both futures and cash grain.

Before adjourning, the conferees expressed themselves as deeply gratified by the interest shown in their project by all agencies with which they came in contact during their conference, and said they felt sure the information secured was of a nature that would enable them to give courses in grain grading that would be of much ultimate benefit to the trade through an increased knowledge on the part of farmers as to the purpose and application of standards for grading.

The Golden Belt Grain and Elevator Co.



The Golden Belt Grain & Elevator Co. was chartered in April, 1917, with an authorized capital of $75,000, which was later raised to $100,000, all of which was fully paid in.

The organizers were E. J. Smiley, secretary of the Kansas Grain Dealers' Association; F. D. Sperry, banker and grain dealer of Ellsworth, Kansas; C. L. Hardman, of The Hardman Lumber Co., WaKeeney, Kans., who operated twenty-three lumber yards in Kansas and Colorado; John F. Jones, grain dealer and lumberman of WaKeeney, Kans., and O. B. Jones, retired banker of Corpus Christi, Texas.

John F. Jones was selected to take the active management of the business and in May moved to Topeka and opened the office of the company at 321-22 New England Building. Mr. Jones has been actively engaged in the grain business for the past twenty-four years and thoroughly understands the wants and needs of the country shipper. All grain sold or consigned to the Golden Belt Grain & Elevator Co. will receive his personal attention.

On May 21, 1917, a contract was let for the building of modern fireproof concrete and steel terminal elevator as shown in the accompanying engraving on a tract adjacent to the Rock Island, Santa Fe, and Union Pacific railways, thus securing free switching from these three lines. The building was ready for operation March 1, 1918. It is equipped with the very best handling machinery and has a handling capacity of fifty cars per day in and out. A drier with ample capacity is part of the complete equipment.

The Golden Belt Co. has secured ample and competent office help so that returns will be made to the shipper within twenty-four hours after weights are received. The weighing facilities consist of two 120,000-pound Howe hopper scales set on solid concrete piers. These scales are large enough to weigh the largest cars at one draft. They are equipped with type-registering beams so the chances for mistakes are reduced to the minimum. All weighing is done by a licensed state and Federal weighmaster.

THE GOLDEN BELT GRAIN AND ELEVATOR CO., TOPEKA, KANS.

The Letter Box

Crop Good.

Price Current-Grain Reporter: Our maize crop is a good quality and making a good yield; only a small per cent of feterita and kafir raised, but also a fine quality.—*Mayhew Produce Co., Brady, Texas.*

Bought Elevator.

Price Current-Grain Reporter: The T. D. Phelps Grain Co. of Denver has purchased the elevator at this place from the Stroup Lumber Co. and is operating same.—*J. W. Worrall, Manager, Isley Lumber Co.*

The Value Is There.

Price Current-Grain Reporter: Personally I find your paper is of unestimable value as a business guide.—*A. L. Chamberlain, President, Chamberlain-Holmes-Jeffords Co., Port Huron, Mich.*

Movement Light.

Price Current-Grain Reporter: The movement of grain, hay, straw and corn is very light in this territory and it will be light until the farmers begin to let loose of some of the new corn which will be about Oct. 20. There is not very much doing in this territory.—*Pollock Grain Co., Lima, O.*

Profiteers, Beware!

Price Current-Grain Reporter: The keeping of the price of foodstuffs in reasonable bounds is of vital importance. Let all dealers clear themselves from suspicion of profiteering. We should keep tab on extortionists and boycott them to the finish.—*Kansas-Missouri Grain Co., J. C. Lynn, Treasurer, Dodson, Mo.*

Cars in the Southwest.

Price Current-Grain Reporter: The car situation in the Southwest is without much change and business is practically at a standstill. Cars for grain loading are scarce, elevators full of wheat, ports congested, all of which you are familiar with. How much longer this is going to last is the question.—*C. F. Prouty, Sec'y, Oklahoma City, Okla.*

Will Make Repairs.

Price Current-Grain Reporter: We expect to make some repairs at our elevator about Oct. 20; also install electric light plant to be run in connection with our grain business. We deem it of vital importance that Governor Allen and a few other cheap politicians keep their mouths shut.—*C. R. Long Grain Co., Elk City, Kans.*

Crops Excellent.

Price Current-Grain Reporter: The Union Hay Co. has discontinued business at Goshen, Ind., their manager, we believe, having moved to Detroit. There are no particular changes in this territory in the way of new institutions. Crops have been excellent, quality of wheat good, corn going to turn out much better than anticipated, hay crop large and good quality.—*American Hay Co., Goshen, Ind.*

Unable to Haul Wheat.

Price Current-Grain Reporter: I have been out in Colorado and Western Nebraska where things are surely in bad shape on account of there not being any cars.

The wheat is piled up in the thousands on the farms, threshed, and are unable to be hauled in on account of every elevator being filled to the roof. One lucky thing is that there has been no rain to speak of, and the wheat is safe as far as moisture is concerned. Had the farmers taken the advice of the Government and binned this wheat, they would have been all right, but very few have places to store their wheat for safety. All the wheat in that section is of high grade, running mostly No. 1 and No. 2 hard and dark hard, and the finest berry they have grown in years. Even the dry lands in Colorado have had wheat as high as 45 bus. to the acre, where irrigated lands have gone as high as 52 bus. It is a shame there are not cars, but really believe that it will be better in the long run, as the wheat will no doubt stay around the Government price, and maybe help bring the 5c loaf back to the U. S. A. Maybe (?).—*W. H. Moore, St. Joseph Hay & Grain Co., St. Joseph, Mo.*

Beyond Frost Damage.

Price Current-Grain Reporter: In these days of crashing grain values, that little $2.26 price looks very good, think some would like to use it for a North Star by which to steer the rest of the market.

Dry, hot weather continues, the wagon roads are dusty, and the soil too hard now to plough well, but a large part of this work is already completed. Folks are not worrying over frost this year; a light one now would not hurt much corn, and the entire crop is rapidly getting beyond damage from any usual weather.—*H. I. Baldwin & Co., Decatur, Ill.*

Moved to Saginaw.

Price Current-Grain Reporter: We wish to announce that the office of the Michigan Bean Co., formerly at Port Huron, was removed Sept. 1 to Saginaw, Mich. We feel that the moving of the office to Saginaw will greatly benefit our patrons, as it is more centrally located, Saginaw being the recognized center of the bean industry of Michigan. The railroad, telephone and telegraphic facilities, as well as warehousing, are fully equal to the best in the state. Mr. Albert L. Riedel, formerly secretary of the Michigan Bean Co. at Port Huron, will be located at Saginaw as secretary and general manager.—*Wm. J. Orr, president, Michigan Bean Co., Saginaw, Mich.*

European Peasants at Work.

Price Current-Grain Reporter: While it is true that there are disturbances in the congested centers in Europe and the populations of the various countries are more or less up in the air regarding their economic conditions, which truly present problems that are most appalling in the way of finance and that sort of thing, they must certainly realize that the foundation of prosperity is what can be gotten out of the earth in the way of agriculture and mineral products, and the manner in which the European peasant has done his job impressed me as one of the fundamental things well started that will go a long way toward bringing about normal conditions and the extent to which the peasant in Europe has performed his work under the known disturbed conditions for more than four years was a constant source of wonder to me.—*John D. Shanahan, U. S. Grain Corporation, New York, N. Y.*

Wheat Poor.

Price Current-Grain Reporter: I entered the employ of this company the 15th of June this year as manager and I built an addition to the elevator and installed a recleaner built by the Watkins Mfg. Co. of Wichita, Kans. They are building a farmers' elevator at Harper, Kans., and one at Danville, Kans.

Wheat was not very good in this part this season; too much rain in the spring up to the first of June, and then turned dry and we have had no rain since to speak of. A few of the farmers that have tractors are listing some, but the ground is very dry and no indications of rain.

Wheat averaged about 8 bus. per acre and was of low grade. I have shipped 28 cars of wheat and only four cars that graded No. 3; the rest were lower.—*Farmers Co-op. Elevator & Merc. Co., W. H. Sage, Mgr., Duquoin, Kans.*

Business Double.

Price Current-Grain Reporter: Fall business with us has been about double what it was last year. Wheat, oats and rye are ready sellers and there is some difficulty in supplying the demand. Good seed wheat will be rather scarce in this section and gray winter or turf oats are already selling at a premium. Some corn is looking good but the average will hardly run over fifty per cent of a crop. Seed corn should bring a good price for another year.

Recent estimates made up of our yields of tobacco seed show a crop of about 33 per cent of normal. Prices on these must advance to a certain extent and an advance of one dollar per pound has already been suggested. Excessive rains in the early summer followed by extremely dry weather have caused considerable damage to all crops through this section.—*The Slate Seed Company, So. Boston, Va.*

Season Late.

Price Current-Grain Reporter: There is little change here as to new concerns. The old firms who for many years have been in the business are still on deck; fortunately we have not had any fires or other mishaps to interfere. No new buildings for this line of business are contemplated insofar as we know.

Seed crop conditions might be much better. The late frost cut acreage considerable; many fields were replanted, but in the majority of cases these will be late and in some cases it is a question if they can mature. This latter in particular as regards cantaloupes and cucumbers; for this reason in many instances it will be a question what percentage of seed orders can be furnished.

Beans, both garden and pintos, have been damaged materially both from the frosts and rust, so the crop will be very short. Some fields will not return the original seed. The acreage of pintos is less than 10% of last year.

The quality of all seed crop will be excellent. In view of existing conditions it stands all seed buyers in hand to get as early as possible as close a delivery estimate as can be had and cover all shortage from any source obtainable.

Little or no surplus cantaloupe seed is obtainable on account of great demand and replantings, which in this district in some cases reached four times.—*H. Van Buskirk Seed Co., Rocky Ford, Colo.*

Grain and Oil.

Price Current-Grain Reporter: We do not know that we can give you much information from Texas that will be of value to a bull in the grain business, but the Texas farmer this year has cut at least one of the tap roots of the high cost of living. We have produced 40,000,000 bus. of wheat, 75,000,000 bus. of oats, 100,000,000 bus. of milo maize, feterita and other sorghums, and 250,000,000 to 275,000,000 bus. of native corn.

Prior to this year we had a three years' drouth in Texas and a few optimistic citizens, in attempting to drill deep wells for water, struck oil, and now oil is bubbling out of the ground all over Texas, and Texas has produced an immense crop of millionaires in addition to a double crop of grains kinds.

Would like for you to insert a in THE PRICE CURRENT-GRAIN RE that if any of your readers are money, not making a living, o about to starve to death in the business, that they should move a to Texas, locate at Forth Worth become millionaires in the oil bu For further specific information just how to do this, please refer to the writer, who without cha hesitation will be glad to give to suffering grain men full details road to riches in oil.—*The Fort Elevators Co., Per Jule G. Smith, dent, Ft. Worth, Tex.*

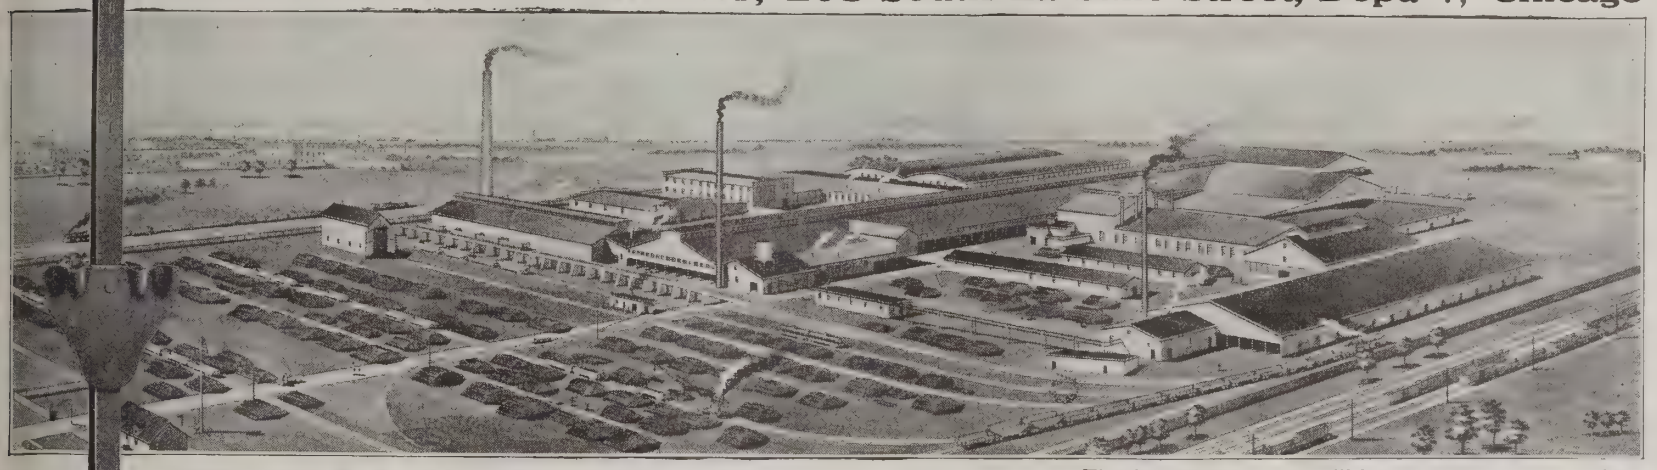
Repeat Orders Tell The Story

They're coming in with a rush from scores of Ankorite dealers. Dealers who began by ordering a few hundred posts are now ordering carload lots—by wire!

We've been obliged to double and re-double our output to take care of them—and we'll have to double it again within the next six months. Dealers who used to sell wood posts have switched to Ankorite and they're making dollars where they used to make dimes!



Thousands of posts will be needed in your territory during the next five or six months, and you can get more than your share of the business by securing exclusive sales rights for Ankorite Steel Posts. Other dealers have had remarkable success with them—why not you?

Ankorite STEEL FENCE POST

Farmers *want* Ankorite Posts and you are the logical dealer to supply them. Small investment—quick turn-over—you buy them direct from the mill.

Territory is being closed fast—you can hold yours open and secure exclusive sales rights if you'll write NOW. Don't put it off.

CALUMET STEEL COMPANY, 208 South La Salle Street, Dept. 7, Chicago

The Mill Behind the Post

This big, modern steel mill has a capacity of forty thousand posts a day—enough to build 125 miles of fence. We can make immediate shipment in any quantity.

tigating Port Colborne Disaster.

estigation into the causes of the t grain dust explosion which d the destruction of the large elevator at Port Colborne, Onta- on the Welland Canal, involving damage and loss of life, has fo- added interest on the fire-preven- campaign now being conducted by nited States Grain Corporation un- ne direction of the Department of ulture's Bureau of Chemistry. An priation of $50,000 was recently by the Grain Corporation for this at the suggestion of Julius H. s, United States Wheat Director.

Port Colborne explosion was the disastrous one of its kind to occur nerica in two years and possibly have been avoided by strict ad- ce to the Safety First principles have been outlined for grain and or men after exhaustive investi- ns into the causes of grain dust sions by the Bureau of Chemistry.

Port Colborne elevator was con- ed of fire resistive material, be- ade entirely of steel and rein- l concrete, and consequently the by fire was comparatively small. men, however, lost their lives, were severely burned and six s slightly injured. A barge beside levator was completely wrecked t is estimated that nearly $1,000,- orth of damage was done to the or structure.

this instance, the destruction was d by a grain-dust explosion, which red shortly after 1 o'clock in the noon on Saturday, August 9, just the men had returned from dinner ad started up the plant. The ori- f the fire which ignited the dust d in an elevator leg. The eleva- ad a capacity of 2,000,000 bushels. estigation into the causes of the sion, which it is said will serious- mper the supply of grain for ex- was started immediately by an epartmental commission appoint- ed by Hon. J. D. Reid, Minister of Railways and Canals of Ottawa. Lt. Colonel C. N. Monsarrat, chief consulting engineer for the Department of Railways and Canals and chief engineer in charge of the Quebec Bridge construction, is chairman of this commission and the other members include: Hon. A. St. Laurent, Assistant Deputy Minister of Public Works for Canada; Mr. John Murphy, electrical engineer of the Department of Railways and Canals; and Mr. D. W. McLachlan, chief engineer for the Hudson Bay Terminal Dock and Harbor and engineer for the Department of Railways and Canals.

The Port Colborne elevator belonged to the Canadian government, and was operated by the Department of Railways and Canals. W. J. Fawcett, Superintendent, was not in the building at the time of the explosion, but D. S. Harvey, mechanical superintendent, was in the elevator and was badly burned.

Dr. H. H. Brown of the Department of Agriculture, Washington, D. C., who, with D. J. Price of the same Department is carrying on the Grain Corporation work to prevent similar grain-dust explosions in the United States, went to Port Colborne immediately after the explosion to make a thorough investigation and has been assisting the Canadian officials in determining its causes.

CANADIAN CROPS.

Secretary Frank O. Fowler of the Northwest Grain Dealers' Ass'n, Winnipeg, estimates the crops of Manitoba, Saskatchewan and Alberta at Sept. 1, 1919, as follows:

	Acres.	Yield, Bus. per acre.	Product'n, Bus.
Wheat	16,085,000	10.3	165,675,000
Oats	9,626,000	23 6	227,173,000
Barley	1,955,000	19	37,145,000
Flax	1,000,000	6.1	6,100,000
Rye	216,000	10.5	2,268,000

In a summary of the 1918 crop there were inspected 128,073,000 bus. of wheat, in addition to which there were 225,000 bus. of the old crop in transit and also wheat marketed at Winnipeg which were not inspected, 200,000 bus. in store at country points, 175,000 bus. in farmers' hands to market and 35,000,000 bus. used for seed, feed and country mills, totaling 163,673,000 bus., the 1918 crop.

Three Are Plenty in Kansas.

Kansas has achieved fame in many directions; she is proud and boastful of her wheat fields, the enormous handling facilities of her markets, *ad libitum*, but she has now achieved the Line O' Type for a watchful reader of the Chicago *Tribune* last week saw the following regarding one prominent in the grain trade of that Western state. The article was headed—"Instead of the Conventional Caboose," and read as follows: "Mr. and Mrs. Thad Hoffman of Wichita announce the birth of a baby girl at their home. This is the third girl baby born to them, no boy baby, and they have named her 'Plenty.'"

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Sept. 13:

	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.

News of the Terminal Markets

DES MOINES, IA.

B. Randleman, Correspondent.

Receipts of corn and oats have been large during the past week. There is not much wheat moving at this time. Spot market on oats for the week has ranged from 65c to 69c. Corn, $1.50 to $1.55. Wheat, 1c to 2c over Government price.

CAIRO, ILL.

J. E. Clancy, Correspondent.

Receipts are light. Shipments are some better than last week. Very light demands.

The first of the new government barges arrived here Thursday on their way to St. Louis.

Ichertz & Watson, who have offices here, are opening offices in Charleston, Mo., and Murphysboro, Ill.

W. L. Duncan, the well known and popular sales manager of the Samuel Hastings Co., was married to Miss Alberta Naugle of Cairo on the 11th at Chicago and are on a honeymoon trip through the east and south.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

Receipts of grain on this market has been picking up of late but is far from being up to normal, due to the car shortage.

Geo Strom, manager of the Taylor-Bournique Co., is back at his desk after three weeks in a hospital from an operation for appendicitis.

Mr. Reed, secretary of the Atlas Elevator Co., of Minneapolis, has been spending several days in the vicinity of Sioux City, going over their line of elevators.

Clarence J. Brown, manager of the Farmers' Elevator Co., at Jefferson, S. Dak., has made application for membership to the Sioux City Board of Trade.

Visitors on the floor during the week were: Ed. Propp, manager of the Farmers' Elev. Co., Sutherland, Iowa; Mr. Roe, manager of the Farmers' Elevator Co., Carroll, Nebr.; Wm. A. Verzani, of New Castle, Nebr.; A. H. Hillis, of Ponca, Nebr.; H. E. Larson, Burbank S. Dak.; C. J. Brown, Jefferson, S. Dak.; Mr. Simonson, Elk Point, S. Dak.

BUFFALO.

E. Bangasser, Correspondent.

A. R. Taylor of Taylor & Bournique, Milwaukee, is in Buffalo. C. W. Urmston of the Urmston Grain Co., Indianapolis, was on 'Change today.

Rye neglected. No. 2 was offered at $1.40 at one time, but closed at $1.48 asked. No. 2 September shipment was quoted at Chicago October price, c. i. f. Buffalo.

An explosion of dust in the elevator of the Curtiss Grain Corporation plant blew 40 feet out of a brick wall, causing damage to the extent of $20,000. Fire followed, but did little damage. The mill will continue operations.

Wheat arrivals were liberal and all the offerings were taken. Quoted: No. 1 red, $2.31; No 2 red, $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $2.17; No. 2 mixed, $2.26; No. 3 mixed, $2.22@2.23; No. 4 mixed, $2.16@2.18 on track.

Geo. E. Pierce, elevator owner and grain merchant, whose financial affairs seem to be in a bad way, claims he can tide them over and has opened a new office. A creditors' meeting will be held next Tuesday. His attorney estimates Pierce's liabilities at $250,000 and assets at about three times that amount.

Oats were taken as fast as offered and the market cleaned up daily. Prices were fairly steady with last week at the close of each day's business until yesterday, when the disposition on the part of sellers was to let go and there was a decline. No. 1 white, 72¼c; No. 2 white, 71¾c; No. 3 white, 70¾c; No. 4 white, 69¾c asked on track.

Corn declined rapidly after the opening of the week, but went a little lower than expected. There were purchases all the way down from $1.80 to $1.59, after which buyers were not paying any price. The demand was principally from mills who had to have the corn, and at the close No. 1 and No. 2 yellow were offered at $1.50 and no buyers.

Inspection track receipts for the week: No. 1 red, 1 car; No. 2 red, 24 cars; No. 3 red, 28 cars; No. 4 red, 16 cars; No. 5 red, 8 cars; sample, 2 cars; No. 3 soft white, 1 car; No. 1 white club, 1 car; No. 1 mixed, 3 cars; No. 2 mixed, 4 cars; No. 3 mixed, 11 cars; No. 4 mixed, 3 cars; sample mixed, 2 cars; No. 1 northern, 11 cars; No. 2 northern, 6 cars; No. 3 northern, 75 cars; No. 4 northern, 27 cars; No. 5 northern, 3 cars; No. 1 dark hard, 1 car; No. 2 dark hard, 8 cars; No. 3 dark hard, 12 cars; No. 4 dark hard, 12 cars; No. 1 hard, 7 cars; No. 2 hard, 70 cars; No. 3 hard, 99 cars; No. 4 hard, 48 cars; No. 5 hard, 27 cars; sample, 1 car; No. 1 dark hard, 2 cars; No. 2, 20 cars; No. 3 dark hard, 32 cars; No. 4 dark hard, 9 cars. Corn—No. 1 yellow, 72 cars; No. 2 yellow, 61 cars; No. 3 yellow, 25 cars; No. 4 yellow, 2 cars; No. 6 yellow, 2 cars; No. 1 mixed, 2 cars; No. 2 mixed, 4 cars; No. 3 mixed, 5 cars; No. 4 mixed, 1 car; No. 1 white, 1 car; No. 2 white, 8 cars; No. 3 white, 4 cars. Oats—No. 1 white, 17 cars; No. 2 white, 168 cars; No. 3 white, 79 cars; No. 4 white, 8 cars; sample, 10 cars Rye—No. 1, 1 car; No. 2, 26 cars; No. 3, 2 cars; No. 4, 1 car.

Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

WESTERN CANADA.

A. Caldwell, Correspondent.

The movement of new oats through Winnipeg is increasing, and as stocks are light, premiums have been well maintained, but now easing off, as noted.

Heavy rains are delaying the windup of threshing operations and to some extent the movement of grain for the time of the year the volume of new crop coming on the market is remarkably heavy.

The Canadian wheat board meets in Calgary this week and the milling situation in the west will come up for consideration. The mills in the west, especially those along the main line of the C. P. R. R, are in a very different position, having no wheat along the lines tributary to them and being faced with double freight rates in shipping in wheat from other districts. At present the smaller mills are all closed down. Sharp advances in flour prices in Alberta and Saskatchewan seem to be inevitable.

Coarse grains have been unsettled, with slow trade during the past week. No. 2 C. W. oats lost part of its premium, closing at 85c today, compared with 88⅛c a week ago, but the October delivery future is 81c as compared with 81⅛c a week ago. Cash barley is ¾c lower at $1.25¼, compared with $1.26 last week, the October future being $1.20⅛. There has been a decline of 20c in cash flax, No. 1 being down to $4.38 and October delivery at $4.63, but rye has advanced in the period under review 6⅜c to $1.38½. Barley and rye have been relatively strong, and so far as barley is concerned we believe it will continue to show independent strength with sufficient demand and shipments out of terminal elevators to prevent any large accumulation. With No. 1 northern marquis and bluestem wheat in Minneapolis selling at $2.45 and $2.60 it makes American rye look cheap at around $1.38, and our market is following their price in that cereal.

INDIANAPOLIS.

Myron R. Green, Correspondent.

Present estimates of the probable acreage of winter wheat to be sown this fall as compared with last year show a reduction of about 25 per cent.

The Squibbs Elevator Storage Co., of Greendale, Ind., incorporated with a capital of $3,000. Directors are N. E. Squibbs, Robert E. Squibbs and Elmer L. Schneider.

The Dearborn Baking Co., of Aurora, Ind., incorporated with a capital stock of $10,000 for general baking business. Directors are George B. Lewis, Ralph R. Gray, James Rushworth and Lew W. Hill.

The Hoosier Food & Supply Co., of Indianapolis, has incorporated with a capital of $50,000 to manufacture flour, meal and cereal products. The directors are Clyde V. Mendenhall, Joseph H. Traub and Albert B. Karle.

A state-wide campaign for the selection of seed corn from standing stalks will be made this fall by workers from the extension department of Purdue University. Field selection and proper storage will be emphasized in the demonstrations to be held in almost every county.

Among the out of town members of the Indiana Grain Dealers' Association who were in Indianapolis last week were: Lloyd Loughney, Monticello, Ind.; Carl W. Sims, Frankfort, Ind.; Bennett Taylor, Lafayette, Ind.; P. E. Goodrich, Winchester, Ind.; J. W. Sale, Bluffton, Ind.; Elmer Hutchison, Arlington, Ind., and H. W. Reiman, Shelbyville, Ind.

H. E. Barnard, head of the food and drug division of the state board of health, has resigned to become a director of the American Institute of Baking. Mr. Barnard had been in state work since 1905, and through his association with the state board has accomplished much toward getting through many state legislatures many of the present food laws.

The necessary power and space for the treatment of seed wheat was offered by a canning factory at Shelbyville for all Shelby county farmers. The work will be started this week. Each farmer in the community will be allowed ten bushels to be treated under the hot water system. V. P. Tapke, from the Department of Agriculture, Washington, D. C., has been sent to Shelbyville to study the method of the hot water treatment and has stated that the department expects this treatment to become general throughout the winter wheat belt.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Cattle market steady. Receipts, 100.

Saturday's hog receipts were 500 head. Market about steady with $17.50 top heavy packing hogs selling around $15.

Many country dealers have been visitors on Peoria 'change the past few days while attending the implement fair at this point.

Oats—Receipts, 4 cars, with market very quiet and very little inquiry. Prices were 2¼c under Friday's market. No. 2 white, 66c bid; No. 4 white, 1 car at 64c.

A report recently issued by the secretary of the Peoria Board of Trade shows that a total of 1,709 cars of grain were unloaded at Peoria during the months of July and August, of which 452 cars were leaking, or an average of one in each four cars unloaded.

Saturday's corn receipts at Peoria were 45 cars. Conditions prevailing at all other markets were reflected here again Saturday and prices were 7½ to 8c lower. Peoria industries are using enough corn to make a good local demand at this market for all grades. Demand for yellow corn from shippers is very good and prices at Peoria for all grades appear strongly in line with other markets. All offerings were readily taken at the decline. No. 1 white, $1.42½; No. 1 yellow, $1.42½; No. 2 yellow, $1.42½; No. 3 yellow, $1.42; No. 4 yellow, $1.41; No. 5 yellow, $1.39@1.40; No. 6 yellow, $1.38; No. 1 mixed, $1.42½; No. 2 mixed, $1.42½; No. 3 mixed, $1.42; No. 6 mixed, $1.39.

OMAHA.

Leigh Leslie, Correspondent.

After eleven years' service as manager of the Farmers' Grain & Live Stock Company at Norfolk, Nebr., John Phinney has severed his connection with that company. Frank Melcher has been appointed his successor.

Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, returned to his home here Thursday from Washington, where he attended, on September 8th, an important hearing before the Interstate Commerce Commission.

On account of congestion in the terminals here, an embargo was put on the shipment of wheat to this market last Sunday. The congestion was quickly cleared up, and the embargo was lifted within three days after it was put on. There are now absolutely no restrictions on the shipment of any grains to Omaha.

Improved Oats Discovered.

Discovery of a new and improved variety of the Khersion oats seed by Prof. T. A. Kiesselbach, crop department of the University of Nebraska, has resulted in the increased production of oats, according to E. G. Maxwell, County Agricultural Agent of Douglas county.

The new seed produced 46 bushels of oats to the acre on the Sass farm, 10 bushels in excess of the amount produced by the regular seed. On the Bock form six more bushels were produced to the acre by the new seed than by the old one. In each case both the new and old seed were planted on the same field. The two farms adjoin each other and are located a few miles west of Benson.

Nebraska Corn Maturing.

Corn throughout the state is maturing rapidly, but has been affected unfavorably by dry weather in the central and western counties, according to the weekly crop bulletin of the federal department of agriculture.

The last week was cool and dry. Temperatures averaged three degrees below normal, generally less than one-quarter of an inch. In a few eastern sections it was about one inch. Plowing has progressed slowly. Pastures are still dry.

Crop conditions for the entire state of Nebraska, with the exception of one small section in the McCook division, continue good, according to the last Burlington weekly crop report.

Threshing of wheat is about completed in Nebraska. The wheat yield in the Omaha division this season is estimated at from 15 to 30 bushels per acre. Plowing is under way for the next crop of wheat.

The report says that the oats and barley crop turned out well.

MEMPHIS.

George Williamson, Correspondent.

Douglass W. King, of Ft. Worth, Texas, was here during the week and a visitor on 'change.

Pease & Dwyer are building an addition to their plant at the corner of Nettleton and Tennessee.

On Friday No. 3 red oats sold at 66c, while No. 2 cars of sample sold at 60c. No. 2 red sold a day or so ago at 68c, but the best bid today for No. 3 was 62c, while 59c was offered for No. 4 red.

J. T. Morgan, of the Edgar-Morgan Co., and ex-president of the Merchants Exchange, has not been worrying over the slump in prices. He was too busy accepting congratulations over another candidate for the Morgan baseball team at his home.

UNION TRUST COMPANY
CHICAGO
A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing the banks of the country greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

UNION TRUST COMPANY CHICAGO

STRICTLY A COMMERCIAL BANK
Member Federal Reserve System

The Mississippi Elevator Co. is adding two large concrete tanks with capacity of 35,000 bushels, which will give the bulk capacity of 70,000 bushels at the plant. They are getting ready to do the mixed feed business in addition to hay and grain.

In oats there has been little activity, prices have crumbled. White oats were selling today in a small way around with those who had the red on hand knowing what they could get. The offerings have been taken very sparingly for feeding purposes, the consumers preferring to pay the difference for the white. Business on call was at a standstill because the trade did not know what to do and those did not care to unduly depress the market by making offers.

The slump in prices has not hurt the cash body seriously here, coming at a time when dullness of demand is expected and counted on. For some time the shippers have been buying sparingly, fearing that high prices would not hold. The unsettled state of the market, however, has encouraged buying more than usual and has resulted in orders coming in more slowly. Price making has been dull for several days, because no sooner would some be made than they would have to be changed. Corn has been more upset than oats and some sales have been made at prices which a week or so ago would have been regarded as out of the question. Texas corn has been slashed unmercifully for the mills have been grinding nights and that had been the best outlet. Today September shipment 2 white mixed corn was offering at $1.45 and less with buyers hard to find. The feed manufacturers have been doing very little, waiting to see more stable conditions.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Oats have held remarkably firm, considering the continual decline in the corn market. Recent sales have been at 45c per bushel delivered, New Orleans weights and grades to govern. At the close of the market this week indications on the basis of white oats, delivered, should be 44c in bulk. The demand for oats is exceedingly slow, and inquiry for both local and export is almost nothing.

The continual decline in the corn market, with apparently no bottom in sight, has upset trade conditions in coarse grains considerably, and buyers have about withdrawn up their hands. Texas is still active with offerings and recent indications from the state have been $1.50 per bushel delivered on both No. 3 white and No. 3 mixed. Nominally for quick shipment, New Orleans weights and grades to govern. The demand for white and mixed corn here is of a very limited character, and the call is for yellow corn almost exclusively. Nevertheless markets have been following the decline to some extent and the last sale of No. 3 yellow corn delivered was at $1.60 per bushel. Since then the market has declined off considerably and the price on No. 3 yellow corn delivered today should be about $1.60.

ner Kearsarge arrived here last om Chicago with 150,000 bushels of ed winter wheat to go into store at st Side Iron Elevator. The wheat d by the Grain Corporation, and it rstood that more is on the way.

Raddatz & Co., grain dealers, are a series of letters to the trade en- "Letters to Hank from Archie." The has used the style made famous by ardner in his "You Know Me" They are complete with facts and ns as they appear to this progres- n and at the same time designed to he funny bone of the most serious r of the market's course in the last days.

rye selling at 85c to 90c below some Toledo dealers are wondering ere is not more rye being milled bread offered for sale. Inquiries mong Toledo grocers brought out ormation that only two of 30 re- rye flour for sale, which they were for 7c per pound, and it is almost ble to produce rye bread at baker- ceipts of rye here have greatly in- over a year ago. Last month they 50,000 bus., against 70,000 in Au- 918. Demand is nil at the present time, with the seaboard taking a few lots of late.

With general liquidation all along the line cash corn prices here were lowered 21c during the week, receipts amounting to only 10 cars, and bringing good premiums over the futures. Oats receipts are some better but the movement is being held back by preference to wheat loading and lack of cars. Old cash oats were quoted Saturday at 72½c, and new at 71c; No. 3 white sold Saturday at 66⅛c, Toledo rate of 23c to New York. Mills are gradually becoming filled with wheat and prices were lowered last week. Spring wheat is in good demand and good dark northern sold as high as $2.52, Toledo rate. Lower grades selling accordingly with No. 3 at $2.39 to $2.44 and No. 4 at $2.33½. Wheat receipts last week 352 cars and 150,000 bus. by lake; corn, 10; oats, 55; rye, 42; barley, 2.

Unless some action on the part of the Grain Corporation is forthcoming within a few days Toledo dealers will be compelled to withdraw their bids to the country for wheat. The situation is acute, as the only market open is interior and local mills and the latter have already purchased about all the wheat they can use and are reducing their prices daily. With the seaboard congested and only 100 permits a day being issued for eastern shipments, wheat in this territory will simply have to go back to the farms. There is plenty of storage space available in Toledo but the small margin for handling does not permit of any added expense for elevation and storage on the part of grain dealers. It is understood the Grain Corporation will reship several hundred thousand bushels of wheat to Toledo from Chicago, and already 150,000 bushels have come down by lake and gone into store. This looks like a pure case of discrimination in favor of Chicago, thereby relieving elevators there and allowing them to take in so much more wheat.

ST. LOUIS.

E. E. Reeves, Correspondent.

Joseph J. Bagley, of Logan & Bryan, was among the visitors on the floor of the Merchants' Exchange last week.

Nat. L. Moffitt, president of the Hubbard & Moffitt Commission Co., has returned from a three weeks' vacation at Fishers Island, N. Y.

Senator Porter Lewis and M. Caldwell, a grain man, of Nashville, Tenn., were among the visitors on the floor of the Merchants' Exchange last week.

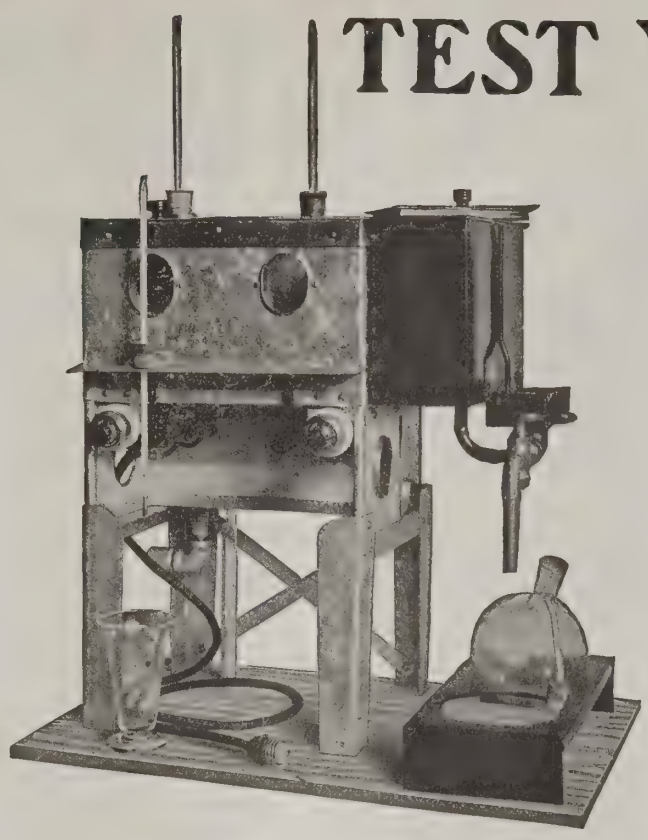
J. B. Stubblefield, of Matthews & Stubblefield, grain and elevator operators of Maiden, Mo., was a visitor on the floor of the Merchants' Exchange last Wednesday.

F. M. Craig, district sales agent of the southwestern division for the Quaker Oats Co. of Chicago, was in St. Louis Thursday looking up old friends on the floor of the Merchants' Exchange.

E. L. Luibel, manager for J. Wade & Sons of Memphis, Tenn., was on the floor of the Merchants' Exchange Thursday looking over the market situation and lining up business for his company.

D. J. Rooter and Graby Hord of the Tebbetts Mill & Elevator Co., of Tebbetts, Mo., were on 'change last week making arrangements to market some of the grain from their vicinity in St. Louis.

J. S. Kevil, secretary of the Sikes-McMullin Grain Co., of Sikeston, was on the floor of the Merchants' Exchange last week shaking hands with his old friends and looking after business for his company.



John E. Hall and Mrs. Hall returned last week from a two months' fishing trip on a private yacht on the rivers of Canada. John expected to be gone "until the snow flies, but the bait ran out." He says that his host could cast much better on dry land, in a bucket, than he could in the water.

Secretary Eugene Smith is mourning the loss of a jewel case containing $500 worth of jewelry which disappeared from his home last Thursday night along with a newly employed servant. Among the missing jewelry is a Shriner pin set with diamonds, a signet ring, a diamond sunburst, and some beauty pins.

Otto L. Teichmann, former president and one of the best known members of the Merchants' Exchange, president of the United States Bank of St. Louis, and a former member of the Police Board, is seriously ill at his home, 3401 Longfellow boulevard, but is said to be recovering. His illness is the result of overwork during the war period and grief over the death of his father.

The St. Louis grain and milling trade is becoming daily more appreciative of the benefits of the Federal Barge Line, and shipments of grain and flour by that route are steadily increasing. The tonnage in these two lines shows a greater increase than that of any other kind of freight. The new line will soon celebrate its first anniversary and it is probable that the Merchants' Exchange will hold appropriate ceremonies on that occasion.

A vote of the members of the Merchants' Exchange of St. Louis will be taken on Tuesday, the 16th day of September, 1919, on the question of making an appropriation

of $2,000 towards defraying the expenses of the twenty-third annual convention of the Grain Dealers' National Association, St Louis, October 13-14-15. The members of the various committees in charge of the arrangements for the affair are working like beavers to make it the largest and most successful convention ever held by the association.

President E. C. Andrews and the members of the Merchants' Exchange are preparing to give a rousing reception to David R. Francis, United States Ambassador to Russia, on his return to St. Louis some time between Sept. 24 and 27. President Andrews has not announced his committee, but he will place some of the strongest members of the Exchange on this committee. The Chamber of Commerce and a committee appointed by Mayor Kiel will assist in making Ambassador Francis welcome home.

St. Louis is feeling the effects of the heavy receipts of wheat at various country points in her territory, but so far she has been amply able to take care of all the offerings in good shape. A wire from Springfield, Mo., shows a condition which is similar to that existing at many other of the smaller markets. It says that "The heavy receipts of wheat have demoralized the milling industry at Springfield to such an extent that millers have issued an appeal to farmers of Southern Missouri to hold up further shipments of grain until the situation can be relieved."

MILWAUKEE.

Erich E. Meyer, Correspondent.

The Milwaukee Chamber of Commerce closed at noon Thursday, Sept. 11, which was Milwaukee day at the State Fair.

Harry M. Stratton, president of the Milwaukee Chamber of Commerce, was authorized to appoint delegates to the Grain Dealers' national convention at St. Louis Oct. 1.

The office of the J. H. Murphy Feed Co., 208 Florida St., was partially wrecked by a freight car which went rampant while being switched in the Northwestern road yards. No one was injured.

Receipts of grain at Milwaukee in August were 6,875,220 bushels, of which 779,880 bushels were wheat, 724,040 bushels corn, 3,729,830 bushels oats, 1,453,820 bushels barley, and 187,650 bushels rye.

The directors of the Milwaukee Chamber of Commerce, at their monthly meeting Sept. 9, went on record in opposition to the government's taking over private property in connection with the discussion of the Kenyon bill.

Milwaukee Chamber of Commerce memberships are selling at $480. This is taken to indicate the increasing importance of the grain trade in Milwaukee, as a few months ago memberships were transferred at as low a figure as $90.

Shipments of grain from Milwaukee for the past week were 524,527 bu. oats, 175,471 bu. corn, 109,492 bu. barley, 15,710 bu. wheat, 7,750 bu. rye; total, 832,950 bu., against 622,415 bu. the preceding week and 1,546,287 bu. a year ago.

Receipts of grain at Milwaukee for the week ending Sept. 13 were 148 cars barley, 305 cars corn, 391 cars oats, 257 cars wheat, 95 cars rye, 1 car flax; total, 1,197 cars, against 1,549 cars the week before, 1,291 cars a year ago and 820 cars in 1917.

The members elected by the Milwaukee Chamber of Commerce directors were: Fred Hallberg, Minneapolis; Harold E. Tweeden, Milwaukee; Albert H. Cherry, Milwaukee; Charles Zehnpfennig, Parkston, S. D.; Harold H. Hellier, Minneapolis, and William P. Devereaux, Minneapolis.

The Milwaukee cash grain market during the past week was featured by the continued decline in corn, which is 29@30c lower for this period, due to the excellent showing of the new crop, as presented by the September government report, the entire crop being almost entirely of uniform good quality. Barley for the week is 3@5c lower, rye 1c, while wheat is 5@10c higher, and oats are 4@5c lower. The movement is moderate and the demand fair.

George A. Schroeder, traffic expert of the Milwaukee Chamber of Commerce, recently returned from Washington and declared that the Milwaukee delegation was unable to present any testimony concerning proposed changes in grain rates because the hearing was postponed until some time after Nov. 1.

P. P. Donahue, president of the Donahue-Stratton Co., Milwaukee, attended a two days' conference in Chicago, called by the Illinois Manufacturers' Association, to discuss problems affecting legislation, railways, labor, cost of living and prices. Mr. Donahue is the Milwaukee representative of the National Association of Grain Dealers.

The Milwaukee grain control committee advises that, until further notice, no permits will be issued for shipments of grain from other primary points to Milwaukee. Shipments from country points to Milwaukee will continue unrestricted. The grain corporation is shipping 100 cars of wheat per day for storage in Milwaukee elevators. Unless consignees give prompt disposition orders for all receipts of country grain and avoid a congestion in the Milwaukee terminals, it may become necessary to restrict such shipments in the near future.

CINCINNATI.

George Mosbacker, Correspondent.

The daily records of hay plugging track transactions attest strikingly to the prominence of the Van Lennen Co. in this line of business.

The wheat business of the local offices of the Cleveland Grain Co., since the movement of the new crop began, has been very large, far transcending the proportion in other years of their Cincinnati connections.

President E. B. Terrill, of the Cincinnati Grain and Hay Exchange, has been invited to name a committee of the Exchange to attend the annual convention of the Grain Dealers' National Association to be held in St. Louis on October 13, 14 and 15.

Cancellation of the privilege for free transportation of an attendant with shipment of live stock is petitioned for by the Southern Railroad lines west before the Louisville District Freight Traffic Committee hearings set for September 24 at Cincinnati. In the argument it is stated that the necessity of providing a caretaker to accompany shipments of live stock devolves upon the shipper and not upon the carrier.

Cincinnati is to enter the farm tractor field through the locating here of the Reliable Tractor and Engine Company, whose plant is now at Portsmouth, Ohio. The company will acquire a factory here with the intention of later building a modern plant to meet its requirements. They have underwritten $1,000,000 preferred stock to be used in the expansion of the farm tractor business, and expect to employ 400 men in the manufacture of gas engines and tractors.

Due credit must be given to H. Edward Niemeyer, who skillfully directs the hay business of the Fitzgerald Bros. Co. for the result accomplished in bringing Chicago, and other hay buying interests into this market, the past week, and relieving the congestion in the local terminals. The volume of their purchases, and his own as a representative of these interests, helped materially to sustain quotations at the plugging yards, and to give to shippers a price advantage, which was reflected in the large invoices to the trade at the close of the week.

The Cincinnati District Freight Traffic Committee will in the next week hear the request of the Baltimore and Ohio, western lines, to make certain corrections to provide that on trap cars which do not contain the minimum weight as specified in the tariff, a charge of $3 per car will be made over and above the regular tariff rates, on the property of the car, this charge to be prepaid in all cases. In the argument it is stated that the proposed change is necessary in order to establish a uniform rule on the B. and O. Western lines, and also to put B. and O. regulations in line with those of other roads at common points.

Total inspections of wheat as to grades for the month of August as compiled by Geo. F. Munson, chief of the inspection department of the Grain and Hay Exchange were as follows: No. 1 red, 2 cars. No. 2, 272, No. 2 smutty 22, No. 3, 667, No. 3 smutty 62, No. 3, garlicky 4, No. 3, mixed 5, No. 3, mixed smutty 1, No. 4, red 299, No. 4, red smutty 36, No. 4, garlicky 1, No. 4, mixed 2, No. 4, mixed smutty 1, No. 5, red 87, No. 5, smutty 6, No. 5, garlicky 3, No. 5, mixed, smutty, 1, No. 5, Northern spring 1, sample red 18, sample garlicky 1, No. 2, hard 2, No. 2, mixed smutty 1 car. There were 56 cars of 1 per cent or more dockage, 20 cars of garlicky wheat and 132 cars of smutty grain during the month. Total inspections were 1,496 cars.

CASH MARKETS.

Wheat—The wheat market was not affected by the dullness and declines of other grades, in fact displayed more activity and held a firmer tone under the smaller movement and urgent demand. Quality was not a factor, and offerings, which were largely of consigned grain were eagerly competed for by elevator and milling interest. No. 2 of heavy weight was scarce, but a good percentage of the arrivals graded No. 3 and No. 4: No. 1 red winter, track, $2.26@2.27; No. 2 red winter, track, $2.23@2.25; No. 3 red winter, track, $2.18½@2.20½ No. 4 red winter, track, $2.14@2.16; No. 5 red winter, track, 2.10@2.13; sample as to quality, $2.05@2.15. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—Extremely dull conditions, with further sharp declines in prices prevailed in the local corn market the past week as a result of the sensationally weak September option. Losses of 28c per bushel were recorded as compared with 18c a week ago, and 12c two weeks ago. There was practically no demand for the limited offerings, and the disposition to look for lower prices was much in evidence among buyers. Yellow grades had a few inquiries for immediate needs, but white and mixed sold only at a sacrifice:

No. 1 white, $1.41@1.42; No. 2 white, $1.40@1.41; No. 3 white, $1.39@1.40; No. 4 white, $1.36@1.38; No. 5 white, 1.34@1.36; No. 6 white, $1.32@1.34; No. 1 yellow, $1.43@1.44; No. 2 yellow, $1.42@1.43; No. 3 yellow, $1.41@1.42; No. 4 yellow, $1.38@1.40; No. 5 yellow, $1.36@1.38; No. 6 yellow, $1.34@1.36; No. 1 mixed, $1.40@1.41; No. 2 mixed, $1.39@1.40; No. 3 mixed, $1.38@1.39; No. 4 mixed, $1.35@1.37; $1.33@1.35; No. 6 mixed, 1.31@1.33.

Oats—The oats market declined with corn, but the tone was steadier, and the losses only 4½c as compared with the close of a week ago. Receipts, however, were comparatively small and demand about equal to offerings. Light weight sold rather slowly and full values were difficult: No. 2 white, 68@69; No. 3 white, 67@68; No. 4 white, 66@67; No. 2 mixed, 66½@67; No. 3 mixed, 65@66; No. 4 mixed, 64@65.

DULUTH.

S. J. Schulte, Correspondent.

Application has been made for the transfer of the Duluth Board of Trade membership of E. H. Harbison to James T. Hankinson, of Winnipeg.

The oats market here has been on the down grade for some time. Receipts have been only of a straggling nature, being limited to a few cars daily. Spot No. 3 white oats closed on Saturday at 61¾@64⅜c, as against 65¾@67¾c at the previous week-end.

The Minnesota state grain inspection department here has taken larger quarters in the Board of Trade building. A force of 70 inside and outside men is being employed, and A. C. Smith, chief deputy grain inspector, asserts that they would all have been busy had the season been a normal one.

Grain receipts of all kinds during August at the elevators here came to 2,295,014 bus. Of that rye accounted for 882,439 bus., barley for 755,381 bus. and oats for 243,410 bus. Wheat receipts came to 267,698 bus. Shipments from the elevators amounted to 1,932,577 bus., of which 590,000 bus. was rye, 881,963 bus. barley, 167,721 bus. wheat and 94,685 bus. oats.

Trading in rye was a feature on this market during the last week. Receipts of that grain was in good volume, so that cash handlers were afforded some business in it. Operations in futures were in good proportion on each day's market session. Spot No. 2 rye sold at the end of the week at $1.40½, an advance of 2½c compared with the previous Saturday. A substantial tonnage of rye has been booked for eastern shipment, and it is expected to be moved out shortly. Stocks of rye in the elevators here now aggregate 2,500,000 bushels.

Elevator men and the grain interests here are complaining of the extreme dullness of trade so far this season. Receipts of wheat up to date on the new crop have not averaged up at more than 70 cars a day, as against runs all the way up to 900 cars at this time last fall. As a result of the falling off in the season's wheat production over the Northwest, dealers are not hopeful that any material activity will develop at any stage. The tendency of farmers to hold off their marketing of wheat in hopes of eventually obtaining still higher premiums for it is being generally commented upon. Durum has accounted for the bulk of the wheat receipts here during the last ten days, and the mills are finding themselves unable to obtain sufficient supplies from day to day to maintain their plants in operation at more than part capacities.

NEW YORK.

J. M. Nugent, Correspondent.

Included among the visitors on the Produce Exchange floor during the past week were W. H. Martin, of Chicago, A. James, of Chicago, and A. R. T[illegible] of Milwaukee.

Cash corn continues to rule heavy, with trade neglected. The influence of the weakness in the West is the principal factor in the situation. Prices follow: No. 2 yellow, $1.55¾; No. 3 yellow, $1.55¼; No. 2 white $1.56¼; No. 3 white, $1.55¾; No. 2 mixed, $1.54¾, and No. 3 mixed, $1.[illegible]

Domestic demand for spot oats in the market during the week was on a light scale, and the foreign enquiry was entirely absent, with the exception of one small purchase. Values rule heavy, with the close of the week: No. 1 white 78c; No. 2 white, 77c; No. 3 white and No. 4 white, 75c.

BALTIMORE.

Robert C. Neu, Correspondent.

A. K. Taylor, of Taylor & Bourne, Milwaukee grain merchants, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

At the regular monthly meeting of the Board of Directors of the Baltimore Chamber of Commerce, held August 8th four new members were elected.

In Baltimore elevators and termirals has been estimated that there are 2 million bushels of grain at this writing, 90 per cent of this being wheat.

Ferdinand A. Meyer, president of the Baltimore Grain Co., receivers and exporters of this market, has returned from his vacation spent on the coast of Maine.

Receipts of baled hay in the Baltimore market during the month of September totaled 2,631 tons, compared with 1,[illegible] tons arrived in the same month last year.

The name of Harry M. Blinn, secretary of the C. A. Gambrill Mfg. Co., millers and exporters, of this market, is posted as an applicant for membership in the Baltimore Chamber of Commerce.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 970,000 bushels, compared with

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

00 bushels arrived up to the corre-ng time last year.

orts of wheat from Baltimore for the ight months of the calendar year ate 15,420,858 bushels, as against 77 bushels exported during the cor-ding time last year.

France and Canada Steamship Co., line that will operate from this port, ing freight and passenger service Baltimore to French ports, has leased pace in the Stewart building at Gay mbard streets, this city.

chard Randall, head of the well grain exporting firm of Gill & , of this city, has been named by Broening, of Baltimore, as chair-f the special committee to arrange tails of a complete survey of the schools of Baltimore, as authorized esolution of the City Council. The is to cover the school buildings, stem and the teaching force, and ke two years. It is the hope of the and of the special committee to the standard of efficiency of the schools as high as possible.

FORT WILLIAM, ONT.

By the Secretary.

following officers were elected at nual meeting of the Fort William ort Arthur Grain Exchange, held sday, September 10th: Council, Nor-M. Paterson, president; D. L. Bole, esident; C. Birkett, secretary; F. lie, J. A. Campbell, Geo. A. Coslett, Lemater, R. S. Dell, F. A. Guy, A. May, W. D. Muirhead, H. J. Sterling, Smith, A. Sellers.

PRICES
ON
WHEAT

KANSAS CITY.

T. J. Tanner, Correspondent.

Deliveries of 170,000 bushels of oats have been made on Kansas City September contracts. No corn has been tendered.

Thomson & McKinnon, Chicago grain commission merchants, with a branch in Kansas City, have decided to open an office in Excelsior Springs, Mo. George W. Bingham, of Chicago, will be in charge.

Solomon Herzstein, of Greeley, Colo., a grain and seed dealer, whose license was revoked a year ago for alleged offenses against federal rules, was before the Kansas City office of the United States Grain Corporation Monday seeking a new license.

So many fields in Kansas were burned this year by ignition from locomotive sparks that George O. Brophy, superintendent of the Union Pacific Railroad, is urging farmers to reserve a strip of 75 feet on the outside of right-of-way fences. On this strip, says Mr. Brophy, corn, kafir and other spring crops should be planted as a safeguard against fire.

Plans are being made by the Kansas City Grain Club for the entertainment of Julius H. Barnes, United States wheat director, on the occasion of his visit to Kansas City, September 26. After his address to the International Farm Congress, Mr. Barnes will be a guest of the grain club at a dinner to be given at either the Meuhlebach or the Baltimore Hotel.

The Missouri Grain Inspection Department has followed the Kansas bureau in establishing a system for reporting the condition of grain cars after unloading in Kansas City. A charge of 25c a car will be made, but the service will be rendered only on request. The action has the approval of receivers, who say the reports will be helpful in supporting claims for loss of grain in transit and in guarding against unjust demands of buyers.

The retirement of A. D. Wright from the presidency of the Twidale-Wright Grain Co. has necessitated a reorganization of the house. E. A. Twidale will become president and A. W. Stewart, formerly with the Shannon Grain Co., will be secretary. Mr. Stewart is an applicant for membership in the Board of Trade on a transfer from Mr. Wright. The withdrawal of Mr. Wright is due to failing health. He will go, with his family, to a ranch in the Hood River Valley, Oregon, for the winter. Mr. Wright hopes to reenter the grain business here.

Car shortage in Kansas has brought into requisition a clause in the agreement between country elevator men and the United States Grain Corporation whereby claims for storage become valid. The contract provides that, where cars are unobtainable for the shipment of 20 per cent of wheat held in any week, the corporation will pay a fee of seven-twentieths of a cent a bushel, which is to cover insurance, interest and other expenses. Several elevator men in Kansas have filed claims, which amount to $3.50 a week on each 1,000 bushels of wheat carried.

Delay in Fall Plowing.

With seeding time at hand and dry weather persisting, the fear is growing into a conviction that Kansas will have a greatly reduced acreage of winter wheat this fall. Advices received by B. C. Christopher & Co. indicates the possibility of only 7,000,000 acres, as against 11,611,000 sown in 1918. C. G. Hopkins, traveling agent for the Shannon Grain Co., sent in a report this week in which he declared conditions in Central and Western Kansas to be the worst for seeding in 20 years.

"Fields that were plowed soon after harvest in the central counties," says Mr. Hopkins, "have clods as large as a horse's head, and will have to be packed soon after rain to have any kind of seed bed. In some places where it is sandy and where they have had local showers and where the ground has been listed, it is in fair shape for seeding, following good rains. In the western part from Kinsley west, north and south not more than 30 per cent has been plowed. What has been touched was done with disk plows and disks which have stirred the top soil only about three or four inches, and is nothing but dust mixed with heavy stubble. Even if it should begin raining now and rain four inches, in my opinion, the Kansas winter wheat crop will be short one-fourth of the normal acreage sown."

Cash Grain Markets.

Wheat—Receipts for the week, 1,072 cars, against 2,239 a week ago and 1,072 a year ago. Scarcity of cars was mainly responsible for a reduction of over 50 per cent in the offerings. Reports from Kansas said many elevators were full, and that wheat in some instances had been piled on

KAFFIR CORN MILO MAIZE GRAIN
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

the ground. The embargo against new loadings for Kansas City was lifted Friday, and railroads were authorized to bring in a total of 310 cars a day, which will be accomplished under the blanket permit system, provided the roads can furnish the empty cars. Offerings in Kansas City did not afford a sufficiency of the choice qualities of hard and red wheat desired by local millers and shippers. Hence prices moved upward. Hard wheat closed 1c to 6c a bushel higher, with a premium of 12c on the best dark wheat, compared to the federal guarantee level. Red wheat gained 1@1½c. Closing quotations were: No. 1 hard, $2.20@2.32; No. 2, $2.18@2.30; No. 3, $2.12@2.26; No. 1 red, $2.19@2.20; No. 2, $2.16; No. 3, $2.13@2.14. A few cars of off grade, mixed and durum were sold direct to the United States Grain Corporation. The delivery of wheat to the government on warehouse receipts continued on a liberal scale. The grain corporation persisted in its effort to move wheat out, but was unable to get more than half as many cars as desired. About 150 cars a day were sent to Chicago and Milwaukee for temporary storage while en route to the Atlantic seaboard. Gulf port conditions did not permit shipments in that direction. While the yard situation in Kansas City improved somewhat, wheat continued to accumulate in the elevators. Stocks on Saturday were 14,696,000 bus., or 1,230,000 more than a week ago. A year ago the holdings here were 11,065,000 bus.

Corn—Receipts, 100 cars, against 41 a week ago and 417 last year. Weakness evident in previous weeks, due to approaching availability of the new crop, became pronounced and the most radical break of the year resulted. Prices receded 25c to 34c, with mixed and white showing the heaviest loss. Final quotations were: No. 2 mixed, $1.38; No. 3, $1.36@1.38; No. 2 white, $1.41@1.42; No. 3, $1.39@1.40; No. 2 yellow, $1.41; No. 3, $1.38@1.40. Though sales by sample were very slow, the elevator men continued to move stocks out on old contracts. Holdings at the end of the week were 7,000 bus. less than a week ago, at 26,000 bus. A year ago the stocks were 578,000 bus. Samples of new Texas corn were exhibited, but no purchases were announced. While some further decline in cash and September corn may be possible, there is a belief that sales of December and May below $1.20 are dangerous. December closed at $1.19⅛ and May at $1.16¾, while September was quoted at $1.34½.

Oats—Receipts, 80 cars, against 90 a week ago and 662 a year ago. The market held up at the week's outset, but prices yielded later in sympathy with action of corn. Prices closed generally 1c to 3c lower, with No. 2 white at 67@68c, No. 3 at 66@67c, No. 2 mixed at 62@68c, No. 3 at 61@62c, No. 2 red at 62@64c and No. 3 at 61c. Shipping trade was slow, with buyers holding off as much as possible to facilitate the recession. Elevator men took much of the offerings, as reflected by the increase of 66,000 bus. in stocks. Holdings are 1,138,000 bus., against 2,382,000 a year ago. The car situation was a handicap to both receivers and shippers.

Kafir and Milo—Receipts, 9 cars, against 5 a week ago and 8 a year ago. With new crop interest dominating sentiment, the market broke about 75c per cwt. At the finish both No. 2 white kafir and No. 2 milo were quoted at $2.25@2.30 and No. 3 at $2.25@2.27. Doubtless, some new milo from Texas would have been on the market except for the shortage of cars. It is reported that Texas growers are very anxious to sell, and that Oklahoma is offering for October shipment. Buyers seem to be holding off and are afraid to make bids in view of the record production this year in the various production states. One Kansas City dealer offered to make short sales of October at $2. Another said his bids for October to the country were as low as $1.70. The stocks here increased 1,000 bus. for the week, to 6,000 bus., against 120,000 a year ago. While it would require a killing frost to damage the crop materially in Kansas and Oklahoma, that danger in Texas is supposed to be passed.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain for the week ending September 8th were as follows: Wheat, 480,000 bus.; oats, 490,960 bus.; barley, 169,502 bus.

Stocks of grain in regular elevators September 8th were as follows: Wheat, 306,976 bushels; oats, 222,113 bushels; rye, 79,101 bushels; barley, 217,949 bushels.

The following were visitors on 'Change during the past week: L. A. Cutler, Rochester, N. Y.; F. E. Osborne, Batavia, N. Y.; E. B. Williams, Sheridan, Wyo.; Charles E. Lee, Chicago, Ill.; R. E. Hasenwinkle, Bloomington, Ill.; Walter P. Tulley, Denver, Col., and W. S. Smith, Minneapolis, Minn.

The extreme break in the corn market during the past week has naturally caused buyers great uneasiness, with the result that they are holding off making further purchases. Offerings are liberal. For shipment No. 2 yellow corn is quoted at $1.60 to $1.61 per bushel; No. 3 yellow corn, $1.59 to $1.60 per bushel. Receipts for the week ending September 13th, none.

Offerings were free during the past week on oats, although stocks were not heavy. Buyers are holding off purchasing owing to the extreme break in prices causing little demand for oats. Prices were quoted as follows at the close: New fancy 40/42 lbs. clipped white oats, 80c to 80½c per bushel; fancy 38/40 lbs. clipped white oats, 79c to 79½c per bushel; regular 38/40 lbs. clipped white oats, 78½c to 79c per bushel; regular 36/38 lbs. clipped white oats, 78c to 78½c per bushel. Receipts for the week ending September 13th were 81,430 bushels.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Receipts of straw have been more liberal with a very light demand, consequently prices are barely steady from $10.50 to $12 a ton.

Arrivals of shelled corn indicate some increase in the supply and it is ample for all present requirements. Quotations are holding around $1.80@1.82 a bushel for good corn.

On account of a Saturday holiday the receipts scheduled on last Monday were unusually heavy, with 12 cars of feed listed in the arrivals. One hundred and seventeen cars of hay and grain were bulletined.

Adjusters are at work on the fire losses at the Central elevator and until they report the actual damage will not be known. It is conservatively estimated, however, by local fire officials and others at more than $500,000.

A small amount of ear corn arrived but as there is practically no demand for it owners have trouble in effecting sales. Nominal quotations are around $1.85@1.90 a bushel but even at that price one has to find a buyer.

Among the visitors at the local exchange during the week were J. A. Siorski, of Oakdale, introduced by H. S. Allen; Capt. W. W. Terry, Pittsburgh, introduced by C. W. Fischer, of H. G. Morgan & Co.; and W. W. Mathers, Williamsport, Pa., introduced by W. F. Heck.

The oats market is very narrow, owing to lack of demand and it is difficult to place all arrivals. There is no change in quotations around 76½@77c a bushel for best grade. Receipts totaled 144,000 bushels for the period as compared with 118,000 for the same period a year ago.

Under the direction of President Harper shippers in the Pittsburgh district have been advised to get in touch with receivers before shipping grain to Pittsburgh for storage. So far the local officials have managed to avoid any confusion in the local terminals but if there should be any large increase in supplies before additional storage room is provided much confusion, as well as unnecessary expense, would be encountered.

John Floyd, chairman of the elevator committee of the Pittsburgh Hay and Exchange, together with his associa making every possible effort to relie situation caused by destruction Central elevator here. This elevat a capacity of about 300,000 bus grain, and the situation is much serious than anything that has con local dealers and shippers for many There are two other elevators, th change and the Iron City, and ar ments have been made to shift busi that congestion will be minimized as possible. President R. V. Harper, local exchange, says he does not hend any lasting effects from the the Central elevator and that he is dent ample accommodations can ranged. The Central elevator was by the R. S. McCague estate and v of the largest in the state. No plans have been made, according to sentatives of the estate, for rebuild elevator. There is some talk of larg ness interests here establishing

umber of Minneapolis millers have sked to testify before the local com- investigating the high cost of living lain why flour is being sold cehaper e United Kingdom than in Minne- .

Following a conference with O. P. B. Jacobson and A. L. Flinn, of the Minnesota Railroad and Warehouse Commission, W. W. Trenholm, federal supervisor of railroads in the Twin Cities, asked R. H. Aishton, regional director of railroads in the Northwest, for relief from the car shortage.

The following requests for transfer of membership in the Minneapolis Chamber of Commerce Association have been posted: From J. R. McMillan to M. R. Walsh; H. A. Jeub to Martin J. Kammerer. C. F. Clark has applied for a traveling representative's license to represent the Columbia Elevator Co.

Vidian Vye, formerly special agent for the United States Food Administration in Brown county, Minnesota, must stand trial in Brown county on an indictment charging that he dealt unjustly with alleged food hoarders. Federal Judge Wilbur F. Booth refused to release him after a hearing on habeas corpus proceedings.

Cash Wheat—The demand for cash wheat is strong in the local market and prices show an upward tendency. There is strong competition for wheat coming from certain sections of North Dakota on account of the gluten content and one or two of the big milling companies have been forcing prices higher for that kind. The demand for the choice No. 1 northern quality is sharp also and prices are advancing. There is a good demand for wheat to arrive from parts of North Dakota raising a desirable quality, millers paying close to spot price for the offerings.

The demand for durum wheat has improved considerably and premiums over the government price are better. Several elevator companies are in the market for amber durum and pay 4c over government price for choice. Ordinary durum is in fair to good general demand, but red durum is in slow to dull demand. Farmers are planning on sowing considerable red durum next year owing to the heavy yields noted this year.

The winter wheat market is narrow on account of the falling off in the movement to market. Very few consigned cars have been received lately and no notices of fresh consignments have been received in the past few days There is a fair movement of Nebraska wheat, but very little wheat is coming from Iowa.

Farmers in the Northwest are holding back their wheat for better prices. Line elevator companies report very light deliveries at their country stations.

Corn—The sharp break in other markets resulted in a decidedly poor demand for local corn offerings during the week and the market declined sharply. As new corn is available in Minnesota and most of the Northwest the shipping demand from outside markets is the chief outlet for local receipts. There is very little demand coming from the Northwest. Rain helped the feeding situation in South Dakota and Montana and orders from these states have fallen off sharply.

Oats—Prices are about the same compared with the futures, but the demand is not very sharp except for the choice offerings. Deliveries on September contracts have been fairly heavy. Most of the elevator companies are holding their old crop oats for mixing purposes. No eastern demand is reported at present. Offerings from the country are light. One elevator company has shipped but one lonesone car, compared with over a hundred cars shipped last year.

Rye—The market is strong compared with the futures and there is a good general demand at a premium over the October future. Millers are good buyers of the choice and the elevator companies buy the ordinary offerings very readily. Receipts are light. Farmers are taking storage tickets for most of their deliveries.

TAMPA, FLA.

Leonard Selz, Correspondent.

Coarse and fine standard grits are quoted at $4@4.10; cream meal at $4. Local jobbers have some grits and meal contracts purchased at higher limits and are watching the situation very closely. The demand is steady from the consuming trade.

No. 2 yellow corn is quoted at $1.96 per bu., sacked, 100 lbs., delivered here. The demand for out-of-state corn is very small now and Florida corn is being used at several cents per bushel discount under western corn. Stocks are far below normal and receipts continue very light.

Seven per cent bright American cottonseed meal is offered at $70.25 per ton for September-October-November delivery from Georgia mills. Local dealers are holding off from buying freely of cottonseed meal at present quotations, anticipating much lower prices. Five per cent feed cottonseed meal is offered at $59.25, but is meeting with little demand.

No. 3 white oats are quoted here today at 85¼c in second-hand packages; No. 2 whites at 88¼c in new bags; sacked in 100-lb. bags, delivered Tampa, all-rail. Stocks on hand are fairly large and there is but little demand under the nervous condition of the oat market. Receipts for the past week have been normal, totaling about 8,000 bags. The demand continues normal from country buyers, but local dealers are not buying ahead and are pursuing a very careful policy at this time. Further declines are anticipated with the free movement of new crop oats, which will find the Tampa dealers with light floor stocks.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

No permits necessary for shipments to St. Joseph.

Jesse Wright, of Oberlin, Kans., is now traveling representative for the Brunswig Grain Company.

A. B. Schreiber, of the Schreiber Milling Co., has been spending the summer months in Minneapolis, looking after the interests of their new mill in Minneapolis.

Application has been made for the transfer of memberships in the St. Joseph Grain Exchange from B. K. Blacor to B. V. Wasser, and from F. M. Spees to Henry S. Fogg.

The Washburn Crosby Co., who were making corn flour here during the war, are reported to be making plans to enlarge their mills here and commence the manufacture of wheat flour.

C. A. Addington, formerly with the Elwood Grain Co. and recently of the Keystone Grain & Elevator Company, has gone into business for himself under the name of the Addington Grain Co., with offices at 1014 Corby-Forsee building.

The car shortage has forced the Larrabee Mills to reduce production materially, according to J. C. Hilts, mangaer of the mill. The shortage of cars is greater now than during the worst of the war time, particularly so the last week or so.

Wheat receipts during the week have been large, and if all things keep up the St. Joseph market will break all records for receipts this year. Wheat is coming in from Oklahoma, Kansas, Missouri, Iowa, Nebraska, Colorado and South Dakota, which is a big territory to draw from.

Traveling men returning from western Nebraska and eastern Colorado report wheat piled up on the farms, threshed, and open to the weather on account of the elevators being unable to take in any wheat. At some places forty to fifty wagons have been brought into the elevators and left out in the open unloaded. Cars are absolutely unknown, and in some places no cars have been had for six to seven weeks.

A corn crop of 157,138,900 bushels, an average of 27.3 bushels to the acre, is forecast in the September crop report for Missouri. The 1919 crop will exceed the 1918 crop by 23,000,000 bushels. The oats yield will be more general over the state this year than for several years, while hay is generally good. However, it is forecast that the wheat acreage the coming year will be much decreased on account of the farmers being unable to plow, the ground being in an unfit condition due to lack of rain.

The following registered during the week on the exchange: C. D. Taylor, St. Joseph; J. W. Douglass, Nortonville, Kas.; W. T. George, St. Joseph; M. Olson, Oregon, Mo.; L. O. Ruyle, Rockford, Neb.; F. D. Bruce, Kansas City; P. J. Hennig, Chicago; C. M. Wertenberger, Clarksville, Mo.; W. H. Clay, Union Star, Mo.; Mark Schopfer, Rea, Mo.; J. M. Jolly, Kansas City; George Angel and Thos. Angel, Jr., Tarkio, Mo.; W. G. Patten, Easton, Mo.; Tobias Larson and E. C. Faust, Highland, Kas.; Ireland Hampton, Fort Worth; Arthur O'Conner, Atchison; R. Daniels, Page Center, Iowa; G. L. Brewer, Bolckow, Mo.; R. Adams, Fairfax, Mo.; W. W. Windle and M. W. Metts, Salem, Neb.; G. W. Gore, Forest City, Mo.; Mr. Baker, Shippensburg, Pa.; W. T. Crews, Craig, Mo.; C. B. grades of wheat, most of the receipts running around No. 3, No. 4 and No. 5 and to the yellow and red variety. Good grades of hard and dark hard wheat are in good demand and bring good prices. There is not a very good demand for yellaw hard offerings. Cash wheat follows: No. 1 dark hard, $2.22@2.27; No. 2 dark hard, $2.19@2.25; No. 3 dark hard, $2.16@2.23; No. 4 dark hard, $2.12@2.19; No. 5 dark hard, $2.08@2.12; No. 1 hard, $2.18@2.23; No. 2 hard, $2.15@2.21; No. 3 hard, $2.12@2.19; No. 4 hard, $2.08@2.15; No. 5 hard, $2.04@2.08; No. 1 yellow hard, $2.16@2.18; No. 2 yellow hard, $2.13@2.14; No. 3 yellow hard, $2.10@2.11; No. 4 yellow hard, $2.06@2.07; No. 5 yellow hard, $2.02@2.05; No. 1 red, $2.18@2.19; No. 2 red, $2.15@2.16; No. 3 red, $2.12@2.14; No. 4 red, $2.08@2.10; No. 5 red, $2.04@2.07.

Corn—Receipts for the week, 53 cars, against 62 a week ago and 82 a year ago. Extensive losses continued to feature the corn market all throughout the week. Readjustment in cash corn prices since Monday has amounted to 31c on yellow corn, 26@27c on white and 28c on mixed.

CHICAGO.

Two cars of Texas corn arrived here Saturday which graded No. 1 white.

Logan & Bryan has established private wire connections with Mason & Owen, brokers at Fresno Cal.

Newly elected members of the Board of Trade are Leopold S. Bache, Edward K. Scheftel and J. T. Gwathemy, all of New York.

R. W. McKinnon has returned from a fishing and hunting expedition in the Hudson Bay country and has some fine tales to relate.

Membership on the Chicago Board of Trade sold Monday by W. P. Anderson at $10,850, including $100 brokerage. The former previous high sale was $10,300.

No embargo exists on shipments of grain from Milwaukee to Chicago other than on rye. Barley can be shipped from that market direct to Chicago malt houses.

Chicago packers report substantial sales of packing products to Germany, accepting marks in payment for their product because they feel that they will rise in value.

E. D. Bigelow, secretary of the Kansas City Board of Trade, was a Chicago visitor last week when enroute for a Great Lakes trip as a part of his vacation itinerary.

The embargo on wheat to New York has been partially lifted inasmuch as permits will be accepted for 100 cars of wheat daily for that port to be distributed pro rata among the New York Produce Exchange dealers.

Rumors are heard that J. W. Eckhart is slated as organizer and chairman for Chicago's Federal Fair Price Committee. Official confirmation of this so far has been lacking.

The Chicago floor was visited last week by representatives from fifteen of the leading colleges of the country investigating the operations of the markets, inspection and grading of grain and the various phases of the business. Dean A. R. Mann of Cornell is fostering the idea of agricultural students getting a greater knowledge of the functions of grain exchanges.

Two memberships to the Chicago Board of Trade sold at $10,300 net to the buyers during the past ten days, being an advance of $1,000 over the previous sale. Applications for membership have been filed by A. L. Rosener, L. Richards, R. M. Lockhart, M. F. Cudahy, Wallace Templeton and Edward Lichtenberger. The following memberships have been posted for transfer: Estates of Patrick Cudahy and Chas. Lichtenberger, A. S. Templeton, W. B. Lathrop and W. R. Craig.

BARLEY MARKETS.

MILWAUKEE.—The Milwaukee barley market ruled weaker and closed 3@5c lower. A fair demand exists, especially for malting grades, which are scarce. Offerings are light, and mainly of the good grades and light stuff, which closed 4@5c lower. Receipts for the week were very light, being 148 cars, against 255 cars a week ago and 150 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.34@1.39; bright, $1.40@1.42; fair to good, 45 to 47 lb. test, $1.31@1.36; low, 40 to 44 lb. test, $1.18@1.32; feed, $1.15@1.25; Iowa quoted $1.18@1.40, for light to fancy; Wisconsin, $1.25@1.42; Minnesota, $1.18@1.39; Dakota, $1.18@1.39; feed and rejected, $1.15@1.25.

DULUTH.—Trade in barley again fell away during the last week. Operators who had been prominent in that market for some time back had no orders from their Eastern interests and they were almost entirely out of the game. The feeding demand for barley was less marked in view of the easier situation in oats. Just 24 cars of barley were received here during the week, and the range of prices eased off 2c to from 98c to $1.28.

MINNEAPOLIS.—The market is very weak and narrow and even the light offerings from the country failed to prevent declines. The futures are weak and there is no shipping demand to speak of. Deliveries on September contracts total 200,000 bushels. Local public elevators hold about a million bushels.

BUFFALO.—Barley dealers seem to have filled up maltsters last week and there was nothing done here this week. Some good old barley was offered, but as a rule contained black oats or was light stuff. Some new arriving but no settled price. Old malting quoted $1.42@1.52; feed $1.32@1.40; new malting $1.34@1.40; feed $1.28@1.32 on track.

PORTLAND.—The barley market had a healthy tone last week with the demand reported a little more active, especially for the good, heavy milling grades which commanded top prices. Light weight stuff declined somewhat and feed dealers took quite a liberal amount, this trade displaying so much interest of late that it is thought that maltsters and industries may have difficulty in obtaining sufficient bright plump grain to fill the requirements, says the *Commercial Review*. Values are reported at $64 for No. 2 blue barley with feed at $63 per ton.

SAN FRANCISCO.—Trading in barley last week was a very dull affair with transactions assuming a retail character. The embargo on shipments has caused many in the trade to hold off purchasing fresh supplies, says the *Commercial Review*. Values as reported last week were $3.07½ to $3.15 per cental according to quality.

KANSAS CITY.—Car shortage effected a reduction of 8 cars in the week's receipts of barley. The arrivals were 25 cars, against 36 a year ago. Grading continued to be mainly No. 4 or lower. While heavy samples were wanted, there was a slow trade in the light weights, with the offerings going mainly to elevators. Stocks increased 37,000 bus., to 104,000 bus., against 60,000 a year ago. Prices changed less than expected in view of the weakness of corn. No. 3 closed nominally at $1.09@1.12; No. 4, $1.05@1.08. Feed manufacturers said the demand for ground barley was limited. Feed was quoted at $2.80@3 per cwt.

ST. JOSEPH, MO.—Receipts of barley have been practically nothing, there being but one car on the floor the past week, which was a car from Kansas, very light in test and badly mixed, going sample grade. The barley market followed the corn to some extent, the cash closing at $1.12@1.14 for No. 3 and $1.10@1.12 for No. 4.

CHICAGO—There was a strong and rising market the first three days of last week with gains of from 1@2c reported each day on barley of the choicer types. The malting demand was particularly pressing with some little interest also displayed by the industries and feed men. At the turn of the week shipments from Milwaukee were embargoed and on Thursday, although the malting interest continued to be apparent the market was weaker and there after breaks of from 1 to 5c were of daily occurrence. This was in part influenced by the general break in the corn and oats market and a let-up in the demand. Sales of 20 cars Saturday were reported at $1.15@1.31. On Monday there were 26 cars sold over a range of $1.15@1.28, with futures lower, September closing at $1.18, September new opening at $1.30 and closing at $1.28½, December opening at $1.20, selling up to $1.20½ and closing at $1.20, and May opening and closing at $1.22½. Exports for the week from Atlantic ports were 1,502,000, compared to 300,000 same week in 1918.

Barley Notes.

Under date Aug. 26 we learn that speculation in new barley in the Isle of Wight has sent up the price to £5 per qr. for the choicest samples for malting purposes.

A production of 1,069,000 bus. was forecasted for the state of Indiana at Sept. 1 with condition placed at 70 per cent of normal.

Barley in Michigan suffered from a hot and dry summer, the yield per acre being estimated at only 18.3 bus. The total crop was estimated Sept. 1 at 5,124,000 bus., as compared to 8,360,000 bus. in 1918.

Barley in Minnesota declined five points during the month of August, indicating a crop of 26,404,000 bus. for the state, or 67 per cent of a normal crop. The 1918 crop totaled 43,400,000 bus.

The Wisconsin Coöperative Crop Reporting Service places the condition of barley Sept. 1 at 75 per cent as compared to a 10-year average of 86 per cent. At time of harvest the estimated production of the crop was placed at 14,723,000, compared to 25,383,000 bus. in 1918.

"New crop winter barley has been showing on the early market," says the London *Grain, Seed and Oil Reporter* under date Aug. 22, "and has met with a good reception, best samples have been making around 95d per qr. with rumors of seed making up to £5. The Board of Agriculture report says barley has perhaps improved more than any of the other cereal crops during July, but the straw is short. The Irish is said to be about an average a Scotch outlook is better."

In response to an inquiry as r the feeding value of white hull-le ley compared to the common b variety *Wallaces' Farmer* has t lowing to offer: "The hull-less ties of barley are of high feeding The objection to them is that corn belt conditions they do not nearly so well as the bearded rowed varieties. Under corn bel ditions we strongly advise such ties as the Oderbrucker and Manc Such varieties will often yield 300 pounds per acre more than Rather than sow the hull-less va however, we would use one of the varieties of oats, such as the Kl Iowa No. 103 or Iowa No. 105."

As a finish for hogs barley sho fed moderately when first start the fall, the ration being gradua creased. When fed during the g period on this grain they become tomed to the grain quickly and readily. However, when used as ish it will be found much more factory if fed in combination ground peas, corn or shorts.

ANOTHER DUST EXPLOS

The Smith-Parry Plant, Milw as rebuilt by the Burrell Engin & Construction Co., Chicago, is finished. It will be recalled th was one of the several propert stroyed this summer through d plosion. It is difficult to unde facing the protective appliances a tra care in our trade why we have had so many dust explosi the past several months. Just issue of THE PRICE CURRENT-GRA PORTER goes to press the latest ported—the Murray Elevator, City, Mo., with extensive propert ages and loss of life.

From official sources we learn fleet of 293 freighters steamed American ports during the mo June carrying 1,177,444 tons of Of this number 243 went out of A ports, 33 from Gulf ports and 1 ports of the Pacific.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

egotiations for the purchase of a e interest in the Larabee Flour s Co. by the Washburn-Crosby Co. tinneapolis have nearly been com- d. It is not yet possible to an- ice the financial interest involved. assets of the Larabee corporation around $3,000,000. According to stipulations entered into, Frederick arabee and Frank S. Larabee will ever connections with the corpora- within two years, and the present utive staff is to remain intact dur- hat period. The company has mills issouri and Kansas with an aggre- daily capacity of 12,000 bbls. and ing of 50 country elevators. While ead office is in Kansas City, it has ill here. It is believed that even- y the corporation will build a big here.

e Mid-West Cereal Mlg. Co., 3132 hicago avenue, has been incorpor- with a capital stock of $15,000. In- rators are listed as follows: Max r, Joseph H. Haimowitz and el M. Haimowitz.

KANSAS CITY.

Kansas City, Sept. 13.—Winter wheat in Kansas City and the Southwest njoying a prolonged period of active demand for domestic account, their tage resulting largely from short ction and inferior quality of spring in the Northwest. Sales for some have been up to the 60-day limit on acts imposed by the agreement with lour division of the United States Corporation. As fast as old sales lled, new ones are made. The flour sold consists chiefly of the upper s, with established brands in best st. There has been some difficulty posing of the clears and low grades, at sharp discounts, but the grain ation will on next Thursday receive of clears for export, which will be in liberal volume. Prices of the ht grade here have generally been igh to permit sales to the Govern- on previous export purchases, but Kansas mills secured a few con- of that kind.

For some time the scarcity of cars for flour shipments has been embarrassing to Kansas City mills, but operations here were curtailed very little. In Kansas many mills have been compelled to cut their running time 50 per cent, and just now the car situation is as serious as ever at some points. Within the next few months the daily capacity of Kansas City mills, which is now nearly 15,000 bbls. a day, will be increased about one-fourth by the addition of new mills.

Flour production for the week was 84,000 bbls. as compared with 77,500 a week previous and 65,100 a year ago. Prices had an upward tendency, due to strength in wheat and cheaper mill feeds. The following quotations are based on carlots, per bbl., packed in 98-lb. cotton sacks:

Hard wheat flour—Short patent, $10.90 @11.30; long patent, $10.50@10.90; straight, $10@10.40; first clear, $9@10; second clear, $8@9; low grade, $7@7.50.

Soft wheat flour—Fancy patent, $10.60@ 11; standard patent, $10.30@10.60; clear, $9.50@9.90; low grade, $7.50@8.

CINCINNATI.

Cincinnati, Sept. 16.—The flour business is light, and prices are barely steady. Purchases are mainly for small lots. A carload of Northwestern flour is scheduled to be sold at cost by the city authorities here this week. Quotations below represent prices in wood. Wood basis is 45c over jute. Winter patent, $10.50@10.90; hard patent, $11.50@11.80 per barrel; Bakers' Kansas patent, 140 lbs., jute, $10.60; corn flour, 100 lb. sacks, sacks included, $3.85.

MILWAUKEE.

Milwaukee, Sept. 13.—Flour production of Milwaukee mills for the past week reached a total of 15,600 barrels, representing about 67 per cent of total capacity production. Of this 12,000 barrels were wheat flour and 3,600 barrels rye flour.

NASHVILLE.

Nashville, Tenn., Sept. 15.—Soft winter wheat flour mills in the Southeast had only moderate volume of new bookings last week, but continue to do healthy business, including the filling of old contracts. Business will continue for some time on account of heavy advance orders. The bulk of the local wheat has been sold, and mills have liberal stocks of grain. Prices of both wheat and flour are steady.

Quotations for soft winter wheat flour, 98 lbs. cotton, f. o. b. Ohio river points are: Best patents, $11@11.40; standard patents, $10.15@10.45; 100 per cent, $9.95@10.

Nashville and southeastern mills, with capacity of 207,690 bbls., had output last week of 171,318 bbls., or 82.5 per cent of capacity, which compared with 164,594 bbls. and 79.8 per cent of capacity of mills reporting the preceding week, and 41.8 per cent the same week last year.

MEMPHIS.

Memphis, Sept. 13.—Just at this time there is but little activity among the mills, although grinding of wheat is keeping them busy part of the time. Demand for flour is moderately good. But none are grinding corn, meal being in little demand and stocks having been ample for all requirements. Prices on the latter are practically nominal, being based at present on higher priced corn.

PHILADELPHIA.

Philadelphia, Sept. 13.—Flour receipts for the week ending Sept. 13 were 20,0 bbls. and 15,681,841 lbs. in sacks. Generally speaking, the market is quiet, buyers operating chiefly for present wants, and while the feeling is not strong yet holders as a rule are not willing to force business at the cost of concessions. Stocks are moderate and only in exceptional instances have outside prices been shaded. Stocks in public warehouses on the first of the month were 90,869 bbls., as compared with 140,165 bbls. on Aug. 1.

Quote 196 lbs. packed in 140 lb. jute sacks: Winter straight, Western, new, $10.10@10.40; winter straight, near-by, new, $10@10.25; Kansas straight, new, $11 @11.25; Kansas short patent, new, $11.25 @11.60; spring short patent, new, $11.75@ 12; spring patent, new, $11.25@11.75; spring first, clear, new, $9.15@9.35.

Rye flour, $7.60@7.90 bbl. in sacks, as to quality.

DULUTH.

Duluth, Sept. 13.—Millers here are meeting with a fair local and outside demand for their products. Owing to the continued curtailment in receipts of spring wheat from over the West, the plants are operating at only partial capacities, and are not in position to book any volume of orders for prompt shipment. The trade is buying flour at present on a basis to cover their immediate needs only owing to the agitation in the foods markets.

Quotations per bushel in carlots at mills here follow: Family patent, jute $11.50@ 11.75; bakers' patent, jute $11.25@11.50; first clears, jute, $9.25@9.75; second clears, jute $7.25@7.50.

rather light. The trade is only purchasing for present needs and there is not much buying done but for what is actually needed. The following prices were quoted at the close for mill shipment: New wheat, spring patent, special, $12.20@12.50; spring patent, standard, $11.35@12; hard winter patent, $11@12; soft winter patent, $10.60@11; soft winter straight, $10.30@10.75. Receipts for the week ending Sept. 13 were 30,650 bbls.

NEW YORK.

New York, Sept. 13.—The flour trade was a good deal confused during the week over the pronounced weakness in coarse grains, and the strength in cash wheat. Buyers were inclined to be timid about making large contracts for flour, as they feared that the efforts to reduce the cost of living and the many weak features which have served to depress the other markets might eventually have an influence on wheat.

At the same time, the flour market was firmly held and predictions by some of the leading millers that good cash wheat will continue to advance induced some buyers to take hold, and on the average business was fairly good. The decision on the part of the Government to buy first clears caused a much better feeling in the market for this character of flour, which recently has been pressing for sale with a very poor outlet.

Government purchases of flour for the week amounted to 235,145 bbls., and the prices paid were $9.50@10.25 per bbl.

DES MOINES, IOWA.

Des Moines, Sept. 13.—Flour is now beginning to move somewhat better after two or three months. Best high patent flour is quoted at $12@12.25 per bbl.; standard patents, $11.50; first clear, $9@9.50; second clear, $6.25@6.75.

CHICAGO.

Chicago, Sept. 13.—The flour market was more satisfactory last week with local inquiry better as well as sales reported by outside markets. However, the Grain Corporation continues to be a light buyer much to the consternation and surprise of the milling interests. Minneapolis brands of flour are quotable here at $11.60 in carlots; brokers' grades, $10.90@11.40; retail trade, $12.35; Southwestern hard winters, $10@10.50; soft winters, $9.75@10.50 in car lots.

BUCKWHEAT SITUATION.

Field Agent Kirk of Minnesota says there is only a slight change of 4 points decline in condition of buckwheat, the Sept. 1 figure being 85 per cent.

Due to the more favorable weather which prevailed over the principal buckwheat producing sections, the Ohio Coöperative Reporting Service says the Ohio crop gained 3 points in condition during the month and the present estimate is for a production of 549,900 bus. this season.

Buckwheat in Michigan has improved during the past month, and if frost does not interfere the outlook is for a good crop. The present condition of 78 per cent indicates a yield of 14.4 bushels per acre, or a total production of 895,000 bus.

The condition of the Wisconsin buckwheat crop on Sept. 1 was 88 per cent of normal, compared to 85 on Aug. 1, and a 10-year average of 86. The forecasted production is 554,000 bus., compared to Aug. 1 forecast of 526,000 bus. and a production in 1918 of 636,000 bus. and a 5-year average of 338,000 bus.

Buckwheat condition declined five points during August in Indiana, estimated forecast being 1,069,000 bus. at Sept. 1.

Buckwheat was benefited by the warmer weather the latter part of the week in the northwestern section of the country, says the *National Weather & Crop* Bulletin reporting for the week ending Sept. 9, but it was too dry for the crop in the central Appalachian districts, and more moisture is needed in the western Lake region.

IOWA CORN PROSPECTS.

For the week ending Sept. 9 the *Weekly Weather-Crop Bulletin* of Iowa says the hot and mostly dry weather with strong, southerly winds hastened maturity of corn but injured pastures, potatoes, sweet corn, etc. It is estimated that 70 per cent of the corn crop will be safe if killing frost holds off till Sept. 20; 84 per cent, Oct. 1; and 95 per cent Oct. 15. Silo filling is progressing rapidly in the Central and Northern portions and some corn has been cut for fodder.

Increasing Inspection Rates.

The grain committee of the New Orleans Board of Trade, New Orleans, La., has had under consideration for some time the question of increasing the inspection fee on grain. Increases have been made in other markets and owing to the very material increases in the cost of operation in the New Orleans Inspection Department and der to maintain its efficiency, the of Trade has found it necessa feels justified in making an incr the inward inspection fee from $1.00 per car. This change beco fective Oct. 1.

The price of grain bags to f has been cut from 14 to 12 ce cording to Warden Drum of the Walla, Wash., penitentiary. Thi is for carload lots with the freig paid to any point in the state. F than carload lots the price is 12 There are 900,000 bags at the pri sale at this price.

Returning Common Sense.

The House appropriations committee on Sept. 11 reported the Deficiency bill appropriating $14,184,704.07 as against $47,752,484.14 asked — "some cut." Among the requests refused was one of $502,000 of the Department of Agriculture to investigate warehouses and to report on foods in storage, and another by the Department of Commerce to teach the public how to cook fish! No wonder "Buy W. S. S." is found on nearly every public document likely to get into the hands of the people.

ILLINOIS CROP CONDITIONS.

With the exception of corn practically all growing crops in Illinois have deteriorated during the month of August as reported by Chas. Adkins, director, State Department of Agriculture, and S. D. Fessenden, field agent for the Bureau of Crop Estimates. There were scattered showers during the month and temperatures averaged about normal for the state as a whole, but for large sections the droughty conditions prevailing for some time were not relieved to any appreciable extent. Fall plowing is going on slowly as the ground is quite generally baked and dry. Threshing has progressed more slowly than usual and much grain is still in the shocks.

Corn—The condition of this crop on September 1 was 76 per cent of the normal, practically no change having taken place since August 1. While in many sections the plant has improved and presents an almost perfect appearance in others it has continued to deteriorate. The indicated production on the present showing is 294,640,000 bus.

Spring Wheat—This crop has lost eight points in condition during the month, being on September 1 50 per cent of the normal and a crop of about 8,500,000 bus. is indicated. Reports from most sections of the state show that the quality of the grain is generally poor.

Oats—This crop has also fallen in condition from 73 per cent of the normal on August 1, to 68 per cent on September 1. Threshing returns appear to show that the average yield per acre will not be high and that the whole crop will be of very light weight.

Barley—The condition of this crop on September 1 is estimated at 73 per cent at the normal. A crop of about 5,400,000 bus. is indicated.

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle:*

Speed Up the Fertilizer.

The following wire from Governor Goodrich of Indiana to Director General Hines of the U. S. Railroad Administration has something to say regarding the general car scarcity:

"Indiana state food committee is waging campaign for a large acreage of wheat this fall. Fertilizer companies report they are unable to secure cars to fill orders. They state that only 40 to 60 per cent of needed cars have been received up to this time. It is absolutely necessary that cars be secured during the next two weeks if fertilizers are to be received by farmers in time for fall planting. Every encouragement is needed if farmers are to plant a normal acreage this fall. Will you not arrange to issue a priority order for fertilizer so that cars may be furn and the goods delivered to the during the next two weeks? The ter is urgent and I hope you m able to give us assistance."

Cut This Out

SEND this advertisement to address below and you will receive three sample copies of the Rosenbaum Review, edited and published by J. Ralph Pickell. The editor has just returned from Europe after an extended tour of investigation of **financial, commercial and agricultural** conditions. **There are many things to read.** Some things must be read.

The Review **is** read because several thousand like it.

Try it.

News of the Country Grain Trade

IDAHO.

Salmon, Idaho.—D. K. Zuck, formerly of Seattle, Wash., has bought the flour mill at Salmon, Idaho. Consideration is reported at $3,000, and Mr. Zuck is spending an additional $2,000 for new machinery.

ILLINOIS.

Milbrook, Ill.—A. J. Whitfield is the new manager of the Farmers Elevator Co. at this place.

Good Hope, Ill.—A. Parks has purchased the Good Hope elevator from E. E. Snaoco and will take possession Oct. 1.

Kirbury, Ill.—The Farmers Elevator Co. held its annual meeting recently. A 10 per cent dividend was declared.

Knoxville, Ill.—Chas. Wyman has bought the old mill property in the south part of town and it will be used for grinding grit and other coarse articles.

Cooksville, Ill.—Fire destroyed the elevator of the Cooksville Grain Co. recently. Origin unknown. The elevator contained 6,000 bushels of oats and 12,000 bushels of corn. Plant will be rebuilt.

London Mills, Ill.—A new grain elevator company has been organized here with a capitalization of $30,000. Directors are W. Lampson, A. C. Timmons, John Luman, Frank Rehm, Frank Welch, Richard Harris and John T. Culver.

Spatee, Ill.—The new Farmers Elevator soon will be an assured fact. The foundation is in and cement work on the structure will soon commence. Marion ——, president; Philip Fullmer, secretary; J. L. Harden, treasurer.

Carlinville, Ill.—The Carlinville Milling Co. has been granted a charter to engage in a general milling business; capital $30,000. Incorporators: John F. Leefers, Wm. Leefer, Fred James, Chas. H. Hacke, Wm. Steiner and Bert A. Phillips.

Rushville, Ill.—The Rushville Farmers Grain & Livestock Co. has been incorporated and has purchased the elevators, together with complete equipment, of Graff Bros., located on the C. B. & Q. right-of-way for a consideration of $25,000.

INDIANA.

Carlisle, Ind.—J. E. M. Purcell has retired from business with the Carlisle Grain Co. and has sold his interest to his partner, J. C. Fairhurst.

Wabash, Ind.—The two-story addition to the North Manchester Milling Co.'s plant is nearing completion. New machinery is being installed.

North Vernon, Ind.—Hon. Wm. J. Hare has purchased a site on the Big Four railroad in North Vernon for a grain elevator and will organize a company and build.

Indianapolis, Ind.—The Hoosier Food Supply Co., manufacturers of flour, meal and cereal products, has been incorporated with a capital of $50,000. Incorporators: Lee V. Mendenhall, Jos. H. Traub and Albert B. Kane.

Evansville, Ind.—A. Waller & Co., a Kentucky corporation, qualified to do business in the state of Indiana; $200,000 of its capital stock is represented in Indiana, to own and operate grain elevators. J. C. Doods, Evansville, is named as agent.

IOWA.

Sioux City, Ia.—J. T. Scroggs & Co., one of the largest grain firms in South Dakota, has purchased a seat on the Sioux City Board of Trade. The main office of the company is located at Beresford, S. D. Ralph E. Mangan will manage the Sioux City office.

Lake View, Ia.—An Omaha concern is now building a $20,000 popcorn elevator for F. C. Simmons at Lake View. The building will be 24x28 feet and 60 feet high. Foundation will be of concrete, the rest of the building being of lumber covered with galvanized iron.

KANSAS.

Salina, Kans.—A building permit for a $10,000 grain elevator was issued to L. O. Baber.

Hutchinson, Kans.—The Bailey grain elevator site on the Rock Island has been purchased by Geo. Gano.

Burlington, Kans.—The Excelsior Mills of Burlington have commenced running night and day to supply the demand for flour.

Garden City, Kans.—The Garden City Co-operative Equity Exchange has taken over the elevator and business of J. E. Kirk.

Emporia, Kans.—Otto Behymer has been appointed assistant state grain inspector and will have his headquarters in Emporia.

Ellis, Kans.—A large force of men are at work on the new concrete elevator being constructed by the Wheatland Elevator Co. here.

Stafford, Kans.—Chas. Augustus has resigned as manager of the Stafford Grain & Supply Co. Gene Bates of Rush Center will succeed him.

Hutchinson, Kans.—D. S. Warwick of the Warwick Grain Co. has opened a branch office at Denver, Colo. Will L. Brown of Wichita will be manager.

Clyde, Kans.—The Clyde Milling & Elevator Co. has begun work on a 7-story mill with a capacity of 750 bbls. daily. The mill will be built of concrete and steel.

Hutchinson, Kans.—The Reno Flour Mills Co. will soon have completed a big concrete elevator with a storage of 300,000 bushels. It is being built just east of the mill.

Potter, Kans.—Two grain elevators owned by James M. Robinson of Potter, Kans., have been ordered closed and the license of Robinson revoked by D. F. Piazzek.

Leavenworth, Kans.—H. D. Rush has taken charge of the elevator at the corner of Third street and Choctaw and is now receiving grain. He will build an elevator next season.

Sterling, Kans.—The Mutual Milling Co. has been organized and will build a 600-bbl. mill here. F. W. Ross is president; D. J. Fair, vice-president; E. C. Wellman, secretary; and C. K. Connery, treasurer.

Hutchinson, Kans.—The Washburn-Crosby milling interests at Minneapolis have purchased the controlling interests in the Larabee mill in this city and other properties of the Larabee Flour Mills Co.

Lyons, Kans.—It is reported that John Speck will be the new traffic manager at the Central Kansas Milling Co., taking the place of Roy Miller, who has resigned to go to the Claflin (Kans.) Mill & Elevator Co. as assistant manager.

Larned, Kans.—The half million bushel elevator for Larned is now an assured fact. Word received from the Associated Mill & Elevator Co. meeting conditions asked for by a committee representing business interests in this community makes the building of the elevator at Larned now certain. The proposed elevator to be built is to have a capacity of 500,000 bushels and the estimated cost is about $175,000.

KENTUCKY.

Maysville, Ky.—The Monarch Milling Co. has started excavating and will shortly begin the erection of a large brick grain and seed house.

MARYLAND.

Centerville, Md.—The Centerville Roller Mills, owned by R. H. Linwood Carter, were sold to C. S. Thomas and Wm. H. Carter, both of Centerville.

MICHIGAN.

Scottsville, Mich.—M. Christensen has sold the Scottsville flouring mill to Noah Bellamy and Clyde Howe.

Eaton Rapids, Mich.—The Abrams Seed Co. has completed its new elevator near the Michigan Central tracks.

Reed City, Mich.—It is expected that the Wm. Horner flouring mill, destroyed by

fire recently at a loss of $100,000, will be rebuilt.

Hancock, Mich.—The Houghton Mill & Elevator Co. will erect a plant of concrete or brick, three stories high. Main building will be 46x30 feet and warehouse 30x30.

West Branch, Mich.—The Geo. J. Diebold elevator was purchased by the Farmers Co-operative Elevator Co., which took possession Sept. 8. Luther Jones will manage the new elevator.

Port Huron, Mich.—The offices of the Michigan Bean Co. have been moved to 208 Bearinger Bldg., Saginaw, Mich. Albert L. Riedel, formerly secretary of the Michigan Bean Co. of Port Huron will be located in this city as secretary and general manager.

MINNESOTA.

Morgan, Minn.—C. J. Skogan has purchased a flour mill here.

Clarfield, Minn.—The flour mill owned by C. S. Orwoll was destroyed by fire.

Winsted, Minn.—J. A. Thompson of Minneapolis has purchased the flour mill here.

Red Lake Falls, Minn.—The Doroth Farmers Elevator has been completed and Walter Dyce is manager.

Wendell, Minn.—The Equity Co-operative Exchange elevator here has opened for business with I. O. Kaasa as buyer.

Stephen, Minn.—The Stephen Farmers Co-operative Elevator Co. has opened up for business in the old Mikkelson elevator.

St. Paul, Minn.—T. F. Cullen & Co.'s warehouse at Minnehaha and Arcade streets was destroyed by fire. Loss $2,000.

St. Hilaire, Minn.—M. C. Johnson of Fertile is the new manager of the Red Lake elevator at this point. He succeeds Mr. O'Claire.

Waterville, Minn.—Contract for the new Equity Co-operative elevator and warehouse at Waterville was let to D. E. Hoag & Co. of Minneapolis, Minn.

Wabasha, Minn.—The Big Jo Flouring Mills are adding six large grain tanks to their plant in order to secure adequate storage facilities. This mill has a capacity of 1,200 bbls.

Guckeen, Minn.—The Guckeen Farmers Elevator Co. has filed articles of incorporation; capital, $25,000. Incorporators: Henry Seglem, F. E. Child, John W. McGoff, of Guckeen, and others.

Elbow Lake, Minn.—J. W. Wood and L. M. Bond are working on proposition to establish Equity Co-operative elevator here. Proposal is to purchase Farmers Elevator here and put it on the Equity Exchange Line System.

Minneapolis, Minn.—At the annual meeting of the Minnesota Millers' Club the following officers were elected for the ensuing year: W. B. Windson, president; C. E. Hutton, vice-president; A. L. Goodman, treasurer; and L. H. Pinney, secretary.

MISSOURI.

Waco, Mo.—The Farmers Co-operative Grain Co. will build a $25,000 elevator at Waco, near Carthage.

Eaton, Mo.—The Easton Elevator Co., capitalized at $10,000, has filed articles of incorporation and will erect and operate a grain elevator. E. A. Allgaier, P. I. Hadley, R. L. Holmes, F. E. Poteet and Michael Wogan comprise the board of directors.

MONTANA.

Huntley, Mont.—The Cousins elevator was set on fire by lightning.

Benchland, Mont.—The Benchland Grain Co. has been incorporated with a capital of $50,000. Incorporators: John W. Nelson, H. W. Zimmerman, D. W. Deegan and Bert Barkoff.

Billings, Mont.—The Occident elevator burned to the ground when flames started by an engine spark in a box car on a siding nearby spread to the structure. Little grain was in the elevator. Loss about $25,000.

Bozeman, Mont.—The sale of the mills and elevators of the Bozeman Milling Co. to the Montana Flour Mills Co., of Great Falls, is announced. Consideration was $275,000. The Story interests, which controlled the Bozeman mills and have had control of them for nearly 40 years, take a large block of stock in the Montana Milling Co., and T. B. Story becomes one of the directors. It is planned to increase the capacity of the mills at Bozeman from 1,000 to 1,500 bbls. of flour a day.

NEBRASKA.

West Point, Nebr.—The Farmers Union Co-operative Co. has let the contract for the erection of an elevator of reinforced concrete to have a capacity of 100,000 bushels and to cost $50,000.

Lincoln, Nebr.—General contract has been let by the Gooch Milling & Elevator Co. to W. C. Bailey of Omaha for the erection of six grain tanks, 21x90, and head house, 140,000 bushels capacity, and the addition of 12 temp. bins, 14x40, 80 ft. high.

dison, Wis.—Joseph A. Becker of the nsin Co-operative Crop Reporting ce, reports that rainfall early in the h of August rescued the corn crop a threatened drought and brought an increased condition from 92 per of normal Aug. 1 to 95 per cent Sept.

er Falls, Wis.—The Spring Valley ice Co. has increased its capital stock $10,000 to $20,000. The company has operations to greatly enlarge and iel its plant. The officers are: H. P. rg, president; Jos. Schultz, vicelent and treasurer; F. A. Marcell, ary.

nols, Wis.—The Nichols Farmers' g Co. has recently been incorporated a capital stock of $28,500. The coron will build and operate a new mill s city and also engage in the buynd selling of feed, seed, hay, straw, The incorporators are A. L. Nichols, rd Olsen and Albert Klockzien.

n Bay, Wis.—The Badger Grain Co. is city has purchased the terminal or "C" in Green Bay of the Cargill Co. The elevator has a capacity of bushels. The Badger Grain Co. also es elevators at Mondovi, Bear Creek ulaski. Fred DeBroux, president of Badger Grain Co., has been con with the Cargill grain interests for years.

BROOM CORN.

The past week was favorable both to the late crop of broom corn and the harvesting of crops in the dwarf districts, says the *Broom Corn Review*. Harvesting is in progress in the dwarf areas of Oklahoma, New Mexico, southwestern Kansas and Colorado, with harvesting in the two latter states reported on the early crops. With same favorable weather condition as prevailed last week the crop will be cared for under more favorable circumstances than previous years. Marketing is principally in the Lindsay district with the crop also marketed to some extent at Lawton and Carnegie and some purchases reported in the Elk City-Sayre territory. At Lindsay buying has been very active with quotations showing an advance of $20@25 during the week's trading on certain grades, although this advance does not reflect any similar advance between top and bottom prices which rule as heretofore at $125@300. The dwarf markets range from $100@180 with a sale at $250 being reported paid for stock at Lawton. Odd lots of old corn in the northern districts are being taken at $75@120 and but little new crop will be ready before October. Central Illinois corn has been gathered under auspicious weather conditions and to date it is estimated 85 per cent of the crop has been cut with 30@40 per cent stored at from $300@350, with quality and color good. The Wichita market was more active with considerable inquiry manifest for old crop holders of which are firm in their views of value. Arrivals of new crop from Oklahoma, Rio Grande Valley and Beeville districts are increasing and prices run from $100 on old common stock to around $250@300 for best offerings of Lindsay with $325 as high as reported. Short choice South Texas new dwarf is offered at $125@200.

Demand Relief on Embargo.

Texas dealers are still demanding relief on the embargo situation at Galveston through H. B. Dorsey, secretary of the Grain Dealers' Association. A telegram from D. F. Piazzek to Sec'y Dorsey indicates that only distressed cases will be taken care of which will mean that where elevators are not entirely full and cars loaded on track with heating wheat involved that permit will not be given to move. The following is the telegram referred to:

A careful survey of the situation at both gulf ports and of wheat flowing in that direction and also careful review of vessel tonnage available at gulf for next six weeks leads us to the opinion we can suggest to railroad administration lifting embargo on Galveston this week to the extent of relieving particularly distressed situation in territory dependent upon gulf for outlet. Advise your shippers take up with gulf offices any particularly urgent situation.

Sec'y Dorsey urges his members to see the necessity of complying with the rules of the Grain Corporation, especially in keeping with clause No. 2 of license agreement, which means keeping an adequate record of each transaction, as Mr. Piazzek states, "Where the producer complains and has a weight ticket showing that his wheat tested 56 pounds and there is nothing else on it to indicate that it was damaged in any way, the Department proceeds on the supposition that this was No. 3 wheat and will compel refund to purchaser on this basis. The rule follows:

Second—The dealer in buying wheat from the producer shall purchase on the proper grade and dockage, under the federal standards, and shall pay therefor not less than the guarantee price based on such proper grade and dockage, at the terminal most advantageously reached, less freight, and less a reasonable handling margin. The dealer shall keep a record showing all purchases from the producer, name of the seller, date, quantity, grade and dockage fixed and price paid and reasons for fixing grade under No. 1, including test weight; and on all parcels of wheat on which there is a dispute as to grade and dockage or price between the dealer and the producer at the time of delivery, a notation thereof shall be made upon the records of the dealer and a sample shall be drawn by the producer and the dealer and forwarded in a proper container to the vice-president of the Grain Corporation, in the zone in which the purchase is made, for his use in the determination of the dispute. The determination of the vice-president shall be final and conclusive unless an appeal from such determination be filed within ten days with the United States Wheat Director by either the producer or dealer. In case of appeal the decision of the United States Wheat Director shall be final and conclusive. The dealer shall keep a copy [illegible] conspicuously displayed at his business

The United States Grain Corporation announces that its purchases of wheat flour for the week ending Sept. 9 amounted to 235,145 barrels at prices ranging from $9.50 to $10.25.

Field Seeds

Acreage left to clover seed in the state of Illinois is estimated at 80 per cent of last year.

Clover seed acreage in Missouri is said to be 15 per cent more than last year with condition placed at 79.

S. W. Webb will establish a seed business at Burlington Junction, Mo., having bought the Chas. W. Woods property, on which he will erect a building for that purpose.

Not more than two-thirds of a clover seed crop is estimated for the state of Indiana this year, only 64 per cent of last year being reported as left for seed and condition said to be poor.

Extremely dry weather coupled with a plague of grasshoppers reduced the clover seed prospects of Ohio considerably, condition being 62 at Sept. 1, compared to a ten-year average of 79. Acreage, too, is only 70 per cent, compared with last year.

A seed store has recently been established at Ft. Myers, Fla., under the name of La Homach Seed Co., L. L. Simms and son, O. M. Simms, having located their business on St. George street. Mr. Simms, Sr., had formerly been with the Mann-Hodge Seed Co.

The South Dakota Corn & Grain Growers' Ass'n with others interested in securing a good selection of seed corn before frost, designated Sept. 1-6 as seed corn week and a vigorous campaign among farmers of the state was undertaken.

Clover seed production in Wisconsin is forecasted at 180,000 bus., compared with 101,000 bus. in 1918 and 336,000 bus. in 1917. Condition of the crop Sept. 1 was 89 per cent, compared with 80 last year, with acreage placed at 78,000 acres, 139 per cent of last year.

Clover seed acreage seems to be growing less each year in Michigan, 1919 acreage being only 80 per cent of last year, which was also short. Early threshing returns indicate a fairly good yield, but last spring's seedlings have been severely injured by drought and are entirely lost in some sections.

The Northern Field Seed Co. has purchased the 50,000-bushel elevator near the Milwaukee depot at Winona, Minn., and will expend about $15,000 for remodeling the building and converting it into a seed and grain cleaning plant. The elevator has been idle for about 10 years.

Warnings are being sent out to farmers of eastern Nebraska that much of the wheat raised in that section is of exceedingly low germinating quality. Leo Stuhr, secretary of agriculture of that state, advises eastern farmers to sell their wheat and obtain seed from the western portion of the state, where the crop ripened under more favorable conditions. One sample of wheat sent in to be tested was found to possess only 10 per cent germination.

Detroit Seed Prices.

Quote grass seed prices Sept. 13 as follows per 100 lbs.: Clover seed, cash, $29.50; Oct., $29.75. Alsike, $24.50. Timothy seed, $5.40.

Buffalo Seed Prices.

Quote grass seed prices Sept. 10 at Buffalo as follows: Timothy, ch., $5.70 @6.40; clover, red, ch., $27@28.50; alfalfa, $15@16 per bu.; red top, $14.50 @16; white clover, $45@50 per cwt.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during the week ending Sept. 13, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs.....		25,313	.....	2,990
Clover, lbs.....	87,495	26,782	28,700	.....

Kansas City Seed Market.

KANSAS CITY, Sept. 13.—One of the features of recent trade in seeds was the sale of the principal holding of meadow fescue at $25 per cwt. The price accepted was $9 less than was bid a month ago, when producers were unduly bullish. One lot sold at the reduced price was 4,000 bus. A house in Lawrence, Kans., was the buyer. The seed probably will go for export, though the demand for that purpose has quieted down. Usually meadow fescue seed sells at about $10 per cwt., which was considered remunerative in pre-war times, when the acreage and production were larger than now. The market is quoted at $20@25.

Timothy—Though the crop of seed saved in Missouri and the Southwest generally was moderate this year, present offerings are making a fair volume. Dealers are opposing bullish ideas, because there was a holdover of old seed. Prices are weaker, at $9.50@10.25 per cwt.

Clover—Dealers agree in the opinion that the Southwest will have no more clover seed than home requirements will absorb. Seed to be saved will come f a reduced acreage of old fields. T is evidence of a good demand for ing in land run down by heavy pro tion of wheat in the last few y The price of seed is quoted nomi at $35@45 per cwt., which, it is h will induce threshing wherever the promises to be good.

Blue Grass—Practically all of th crop harvested in Missouri has p from producers' hands, but there a few lots yet to be sold. Dealers bidding $10 to $15 per cwt. for se the rough. Cleaned seed is worth to $26.

Alfalfa—Offerings of new seed been limited thus far to the cro Arizona and other far Southwe states. The amount of seed ha thus far is small. Scattered poin Kansas, Oklahoma and Nebraska p ise to save seed, but volume this will be moderate, owing to damag grasshoppers in southwestern Ka and the inducement to save hay. falfa seed is quoted from $17 to $2 cwt.

Cane, Millet and Soudan Gr Frost has held off so well that dence is felt in the maturity of f crops as well as sorghum grains thr out the Southwest. Some reports cate threshing of millet, but d make no announcement of receip prices. A big crop of cane seed pected. Soudan grass made good and there should be a liberal savi seed.

Minneapolis Flaxseed Marke

MINNEAPOLIS, Minn., Sept. 13.- demand for flaxseed in the local m is very keen and offerings are The bulk of the receipts are appli to arrive contracts and after thes tracts are filled there is practa nothing offered for spot sale. Th a good demand for seed to arriv

ngs are extremely light in spite of e fact that good premiums over the ember and October futures prevail. ers are delivering but a small tity of seed and most of them are ig storage tickets for their deliver- Spot No. 1 seed sells at 4@8c over ember and seed to arrive this h sells the same. Seed to arrive tober sells at 8@10c over the Octo- future. The Government estimate ,000,000 bushels is regarded as very al. Private estimates range from ,000 to 7,000,000 bushels.

Duluth Flaxseed Market.

LUTH, Sept. 13.—Flaxseed prices nued on the downgrade during the week, the declines recorded extend- rom 16 cents in spot to 29 cents tober and 34 cents in the Novem- uture. An avalanche came on esday when drops extending to 24 were set. It was followed by an- slump of 14 cents on Friday and of 3@4 cents during Saturday's session. The spot market was vely firm due to light receipts and demand from linseed oil interests ver their immediate needs. Good iums were paid privately by crush- r seed on track and in store and ng supplies are said to be now ughly cleaned up.

e Government crop report for st was bearish as far as flaxseed was rned, showed a decrease from July 0,000 bushels to 10,000,000 bushels, as losses in the season's produc- ll the way up to 1,500,000 bushels been looked for in some quarters. v of the specialists also took the that with supplies of flaxseed in country and Canada in about the volume as 1918, quotations should arked down from their recent which discounted marketwise a deal of damage results. It was that the market did not show rallying power at any stage dur- e week, and that final prices were e bottom for the six days.

eipts of flaxseed on this market g the week were 17,827 bushels, st 13,577 bushels last year, and shipments of 28,662 bushels, stocks e elevators were brought down to bushels.

ing prices of flaxseed on the Du- market on Saturday, as compared the previous Saturday and last were:

Illinois Bars Eastern Seed.

The Illinois Department of Agriculture issued Sept. 9 a quarantine order against the shipment of seed sweet corn into Illinois from Maine, New Hampshire, Massachusetts, Rhode Island and New York. This order emanated from a desire to protect the state from the European corn borer, which has been prevalent to a large extent in Eastern states.

Clover Seed Comment.

"Government report on clover seed is bullish," says C. A. King & Co., Toledo. It makes acreage only 608,000, against 722,000 last year and 821,000 two years ago. Condition Sept. 1 was 77.1, against 78.7 last year. Crop in bushels will be given later in the season. Last year it was only 1,102,000, smallest crop in recent years. Illinois has the largest acreage this season, but less than last year. Ohio and Indiana show the largest reduction. Wisconsin, Missouri, Iowa and Minnesota show a gain. Idaho has the best condition. Minnesota, Wisconsin and Iowa are also high. Oregon is very low. Ohio and Indiana are also low.

	Acreage (100 omitted.) 1919	1918	Sept. Cond. 1919	1918	Crop in Bu. (000 omitted.) 1918	1917

Seed Association for the Northwest.

The Northwest Pacific Seedsmen's Ass'n was organized at a meeting of seed growers and representatives of seed companies held at Spokane, Wash., recently, the outgrowth of a desire to promote a better understanding among seed growers, dealers, consumers and state officials of the Northwestern States. The organization will try to bring about the enactment of more uniform seed regulations in the Northwest so that unscrupulous dealers cannot hide under cover of regulations which protect one state from disreputable business transactions in seeds, but not another. Officers of the Association are as follows: President, Frank Leckenby, Chas. H. Lilley Seed Co., Seattle; secretary-treasurer, L. C. Barrett, Spokane Seed Co. Board of directors—John Anderson, Inland Seed Co., Spokane; F. E. Barkemeyer, Barkemeyer Grain & Seed Co., Great Falls, Mont.; C. H. Leslie, Barrow Bros. Seed & Supply Co., Twin Falls, Ida.; Geo. S. Reed, Portland Seed Co., Portland, Ore.; Josiah Bowden, Jr., Helena, Mont.; E. C. Johnson, Portland, Ore.; George J. Cannon, Spokane; E. F. Benson, Olympia; George R. Hyslop, Corvallis, Ore.; Dr. F. K. Pickett, Washington State College; V. H. Florell, U. S. Department of Cereal Investigation, Chico, Cal.; H. A. Schoth, U. S. Department of Forage Crops, Corvallis, Ore.; B. F. Shuhan, Field Agricultural Seed Commission, Boise, Ida.; R. B. Randall, Seattle: John Anderson, Spokane; T. H. Boie, Spokane; Alex. Galbraith, State Seed Analyst, Olympia; A. E. Barkemeyer, Great Falls, Mont.; Leo L. Hershberger, Hubbard, Ore.; A. Boyce, Seattle; H. C. Lage, Seattle; H. Schuett, Seattle; L. C. Barrett, Spokane; and Frank Leckenby, Seattle.

In combating losses to wheat by Hessian fly, T. H. Parks of the Ohio Experiment Station calls attention to the fly-free wheat seeding dates established by the state after many experiments, stating that losses may be materially reduced by observance of the date as early sown wheat fields prove breeding grounds for the pest and often affect the entire neighborhood. The dates for Ohio are given as follows: Extreme northern section, Sept. 16-18; north-central section, Sept. 18-22; central section, Sept. 22-26; south-central section, Sept. 26-30; extreme southern section, Sept. 30-Oct. 4. During the past season even some of the late-sown fields of fall wheat were heavily infested with fly at harvest time, but this may be explained by the fact that the infestation came from flies that were reared in opposite fields of early sown wheat.

The following recalls to mind the proverbial distaste for work exhibited by the Arkansas farmer, but we must admit the scheme appears to be an attractive one: A farmer in Baxter County, Ark., had a bunch of hogs running in a one-acre woods pasture last fall. They rooted the acre up thoroughly, and the idea came to him to sow alfalfa on it. After he sowed it he turned the hogs in and let them root in the seed. He has cut the alfalfa three times this year and will get another cutting if it rains in time.

SEED SITUATION.

MORE SEED.

MICHIGAN—Will say that in taking a canvass of the seed situation throughout this section of the state we are convinced that the farmers in general are saving every acre of clover seed available, and that if they don't have

any more than their own wants, it will help to curtail the demand on the sections that will have a surplus.

The alsike that has been threshed does not commence to yield as good as it did last year, yields ranging from 1 to 2 bus. per acre, where last year it run from 4 to 7 bus. per acre.

We believe in general that there is more seed in this section of the state than there has been for several years past.—*Sioux City Seed Co., Millington, Mich.*

AMERICAN STEEL & WIRE CROP REPORT.

The American Steel & Wire Co.'s crop report for week ending September 13 says there has been little change since previous week. Corn is ripening rapidly, much already in shock and silos. There have been no reports of frost damage, and as a matter of fact most of the corn is out of frost danger and in some localities would even be benefited by a light frost.

Sorghums—In the milo maize and kafir corn producing belt these crops generally are good to very good, although there has been local damage in some instances from severe drought.

Potato prospects are being further curtailed by the long dry spell in the West and by rotting in the East. Plowing and fall seeding are retarded by dryness.

Sweet Potatoes—This crop is still good.

Peanuts—In some localities the harvest is on, in others the crop is maturing rapidly and promises to be fair.

Forage—In the Central and Central Western states the forage crops are getting dry. Farmers are helping out by feeding and making preparation for winter by extensive silo filling.

Grain Corporation Weekly Report.

The United States Grain Corporation bulletin covering the wheat and wheat flour movement throughout the United States for the week ending Aug. 29, in comparison with the figures for the same period a year ago, shows the following:

	1919.	1918
Wheat—

Townley Convicted.

According to a daily press report, A. C. Townley, president of the Non-Partisan League, and Jos. Gilbert, former organization manager, were convicted of having conspired to teach sedition, and District Judge E. C. Dean at Jackson, Minn., sentenced them to 90 days in the Jackson County jail. Townley and Gilbert were tried on charges of having made speeches and distributed literature in Jackson County and other counties of the state shortly before and after the United States entered the war, for the alleged purpose of discouraging enlistments and co-operation in other war measures. Judge Dean granted a stay of sentence of 60 days, and the defense will move for a new trial.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 1,680,000 bu. last week, corn 196,000 bu., oats 268,000 bu., and rye 142,000 bu. Barley decreased 74,000 bu. Details follows, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	4,229	9,869	14,198,000	16,112,000
Corn	94	267	363,000	2,318,000

Rye	1,362	1,191	2,553,000	1,118,000
Barley	24	176	200,000	589,000

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Beans and Potatoes

California Bean Grades.

he California Bean Dealers' Ass'n headquarters at San Francisco has olished definite standards as repre- ing the grades under which Cali- ia beans will hereafter be bought sold as follows:

oice Recleaned—To contain not than 98 per cent sound merchant- beans and not over 2 per cent aged, discolored or other beans, s, adobe, or other foreign matter, in no case more than 1 per cent aged beans. (This standard shall ermanent and in no way altered year to year, and all sales and nents made thereunder must not therefrom in excess of 1 per cent.)

. 1 Recleaned—To be equal to or r than the average of the grade he current season at time of ship- . Such standards to be jointly es- shed annually by the California Dealers' Ass'n and the San Fran- Chamber of Commerce. (This lard shall be elastic as above in- ed, but the official type sample be jointly made as in the case of choice recleaned grade and pub- d by the California Bean Dealers' n each season and not by any cor- ion, firm or individual.)

beans not conforming with above lards will be bought and sold on le or description.

ch season's crop will be handled cordance with above standards. If ce recleaned" standards cannot ully and fairly met, such fact will nounced to the public by the Cali- a Bean Dealers' Ass'n.

BEAN SITUATION.

ACREAGE LESS.

CHIGAN.—There have been no new s thrashed in this section yet. The ge is about 75 per cent less than s a year ago. The growers are not ied to sell at present prices.—*A. eynolds & Son., Centerville, Mich.*

CROP 60% OF NORMAL.

CHIGAN.—The bean crop through section of the country will average 60 per cent of the normal crop. e early beans that are being ned are nice, dry and of good qual- ut the later ones will be quite pickers on account of the dry ier when planted. This caused ns of the field to start about two s before the others came up.—*ufellow Grain Co., Carson City,*

ACREAGE LESS.

ORADO (8).—Will say that the ge in our part of Colorado is bly not over ¼ of what it was last and although the yield of Pinto to the acre will be somewhat than usual the total yield will sarily be very much smaller. In- ons now are that beans will be the way before frost and that the y will be good. Mr. C. F. Waugh, 16th St., Denver, Colo., is secre- of the Rocky Mountain Jobbers' iation.—*Robinson-Hunt Gr. Co., ido Springs, Colo.*

AN AND POTATO PRICES.

tations follow for lots of good y and condition beans and pota- sacked, per cwt., unless otherwise ed as of Sept. 13:

on—Limas, $9.50@10.
dio—Marrows, $11@12; mediums, $8@ pea beans, $8@9; wh. kidney, $11@ red kidney, $9@12.
ago—Pea beans, hand picked, ch. to cy, $8.50@9; brown Swedish, $5.50@); red kidney, $11.50@12.
nnati—Navies, $8@8.50; marrowfats 50@12.75; red kidneys, $12.50@12 75: as, $10@10.50.
oit—H.-p. pea beans, $7.75.
er—Pintos, $6@7; navy, $8.50@9. as, $10@10.50, wholesale.
real—The market is firm under a tinued good demand, cars of Ontario nd-picked being quoted at $5.25 to $5.50 and three-pound pickers $4.75 to $5. Quebec beans are steady at $4.25 to $4.50, as to quality.—Trade Bulletin.

New York—Calif. limas, $12@12.50; pinks, $7; ch. marrows, $11.50; fair, $10.50@11.25; ch. pea beans, $8.50; sma. wh. Calif., $8.50; red kidney, $13.50@14; wh. kidney, ch., $12.25@12.50.

Pittsburgh—Limas, $13@13.50; Calif. navies, $8; Mich. navies, $9.75.

St. Louis—Quote c. lts.—Ch. h.-p. Mich., $8.75; prime ma.-p., $8.50; orders and small lots higher; pinto beans, $7 per cwt. From store—Scotch peas, 8c per lb.; split peas, green, at 15c, and yellow at 9c per lb. Per cwt.: Calif. black eyes, $7; ch. limas, $13; Calif. pinks, $8; white, $8.50.—Market Reporter.

Potatoes—

Buffalo—Market lower, supplies increasing, quality better. Jer. rnd., 150-lb. sk., $5.25@5.50; long, $4@4.50; sweet Va., bbl., $4.50@5.

Chicago—Minn., Ohio, $2.85@3; Wis., rnd. wh., $2.85@3; Idaho, rural, $3.40@$3.65.

Cincinnati—Minn. early Ohio, $3.25; N. J. Giants, $5.25 per 150-lb. sk.; early Ohio h.-g., bbl., $6.50@7.

Denver—Colo., $2.00@2.50, wholesale del., Denver; Calif., $2.50@3.

Kansas City—Minn. sand land, $2.70@2.80; Red River, $2.85@2.95; h.-g., bu., $1.65@1.75 per bu.; Tri., $2.75@2.85 cwt.

New York—New Southern, bbl., No. 1 $2.50@4; Jer. rnd., 150-lb., $4@4.25; L. I., bbl., $5@6.

Los Angeles—Stockton Burbank, $2.90@$3; wh. and red rose, $3.25@3.50.

Montreal—Receipts last week 2,159 bags, against 1,560 bags last year. The market is firmer. Quebec whites being quoted at $1.75 per bag of 90 lbs. Green mountains are quoted at $2.10 to $2.15.—Trade Bulletin.

Pittsburgh—N. J. cobb., blk., $3 25@3.50; Pa., rnd., wh., blk., $3.50 c. lts.; N. J. giants, 150-lb. sk., $4.35@4.50.

St. Louis—Market greatly depressed. Idaho rural, $3@3.15; Colo. tri., $2.70@2.75; Minn. early Ohio, $2.75@2.80; cobb, $2.50; Red River early Ohio, $2.75.—Market Reporter.

San Francisco—River, fcy., $2@2.25; river, ch., $1.85@2; Salinas, $2.90.

The New England bean crop is reported as a good one this year and the carry-over is said to be an unusually heavy one.

The Michigan bean crop improved in condition during August and much of the crop is reported as matured and being harvested under ideal weather conditions. The Coöperative Crop Reporting Service of the state forecasts a crop of 3,534,000 bus. with condition placed at 77 per cent, as compared with 82 in New York, 65 in Colorado, 92 in New Mexico and 71 in California.

The official grade termed choice recleaned beans requires that not more than one-half of 1 per cent dirt, stones and other foreign matter in addition to 1½ per cent of split beans and 6 per cent of weather-damaged beans shall be present in the lot inspected. Colorado pinto growers are being urged to maintain a high standard of the grades now in force and should by care in gathering the crop eliminate gravel, stones, etc., so that loss in dockage will not be incurred. When threshing the crop with an ordinary grain thresher split beans are apt to result, and this, too, reduces the value of the crop.

Field Agent V. A. Sanders reporting from Wakefield, Mass., says that Maine potatoes improved slightly during August despite the drought in the central counties and a forecast for the state of Maine is put at 20,614,000 bus., compared to 22,400,000 in 1918. Rain would have been beneficial to the crop and some fertilizer injury was also reported in Aroostook County.

Licenses have been returned to the 13 mills and elevators of the Osceola Mill & Elevator Co. of Minnesota which were revoked by the Grain Corporation a month ago on the charge that the company had refused to give up to the Government $12,000 of excess profits.

Feedstuffs

Dynnington, Cooper & Dowdy have recently purchased the stock feed business of the Burum Co. at 843 Broad street, Augusta, Ga.

Ernst & Zimmer will open a feed store on Broadway, Witt, Ill., where they will maintain a feed-grinding department in connection with their feed business.

Due to rains and moderate temperatures the past month in Wisconsin pastures improved slightly, condition figure being 82, as compared to 80 previous month and 76 per cent a year ago.

Pastures in Missouri at Sept. 1 are said to be poor in the southwestern part of the state as well as along the northern border with water scarce in many counties. Condition, 78 per cent, and reported improving.

Plenty of feed is reported in Colorado, as grass in the vicinity of Sheridan Lake and Pueblo is reported very good, and abundant moisture from the heavy snows last winter as well as the spring rains produced good forage crops such as barley, oats and corn.

Cattlemen in the vicinity of Silverdale, Cowley County, Kans., report pastures dried up in that vicinity, having had but little rain since early in July, and feed with the exception of alfalfa, which produced a particularly fine crop along the bottoms, is very short. Some of the stock has been shipped in consequence.

Many of the dry farmers of Wyoming who were hard hit by the continued drought this season are looking for jobs in the eastern part of the state this fall, and although cattlemen have made arrangements to take care of what cattle they intend to keep over the winter, nevertheless they culled their herds closer than ever before.

The Arizona range country is reported in excellent shape so far as pasturage is concerned, abundant rains having been the rule throughout the season, and sheep and cattle are reported in splendid condition. In the vicinity of Flagstaff and Williams it is said cattlemen contemplate holding back their live stock beyond the usual fall shipping dates.

Lower Feed Will Advance Rye Flour Prices.

Prices on rye flour so far on this crop have been extremely low as the result of rye being comparatively cheap and feed extremely high. While the export demand will continue to govern cash rye (and foreigners are buying at present prices) feed values will be fixed by the price of corn. If present prices for corn hold, rye feeds will sell for less money and rye flour will advance. —*Blodgett-Holmes Co., Janesville, Wis.*

Reground Wheat Bran.

A representative of the Department of Agriculture of Tennessee has recently discovered a case where a mixed feed dealer was buying wheat bran, regrinding it on a Williams Mill and selling the product as "*Brown Shorts.*"

The dealer admitted that he had a larger demand for these "*Brown Shorts*" than he could supply and was getting very fair prices. This clever fraud has started the Department into a thorough investigation of the whole scheme of mill-feed nomenclature and manufacture. The Department realizes that, in case of commercial mills, what the public loses in feed it gains in the flour, but feels that deception of this kind cannot be tolerated at all.

The Department has reached the conclusion that neither miller nor mixed-feed dealer will be allowed to manipulate bran, mixed-feed, or middlings in such manner as to mislead and defraud the public. Bran is one thing, mixed-feed another, and middlings still another. Regrinding, according to their experts, does not change the chemical or feeding properties.

The Department, realizing its inability to stop interstate movements, has asked the assistance of the Federal authorities, and expects the Bureau of Chemistry at Washington to co-operate in a national way.

Cottonseed Feed Prices Lower.

KANSAS CITY, Sept. 13—Prices for cottonseed cake and meal are working lower as the season for the movement of the new crop product approaches. Cake of 43 per cent protein grade, which not many weeks ago held around $80 a ton, basic Texas common points and elsewhere in the South, was quoted the past week at a range of $65 @ $66 a ton, basic Texas shipping stations. There is some inquiry for cake and meal, but no important demand has developed. Further recessions in prices are anticipated.

THE FEED SITUATION.

DEMAND EXCELLENT.

MICHIGAN.—We cannot supply the demand for midds or rye feed. Bran is slow sale.—*Wm. A. Coombs Milling Co., Coldwater, Mich.*

INQUIRY GOOD.

OHIO.—We have a good inquiry and demand for soft winter wheat middlings and only a fair demand for soft winter wheat bran. Middlings are firm and bran a little lower than last week. —*The Colton Bros. Co., Bellefontaine, Ohio.*

GROUND FEED STOCKS.

The Bureau of Markets, reporting under date Sept. 13, has the following as regards ground feed stocks throughout the country:

SOUTHWESTERN.—Ft. Worth—Very little c. s. meal moving, good 43% meal $68@69, which is a decline of $3@4 per ton for the week. Prices steady on mill fds., stg. bran $2.25, millrun $2.50, barley chops ground $2.80. Shreveport—Wh. bran $2.10, shorts $2.70. Houston—Wh. bran $2.10@2.15, shorts $2.70@2.85. San Antonio—Stks.-rcts. gd., dmd. fr. Ft. Smith, Ark.—Trade dull, mxd. car shpts. good, 30 cars shipped out in week.

SOUTHERN.—Jacksonville — Bran $46, peanut meal $62, 4% c. s. meal $59.75. Velvet bean fd. not obtainable. Dmd. peanut meal poor. Pensacola—Bran $44.75, brown middlings $59.25. Miami—Bran $53, shorts $71. Tampa—Dmd. lgt. for c. s. meal, bran $47.50, middlings $64, 7% c. s. meal $71.10. Mobile—Bran $43, middlings $55, brown shorts $55, gray shorts $60, vel. bean fd. $60, new crop $55, 7% c. s. meal $75, 20% c. s. fd. $55. Birmingham—No vel. bean fd. to be had, bran $46.25, middlings $64.50, 7% c. s. meal $70. Montgomery—Bran $49, middlings $63, 32% peanut $63, 7% c. s. meal $70, 20% c. s. fd. $56.25. Wilmington—Middlings in fr. sup. with gd. dmd. at $63@65. Greensboro—Bran $50@52, middlings $66@70. Vicksburg—Bran $45, gray shorts $59. Columbus—Gd. dmd. for bran-middlings with ample supplies. Bran $50, middlings $68; offered f. o. b. Columbus 7% c. s. meal $70, 20% c. s. fd. $54. Savannah—Bran $52, middlings $62; offered f. o. b. Sav. 7% c. s. meal $70, 20% c. s. fd. $60, 30% peanut meal $61. Atlanta—Mod. dmd. for bran but none for middlings. Cake and meal c. s. have declined $10 per ton in few weeks, offerings at $62@63 for 36% meal and $60 for 36% cake. Hulls $7.50 bulk and $11 skd. Peanut meal $57 for 30%, $5[illegible] vel. bean fd., $68 for 36% peanut [illegible] bran $47, spg. wh. bran $50.

CENTRAL.—Terre Haute—Bran [illegible] middlings in gd. dmd., corn fds. [illegible] quotations lower.

EASTERN.—Lynchburg—Hard to [illegible] shpts. for flour, dmd. is poor and t[illegible] fore output of fd. is lgt. Std. bran [illegible] flour middlings $65. Scranton—l[illegible] lgt., sup. norm., linseed, c. s., gluten [illegible] other concentrates dmd. gd.

REGARDING FEED STOCK[illegible]

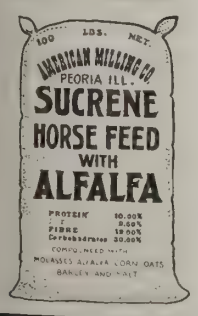
Above All Others

Hold your leadership in the feed business with the recognized Standard Sucrene Line. The long standing reputation of these feeds for result producing quality is firmly established. Feeders of live stock and poultry will not be satisfied with "substitutes."

Co-operation Gets the Business Sucrene Quality Holds It

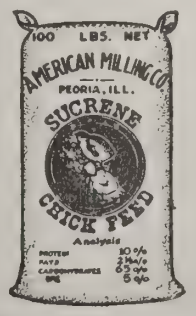


With the completion of our new mill in the near future—the greatest and most modern exclusive feed mill in America—we will be able to take better care of the trade than ever before, with quality feeds at money making prices.

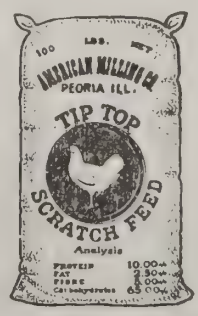
Orders for the complete line of Sucrene Poultry Scratch Feeds are solicited and will be promptly filled. Address main office.

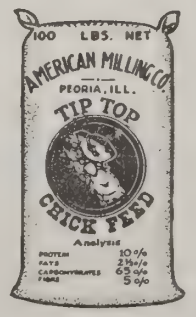
AMERICAN MILLING COMPANY

MAIN OFFICE AND MILLS: PEORIA, ILLINOIS



SOUTHERN MILL: OWENSBORO, KY.





are seasonable commodities subject to every whim of the buyer's caprice. For instance on declining markets it takes a rather honorable firm to withhold attempted cancellations, rebuying elsewhere at lower ranges. We are assured by traffic experts that embargoes will be a continuous program this winter and such important grain terminals as St. Louis, Kansas City and others have already experienced the heartbreaking results of embargoes imposed during August and September.

If official Washington insists that 30 days shall be the limit for storage the consequences are on their heads, but this may be avoided possibly through prompt action on the part of the great host of feedstuff handlers, the majority of whom have been trained through a lifetime's service, and they might with propriety take their pen in hand and tell their senator, congressman or some one who has the ear of the various Washington departments a few facts in the matter.

FEED MARKETS.

NEW YORK.

New York, Sept. 13.—The market for millfeed weakened decidedly during the week under much larger offers from the mills and an appreciable falling off in the consuming demand. Western spring bran was quoted at $43.50@44; standard middlings at $58.50@59, and red dog at $71.

BALTIMORE.

Baltimore, Sept. 13.—There is an easier tone to the general feed market in sympathy with the interior, and a disposition on the part of the local trade to take hold sparingly of both bran and middlings. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $46; Western middlings, per ton, in 100-lb. sacks, $56@58; city mills' winter wheat bran, per ton, in 100-lb. sacks, $58; brown middlings, per ton, in 100-lb. sacks, $58; white middlings, per ton, in 100-lb. sacks, $68.

CINCINNATI.

Cincinnati, Sept. 16.—The market for feeds was quiet, but sufficiently active to fairly maintain the quotations. Supplies were about equal to the requirements. Bran ranged at $43@44 per ton; mixed feed, $52.50@53; brown shorts, $57.50@58; grey middlings, $61@61.50; standard fine middlings, $58@58.50; and hominy feed, in 100-lb. sacks, $68 per ton.

MILWAUKEE.

Milwaukee, Wis., Sept. 13.—The local mill feed market is somewhat easier and experienced a slight drop during the past week. A fair demand exists; mainly for immediate requirements, as buyers are still hopeful for improved conditions. However, an appreciable increased demand from Eastern shippers was felt. The offerings, although not in excess to the demand, have been somewhat better. Current quotations are: Bran, per ton, $40.50@41.50; standard middlings, $55@55.50; flour middlings, $60@61; red dog, $61@65; hominy feed, $69.50; rye feed, $54@54.50; old process oilmeal, $84.50@87.50; cottonseed meal, $75@82; brewers' dried grain, $63; gluten feed, September shipment, $69.

NASHVILLE.

Nashville, Tenn., Sept. 15.—The demand for wheat bran and middlings continues good, and mills are behind with orders. Other ground feeds are in moderate demand and slightly lower on account of decline of corn. Quotations: Wheat bran, 100-lb. bags, per ton, $45.20; standard middlings or shorts, $61.20; horse and mule feed, $47@59; dairy feed, $48@60; hog feed, $60; poultry feed, $74@78.

MEMPHIS.

Memphis, Sept. 13.—There is little doing in feeds of any kind and prices are more or less nominal. Mixed feed manufacturers are practically out of the market and are doing nothing but filling o'd orders and buying but little of their raw material for future business. Alfalfa meal is holding steady, but there is no demand for it here and the same appears true of some other things. Mill feeds are fairly steady and are in small supply, but demand for future delivery is limited. Cash wheat bran was offered today at $41.50, while gray shorts, to arrive, were $55 bid and $58 asked.

In cottonseed meal there is little doing, but some small lots of old meal are changing hands for 7% ammonia at $66.50@67. There is much inquiry regarding new meal but actual business being put through is small. Prices are said to be around $61 a ton, but this was before the sharp declines in grains during the last day or so. One thing causing hesitancy on the part of the mills is the uncertainty as to what price they will have to pay for seed.

PHILADELPHIA.

Philadelphia, Sept. 13.—The market for feedstuffs is dull and lower. Supplies are not large but more than ample for the demand which is light. The following quotations are for carlots, in 100-lb. sacks, to arrive, at cost per ton: Winter bran, $45.50@46.50; spring bran, $45@46; standard middlings, $60@61; flour middings, $64.50@66.50; red dog, $71@72; shorts, $60@61; low grade flour, $71@72; rye middlings, $59@60; fine yellow hominy, $70@71; fine white hominy, $71@72; reground oats feed, $29.50@30.50; cottonseed meal, 36% protein, $71.50@72.50; cottonseed meal, 41% protein, $75@76.50; cottonseed feed, 20% protein, $55@56.

MONTREAL.

Montreal, Sept. 12.—The chief business in bran is still in mixed cars. In carlots it is quoted at $45 per ton and short at $55 per ton. Business on the whole is quiet owing to paucity of supply. Some dealers have not been able to fill their July contracts owing to the mills being short of wheat. Corn feed is steady and sales are reported at $80@82 per ton, moullie at $69@71, and pure barley meal at $69@70, and dairy feed $48@50 per ton, including bags delivered.—Trade Bulletin.

CHICAGO.

Chicago, Sept. 13.—There was a good demand for bran and middlings last week with supply ample of the former but the latter scarce and quotable $40 and $56 respectively. Cottonseed meal was a shade weaker, new crop meal offered $72@73 for October delivery, with old crop practically off the market. Linseed meal quotable at $86.

DES MOINES, IA.

Des Moines, Sept. 13.—Receipts for the week on mill feeds were fairly liberal. Bran quoted at $39, shorts at $57, tankage at $100. There has been decided breaks in the cottonseed and oil meal with very few sales. Feeders think these feeds are selling too high in comparison with the grain market.

NEW ORLEANS, LA.

New Orleans, La., Sept. 13.—Recent sales of bran have ranged from $2.10 to $2.12 per hundred, tagged, delivered. Offerings of bran for October and November shipment have been at $2.15 per hundred, untagged, delivered. Some sales of bran have been made at $2.18 per hundred, tagged, delivered, and grey shorts at $3.10. Offerings of bran are not free, neither is the demand active.

MINNEAPOLIS.

Minneapolis, Minn., Sept. 13.—The undertone of the mill feed market is very soft owing to the decline in grains and because the demand is limited. Local millers are still holding for firm prices on spot feed as they are sold ahead and have practically nothing to offer. Interior mills are selling quite freely and show an inclination to accept lower bids. Heavier grades of feed are in the best demand and there is no oversupply where they are concerned. Bran is in slow to dull demand and the weakest in tone. Owing to the slack demand for low grade flour the millers are running most of that kind into their heavy feeds. Shipping directions are fairly prompt and the heavier output of local mills is being taken care of.

Quotations in carlots, f. o. b. Minneapolis, sacked in 100-lb. sacks: Bran, $36@38; standard middlings, $50@52; flour middlings, $56@58; red dog, $61@65; rye middlings, $50@51; ground barley, $59.

BOSTON.

Boston, Sept. 13.—The market on feeds of all kinds is rather quiet with little demand noted during the past week. Offerings are moderate. The following prices were quoted at the close: Bran, spring, sacked, $46; bran, winter, sacked, $46.50; middlings, sacked, $60@65; mixed feed, sacked, $56@60; gluten feed, sacked, $75.12; red dog, sacked, $72; second clear, sacked, $74; stock feed, sacked, $65; oat hulls, reground, sacked, $32; hominy feed, sacked, $71.40; cottonseed meal, sacked, $78.50@80.50 per ton. Receipts for the week ending Sept. 13 were 50 tons.

DULUTH.

Duluth, Sept. 13.—Ground feeds, flour middlings and cracked corn ran off in the feeds list during the last week, but other figures were unchanged. Trade in feeds was comparatively light as in view of curtailed operations the mills had little stuff to dispose of. The trade continued to buy for their immediate needs only. Prices per ton follow: Bran, $42; ground oats, $48.25; No. 1 ground feed, $58.25; No. 2 ground feed, $55.50; No. 3 ground feed, $58.50; red dog, $66; Boston mixed, $15; cracked corn, $63; rye feed, $50.

ST. LOUIS.

St. Louis, Sept. 15.—Mill feeds are weak and lower, with wheat feeds particularly weak. Middlings are the best sustained, but there is an increased pressure to sell, and buyers are holding off. Quotations are as follows: bran, $37.50@39 per ton, in 100 lb. sacks; middlings, gray, $57@58; brown, $54, with deferred shipments lower; mixed feed, $50@50.50, white hominy feed offered at $64; oat feed, $25.30; alfalfa meal, No. 1, $38.50@39; No. 2, $35 per ton.

PITTSBURGH.

Pittsburgh, Sept. 13.—More feed is arriving than for some weeks, with demand about equal to the supply. Prices are holding strong for all the better grades of feed but no attempt is being made to establish regular quotations. Some cars of feed are being shipped direct to destination. Bran is in moderate supply as are No. 1 and No. 2 white middlings.

Rice By-Products as Feed.

An excellent finish for hogs is rice bran as well as rice polish, the former excelling in protein and fat content. Many feeders are not as yet cognizant of the feeding value of rice by-products for livestock, but feeders in the South and West in the vicinity of the rice fields have for several years now been strong advocates of this splendid feed and finish for cattle and hogs. The bran, or inner cuticle of the grain, underlies the hull which is removed when the rough rice is milled. After the hulls are removed the bran is taken off by means of scouring machines and the next process by means of special brushes removes the polish. The polish has a high percentage of carbohydrates and has very little fibre and is a splendid feed when fed as a mash. It should be mixed with bran to secure the best balance to the ration, although a quart of polish to a pail of slops will quickly produce fat hogs with fine white meat. The continued straight feeding of rice by-products is not recommended but should be alternated with corn and oats.

The rice bran varies quite generally in color and feeders soon become aware of the fact that the darker feeds are the more nutritious. This is due to the fact that different grades of red rice must be milled in varying degrees, some more closely, in order to whiten the grain for the grocery trade, which thus produces a higher nutrient content to the bran and polish secured from the darker grains.

The Dairy Industry.

The Department of Agriculture compilation of dairy products statistics shows total exports last year, in terms of milk, of 2,556,696,000 lbs., or 3 per cent of the total product of the country. There was an increase in the shipments of butter and condensed milk but the exports of cheese were decreased when compared with 1918. The total butter exports amounted to 33,739,960 pounds for the year. This is the largest amount of butter exp from the United States in a recent and has been exceeded but three since 1850. The largest amoun record was for the year 1880, whe 000,000 pounds were exported. cheese exports for 1919 were onl 794,853 pounds, which is a decrea more than 50 per cent when com with any year from 1915 to 191 clusive. The condensed milk ex for 1919 were 728,740,509 pounds. is an increase over 1918 of 198,9 pounds. The net exports of these products were:

	Pounds.	Equival whole Po
Butter	29,608,491	621,7
Cheese	16,352,547	163,5
Condensed milk	708,556,786	1,771,3
Net exports in terms of whole milk, 1919		2,556,6
1918		1,929,0

Butter exports fell off in May June each year, as the butter during those months is used large storage. While the exports of for 1919 were practically double imports also were doubled, and an ed to 4,131,469 pounds. The chee ports were not heavy for any mon the year, the largest amount bein July, 1918, which reached 5,6 pounds. The imports were also g reduced, being only 2,442,306, the est since 1878.

Condensed milk and evaporated showed continued and materia creases throughout the year. Th crease was greatest during May, and July. In June there were exp 114,835,626 pounds, which was g than the total for any year pri 1916. The imports of condensed continue, but were reduced fron 000,000 pounds in 1918 to 20,1 pounds in 1919. Fresh milk amou to 2,591,553 gallons also was imp during the year.

NORTH PLATTE, NEB. ATKINSON,

Alfalfa Department

Acreage devoted to alfalfa in Indiana s year was 10 per cent less than last r, with an average yield of 2.3 tons orted to the acre.

Alfalfa in Missouri is estimated by Bureau of Crop Estimates to yield s year 2.50 tons per acre with the rd crop cut under fine conditions.

Alfalfa averaged 2.65 tons to the acre Wisconsin, as compared to 2.52 in 8, production being estimated at 151,- tons, compared to 95,417 tons last r.

The car shortage in the neighborhood Cottonwood Falls, Kans., proved of e benefit to farmers of that county that many who had large quantities hay ready to ship several weeks ago e obtained a higher price for their alfa, due to the dry weather having the present crop very short.

Farmers of Marshall County, Ind., co- rating with County Agent V. V. rke after an extensive tour of the te came to the conclusion that Grimm alfa produced a much higher yield l withstood the rigors of winter bet- than other varieties and thereupon bus. of this variety were ordered by m for fall and winter delivery.

ALFALFA MEAL PRICES.

Quotations on alfalfa meal at various nts throughout the country are as ows: Kansas City, No. 1 alfalfa al $37.50@38; St. Louis, No. 1 offered $39; Shreveport, La., stocks of al- a feeds reported fair as well as re- ts and demand with prices ranging n $40@57 for alfalfa molasses feed; falo, ch. alf. meal $45, No. 1 $43, asses dairy fd. $46@55, and alfalfa in fd. $60@65.

ALFALFA SITUATION.

CROPS GOOD.

OLORADO (9).—In regard to the al- a situation in this vicinity, would that the crops here are very good year and the farmers are selling it d on the cars and shipping out the e for $20 per ton, and they are not anxious to sell at that figure. or last year they received such es that it turned the heads of most of them and they think that the war ot over yet, that is in the way of es. There is lots of alfalfa within adius of 25 miles around here, and estimate about 6,000 cars that will shipped out and fed to stock around this year. he farmers are busy now with their s, harvesting them, and they will bale any alfalfa for you now.—*The ison-Conger Grain and Produce Co., idad, Colo.*

Weakness in Alfalfa Meal.

ANSAS CITY, Sept. 13. — Weakness ailed in the market for alfalfa meal Kansas City this week. Offerings for npt shipment were fairly liberal and s over the important producing ter- y were reported grinding practically apacity. No large lots of meal were ked, trade generally being confined small purchases, buyers taking gh meal for their immediate needs. prices showed a recession of about ton. The Southeast and Central es supplied the bulk of the demand. hoice alfalfa meal was quoted in sas City at $39@40 a ton, in carlots, sacks, compared with $40@41 the eding week; No. 1, $36@37; No. 2, 33; brown, $30@31.

lying of alfalfa mixed feed was re- ted by the sharply downward trend rices for corn, oats and other feed- s, consumers desiring to await a stable and settled tone in the mar- before making purchases. The volume of business was light and ed a considerable reduction from at weeks. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $43@54.

ALFALFA PRICES.

The Bureau of Markets, reporting under date Sept. 13, has the following as regards alfalfa prices throughout the country:

SOUTHERN.—No. 1 alf. $38, No. 2 $32, No. 1 alf. $37. Vicksburg—Ch. alf. $35. Greensboro—Ch. alf. $37@39, No. 1 alf. $35@37. Wilmington—No dmd. for alf. Montgomery—Ch. alf. $38.75, No. 1 alf. $37. Birmingham—Ch. alf. $37.50, No. 1 $37, bulk from New Mex. Mobile—Local alf. available at $32 for shpt. Bulk of sup. from Colo.—Okla., ch. alf. $35, No. 1 $33.30. Tampa—Ch. alf. $42. Pensacola—Ch. alf. $36. Jacksonville—No. 1 alf. $36.

SOUTHWESTERN.—Ft. Worth—Ch. alf. would move in limited quantities if available, ch. alf. $31, No. 1 $28@29. Shreveport—Ch. alf. offered $30. Houston—Alf. $30@32 for ch. grades, rcts. nil. Okla. City—Bids alf. $21, offers $23. San Antonio—Ch. alf. $32, No. 1 $30.

Sowing Alfalfa.

Those of our readers who are planning to sow alfalfa this summer on oats stubble ground should make their plans to get the oats off the ground just as quickly as possible, and to get on it with the disk promptly. The oats stubble should be disked two or three times at the earliest possible date after the oats are removed. This will tend to check evaporation, which means checking the formation of clods, and will help to keep the ground moist enough to plow. It should be plowed just as soon as convenient after it has been thoroughly disked, and then disked and harrowed until it is worked down into the very best possible seed bed.

Alfalfa can be sowed any time after the ground is ready. We have secured a good stand in the latitude of Des Moines when sowed as late as the 15th of September, but it is not wise to delay sowing as late as this. It is best to sow some time during August.

If the suggestions we have given are followed, the chances are very favorable for a first-class stand of alfalfa. Once in a great while, a very heavy or beating rain within a week after the seed is sowed has packed the ground, and hot weather immediately following it has formed a crust which it is difficult for the young alfalfa plants to break through. If this should happen, the best thing to do is to go onto the ground with a heavy roller and break up the crust. In the territory east of the Missouri River, under favorable conditions, alfalfa sowed in August will be just as far ahead the next spring as alfalfa sowed during the preceding spring, and will be much freer of weeds. The disking, plowing and harrowing of the field during the preparation of the seedbed sprout and kill weeds by the million and give the alfalfa a reasonably free field.—*Wallaces' Farmer.*

BRITISH CROP PROSPECTS.

The high temperature of the first twenty-three days of August constitutes a welcome asset of the highest order. We say constitutes, because the gain remains in the actual grain now being reaped. It has been improved in quality, it is a denser and heavier kernel than seemed at all likely in July. It will probably prove richer in dry gluten than the crop of last year, and the yield per acre is now regarded as a clear 31 bus. instead of the 29½ forecast by the somewhat pessimistic report of the Board of Agriculture for August. The progress with acre is already cut, a third cleared. The winter barley and oats have been cut and threshed with eagerness, as unprecedented prices have ruled on the free market for these articles. The new rye is a good sample and 480 lbs. to the quarter is not an uncommon weight. A few samples of winter tares are not of special quality; still, 504 lbs. to the quarter is allowed. The harvest of spring barley only begins, as a rule, today (the 25th), and will not take long, the straw being very short and the yield of corn sure to be below the average. Quality, however, will sometimes be magnificent.—*Mark Lane Express*, 25 August.

Corn Situation.

The short side of corn has been the favored one in the absence of formidable bullish features to stay the tremendous force of an almost universal belief in a material downward revision of values. The purchasing power has received a serious check, there being no obvious incentive for the buyer in the face of prevailing conditions that are still prominent. Should the farmer, however, feel indisposed to market his new crop freely, sentiment nor theories or agitation would relieve the demand for cash corn that has been restricted by forced economy chiefly. The producer is used to higher prices than those now prevailing, and the holding policy followed in former years may again become a factor. Corn promises to be of exceptional quality, and its feeding value is still greater than that obtainable at market centers.—*Simons, Day & Co., Chicago.*

Hay Department

From the Sand Hills district of Nebraska comes the report of an exceptionally heavy hay crop that has been practically all put up to date.

From Labette County, Kans., comes the report of one and a half tons of prairie hay to the acre, the cost of cutting and baling of which amounted to $6 a ton.

I. L. Sutherland & Son is the new name of an old-established hay, grain and feed business at Richmond, Va., Irvin Sutherland, Jr., having recently been taken into the firm.

Not often is the old-fashioned cradle used in cutting hay crops nowadays, but J. B. Glunk, a retired farmer of Albion, Wash., took care of a 30-acre tract in that manner this season, later raking and binding the crop by hand.

The farm bureau estimate of the Kittitas County, Wash., hay crop places the total at 60,000 tons, compared with 70,000 last year. Increased wheat acreage and light crops in some sections due to water shortage explain the decrease.

From San Francisco came the report that the Government had been receiving bids for about 4,000 tons of hay for shipment to Manila and Honolulu. The hay was to be double compressed and it was expected San Francisco bidders would secure the award.

From Shelby County, Ill., comes the report of clover hay fields yielding about two tons to the acre last July with a second crop now being cut which will be threshed for seed. One estimate of the clover meadows production was placed at $75 an acre.

Field Agent Kirk says the yield of both tame and wild hay is above the average in Minnesota, the yield being 1.81 tons and 1.46 tons, respectively; timothy 1.70 tons, and alfalfa 3.20 tons. About 17 per cent of tame hay and 22 per cent of wild hay is baled. The quality of tame hay is 97 per cent and of wild hay 93 per cent.

The tame hay crop of Ohio measured fully up to expectations with an average yield for the state of 1.36 tons per acre, which is just the ten-year average. The quality of the crop is 93, says the Ohio Coöperative Reporting Service, which exceeds the ten-year average by three points. Clover averaged 1.33, timothy 1.39 and alfalfa 2.42 tons to the acre.

We have all heard of palaces of various kinds, including the ice palaces, but at Mabton, Wash., there was a hay palace 100x150 feet, 40 feet high. The large frame skeleton was faced with 600 tons of baled alfalfa hay and the interior of the structure was hung with loose green hay, forming a bower. This unique palace was a feature of the fair held at Mabton Sept. 10-13.

Field Agent Sanders reporting for New England says that a heavy yield of fine hay has been harvested in excellent condition except in sections of southern New England where it was damaged by rain. Timothy, alfalfa and millet are good crops with pastures reported good in Massachusetts, Rhode Island and Connecticut but short in Maine, New Hampshire and Vermont due to drought.

NEW YORK CITY GRAIN, HAY AND FEED MEETING.

A meeting of representative grain, hay and feed merchants of Greater New York was held at the Hotel Pennsylvania on Tuesday, Sept. 9, to discuss methods for combating the substitution of the motor truck and farm tractor for horse-propelled vehicles, which resulted in the formation of a temporary association, which was given the name of the "Horse Publicity Association of America."

As the name implies the object of the Association is to give the horse some publicity and to present the facts of the comparative costs between gasoline and horse power for haulage and farm work.

The attendance at the meeting was representative of all branches of the distributing end of the grain, feed and hay trade, with feed manufacturing firms also present. Those in attendance were: L. G. Leverich, president of Shaw & Truesdale; Clarence S. Betts, treasurer-general manager Wm. H. Payne & Son; Harry G. Gere, president, Harry G. Gere Co., Inc.; J. C. Overfield, N. W. Simpson Co.; Thomas M. Blake; J. W. Gasteiger, Jr., of John W. Gasteiger & Son; S. A. Vroman, president, New York Hay Exchange Ass'n; H. K. Palmer, N. Y. manager for Chas. A. Krause Milling Co., of Milwaukee, Wis.; H. S. Lockwood, sales agent for the American Steel & Wire Co.; E. A. Dillenbeck; Roscoe Tygert; Fred M. Williams; J. C. Bush; Frank Dusenberry, of Dusenberry & Co.

Intense interest was shown in the subject and after general discussion it was decided to form a temporary association to perfect preliminaries for a general meeting to be held in October to which all interests identified with advertising the horse will be invited, and at that time a permanent association will be formed for exploiting the horse. The following officers were elected: President, Fred M. Williams; secretary, Leonard Gibson; treasurer, Thomas M. Blake. The meeting adjourned subject to the call of the chairman.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

"Hay is extremely short in Northern Colorado," declared L. T. Southey, an extensive dealer in hay at Denver, who was a visitor on the Kansas City market last week. "Sections of our state which normally produce a large surplus of alfalfa hay in addition to the home requirements of live stock producers are now buyers of hay, drouth having reduced the crop. Even in the irrigated districts, the yields were small, owing to a shortage of water for irrigation needs. Many feeders are disposing of much of their stock because of the shortage of feed, but this is not general."

Some surprise was manifest by Kansas City dealers over the reduction of about 9,000,000 tons in the Government's September report on the yield of hay in the country. Still, it was pointed out, the indicated figures are more than 12,000,000 tons above a year ago. The indicated crop is 102,000,000 tons.

Consumption of hay at the leading stock yards of the Middle West shows a heavy increase and promises to be great volume until December. At K sas City there is a great movement cattle, which is being taken from stock yards rather slowly. This means creased consumption of hay in Kan City's stock yards. At Omaha all reco in receipts of sheep are broken. M kets in general are receiving heavy s plies, owing partly to drouth in Northwest. In addition, there is great invisible movement of ca which does not come through mark this consisting of the shipment drouth cattle from the Northwest Texas, Oklahoma, Kansas, Missouri, braska and other states. This mo ment means an unusually heavy c sumption of hay at interior stock ya loading stations.

"Inefficient operation of railroads counts for the serious shortage of c in the Southwest," declared a pro nent Kansas City dealer, who devo much time to the transportation pr lems of the industry. "Many of representatives in the interior rep that large numbers of empty auto bile cars, which are used for haul hay, are moving back to the mo manufacturing plants of the East w out being used. Railroad agents at country stations declare there is much delay in the handling of hay permit loading of automobile cars w forage for shipment to eastern con mers. But this is not true, the de is not greater than in other industri in fact, the system as employed in K sas City guards against delay. W the United States Railroad Administ tion to use the automobile cars on th return to the manufacturing plants carrying hay, and safeguarding ter nal grain markets from congestion, car situation at the present time wo be normal."

"Labor unrest in the United Sta demands close attention of members the hay trade," declared Dan Tils head of Dyer & Co. "While some m ket students maintain that the trend labor developments in the country l little, if any, relation to the forage dustry, our trade is affected to the sa degree as the steel industry, the c mines and other of America's basic terprises. Growing unrest will dou less influence the trend of hay pri later in the season. At the mome such feedstuffs as corn, oats and oth

That is ish for the future."

leavy supplies of prairie hay are in the country," reported Harry J. h of the Midwest Hay Co., on re- ing from an extended tour of the hay producing sections of central southern Kansas, along the Okla- a line. "Some of the hay in the r growing areas was cut and baled than a month ago, the shippers unable to obtain cars with which ove the forage. As a result, con- able damage has been done by and other unfavorable weather, y bales being badly bleached. In tion to the large amount of hay dy cut and baled, there are many in the Sunflower State where the ers have not yet harvested their hay crop. Labor is scarce and , and, with a rush of other work in country, farmers are delaying the ng of their hay. The workers are independent as to their hours and r working conditions, and because e short hours for baling, growers lain their hay making operations a loss. This, however, is only a orary situation, and should im- e. There is little choice quality ie hay available."

OMAHA HAY NOTES.

J. C. Pederson, Correspondent.

. Fisher, manager of the Langen- Bros. Co. of Kansas City, Mo., was itor on the market this week. ceipts for the past week have been y on grain, hay and with the de- l quiet there is practically no top e market.

H. Hovey of the McCune-Moore f Kansas City was a visitor on the et this week.

Hay Inspection Port.

erett, Wash., has been designated e State Public Service Commission hay and grain inspection port fol- g a conference between state grain ctors and members of the Com- ion. Heretofore Seattle, Spokane Tacoma have been the only inspec- points in the state but in addition erett, Vancouver, Wash., may also within the list as a petition to effect has been presented the Com- ion.

HAY STOCKS.

e Bureau of Markets, reporting r date Sept. 13, has the following gards hay stocks throughout the ry:

STERN.—Lynchburg—Dmd. fr., rcts. shpts. delayed acct. car shortage, ty new hay good, market weaken- No. 1 tim. $34.50, No. 1 lgt. clov. $34.50. Scranton—Rcts. fr., dmd. Washington, D. C.—Stks.-rcts. in- ing, dmd. mod. No. 1 tim. $34.

NTRAL.—Terre Haute—Market dull, trade fr. but few carlot transac- during wk., No. 1 tim. $30, No. 2 , No. 1 clov. mxd. $29.

Miami—No. 1 tim. $40. Pensacola—No. 1 tim. $31.50. Jacksonville—No. 1 tim. $34.50, No. 2 $32.50, No. 1 lgt. mxd. $34.

THE HAY SITUATION.

SITUATION GOOD.

WISCONSIN.—The hay situation in our locality is good. There is comparatively little hay being baled, but we are getting just about enough to supply our regular demand at this time of the year. There is very little we can say on the subject at this time, except that we have from 1,200 to 1,500 cars of hay in sight which we expect to handle during the season of 1919-20. This will cover our operations in Wisconsin, Minnesota and Michigan.

There is no hay grown in the immediate vicinity of Rhinelander for shipment. It is all consumed locally and there are large quantities shipped in here during the winter months in addition to the local production.—*Consumers' Hay Company, Rhinelander, Wis.*

Hay Markets

ST. JOSEPH.

Sept. 13.—The hay market held steady with prices unchanged. However, weak tone prevailed in the low grades, the better grades being limited and in good demand, while lower grades were slow and draggy. The demand for good grades of hay for the past week has been in excess of the supply. Receipts of low grades were heavy and slow sale. The outlook is not for any material decline or advance the coming week. The prevailing prices are as follows: Prairie, choice, $20@21; prairie, No. 1, $19@20; prairie, No. 2, $17.50@18.50; prairie, No. 3, $13@17; midland, No. 1, $16@17; midland, No. 2, $12@15; alfalfa, choice, $30@31; alfalfa, No. 1, $28@29; alfalfa, standard, $25.50@27; alfalfa, No. 2, $22@25; alfalfa, No. 3, $18@20; timothy, No. 1, $26.50@27; timothy, standard, $25@26; timothy, No. 2, $23@24; clover, light mixed, No. 1, $26@27; clover, light mixed, No. 2, $23@24; clover, No. 1, $22@24; clover, No. 2, $18@21; straw, $7.50@8.

DES MOINES, IA.

Sept. 13.—Receipts of hay are ample to supply the demand. Market rules about steady. No. 1 upland Western hay quoted at $23 per ton; mixed hay, $22 per ton; alfalfa, $28.50; oat straw, $9 per ton, and wheat straw, $8 per ton.

NEW ORLEANS, LA.

Sept. 13.—Offerings of hay still continue light, due to the car shortage and the movement of wheat and coarse grains. Quote No. 1 hay from $35 to $36, No. 2 from $33 to $34, and No. 3 from $31 to $32.

OMAHA.

Sept. 12.—Receipts of prairie hay heavy and the demand very quiet causing the market to become weak and lower on all grades of prairie hay. Receipts of alfalfa light and market firm and higher. Oat and wheat straw steady.

Upland prairie—No. 1, $20@22; No. 2, $16@18; No. 3, $10@12. Midland prairie—No. 1, $20@21; No. 2, $16@17. Lowland prairie—No. 1, $14@15; No. 2, $10@12; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@10; wheat, $8@9.

NASHVILLE.

Sept. 15.—Hay trade was routine last week, with prices about steady. Quotations: No. 1 timothy, $35; No. 2 timothy, $34; No. 1 wild hay, $35; No. 1 clover, $32; No. 2 clover, $29; alfalfa, $37@38.

DETROIT.

Sept. 13.—Receipts of hay have increased a little during the week and everything offered has met a fair demand. The market is quoted steady. A little hay is coming from Canada, but most of the supply is Michigan goods. Canada is shipping in some straw and that market is easier. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $25@25; No. 1 mixed, $24@25; No. 1 clover, $24@25 per ton.

BUFFALO.

Sept. 13.—With farmers getting from $27 to $30 for loose hay in the market here, regular dealers are not in evidence. The feed question is a puzzle and they will wait another while longer. There were offerings of baled hay at $25@27. No straw in the market.

MILWAUKEE.

Sept. 13.—The movement of the new hay crop has been very slow, which is possibly due to the difficulty experienced in securing cars for shipment, as the crop generally is reported as a bumper one. Receipts, although light, have been sufficient to supply current demands. Big shipments are anticipated, although it is not expected to move in great volume until after corn and potato harvest. Prices at the local market hold firm after several weeks of moderate price lowerings. Choice timothy is quoted at $29@30. Current quotations are: Choice timothy, $29@30; No. 1, $28@28.50; No. 2, $26@27; No. 1 clover, $20@23; light clover mixed, $26@27; red top and timothy mixed, $25@28; marsh feeding, $14@15; packing, $10.50@11; rye straw, $11@11.50; oat straw, $9@9.50.

DULUTH.

Sept. 13.—Business in hay was dull and inactive on this market during the last week. Receipts were light and demand from any quarter was limited. Timothy eased off $1, but prairies and midlands are unchanged. Quotations follow: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $18@20; No. 2, $14@16. Straw—Rye, $9@10; oat, $9@10.

BALTIMORE.

Sept. 13.—The local hay market is steady at the late decline, with a rather freer outward movement noted in the better grades of timothy and light mixed hay and supplies of such not burdensome. Common, low grade stuff, as heretofore, is inclined to drag even at its relative value.

Straw of all descriptions is in moderate supply on spot and firm as quoted. Jobbing demand is fair for all kinds. Quotations follow:

Timothy—No. 1, $33.50@34; standard, $32.50@33; No. 2, $31@32; No. 3, $26@29. Light clover mixed—No. 1, $30@31; No. 2, $28.50@29.50. Clover mixed—No. 1, $28.50@29.50; No. 2, $26@28. Clover, nominal—No. 1, $25; No. 2, $22. Straw—Straight rye, $17@18; tangled rye, $14@14.50; wheat, $12@13; oat, $14@15.

PHILADELPHIA.

Sept. 13.—The market for hay is weak and lower under increasing supplies and light demand. The bulk of the supply consists of medium and low grades, No. 1 stock being scarce. Straw is dull aside from wheat and oat straw, which is in good request and prices firm and higher.

Timothy hay—No. 1, $34@35; No. 2, $31@32; No. 3, $28@29. Clover mixed hay—Light mixed, $30@31; No. 1, $29@30. Straw—No. 1 straight rye, $13.50@14; No. 2, $12.50@13; No. 1 tangled rye, $13@13.50; No. 2, $12@12.50; No. 1 wheat straw, $13@13.50; No. 2, $12@12.50; No. 1 oat straw, $13@13.50; No. 2, $12@12.50.

MEMPHIS.

Sept. 13.—The unsettled state of the feed markets has put the hay situation in bad here and prices are difficult to quote. Local selling prices are being held, but it is expected they will be shaded whenever business seems to offer. Shippers are not making any concessions yet, but are finding little outlet and the local people expect lower prices next week. Stocks here are moderate, but too large for the limited demand. On call today No. 1 and No. 2 timothy were offered at $31, while cash clover mixed light brought a bid of $31.

HAY
THE PLUGGING TRACK MARKET IS THE PLACE FOR YOUR HAY
Why, because we pay no attention whatever to grade. All hay being sold on its merits at our straight price for the entire car.
THE FITZGERALD BROS. CO., CINCINNATI, OHIO

Alfalfa is holding steady but there is practically no business therein. For cash choice $33 was bid, while $32 was bid for No. 1 and $34 asked. Standard in transit was offered at $31.50, while $30 was asked for cash No. 2.

CINCINNATI.

Sept. 16.—The congestion in terminals reported in last week's review of the local hay situation, and which necessitated double day trading at the plugging yards was entirely cleared, and the market again placed in position to handle liberal consignments of all kinds. Offerings of 281 cars during the week largely constituted these delayed shipments, as fresh receipts had been discouraged by the trade, but prices were not affected and steady quotations were maintained for timothy with a 50c advance for mixed. Heavy mixtures and clover especially were in good demand both for shipping and nearby consumption. The weather has averaged very warm throughout this immediate territory and pasturage conditions have been seriously reduced, and an increased demand for hay from dairy feeding interests is indicated unless rains soon freshen the pastures.

Timothy—No. 1, $29.50@30; standard, $29@29.50; No. 2, $28@29; No. 3, $26@28; threshed, $15@18. Light clover mixed, $29@30. Clover mixed—No. 1, $28@29; No. 2, $26@28. Clover—No. 1, $35@36; No. 2, $33@34; sample, grassy, $23@25. Local alfalfa—No. 1, $35@36; standard, $34@35; No. 2, $32@34. Straw—Wheat, $8@8.50; rye, $11@12; oats, $8@8.50.

MONTREAL.

Sept. 12.—In this market sales have transpired of good No. 2 hay at $21@22. Sales are also reported of 20 cars of hay at points on the South Shore costing $20@21 f. o. b., all of which are being shipped across the border. These cars were at points that would cost laid down at Montreal $22@23, the freight being about $2 per ton.

It is stated by dealers here that the new crop is already in much better shape to ship than at this time last year, owing to its being harvested in dry weather. That the crop in this province and eastern Ontario is a full average is now generally admitted, and the only drawback is the paucity of No. 1 timothy hay, owing to its mixture with clover and other grasses. A large portion, however, will grade good No. 2, and, of course, the proportion of No. 1 timothy will be smaller than that of last year. The receipts of hay during the last week at Montreal were 3,811 bales, against 12,840 bales for the same week last year.—Trade Bulletin.

BOSTON.

Sept. 13.—The demand for hay the past week in the local market has been practically at a standstill and receivers have found it difficult to make sales even at concessions from asking prices unless the hay is needed. Continued heavy receipts has caused the market to become oversupplied and there is now an accumulation at the various railroad terminals which receivers find it difficult to reduce in order to save storage charges. The demand from the out-of-town trade also has been slow on account of the heavy second cutting of hay and little demand for baled hay is reported from this section. New hay is arriving generally in good condition, although some cars coming forward show signs of heat and are out of condition. These cars have to be moved at material concessions from open quotations. A range of $31@35 per ton is quoted for No. 1 timothy hay in large bales, a fancy car possibly bringing $1 more per ton. Small bales range at $32@33. No. 2 timothy is quoted at $31@32 for large bales and $29@30 for small bales. No. 1 Eastern ranges at $30@31, and No. 2 Eastern at $25@28. No. 3 hay is quoted at $23@24. A full range on clover mixed hay is $25@28 with finer hay unchanged at $22@25. Receipts for the week ending Sept. 13 were: Local, 125 cars.

The straw market is quiet and unchanged. Choice rye straw is quoted at $17 per ton as an extreme price, and oat straw at $14 as an inside quotation. Receipts for the week ending Sept. 13 were: Local, 1 car.

NEW YORK.

Sept. 12.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week (5 days)....	4,000	220
Receipts last week (5 days)....	3,471	230
Receipts Sept. 1 to date.....	6,661	390
Receipts same time last year..	8,765	420

Our market has just about held its own from day to day though there does not appear to be any real stability to prices and the course of the market is uncertain with the tendency, if anything, downward. New invoices are, of course, very light as practically all of the principal terminal points have been embargoed for some time past. In fact the situation is purely and simply a railroad proposition as the amount of hay rolling and unloaded from day to day is wholly up to them, and values are undoubtedly being maintained on their present parity from that reason.

Scarcely any strictly No. 1 timothy hay arriving and it would be difficult to exceed $35 at this writing with $34 extreme top on small bales. No. 2 hay in big bales had some sales early in the week up to $34, but $33 is now regarded as top and $31 is difficult to exceed at Bushwick station; and small bales range all the way from $29@32, according to quality and where located, one car showing some mixture of daisy selling at Bushwick on Thursday at $28. There is fair call for No. 3 and shipping hay in big bales at about the same prices as last week but small bales are dragging. Very little clover mixed here or wanted.

No. 1 state rye straw is selling up to $16, but there is a good deal of inferior Jersey rye straw offering at $14@15. Oat straw scarce and firm. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$35.00@	$ @34.00
No. 2 hay.....	31.00@33.00	29.00@32.00

KANSAS CITY.

pt. 13.—Declines in the cheaper grades ted the only changes on the Kansas hay market this week. Prairie de- d 50c to $1 on the No. 2 and No. 3 es, poorer quality alfalfa was off 50c a ton, and timothy and clover mixed ted 50c to $1.50. Firmness ruled on better quality hay, best prairie selling igh as $21 a ton, and alfalfa up to $31 n. A good demand prevailed for fa hay from millers in the East and heast, this class of trade taking the of offerings suitable to their require- s. Timothy also is moving into the heast and the South, and a good yards demand prevails for prairie. e is an abundance of poorer quality in the country, and demand for these ings is not so keen. Straw rose $1.50 a ton, the cooler temperatures and offerings stimulating trade.

airie—Choice, $20.50@21; No. 1, $19.50 No. 2, $17.50@19; No. 3, $12.50@17; ng hay, $8.50@9.50.
dland prairie—No. 1, $15.50@17.50; No. 0@15.

aw, $10@10.50.

PITTSBURGH, PA.

t. 13.—There is only a very limited nd for hay, even the very best grades, poor hay is not wanted at any price. green clover and No. 1 mixed hay in favor with local consumers and are being moved with little or no lty at firm prices. But dealers are buying only for immediate needs, owing to a general belief in lower prices to come within the next few days. Shippers who have nothing but the lower grades of hay to ship are advised to keep it away from this market at present. Total receipts amounted to 948 tons as compared with 1,572 tons the preceding week. Quotations have not been changed since last week's issue.

ST. LOUIS.

Sept. 13.—Receipts of hay during the past week have been moderate in amount consisting principally of poor timothy and clover mixed.

The timothy hay market continues to rule firm with an active local demand for the better grades which are in scant offering. The medium and lower grades are rather quiet but steady.

Light clover mixed hay firm on good No. 1 light clover mixed but quiet on the medium and lower grades. Demand is fair on shipping account.

Heavy clover mixed hay firm with an active demand for good No. 1 bright heavy clover mixed, dark clover mixed is slow and dull.

Clover hay firm. Receipts are very light and demand excellent for the better grades, medium grades steady. Low grades dull and slow.

Prairie hay steady, offerings are moderate and demand excellent for the better grades of Kansas and Okla. hay, Iowa and Northern Prairie is dull and not wanted.

Alfalfa hay continues to rule firm with an active local demand for good No. 1 to choice leafy alfalfa on dairy account. The milling trade is rather quiet owing to the heavy decline in corn and they show a tendency to hold off from further purchases until the situation clears up.

Straw, scarce.

Track sales—Timothy No. 1, $32@34; standard, $30@31; No. 2, $26@28; No. 3, $23@24; choice timothy, $12@15. Light clover mixed, No. 1, $29@30; No. 2, $25@26; heavy clover mixed, $28@29; No. 2, $25@26; clover hay, No. 1, $32@33; No. 2, $28@29; prairie hay, choice, $26@27; No. 1, $24@25; standard, $23@24; No. 2, $20@21. Alfalfa hay, choice, $35@36; No. 1, $33@35; standard, $32@33; No. 2, $28@30. Straw, $7.50.

TAMPA, FLA.

Sept. 12.—The local hay market is very dull at this time, but little interest being shown in current quotations on $37.50 for No. 1 timothy. Stocks in warehouses are comparatively small and our jobbers are buying in a limited way only. Receipts totaled only 15 cars during the past week, quality running very good.

CHICAGO.

Sept. 15.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Sept. 13, also the total receipts and shipments of hay from Jan. 1, 1919:

	Sept.13, 1919.	Sept.6, 1919.	Sept.14, 1918.
Total receipts.....	4,803	4,010	6,887
Total shipments....	780	602	4,396
Rcpts. since Jan. 1.	170,169	165,366	234,099
Shpts. since Jan. 1.	36,766	35,986	72,162

Receipts for the past week continued light and prices advanced on the higher grades. However, heavier receipts are anticipated very shortly. Quotations follow: No. 1 timothy, $32@34; standard, $30@32; No. 1 light clover, $30@32; No. 2 timothy, $28@30; No. 3 timothy, $22@26; No. 1 clover mixed, $25@27; sample hay, $18@22; threshing timothy, $12@15; clover, $23@26; Kansas and Oklahoma prairie, $20@24; Iowa, Minnesota and Dakota prairie, $15@24; marsh hay, feeding, $13@15; marsh hay, packing, $10@12; rye, straw and oat, $10@10.50; wheat, $7@8.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	15,363,000	31,251,000
Milwaukee	5,398,000	7,397,000
Minneapolis	3,740,000	5,954,000
Duluth	285,000	77,000
St. Louis	3,465,000	4,765,000
Toledo	750,000	3,090,000
Detroit	273,000	965,000

Omaha	254,000	294,000	904,000
Indianapolis ...	255,000	355,000	327,000
Total	5,214,000	5,757,000	8,690,000
Shipments	3,626,000	3,655,000	6,006,000

RADDATZ'S LETTERS.

The first of a series of letters originating in the office of H. D. Raddatz & Co., Toledo, O., is now in the trade's hands. It impresses us that they are unusually enterprising to attempt such publicity in a market everywhere recognized as the originating point for more good market letters than issued probably in any other of our great terminal markets. We will say that letter No. 1, comprising a few remarks on the world situation as affecting our business to "Hank from Archie" is good. The compilation of this series will keep some one sitting up nights, but our friend Raddatz is quite willing to do so, and so original in his line of argument is he that those not on his regular mailing list will be entertained and profitably advised if they get there.

Trade Mention

The Shuman Advertising Co., trade and technical journal specialists, Chicago, has moved from the Westminster Bldg. to larger quarters at 117 North Dearborn street.

The Elmore-Schultz Grain Co. of St. Louis is issuing a very neat, four-page market letter with an attractive mast head. September 1919 issue bears the volume No. 1, issue No. 2. Page 4 of the circular is devoted to a market review. This is another instance of the progressive spirit that dominates the personnel of this live-wire grain firm.

The Edward A. Pratt Audit Co., City Hall Square Bldg., Chicago, with branch offices through the grain belt of Illinois, is circularizing our trade with calendars covering 18 months. This firm makes a specialty of audit systems and income tax surveys for grain dealers, and in order to get you on its lists will appreciate an inquiry for this calendar.

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Sept. 6, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	58,097,000	83,217,000
Milwaukee	6,250,000	11,483,000
Minneapolis	6,505,000	15,115,000
Duluth	25,000	172,000
St. Louis	18,674,000	22,889,000
Toledo	1,101,000	2,353,000
Detroit	1,573,000	3,621,000
Kansas City	15,991,000	29,801,000
Peoria	17,919,000	31,624,000
Omaha	21,509,000	42,644,000
Indianapolis	15,442,000	17,662,000
Total	163,086,000	260,581,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Sept. 13, 1919.	Sept. 6, 1919.	Sept. 14, 1918.
Chicago	2,142,000	1,718,000	1,951,000

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Sept. 15.—Provision prices were on the down grade the greater part of the week, dropping to the lowest of the season with the close at well toward the inside. September pork losing $2 and October $4.10. Lard was off $1 to $1.60, the January showing the smallest loss and September the largest. The near futures of short ribs were $2.15 to $2.22½ lower and January $1.55 lower. The close was the lowest finish of the season with a distrustful feeling.

The provision situation is such that it is largely a question of getting buyers rather than of prices on some lines of hog products. Domestic trade in cured product is not large, but there is a good business in fresh meats, prices of which have shown little change, the main reductions during the week being in Boston butts.

Export business is restricted by the unsatisfactory condition of the foreign exchange market. The big packers, however, are shipping product to branch houses abroad and selling it in Germany and other countries and getting their money out of Germany into other countries where exchange is not so low. The smaller packers are less fortunate and they are hedging a considerable part of their holdings by sales of October lard and ribs. This had a depressing tendency upon values at times and to prevent total demoralization the big packers credited with buying at times to give the market support.

Comparatively little new speculative buying is coming into the market, as there is nothing but the decline in price to induce traders to take hold and a great deal to discourage them. The disposition is to work out of the near futures into January, which is being discounted at a good rate, and some of the specialists think that the sellers are giving away too much. There has been a decline of 26¾ per cent in hogs, 29 per cent in lard and 23 per cent in short ribs from the highest point of the season, but values are still high by comparisons with the pre-war levels.

There is said to be a big loss in the packing business, and while packers are in a position to stand it, owing to having made large profits since the war started five years ago, the constant activities and persecutions on the part of the Government is against both the live stock and packing interests.

Supplies of hogs were liberal and prices irregular, having declined around $3 within a short time and are off $6 from the high point of last month. Farmers are not disposed to sell freely and declines cause them to hold back every few days. Some people, however, think that there is still profit in feeding hogs and that values are to work lower, regarding supplies as equal to last year's.

Pork was neglected and there was some buying of it against sales of ribs. The latest reports from England say that the Government has reduced the import requirements from the United States from 80 to 60 per cent.

Indications are for smaller supplies of hogs according to the Government report, the estimated number of stock hogs on the farms September 1 being 4.6 per cent less than last year. Illinois showed a decrease of 6 per cent, Indiana 5 and Ohio 3 per cent from last year. The total number of hogs is 62,070,000, compared with 65,060,000 last year and 60,218,000 two years ago.

Kansas City Provision Review.

KANSAS CITY, Sept. 13—Further sharp recessions in provision products proved restricting influence in the demand on the Kansas City market this week. Declines on fresh pork cuts ranged from ½c to 1½c, and some of the cheaper grades were off as much as 3c a lb. A fair demand prevailed for loins, which receded 1½c, with local buying showing a slight increase because of cooler temperatures. The East, too, was a fair buyer. Dry salt and heavy smoked meats, which suffered a loss of 1¼c a lb., are moving in larger volume to the South, owing to the opening of the harvest season in that territory. Lard was off about ¼c to ½c, and substitutes declined about 2c. Fancy hams and bacons met with a less active demand, consuming interests being freer buyers of the heavier grades of meat. Hams were off about 1c, and fancy bacon closed ½c lower for the week.

Weekly Average Prices at Chicago.

Weekly average prices at Chicago for good native beef cattle, aged sheep and fat lambs, as compiled by the Chicago *Drovers Journal:*

	Cattle.	Hogs.	Sheep.	Lambs.
This week	$15.50	$17.35	$ 7.90	$15.50

Oklahoma City	170,800	217,100
Above and all others.	15,771,000	15,599,000
For the week	415,000	382,000
Preceding week	294,000	389,000

Weights are reported as follows: 200, 246, 232¾, 274, 215, 178, 248, 250, 201, 255, 184. Reports of quality: Three "good," one "common to good," one "good mixed," two "fair."

Cash Meats.

Trade in mess pork Monday, the 15th, was light and an easy tone prevailed throughout the session. The opposite was true of lard for prices ruled firm but trading did not assume large proportions. Shortribs were particularly active in the October and January deliveries but the market generally was a light one. Quotations as of Monday follow:

M. pork, new	$41.50	@.....
Lard, round lots	26.00	@.....
Neutral, No. 1	32.50	@32.75

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Sept. 15.—Hog prices w irregularly lower the past week, though Chicago was much higher th many of the outside markets. The on Saturday was $18.25, or a decline 25c from Friday, and a loss of $2 fr the previous week. The average Sat day was $16.70, and for the week $17.35, a loss of $1.10 from the previ week, $2.60 from last year, and 75c fr two years ago, while three years ago average was $10.65. The princi breaks were in the first three days the week, aggregating around $2.50. decline was too much for country sh pers to sell on, and receipts beca lighter.

Quality generally was good, altho a larger percentage of packing gra was noticeable and there were m light weights offered, the latter s gesting to some specialist as indicat a starting of the new crop marke Packers took most of the desirable h in the opening days, and light and dium weight butchers were held while the packers' grades led the cline. Top prices for the week w $20.35 on Monday and the highest p on Saturday showed a loss of $2 was the lowest top since March. A age weight was 255 lbs., compared v 256 lbs. the previous week and 251 last year.

Packers bought 104,000 hogs for week, against 60,000 the previous w and 70,900 last year.

Chicago had 112,139 hogs for week, against 73,456 the previous w and 80,211 last year. The eleven r kets had 457,400, against 343,000 previous week and 433,500 last year.

An oversupply of thin, trashy W ern cattle and moderate offerings of ished steers featured the cattle trad the week. The bulk of the steers cl $1 to $1.50 lower. Fancy yearli however, brought $18, and there was sufficient numbers to cause any decl Quality was decidedly poor, but in there was a lack of demand. Top pr on steers for the week were $18, m on three successive days, with the l of sales ranging at $13 to $17, paratively few getting above $17. T were more of the $13 to $15 ani than usual.

Average price for the week $15.50, a drop of 25c for the week, compared with $16.40 last year, w was a record level. Receipts here the week were 69,800, an increas 16;500 over the previous week an decrease of 16,800 from last year. S ments were larger and left a net su for the packers of 43,542, an incr of nearly 13,000 for the week, and pared with 65,894 a year ago.

Receipts of Western range cattle for the week were 25,700, compared 19,400 the previous week and 24,000 year, the run being the largest of season. Prices were 25 to 50c lo Cows and heifers lost 50 to 75c. F sold at $17.50 to $18, but there were many sales above $13.50, with the r for most of the offerings $9 to Dressed cow beef was $1.50 to $2 l for the week, while steers were off to $1 and calves $1.50 to $2. Live ca however, sold better at the last, with supply moderate. The range was $ $21.50. Stockers and feeders decl 50c to $1, heavy feeders holding b than the others. The range was $ $12.50. There has been an accumula of feeders of late and the situatio not particularly healthy. The tw markets had 384,000 cattle for the w or 44,000 more than the previous w and compared with 432,800 last ye

Fat native lambs gained 50c last w with the best at $15.50 and the bul $14 to $14.75. There was also a sin gain in fat Western lambs with the $16.25 and the close 50c below mark. Average for the week was $1

75c higher than the previous week, d compared with $17.25 last year. eeding lambs sold at $13 to $14.50 and eeding ewes $12 to $13 with fancy to $14.50. Feeding sheep ranged at to $6.50 with yearlings $8 to $10.35. verage price of sheep for the week was .90, or 85c lower than the previous eek, and compared with $11.85 last ar. The range was $8 to $11. Reipts at twenty markets were 660,770, compared with 658,600 the previous eek and 501,200 last year.

Receipts of all live stock at twenty arkets so far this year aggregate 47,-),000, the largest on record, an avere of 1,277,000 head per week. The vement included cattle 10,200,000, gs 25,936,000, sheep 11,114,000.

Estimated receipts at Chicago this ek are: Cattle 77,000, hogs 85,000 eep 150,000. Arrivals last week were: ttle 89,855, hogs 102,523, sheep 141,-).

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Sept. 13.—Weakness coned to predominate in the trade in live ck this week. A noteworthy feature a general increase in receipts, but the tle movement was still behind a year . Serious shortage of stock cars is dering the movement to Kansas City, more stock would have arrived this k if railroads had been able to furnish pers in the Southwest with equipment. og trade displayed the greatest weaks, the market closing at the lowest level nore than a year and $2.50 to $2.75 per dredweight lower for the week. The tines were about the most sensational he recent extraordinary weak markets. hogs at the close were only $17.10, inst $19.50 a week ago, and the average was around $16.23 at the close against 02 a week ago. Pigs held up well y, selling along with fat hogs, but later ded sharply, closing around $16.25. To ge from the manner in which packers e been acting in the market this week, eems that further recessions in prices not improbable. A feature as a re- of the great break in prices since the part of August is the increased offer- of immature porkers. However, the that corn has also declined is checksales in many districts of the South-. Kansas, on the other hand, has only ant corn crop in prospect for maturing .

ices of cattle slumped mostly 50c to , with beef steers losing 50c to $1 and sers showed the greatest weakness. top on corn-feds was $17.85, and grassold largely between $9 and $14. Cows l between $6 and $8.50 for grass offerand a few head which had been on sold up to $11. Calves—The butcher e were mostly steady, and in instances higher. Veal calves sold as high as 0.

disappointing feature of the trade was slowness of the stocker and feeder catnarket. Large accumulations failed to from the yards, and thousands of e were shipped to other markets in an avor to find outlets. Stocker and er steers were mainly between $8 and Bearish talk as to prices seems to be cing buying by prospective finishers. enormous losses on grass cattle ed in Kansas and Oklahoma are bearnfluences in the stocker and feeder .

the first part of the week demand for sent prices up, the market gaining uch as $1, but later practically all of gain was lost. Western lambs sold $16 and closed around $15. Feeding breeding stock sold mostly at steady s, but closed with a weak tone.

t. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

tional Stock Yards, Sept. 13.—The receipts at this season of the year always liberal and while the correting week last year was somewhat er than the week just ending this yet we show a big increase over last and the prospects are for a cond good run if the bad break in prices ave just experienced does not check . There are no choice cattle arrivt all and we are therefore unable to the market on this grade. If strictly , they probably would not be far steady. The best cattle we are re- are only fair in quality, and in this the market shows a decline for the of around 50c. Plain and common , of which there is a superabundance n steers and in butcher stock, are off dollar for the week and in spots the e is even greater. There was no imment on westerns, the decline in this being 75c to $1, with the exception me good heavyweight Oklahomas graded up with the best we had the period. There is a great dejust now for good vealers and the on these advanced steadily up to niddle of the week when $21, the t's record on veal calves, was paid. do not quite reach this figure now e still high.

hog market this week experienced of the sharpest fluctuations that has ed in years. The market declined steadily from the close of last week up to Thursday, at which time it was $3.15 per hundred lower than the close of the preceding week. On Friday it took a sharp upturn and during the day advanced $1.25. At this writing it is still advancing and closes the week $1.50 to $1.85 lower than the preceding week. The receipts are light and the quality of the offerings fair to good. The closing quotations are: Mixed and butchers, $16.25@18.25; good heavies, $16.75@17.75; rough, $13.75@14.50; light, $17.25@18.25; pigs, $12.75@16.75; bulk, $17@18.

A bearish sentiment obtains in the sheep house. The market is off around 50c under the close of last week. Nothing real choice is being offered either in aged stock or lambs. The only steady prices quoted in the sheep house are on best breeding ewes. They are still in keen demand, particularly the black-faced kind.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Sept. 13.—Cattle receipts this week have not been any too liberal. As usual at this time of the year, good cattle were given all the preference and general reports carried a steady market on this class, while on the rank and file declines were popular. Despite the scarcity of steers they are about 15c lower for the week. The majority of steers have been common to fair with $10.50 top for several loads averaging aoround 1,075 pounds. Quite a few loads averaging between 1,000 to 1,050 pounds sold from $10 to $10.50. Common grades, $9.25 and $10.50.

The butcher market has been on the decline this week. Between $7@7.50 buyers secured several loads and bunches of pretty smooth grass fat matrons and heifers, while plain cows again notched $6@6.75. She stuff was considered about 50c lower for the close of the week. Calves have shown a marked advance, the market being fully $2 higher compared with the close of last week with a few bunches of light calves selling up to 15c. The general top on good calves, carload lots, is $14@15. A very strong demand for calves exists and the supplies have not been equal to the requirements. All kinds of bulls have been selling at fairly steady prices. With feeders selling around $9@9.75 pretty good cattle that were caked last winter doing around $10 made finishers sweat in their boots. It takes strictly good beef cows to bring over $8 and $8.25 and $8.50 tops the best. While stockers were going at pretty good prices during the week, a slump was noticeable towards the close and were called 25c lower for the week.

The reason for the decline in the hog market is being laid to the absence of European demand of any consequence. Receipts were better this week than they have been for some time, the top being $19.70 with a pretty fair quality.

Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

Omaha, Sept. 13.—Cattle receipts of 58,500 head this week are within 3,000 of the heaviest run of the season two weeks ago. The continued heavy runs resulted on declines in practically all classes of cattle. Cornfeds were scarce here but in sympathy with declines elsewhere, especially at Chicago. Prices broke 50c or more on everything except choice to prime yearlings, which held fully steady. A lot of fair to medium natives are coming, and bulk of the offerings sell from $15 down. Choice to prime heavy and handy weights go as high as $16@17.50, and an extreme top of $18.50 was made on fancy yearlings. Butcher stock broke unevenly. Best cows and heifers closed 25@50c lower, with medium grades 50c@$1 lower and canners 25c lower. Canners and cutters are selling at $5.25@6.50; fair to good cows at $7@8; good to choice at $8@9.50, and a few prime heavy grass cows at $10@11. Bulls at $5.50@8, and calves at $7@14 are steady. So little good to choice western beef is coming that prices hold about steady. Medium to common steers make up the bulk of the supply, and they broke another 25@50c this week. Good to prime sell at $11@15.25, fair to good at $8.50@10.50, and common to fair on down.

Uncertainty as to the future acted as a check on feeder buying at prices that were in force and prices dropped 50c@$1 during the week. Outward movement continues heavy, however, over 25,000 being shipped from here this week. Good to prime feeders bring $10@13.50, but only a few of the best heavy lots go above $12.

Heavy hog receipts and declining provision prices brought another big slump in hog values this week. Receipts here were only fair at 25,707 head, but other points were oversupplied. Thursday, the low day of the week, prices were $2@2.50 under last week's close, and the lowest they had been since July, 1917. There was some reaction yesterday and today and current prices are not more than $1.75 below last Saturday. Bulk sold today at $15.50@16.50, with a top of $16.75.

Sheep supplies grow heavier with each succeeding week. A new season's high mark was hung up this week when over 212,000 sheep and lambs were received. As the season advances the percentage of killing stock grows steadily smaller and fat lambs worked higher again this week. At midweek the high point best sold up to $15.65, fully 50c higher than last week, but there was some reaction on the close, and current prices are at the outside no more than a quarter above a week ago. Fair to choice fat lambs are bringing $14.25@15.25. Old sheep are steady with a week ago. Yearlings are selling at $9.50@10.25, wethers at $8.75@9.50 and ewes at $6.75@8. Under pressure of extremely heavy supplies feeders worked lower again, the decline amounting to 50@75c for the week. Medium to best feeding lambs are now being bought at $12@13.25.

Ft. Worth Live Stock Market.

T. O. Walker, Correspondent.

Ft. Worth, Tex., Sept. 13.—Light receipts in the cattle division have been the rule for the past week, about the same volume of arrivals as for the preceding week in the matter of grown cattle, but a 50 per cent gain in arrivals of calves. Figures show arrivals of grown cattle to be 14,034, calves 9,630.

Week's beef steer supply has been very light, only about 40 loads arriving, and these mostly from native territory. The steer market opened Monday slow to a quarter lower, and lost another quarter by Wednesday. After that nothing came in to test the trade. During the week natives of 1,000 pounds made $10.50 and $10 flat was paid for southern cattle of 1,200 weight.

Stocker steers, if of light weight, have been in fair demand, but strong weights have been handed over to the butchers at the decline. Range owners are taking quite a few heifers and young cows, both natives and southerns, along with thin heavy calves, but are insisting upon blood lines.

All butcher stock closed the week 50 to 75 cents down from the close of last week. Outsiders made the market for the first two days of the week; after that, declines followed. Cows that made up to $8.85 during the competitive time of the week had to sell at $8@8.25 at the close.

Calves advanced early in the week, but closed $2 worse than at the high time. Choice vealers were slow at $12@12.25 at the close.

Receipts of hogs show a gain of around 1,000 for the week, but the market discovers a loss of a flat $2. The Friday top on light butchers was $17.50; bulk $15.50@16.50. Daily receipts of less than 600 show that the hog crop of Texas is virtually exhausted, while the state has a surplus of corn for the first time in ten years.

Sheep receipts have been around 4,000 for the week. Market generally steady with the decline of the previous week. Spring lambs are selling from $10.50@12.75; yearlings from $10@10.50; wethers from $8@10; goats, $6@7.25. The bulk of the present sheep trade is in stockers. Actual sales: Breeding ewes, $11@12; wethers and yearlings, $10@12; lambs, $12.75.

Canadian Livestock.

Montreal, Sept. 13.—There was a declining market in hogs last week, selects having lost $1 on the week, opening Monday with $19 paid, but closing Saturday with sales consummated at $18. Receipts were light the entire six days. Cattle trading was slow and a scarcity of good fat cattle is complained of. Best steers sold at $10@11.

Meat Exports.

The Bureau of Markets reports the following meat exports from New York for week ending:

	Week Sept. 6.	Since July 1.
Beef—		
Frozen or fresh	502,845	39,379,982
Canned and pickled	881,464	11,494,590
Lamb and mutton	678	40,665
Pork—		
Fresh or frozen	873,139	6,175,891
Bacon, hams and shoulders	9,367,888	80,578,037
Lard and lard compounds	4,295,295	77,004,941
Sausage	86,867	2,067,375
Dry salt and pkld	6,703,491	85,546,692
Poultry and game	195	589,586

During this period there were exported 25 mules to the West Indies.

Stock Yards at Moose Jaw.

Good progress is reported in the construction of the new co-operative stock yards at Moose Jaw, Sask., for which the Government grant or bonus will amount to one-third of the entire amount expended on construction. Excellent provisions are being made for stock growers and shippers, as well as fine office accommodation for commission firms and others who establish offices at the yards. In response to numerous requests from stock raisers of the district, a modern and complete dipping vat has been added to the original plans.

Exports of grain from the port of Galveston during August as reported by H. A. Wickstrom, chief inspector of the Galveston Cotton Exchange and Board of Trade, were 2,110,892 bus. of wheat as compared to same month in 1918 with a total of 3,565,292 for the 1919 season July 1-Aug. 31 compared to similar period in 1918. There were also exported during August 140,000 bus. of barley.

USINESS AND TRADE CONDITIONS

HE strike put in motion on Monday by the steel workers is a strike for leader power; not for the workmen's benefit. Working conditions in eel trade, as ordered by the Steel Corporation, ich of necessity all independent operators must m, are as tolerable as the conditions of such acture allow. The intensity of physical labor en mitigated by the use of machinery of the t efficiency which American inventive genius en able to produce and unlimited capital to e. It has been developed to reduce both the f production, on the one hand, and the cost of hrough accidents on the other; and this is say- thing of the humane desires of the operators re men wise enough to recognize the com- l value of good working conditions to make rk of their employes as little exhausting as ly possible. The safety of the men is guarded ry way, and care is taken of those injured by its, which is supplementary to what the law bes. The pay is large and has been volun- increased in five years to nearly if not quite that of 1914 and is beyond comparison higher ver before in the history of the metals in- in spite of the fact that since 1914 the aver- tput of steel per man in tonnage has steadily

hyperbole of Fitzpatrick of Illinois, who seems managing this disruption of the industry, may re be taken *cum grano salis.* The "awful ons," the "grievances" and "murders," are ary; at least, specifications are wholly lacking, because there are in fact few or none, or be- s usual Mr. Fitzpatrick ignores the fact that nomentous an affair the public might safely n into the workmen's confidence as to causes. signed causes, twelve in number, contain in thing that it has not been the policy of the tion to provide, except the right of the union to command the industry and its operation ns of the "closed shop.'" As to this Judge n his open letter of Sept. 15 in part said: not combat labor unions as such. We do otiate with labor unions, because it would the closing of our shops against non-union nd large numbers of our workmen are not s of unions and do not care to be.

principle of the open shop is vital to the industrial progress and prosperity. It is of enefit to employer and employe. It means ery man engages in any line of employment selects, and under such terms as he and the r may agree upon; that he may arrange for l and character of work which he believes will him the largest compensation and the most ory conditions, depending upon his own nd disposition.

'closed shop' means that no man can obtain ent in that shop except through and on the nd conditions imposed by the labor unions. nd sometimes, by the dictum of the union n man is 'called out' and prevented from for days or weeks, although he has no real e, and he and his family are suffering for the necessities of life."

been well said that, "The assertion that the as ordered to enforce the right of collective ng does not carry conviction." For many e workers have had their shop unions, which ers now demand shall be abolished, and they seem to have been well content with the fruits of the kind of bargaining they now enjoy. In fact, many unusual circumstances in this effort of the outside unions tend to create the impression that here, as in so many other trades, the radical element, the agitators for industrial revolution, have usurped the functions of the former leaders and are responsible for this strike movement.

The one great fact, however, which transcends all others involved in this controversy, is stated by Judge Gary as follows: "This country will not stand for the 'closed shop.' It cannot afford it. In the light of experience, we know it would signify decreased production, increased cost of living and initiative, development and enterprise dwarfed. It would be the beginning of industrial decay and an injustice to the workers themselves, who prosper only when industry succeeds."

Much as has been said and written on the present "state of the Nation," little has been said where it has been heard, or printed where it can be read, by the great mass of the people of the danger that portends in union control of labor and labor's output. All wise and humane men have recognized and still recognize the service to society which has been rendered by the labor unions in the past two generations, in rescuing labor from its exploiters and raising the quality of living. But labor in these days has to a lamentable extent fallen under the spell of the demagogues, who with a few stock phrases interminably played upon, have done much to make many working men slackers, untrue, dishonest to themselves, dishonest to their employers, dishonest to society as a whole. Nothing but evil can happen to the world and to those who compose it when men are fools enough to say or to think: "Why should I work to make the world safe and pleasant for other men?" Yet that is exactly the animating and directing spirit which pervades every union leader of today, from Mr. Gompers down—"don't work your fellow man out of a job—make work for him by doing less yourself," forgetting that though they may drag all classes down to one level it is on themselves that the worst evils will fall; forgetful of the stubborn and unalterable fact, that no matter how great may be wages, expressed in dollars, no matter how short the hours, no matter how pleasing working conditions, with "music and love and flowers," in order to get a good share and a large share of anything there must be plenty of the desired object for division, and that only labor of hand and brains can produce the things desired.

The hideous cloud that overshadows Europe, that is approaching apparently like an eclipse the British Isles, and may pass over our own country, is the fact that Europe is not at work. The people are beginning to lose the capacity for work. The sentimentalists, maudling about "democracy" and the "rights of labor," pouring forth an endless froth of words, and approving and encouraging endless strikes and idleness, wholly fail to see that the only thing that can save the world from the fate of Europe in the ninth century, when famine and plague broke down the civilization of the time, when people starved where once were great cities, and where grievance and squalor held men in their awful bonds, is work. Industrial lethargy is everywhere apparent, respect for law and the public order is breaking down; individual initiative, which in the past saved the world, is being at once discouraged and forbidden by labor leaders who are doing everything in their power at once to defeat the ends of labor, which is ceaseless production, and to bring on the scarcity and dearness which cause distress and famine—to destroy that cheapness and abundance which it is the function of work to bestow upon the world. The closed shop is the direct and quickest way to such a calamity. But it means great power in the hands of a few men who, as we see at this hour rank themselves as greater than the Government itself, which they do not hesitate to defy in deed if not in word. It is not labor but labor's leaders who are setting the world on fire again and making more and more difficult the retention of that standard of living which had steadily moved to a higher and still higher line of material comfort and culture until the world war with its economic fallacies swept away men's perceptions of the ways and means to right living.

The business interests have been disposed somewhat to make light of the steel strike, in view of the allegation that at least until very recently only a small fraction of the men really belonged to the unions represented by Mr. Fitzpatrick and the Federation of Labor. The strike can, however, hardly fail to create more or less disorder in general business. Iron and steel are the basic metals. There are no substitutes; and the reduced production which a strike of even 15 per cent of the whole number employed by the Steel Corporation would mean, must seriously affect other industries whose needs have not been as fully supplied nor as rapidly as needed. It is therefore a strike not merely against the Steel Corporation but against the country's activities. It is moreover a strike at the supremacy of the American steel producer in the world's solvent markets, where the war and its blight upon the English and German iron and steel industry had given the Americans a commanding position. Mr. Hoover was no doubt accurate in saying that in Europe "Socialism is bankruptcy itself"; but that is only because it has carried to the extreme the economic fallacy which the Federation of Labor is officially putting into practice to a lesser degree in this country at this moment: consumption unlimited, production limited.

In spite of strikes and rumors of strikes, general merchandising conditions continue good. The retail trade is brisk and tradesmen's failures are few. The shortage of cars for moving Western grain, wheat in particular in the Southwest, is checking the upward swing of bank deposits and in the Southwest liquidation of loans is retarded owing to that fact. Money in the whole of the West is easy and cattlemen would find accommodations easy enough were they disposed to branch out as usual, but between the activities of the Trade Commission and radical members of the Congress feeding operations are rather light. The demand for money "to buy farms to raise corn, to buy more land to raise more corn" is surprisingly active and farms in the West are changing hands at sensational prices. Cotton consumption returns showed a decrease for August of 31,000 bales as compared with 1918 and 67,000 as in 1917, and 6,000 under July, 1919; exports in August were also under those of July by 55,000 bales. Dun's food price index number for the first time since the Government's raid on high prices began, showed last week a slight decline, although of 69 changes 35 were advances. Generally the commercial world continues to look at the brighter side.

Although the Railroad Administration claims to be putting 834 new freight cars into service daily we could be fully clothed in paper attire should we evolve a suit from the clippings received entitled,

Car Shortage—Elevators Full—Dumping Wheat—Mills Closing Down for Lack of Wheat, etc., etc.

NOW AFTER ASSOCIATIONS

THE latest proposal of the Federal Trade Commission is an extension of the provisions of the Clayton act to bring trade associations under the jurisdiction of the Commission, with power to "investigate methods followed by organizations which represent business interests." Victor Murdock, of the Commission, who makes this proposal, suggests a limitation of the associations subject to investigation to those representing "big business" only—the American Steel Institute, Institute of American Meat Packers and "others of the like," which he said "influence trade prices"; but there would probably in practice be no such limitation.

After the exhibition of the investigating capacity and the animus of the Commission in the packers' case, business men will not very kindly welcome any further enlargement of the Commission's legal authority to investigate associations *ex parte* and publish conclusions which represent the Commission's opinions only and are not a judicious finding. Nor would there be any assurance that general trade associations like those of grain and hay and seed dealers, would not sooner or later be made subject to the same kind of investigation by men who, having no technical knowledge of the trades and industries investigated, are not competent to pass upon the real nature of their activities. We know of none of the associations named which would not willingly submit all the facts of their organization and operation to any competent tribunal for examination; but when even judges of high rank find it necessary to submit technical questions to masters to take expert testimony to establish the character and legitimacy of trade customs which laymen do not understand and usually misinterpret, what show would a *bona fide* trade organization have at the hands of the nameless clerks and the briefless lawyers who infest the Trade Commission's investigating corps?

COST OF ADVERTISING

IN the course of his testimony on the K. & K. bills before the Agricultural Committee of the Senate, L. H. D. Weld, of Swift & Co.'s publicity department, was asked by a senator if the large sum mentioned as spent by Swift & Co. for advertising did not add to the cost of the products, to be paid by the consumer. It is, like all costs, paid by the consumer, of course, but the sum named was, Mr. Weld said, so minute a percentage of the selling price per unit that it could not be estimated by the consumer, much less passed on to him specifically.

There is a wide misconception as to the "cost of advertising" which the consumer must pay. The Federal Trade Commission, nearly all reformers of marketing systems or methods, most women out to summarily reduce the cost of living by agitation, all that type of people who jump at conclusions, men who like Senator Capper of Kansas who (as he said of the official attacks on the packers) although "there probably is no proof" still "cannot but believe" and stand ready to condemn without proof—all such people are convinced that the cost of advertising adds greatly to the cost of living.

The belief is not justified by the facts, to the extent at least that advertising adds any appreciable amount to the selling price. On the contrary, the generous advertising is the harbinger of plenty, that for which mankind has prayed since the beginning of recorded time. His prices therefore are always as low as the nature of the product admits. Nature depends upon demand. The greater and the more permanent the demand, the greater will be the effort made to meet that demand with abundant and regular supplies. Demand therefore has a creative power to call forth supplies as it goes along.

The sanction for advertising is that it creates demand. All large advertisers are large producers, because their own advertising forces them to that condition. As production increases prices decline; the greater the production the less is the "overhead," and the consumer gets the benefit. That is the whole secret; advertising creates demand; demand creates supply; the greater the supply the less the cost per unit. No business illustrates this cycle of facts better than the packers', whose enormous output meets a demand that is at once inevitable and unceasing, but which by advertising can be directed along definite channels without in any appreciable degree adding to the cost of production that can be added to the selling price per unit. The same is true of soaps, gum, and innumerable other commodities widely advertised: the supply created by the demand caused by advertising reduces and does not add to the cost of the article itself.

Service advertising is of the same nature. All miscellaneous advertising in trade papers is of the nature of demand creators. It is not enough to be able to offer valuable services—the public must be made to know that the service is obtainable. Merely producing a good—an indispensable—thing is not enough, even though it is produced cheaply, unless demand is set going by stimulating and educating advertising—the creation of a new want or the showing how an old unsatisfied want is filled by a new device or method.

FIRE PREVENTION DAY

OCT. 9, 1919, the 48th anniversary of the great Chicago fire disaster, will be observed as fire prevention day, and the Fire and Accident Prevention Committee of the Chicago Association of Commerce is making a campaign to impress upon the public the great importance of this movement.

Every little while THE PRICE CURRENT-GRAIN REPORTER makes a campaign in its reading columns to impress upon the grain elevator men of the country the importance of fire prevention, urging cleanliness around the plant, the removal of the cumulation of waste, rubbish, leaves, etc., keeping the elevator itself clean, the bearings of the pulleys, shafting, etc., well oiled, and now that the fall with its coming cold weather is nearly at hand and fires will be started in office stoves, the elevator man should take extra precaution to see that the flues of the stove are properly cleaned, cumulation of soot removed from the chimney and that the stove itself is so situated that should it become overheated, it will not set fire to anything near at hand. It is well at this time to inspect the entire premises with a view to removing fire hazards, see that the water barrels are filled with brine, pails conveniently located, for little fires are more easily put out than big ones. Individual care in the prevention of fire will be the means of preserving many thousands of bushels of grain.

DUST EXPLOSIONS

ONE OF the greatest hazards around the elevator is dust. Under proper conditions and with the right mixture of air, it is one of the most highly known explosives. This fact has recently been demonstrated in the destruction of the Port Colborne Elevator and more recently in the explosion at the Murray Elevator in Kansas City, and strange to say, both of these elevators were modern, concrete, fireproof structures but they did not resist the strain and stress of the terrific explosions of dust. A large terminal elevator is a dusty place at the best. Grain is constantly being received, cleaned and shipped and there is dust in the air at all times, which is continually settling and the only way to keep it removed is to remove it immediately and not let it accumulate for a week or so waiting for an opportune time for a little house-cleaning. The modern elevator today is equipped with suction fans, dust collectors and floor sweeps, and if dust explosions in the future are to be prevented, it is up to the operators to have someone make it his duty to see that the elevator is kept clean every day.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

	Sept. 20.	Sept. 13.	Sept. 2
Wheat—			
Primary receipts	15,534,000	14,604,000	18,2

THE SOUTHERN TRADE

THE South is not likely to be a heavy buy Western grain this fall and winter, a crop outlook has been such that there w ample grain, at least until well into next sprin fact, the Southeast has not been a good buy corn for some time, as the local crop has been l enough to supply the local demand. The cal hay, however, are likely to be as good as ever. is much talk of the new hays of the South, espe Natal grass, lespedeza, etc.; but freight rates the Southern to Southern points are practicall hibitive of intra-Southern movement. Natal can't be moved out of Florida, to Georgia s Georgia buys hundreds of carloads each ye alfalfa from New Mexico and Arizona and tim from the North. Southern farmers might raise their own hay but they won't; at least don't, not even enough Johnson grass, which profitable crop in Alabama and Mississippi wh is grown largely in spite of the popular belief th character as an ineradicable "pest" overshado value as a better hay than timothy.

EDITORIALETTES

STATISTICS warn us that casualties from dents each year are twice as great as su by our soldiers and sailors during the war ployers can eliminate three-fourths of the acci deaths and incapacitating injuries through ar cational campaign in this direction, in addit the installation of mechanical guards of va types. Keep everlastingly manipulating that word care—preach it, write it and post it s your employes will use care in safeguarding lives.

GRAIN grading demonstrations at county and fairs, farmers' picnics, etc., ought to be educa and are, but they don't seem to make some of farmers any more fair in their judgments.

With labor asking more and demanding a lowering in the foodstuffs there is a disposition part of farmers in some sections ce production in order to secure prices. How much the winter acreage will be affected by this the inability to finish plowing n account of the dryness of the cannot be determined. The De- nt of Agriculture has recom- that the wheat acreage for the 1920 be around 85 per cent of ar's, or about equal to the five erage, ignoring the unknown fact of yield per acre. If the cost of living is to be reduced production must be increased.

General business has not as yet felt the effect of the factors that had considerable to do with the break in grains. The low rate of exchange tends to check sales of all manufactures, and it is believed that sooner or later that general business will have to readjust itself to a lower level, or else that grains will rise materially.

The corn crop is now practically safe from frost. Much of the grain is already cut and shocked, and it is expected that picking will commence in some sections of the belt within a few weeks. The quality of the grain promises to be excellent, and so confident are the trade that this will be the case that bids for new No. 2 yellow have been made for shipment by December 15. The New England trade is showing more confidence in a maintenance of the present level of prices and has been buying rather freely for deferred shipment. Sales from Chicago so far are estimated at around 2,000,000 bu. Less is heard of the new Texas crop which was to flood the Northern markets.

Heavy weight oats are wanted in practically all sections of the country, but supplies are light. Cereal interests need them, as do shippers and desirable grades of No. 3 white are selling at a premium over the September, regarded as rather abnormal for this season of the year. The movement has been far below last year's, and supplies in all sections are also shorter so that the inability to compete with the Argentine grain in export circles is not as much a factor as some in the trade believe. Previous to the war export business in oats was extremely small, averaging less than 5,000,000 bu. per year. Supplies in sight are now nearly 5,000,000 bu. less than last year. There is more or less bullish sentiment in oats amongst conservative trades, especially those who figure that while the war is over that it is not paid for, and with wages constantly advancing they do not look for a low level of farm products for some time to come.

Conflicting reports continue to be received from abroad regarding the situation there, but were it not for the decidedly unfavorable exchange situation it is possible that considerable export business could be done in wheat, oats, rye and barley. The latter two grains are moving abroad freely. The recent loan to Germany has been reflected in a liberal quantity of rye being taken, as it is the lowest bread grain in the world. The bulk of this business is being done via Scandinavian countries. Choice northern spring wheats are very scarce, and sell at big premiums over the basic figure with seed kinds at very high figures, close to $3 having been paid in the open market for dark No. 1 northern. There is a disposition to hold back heavy weight winters as well as springs for better prices, producers taking a chance on the interest, and other factors, knowing that the basic figures can be obtained throughout the season.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	1919. Sept. 20,	1919. Sept. 13,	1918. Sept. 21,
Wheat	15,534,000	14,604,000	18,242,000
Corn	3,537,000	4,109,000	6,727,000
Oats	4,894,000	5,214,000	7,834,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	23,965,000	32,803,000
Preceding week	24,927,000	32,449,000
Since July 1	252,278,000	322,961,000

Corn futures sold at new low levels for the season on the deferred deliveries, while the September was within a few cents of the $1.26¾ made last March. Liquidation was drastic, but soon ran its course, and a rally of 9¾ @18½c followed on general covering by shorts with September showing the most strength, after having led the decline which carried it off 67½c from the high point of the season. The close was at net gains of 2⅞@13½c. The unrest of labor, agitation over the high cost of living, and other factors were regarded as overdiscounted, and the upturn was not surprising. The cash rallied with futures with a much better eastern demand. Crop reports attract little attention, and while there were light frosts in some of the more northern sections the crop is now practically safe from damage.

Oats had a range of 4⅜@4⅞c the past week, breaking early only to rally sharply and close with net gains of 1½ @2⅛c, December leading. Liquidation ran its course, and with free buying by shorts and removal of hedges against domestic shipping sales the rally was easily attained. There was no pressure of cash grain as farmers refuse to sell in volume, which more than offset the limited export call.

Winter wheats showed little change in price the past week. Millers and elevator interests took the heavy weight grain at a small premium over the basic, while the Government secured the rest. Offerings of springs were mainly of the lower grades, while choice was in keen demand with shippers and millers active buyers and prices averaged higher with $2.73 secured for fancy dark No. 1 northern. Grain fit for seed is expected to bring a big premium over the basic. Rains have fallen over a good part of the belt and plowing for the new winter wheat crop is progressing rapidly. Range of prices the past week follows:

	High.	Low.	Close Sept.20, 1919.	Close Sept.13, 1919.	Close Sept.21, 1918.
Corn—					
Sept.	$1.49	$1.30½	$1.47	$1.35½	$.....
Dec.	1.26½	1.16⅝	1.22⅜	1.19½	.....
May	1.24¾	1.15	1.20½	1.17½	.....
Oats—					
Sept.	.67¾	.63	.66¼	.64½	.72⅞
Dec.	.70½	.65⅝	.68½	.66⅜	.....
May	.72⅝	.68¼	.70¾	.69¼	.....

FROM WASHINGTON

Collective Bargaining Bill to Have Hard Sledding—Representative Foss Insists All Classes be Treated Alike—Stand by American Standards of Life

WASHINGTON, Sept. 20.—The Capper-Hersman bill legalizing collective bargaining by farmers will not get through Congress without the stiffest sort of a fight by some of the recognized leaders of the House. This was apparent in a preliminary skirmish over the issue during consideration of the deficiency appropriation bill.

The issue over collective bargaining was injected into the discussion of the appropriation bill through consideration of a proviso which has been in each appropriation bill for several years prohibiting the Attorney General from using any part of the sum allowed for anti-trust prosecutions in proceedings against organized labor or farm associations.

The House in committee of the whole struck out the proviso by a vote of 53 to 19. This was on a rising vote. Then on the following day when the bill went to the House proper and a record roll call was demanded on this amendment the proviso was put back, the vote being 203 to 28. The bill was passed in this form.

The agricultural interests have rather run away with things so far this season, the repeal of the daylight saving law over the veto of President Wilson being one example. That action and the latest vote of the House on the proviso in the appropriation bill has made the backers of the Capper-Hersman bill confident of success. But, probably because of a growing sentiment that the farmers have become a favored class and for the same reason that a reaction against organized labor is becoming manifest, there appears to be a stiffening of opposition to the collective bargaining legislation.

There has been a rallying of forces favoring the Capper-Hersman bill during the past week at a conference called by the National Board of Farm Organizations. Plans for pushing the bill and for canvassing every member of Congress were formulated. A number of members of Congress, including Senator Capper of Kansas, author of the bill, appeared before the conference and assured the assembled representatives of the farmers of their support.

The proviso as included in the deficiency bill reported from the appropriations committee and as retained in the measure passed by the House follows:

> Enforcement of anti-trust laws. For the enforcement of anti-trust laws, $200,000: Provided, however, that no part of this money shall be spent in the prosecution of any organization or individual for entering into any combination or agreement having in view the increasing of wages, shortening of hours, or bettering the conditions of labor, or for any act done in furtherance thereof, not in itself unlawful. Provided further, That no part of this appropriation shall be expended for the prosecution of producers of farm products and associations of farmers who co-operate and organize in an effort to and for the purpose to obtain and maintain a fair and reasonable price for their products.

Representative Barbour of California, who has introduced a bill somewhat similar to the Capper-Hersman bill, with a view especially to the protection of California fruit growers, provoked the discussion of the proposition by attempting to strengthen the proviso in the interest of the farmers.

He offered the following substitute to the part of the proviso relating to farm associations:

> Provided, further, That no producers of farm products or associations of farms or organizations, corporate or otherwise, of farmers and others who organize and cooperate in an effort to and for the purpose to prepare for market and market and obtain and maintain a fair price for their products or the products of the members of any such association or organization.

Representative Good, who as chairman of the appropriations committee, is one of the most influential men in the House, himself a representative of an agricultural district, but opposing the exempting any particular class, quoted President Wilson's disapproval of this proviso in a message accompanying the signing of an appropriation bill in 1913.

"I represent almost wholly an agricultural district," said Mr. Good. "Never have I up to this time had a farmer or a representative of a farmer say to me that he was doing anything that was questionable under the anti-trust law or that he had been accused of doing such a thing. His acts had never been questioned in that regard and no one has ever asked me to support this provision. I do not know where this whole legislation came from in regard to the farmer, but when I read that provision I almost had to hang my head in shame to think that this Congress or that any Congress had placed on the statute books a law that prevented the prosecution of a crime."

Former Speaker Cannon of Illinois had this to say: "Because a man, an American citizen, works in a coal mine, or works in a brickyard, or works on a farm, or is a merchant, or a packer, or what not, all the laws of the United States, like the grace of God, ought to cover every citizen of the United States without discrimination or differentiation, rich and poor, great and small, alike."

Representative Foss offered the motion to strike out the proviso which was carried in committee of the whole on a rising vote after an extended discussion. In support of his motion to eliminate the exemption of labor and farmers, Mr. Foss said:

"I was in the House when this discriminatory legislation was first enacted. I thought there was a good deal of virtue in the Clayton bill and was anxious to support it because of its general purpose; but I was one of the few members of Congress that voted against that bill because it wrote this particular feature in it. It defined a legal statute and then proceeded to exempt certain classes from its operation.

"I insist that the time is now here, judged by the rapid disintegrating forces against law and order throughout the world, for the American people to make an issue upon making laws that will apply to everybody alike and thereby exempt nobody.

"Opening the door to this sort of legislation invites classes of people with immunity or without it, and with impunity to state to us definitely, in the form of a demand, that if we do not do so and so we will hear from them. Our mails are bringing such demands. I am ready to make that issue at any time. It will first appear in the form of class legislation, and then it will come in a demand for new exemption, then it comes in making demands, as was done in 1916, that this Congress interfere with private contracts as to whether these men's wages shall be increased, and we in a humiliating way surrendered the Government to that demand, as we did in 1916 in the Adamson act.

"Now comes, under the threat, that additional and inevitable demand that unless we do so and so the whole transportation business of the country will be paralyzed. These men, inspired by their success in 1916, are but advancing step by step along similar lines. Following that you will have the same thing appear in the fire department; it will come in the police department, which is now threatening the capital and the city of Boston. Success in these departments and it will come in the army and then in the navy, and then you have Russian sovietism ripened into full bloom right here in America.

"I say to you the time has come for us to make the issue. I for one am ready for it. If it must come, it is best to let it come now and not attempt to play with it. I hope the members of this body will prove their heritage and will have the courage to stand by the American standards of life, whatever it may mean, and not be dictated to by any group of men whatever be their names or station, whether capitalist or laborer, manufacturer or farmer. We must stand for the public good, even though to do so invites determined opposition."

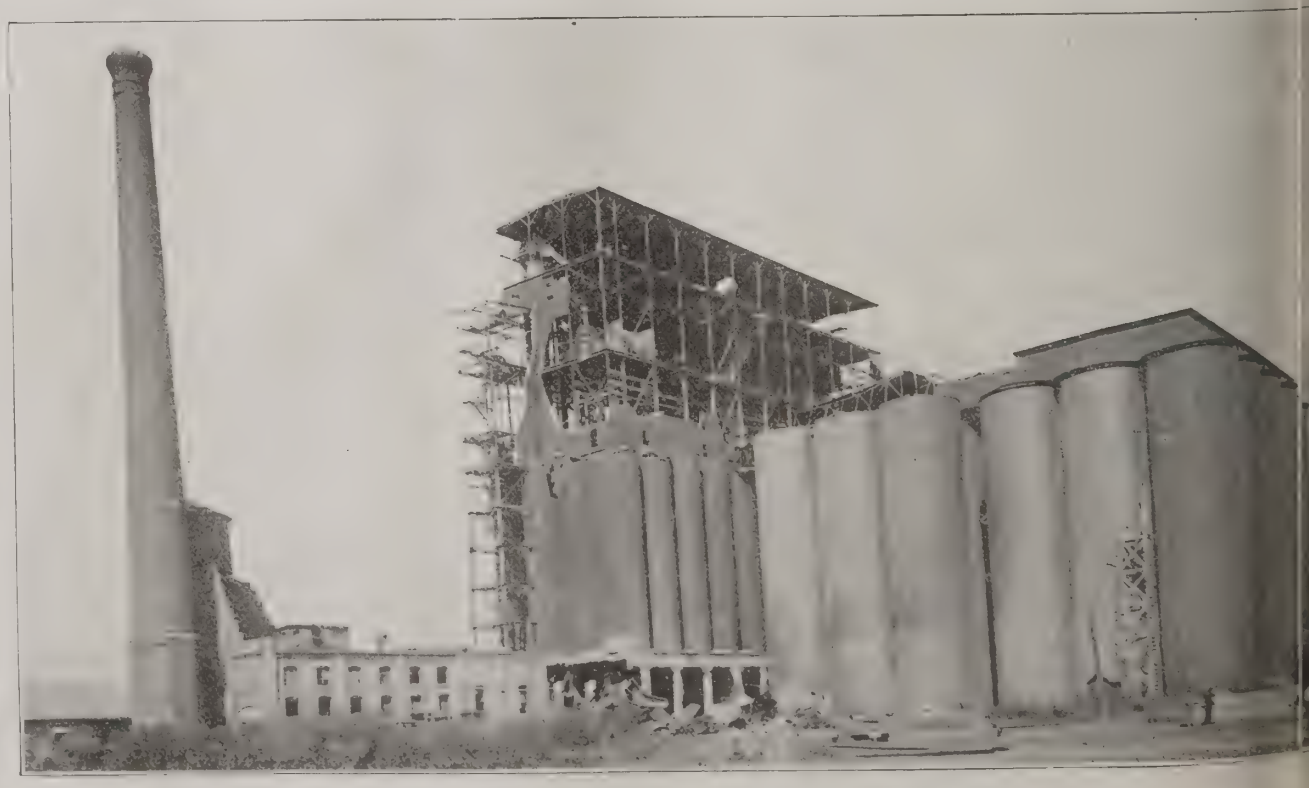
Several weeks probably will elapse before the controversy over legislation to provide for Government regulation of the packing industry again becomes acute. The Senate Committee on Agriculture does not intend to resume its hearings until the peace treaty is out of the way.

An alarming shortage of grain and seeds in soviet Russia is indicated in a report on economic conditions there forwarded to the Department of Commerce by Commercial Attache Normal L. Anderson at Copenhagen.

The bill amending the war-time food control act in the manner desired by the Attorney General to aid him in the crusade against the high cost of living is in the hands of conference committees of the two houses. The chief difference in the measure as passed by the Senate from its form as it originated in the House is a provision aimed at rent profiteers in the District of Columbia. The main features of the measure, on which there is no disagreen are extension of its scope to inc wearing apparel, and containers foods, feeds and fertilizers, and add of a penalty for profiteering. Its also is to eliminate the exemptio small retailers which is in the pre act. The bill does not attempt t tend control beyond the proclama of peace, other legislation pendin fore the Judiciary Committee of House having to do with extensio wartime control.

ORIGIN OF BLAST REMAIN MYSTERY.

Additional deaths resulting from terrible explosion and fire at the Mu elevator, Kansas City, September have brought the number of fata up to fourteen.



The origin of the blast remai mystery, a Jackson county coro jury having declared on Friday, hearing testimony of federal inspec elevator employes and members o Federal Grain Co., that "The cau the explosion is to this jury unkn

SITUATION IN ENGLAND

Grain Prices and Flour Subsidy In England —British Increase Price of Bread 1c Per Loaf—Fix Prices for 1919 Grain.

BY JACK BROOKS.

They have just settled their flour question in England. Since choice laid between either an increase in the $250,000,000 flour subsidy or an increase in bread prices to the consumer, the latter course was adopted. The British Treasury wishes to decrease if possible, not increase, the subsidy on flour, and so another cent was placed on the 4-pound loaf to the consumer, making it 19 cents in all. The Food Ministry says the shortage of flour has not entered into the matter at all. It is purely a matter of increased labor costs, an advance in bakers' wages having been granted by the Court of Arbitration. The only possible alternative to the continuance of the $250,000,000 subsidy which has received the consideration of the responsible officials, is a strict rationing of bread. A system of rationing in regard to the government flour supplied to bakers for subsidized bread, might, it is believed, be put into effect with more or less satisfactory results. This system would leave the bakers free to make bread outside the rationing system from the more expensive flour which could be purchased by private contract, did any care to do so.

The government has agreed on its prices for the 1919 grain crops which are guaranteed as follows:

Wheat, per quarter of 480 lbs	$17.97
Barley, per quarter of 400 lbs	15.37
Oats, per quarter of 312 lbs	10.52
Rye, per quarter of 480 lbs	17.97

Millers can buy home-grown (British) wheat of the 1919 harvest on average prices of $17.97 per quarter of 480 pounds. The market will be free and each sample of wheat will be bought on its merits. Should the milling value of the grain be above the average it will be worth more than the $17.97 per quarter. Inferior quality, or grain out of condition, will be saleable only at prices below the average.

The British government serves notice that every seller of wheat will have to make the best terms he can, under the ordinary pre-war conditions of a free market. For instance, he will not have the privilege of calling upon a miller to buy at $17.97 or at any other price.

The government is prepared for any eventuality in the way of falling prices, and will meet this particular emergency with a proviso of the Corn Production Act of 1917, whereby is involved payment to growers of grain of any difference between "average prices" and the guaranteed prices set out above. It is believed (so far as can at present be ascertained) that the average prices obtained by growers for barley, oats and rye of the 1919 harvest will exceed the prices guaranteed by the government.

In order to arrive at a calculation in fixing the difference between average and guaranteed prices (should there be a difference) the following yields per acre are assumed: Wheat, four quarters; barley, four quarters; oats, five quarters; rye, three and a half quarters.

Payment will be made in respect of the whole acreage of wheat, four-fifths of the acreage of barley and two-thirds of the acreage of oats. Only that average of rye harvested for grain will be reckoned on this basis. Thus: the payment for each acre of grain will be calculated as follows:

Wheat: Four times the difference between the average and the guaranteed price.

Barley: Four times four-fifths of the difference between the average and the guaranteed price.

Oats: Five times two-thirds of the difference between the average and the guaranteed price.

Rye: Three and a half times the difference between the average and the guaranteed price.

It is interesting to note the present grain prices of Britain as compared with prices of the last six or seven years. In the corn returns for the week ended August 30th, this year, one finds the following quantities of grain sold and the prices:

Wheat	13,150 qrs.	4 bus.	$18.31
Barley	6,172 qrs.	6 bus.	21.64
Oats	10,549 qrs.	3 bus.	15.45

For the corresponding week in each of the years from 1912 to 1918 the following quantities of grain were sold and prices obtained:

Year.	Wheat Qrs.	Wheat Bus.	Barley Qrs.	Barley Bus.	Oats Qrs.	Oats Bus.	Wheat.	Barley.	Oats.
1912	21,855	5	2,339	6	4,635	0	$ 8.77	$ 7.43	$ 5.41
1913	65,025	0	23,858	2	18,078	0	7.97	7.42	4.41
1914	81,937	0	42,361	0	57,716	0	9.10	7.62	5.93
1915	40,115	5	10,953	0	17,490	0	11.31	9.52	6.70
1916	50,635	0	3,283	5	9,693	4	14.83	12.10	7.69
1917	12,063	4	2,062	5	2,343	3	18.02	15.08	12.25
1918	2,754	1	1,856	4	5,154	5	18.66	15.02	14.47

Grain growers now are declaring that, during the war, they subsidized corn, meat, wool and hay by selling, under government control, their produce at less than the government had to pay in the markets of the world. They say that the maximum price for British oats varied from $11.75 to $13 per quarter, while the price of light, poor quality imported oats was from $15.50 to $16.25. British hay, they charge, was commandeered at $40 the ton while cottoncake cost from $80 to $100 per ton. Thus the intrinsic value of hay is $60 per ton while cottoncake is worth $80, taking the food units as standard of value. During the war, these men say, the public was at the mercy of the grain dealing community and the seed and livestock dealers. And what was the result? Was the public exploited by the agriculturists as they were by the coal miners and similar classes of profiteers—both capitalists and labor. The grain growers say emphatically—no! They further contend that on the strength of the government's promises they put their backs into things and increased their output and now the Prime Minister's promise has been already forgotten and things have been allowed to fall back into the slough of despond as existed before the war. Since the Corn Production Act was passed the cost of production has risen enormously—that of labor alone being 80 per cent—while the prices of produce have risen by only a small degree in comparison, they say.

World's Record Pole Vault.

The position of weighmaster and custodian of the Chicago Board of Trade is one that requires tact, push and firmness. These qualities are all embodied in the present incumbent, H. A. Foss, who is to be congratulated on the achievement recently accomplished by his son, Frank Foss, a former Cornell University athlete, who recently established a world's record by pole vaulting 15 feet, 3 9/16 inches. This event happened in connection with the 10th annual track and field games of Sears, Roebuck & Co., at Homan Athletic Field, Chicago. Mr. Foss has always worn the smile that would not come off and surely no one will envy him if the smile is bigger and broader than ever because he has reason to be proud of this feat accomplished by his son Frank.

JULIUS H. BARNES HONORED.

Julius H. Barnes, United States Wheat Director, received the decoration of an Officier in the Legion d'Honneur, at a luncheon given in his honor by the French High Commission at the Mid-Day Club, Sept. 15, in New York City. Among those present at the luncheon were M. Casanave, Director-General of the French High Commission; Controller Johannet, Intendant Dietrich, Captain Jean Goldschmidt and Secretary General Mavau.

Grain Corporation Weekly Report.

The United States Grain Corporation covering the wheat and wheat flour movement throughout the United States for the week ending Sept. 5, 1919, in comparison with the figures for the same period a year ago, shows the following:

Wheat—	1919.	1918.
Rects. from farms, bu.	35,941,000	34,394,000
Rects. prev. wek.	40,675,000	32,270,000
Rects. June 27-Sept. 5	365,664,000	310,445,000
Flour—		
Prod'd during wk., bbl.	2,976,000	2,674,000
Produced prev. wk., bbl.	2,904,000	2,131,000
Prod'd June 27-Sept. 5.	22,254,000	19,241,000
Totals—		
Stocks wheat, all elevators and mills, bu.	239,883,000	176,222,000
Previous week, bu.	214,838,000	160,412,000
Change for week, bu.	*25,045,000	*15,810,000

*Increase.

The use of double deck auto trucks for hauling live stock to Omaha is meeting with success and farmers state that the tonnage hauled had been almost doubled and considerable time saved by reducing the number of trips to market. The trucks are being used also to haul feeder sheep from Omaha to grazing districts.

THE WORLD'S RECORD POLE VAULT.

The Letter Box

Sold Out.

Price Current-Grain Reporter: I have sold my elevator to L. C. Titus.—*R. G. Calvert. Selma, Ohio.*

Moved Home.

Price Current-Grain Reporter: We have returned to New Castle, Pa., and will operate under the old firm name of The Hamilton Co. We are members of the Grain Dealers' National Association. —*The Hamilton Co., New Castle, Pa.*

Wants to Buy Mill.

Price Current-Grain Reporter: We want to buy the very best 50-bbl. flour mill and all equipment. We have our own elevator and receiving separator.—*Medical Lake Grain & Milling Co., Inc., Medical Lake, Wash.*

Brings Results

Price Current-Grain Reporter: Enclosed find check covering advertising in your good paper. This "ad" has brought wonderful results and we can only speak very highly of the circulation and trade this paper goes to.—*Wickens Grain Co., Inc., Lansing, Mich.*

Out of Business.

Price Current-Grain Reporter: The Richardson Hay & Grain Co. failed last February and I was appointed receiver so you will please discontinue your paper as there is no one here to receive it.—*E. P. Wharton, Receiver, Greensboro, N. C.*

Dissolved Partnership.

Price Current-Grain Reporter: You are hereby notified that W. H. Bartz and L. N. Hart, in a partnership doing business under the firm name of Mid West Consumers Grain Co., Des Moines, Ia., intend to dissolve, effective Sept. 23, W. H. Bartz selling his interest in said partnership to L. N. Hart.—*Per L. N. Hart and W. H. Bartz, Des Moines, Ia.*

Likes Business and Trade Conditions.

Price Current-Grain Reporter: In reference to your editorial, Business and Trade Conditions, I have shown this article to several of our local business men and believe if papers generally took the same stand, conditions would be much better understood.—*F. J. Smith, Pickford, Mich.*

ANOTHER WARNING.

Howard B. Jackson, second vice-president, United States Grain Corporation, Chicago, has issued under date Sept. 19, Bulletin No. 86 to all mills and elevators in zone No. 2 urging that extreme care should be exercised to prevent grain dust explosions in grain elevators and mills by reason of the terrible catastrophe at Kansas City, Mo., Saturday afternoon, Sept. 13, with its appalling loss of life and property.

The Department of Agriculture and the United States Grain Corporation have jointly been conducting an active campaign to cover this entire field in the interest of safety of life and conservation of grain and flour storage.

All that is necessary at this time is to point to this explosion, one of the most disastrous of its kind occurring in America. This awful elevator calamity gives more emphasis to the necessity for unusual care and attention to the conditions prevailing in all elevators and mills than any statement that could be made.

It is a duty owed to the individuals identified with the operations of elevators, their families and the public to make the work as safe as possible and remove every hazard that attends it.

Renew every precaution against grain dust explosions. Make the cleanliness of the plant your first business. After it is clean and in proper condition, see that it is kept so.

A NEW MICHIGAN CONCERN.

The last few years have seen a number of consolidations and expansions among Michigan trade in the handling of grain, beans and hay, which have developed strong, the firms doing a large and successful business. One of the recent consolidations is the acquisition of the business and property of the Michigan Bean Co. of Port Huron by the newly organized firm of Chamberlain-Holmes-Jeffords Co., which is capitalized for $125,000 with the following officers: President, A. L. Chamberlain, Port Huron; vice-president, E. C. Holmes, Marlette; treasurer, Howard J. Jeffords; secretary, Wm. J. Taylor. The above named officers, together with F. E. McGunagle of Marlette and Lloyd Wolf of Sandusky, comprise the board of directors.

The new firm will continue the lines handled by the Michigan Bean Co. only on a more extensive scale and also do a hay jobbing business. The history of the coming of the Michigan Bean Co. to Port Huron is of unusual interest. In July, 1915, A. L. Reidel of Minden City and A. L. Chamberlain, Sandusky, came to Port Huron and together with Gus Hill organized the Producers Elevator Co. They took over the old office, warehouse and dock. This property had for several years been lying idle and was in bad repair, but these men with business foresight proceeded to build up a creditable business, improving the property, and in a short time were employing 100 bean pickers. By December of the same year the business had expanded to such an extent that new capital was interested and more elevators were purchased and at this time the Michigan Bean Co. was incorporated.

During the war the company offered its plant, warehouse and facilities to the Government and thousands of tons of Michigan beans were passed through the warehouse and were inspected by A. L. Chamberlain, who was appointed by the U. S. Grain Corporation as representative to handle the Michigan purchases.

We show in the engraving herewith the present plant of this concern.

IOWA CROP CONDITIONS.

The Iowa *Weather-Crop Bulletin* for the week ending Sept. 16 says there were light frosts on the lowlands in the vicinity of Grundy Center and Iowa Falls Sept. 12. The drouth is becoming serious in the central and southern districts and wells are failing, stock water is scarce and pastures are dried up.

Corn has dried rapidly. Silo filling and fodder shocking are nearing completion in the north. Late corn that did not reach the denting stage before the drouth set in three weeks ago has deteriorated appreciably. Considerable corn that was reported in good condition has matured and dried too rapidly so that it will be loose on the cob.

Winter wheat seeding and fall plowing have been almost impossible in the southern two-thirds of the state, due to the hard, dry condition of the soil.

Farm Congress and Soil Products Exposition.

The International Farm Congress and the International Soil Products Exposition, which opens in Convention Hall, Kansas City, this week, are expected to draw the usual large attendance, which is 5,000 persons. Among the speakers at the Congress will be Franklin K. Lane, secretary of the interior; Julius H. Barnes, president of the United States Grain Corporation; Governor Henry J. Allen, of Kansas; Dr. He J. Waters; Senator William S. Keny Dr. W. M. Jardine, of the Kansas A cultural College; W. A. Dunning, m ister of agriculture, Saskatchew Canada; J. S. Wannamaker, presid of the American Cotton Associati and John Barrett, director general the Pan-American Union.

Two main divisions will be requi for the Government exhibit in the products show. There will be dem strations of road building and gr grading. E. L. Morris, federal gr supervisor for the southwestern trict, has been authorized to accept pointment as a judge of the grain hibits.

During the convention and exposit the crop reporters of Missouri, ab 1,300, will hold their second annual ference in Kansas City. The date the meeting is September 25, and Jev Mayes, secretary of the State Board Agriculture, and E. Logan, field ag in Missouri for the Department of riculture, will be in charge of meeting. Missouri was the first belt state to form a cooperation or solidation of the state and federal reporters, merging the two reports the Missouri State Board of Agri ture and the United States Dep ment of Agriculture under the name the "Co-operative Crop Reporting vice." Leon M. Estabrook, chief of Bureau of Crop Estimates, Washing has accepted an invitation to be pres and deliver an address.

BARLEY MARKETS.

LWAUKEE.—In the Milwaukee barmarket prices for the week declined . An easy tone continues to prepossibly due to the indictment of eries in violation of the war proion act. Good malting grades are ed and active, as the offerings are and largely lightweight stuff ı is hard to place. Receipts of y for the week were 182 cars, st 148 cars a week ago and 186 in 1918. Current quotations are: to choice, 48 to 50-lb. test, is quotable at $1.33@1.36; bright, $1.37@1.39; fair to good, 45 to 47-lb. test, $1.25@1.35; low, 38 to 44-lb. test, $1.15@1.28; feed, $1.05@1.20. Heavy feed grades also sold 1c higher. Iowa quoted $1.05@1.35 for light to fancy; Wisconsin, $1.15@1.39; Minnesota, $1.05@1.35; Dakota, $1.05@1.35; feed and rejected, $1.05@1.20.

ST. JOSEPH, MO.—One car on the tables the entire week, which was a very poor grade of barley, and sold for $1.05. No demand, and no receipts to speak of. No. 3 barley was quoted nominally at $1.12@1.14 and No. 4, $1.09@1.11.

DULUTH.—Business in barley was again slow on this market during the last week. Demand for it was lacking from any quarter and traders were without orders. Only 26 cars were received on track here during the week, as compared with 132 during the same period last year. Quotations weakened 3c with the range standing at from 95c to 25c for on track.

BUFFALO.—Barley dealers did very little and there was a very wide range in prices. Maltsters picked up some bargains and for other lots paid good prices. Old feed to malting was quoted at $1.30@1.45 and new $1.28@1.42 on track or in store Buffalo. The track receipts were about 40 cars.

KANSAS CITY.—The barley market ruled quiet this week. Receipts were only 22 cars, against 25 a week ago and 42 a year ago. The light movement was attributed to car scarcity and also to the interior feeding demand, which prevented many cars from coming to Kansas City. Evidently the elevators took most of the barley offered here, as stocks show an increase of 28,000 bus., to 132,000 bus., against 63,000 a year ago. Closing prices were practically the same as a week ago, with No. 3 at $1.06@1.10 and No. 4 at $1.04@1.08. Ground barley feed was quoted at $2.70@2.80 per cwt.

PORTLAND.—The barley movement to date may be characterized as slow as affecting coast terminal markets, in fact less than one-half that of a year ago. "Prices were somewhat firmer," says the *Commercial Review*, and considerable interest was manifest in both the brewing grades and feed qualities. The feed demand is very keen. Barley for flour is not wanted and of course prohibition being the order of the day the brewing demand is limited which meets the condition set by the rather light weight grain this year. Feed barley is quotable at $62 a ton with No. 3 brewing barley $63.

SAN FRANCISCO.—The market has been inactive as buyers and sellers cannot agree upon values. "Shipments South and East," says the *Commercial Review*, have been held up for some time on account of the embargo. Stocks are large, but two-thirds of the crop has been sold." Shipping grades quotable $3.10@3.15 per cental with feed at $3.07½@3.10.

CHICAGO—Considerable interest was displayed in the barley market last week, and values which were from 2@3c lower at the opening of the week made a recovery on Wednesday and a feeling of firmness was maintained during the remaining trading sessions. Heavier types of barley were the more urgently sought for, of which the offerings were limited. The thinner grades moved fairly well on Monday, the 22nd, but as throughout the week the black oaty mixtures found very slow sale. Shipping sales were of quite heavy volume and there were rumors of export inquiries. On Saturday sales ranged from $1.17@1.31, with screenings at 73c. On Monday, the 22nd, sales ranged at $1.20@1.30, with futures quotable $1.22 bid for September; $1.33 September new; December, $1.22½ bid at the close; May, $1.23½ bid. Exports from Atlantic ports were 1,321,000 bus., compared to 136,000 same week in 1918. Visible in another column.

MINNEAPOLIS.—The demand lacked aggressiveness and prices were barely steady compared with the futures. Offerings were light compared with year ago totals.

There were 100,000 bushels barley sold in New York last week which were exported to Greece.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 478,000 bu. last week, corn 263,000 bu. and barley 42,000 bu., while oats decreased 9,000 bu. and rye 267,000 bu. Details follow, last three ciphers omitted except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	3,721	10,955	14,676,000	16,199,000
Corn	120	406	626,000	2,428,000
Oats	2,589	4,859	7,448,000	10,983,000
Rye	1,418	868	2,286,000	1,207,000
Barley	45	197	242,000	673,000

A Gulf hurricane last week caused a $2,500,000 loss in Florida, with fruit and vegetable growers sustaining their full share of the disaster.

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended September 19, and for the corresponding week last year, as reported by the Minneapolis *Daily Market Record*, were:

	1919. Cars.	1918. Cars.
Minneapolis	262	477
Duluth	342	249
Chicago	64	100
Omaha	17	13
Milwaukee	39	57
Total	724	896

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning September 12, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Sept. 12	1.39	1.41	1.44½	1.34	1.44¾
Sept. 13	1.37¾	1.40½	1.41¾	1.30	1.42
Sept. 15	1.39¼	1.41½	1.41½	.....	1.42
Sept. 16	1.40½	1.43	1.43	1.28	1.44
Sept. 17	1.38½	1.42¼	1.44½	1.34	1.45
Sept. 18	1.40½	1.43¼	1.43	.....	1.43
Sept. 19	1.39⅝	1.42½	1.44	1.32	1.43

BUCKWHEAT SITUATION.

Buckwheat at country points in the province of Quebec, Canada, is quotable at $3.00 per cwt.

The buckwheat crop which is in blossom at the present time in Mercer County, Pa., is ripening fast and promises fast to be a record smasher.

A good crop of buckwheat was being harvested last week in the central Appalachian Mountain section and harvest was in progress in the western Lake region. This crop, says the *National Weather & Crop Bulletin*, is in very good condition in the Northeast.

The movement of feeder sheep from New Mexico to the range districts of San Angelo and Trans Pecos in the southwestern part of Texas has been heavy the past few months owing to drought conditions in New Mexico and to the splendid grazing conditions of the Texas ranges.

Crop Reports

Compiled by GEO. A. WELLS

The reports and compilations given below are based on conditions existing Sept. 16-18 and changes in climatic conditions since those dates should be taken into consideration.

The general reports indicate that farmers are not free sellers of oats at present prices and also that they would not sell corn freely at $1 or less per bushel. The recent decline in market values of grain has inspired the idea among the farmers that land at the high prices at which it has been selling of late will not be a remunerative investment and it is reported that there is a falling off in the demand for such high-priced land on that account.

The farmers' bins have been pretty well cleaned out during the war period, but the decline in market values of grain will undoubtedly encourage an increase in the farm reserves which may be an important factor in market values in the future.

SOIL CONDITION.—The soil condition is reported almost entirely "too dry" in all of the states with the exception of Minnesota, and fall plowing has been stopped in some localities on that account. The winter wheat acreage has no doubt been considerably decreased because of the dry condition of the soil preventing its preparation for seeding. However, since these reports were taken there have been good general rains throughout most of the surplus winter wheat states which will permit plowing and seeding of winter wheat that was not anticipated when these reports were taken.

TEMPERATURE.—The prevailing temperature during the past two weeks has been almost entirely "favorable" except in Nebraska and Kansas, where a considerable portion of these states was reported as "too hot."

CORN.—Basing the Government term normal at 100, the average comparative reports of the growth condition as reported by our correspondents in each of the states is as follows: Ohio, 98; Indiana, 81; Illinois, 82; Missouri, 72; Iowa, 92; Nebraska, 69; Kansas, 43; Oklahoma, 76.

Our report of the condition two weeks ago was as follows: Ohio, 95; Indiana, 83; Illinois, 72; Missouri, 73; Iowa, 95; Nebraska, 68; Kansas, 52. The comparison of these reports shows an improvement in the states of Ohio, Illinois and Nebraska and deterioration in Indiana, Missouri, Iowa and Kansas, the latter state having suffered greater depreciation than others. The flat average, however, is practically the same now as two weeks ago, which still substantiates the Government estimate of Sept. 1 corn crop of over 2,850,000,000 bushels.

The percentage of the corn that it was estimated would be matured and out of the way of frost by Sept. 20 in each of the states is reported as follows: Ohio, 86; Indiana, 84; Illinois, 88; Missouri, 70; Iowa, 87; Nebraska, 84; Kansas, 85; Oklahoma, 98, thus promising a well-matured crop of good quality.

FALL PLOWING.—The percentage of the fall plowing that has now been done is reported as follows: Ohio, 55; Indiana, 52; Illinois, 50; Missouri, 31; Iowa, 38; Minnesota, 41; North Dakota, 22; South Dakota, 40; Nebraska, 40; Kansas, 41; Oklahoma, 36.

ACREAGE OF WINTER WHEAT.—Basing the acreage of winter wheat sown last fall at 100, the comparative percentage sown this fall is reported as follows: Ohio, 70; Indiana, 70; Illinois, 62; Missouri, 45; Nebraska, 71; Kansas, 67; Oklahoma, 83. This gives a flat average of 67, which is practically the pre-war acreage, the increase of acreage as stimulated during the war being about 30 per cent. It is probable, however, that the recent rains will encourage additional acreage and that these percentages will finally be increased.

FARM SURPLUS.—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold by the farmers in each of the states is reported as follows: Ohio, 70; Indiana, 72; Illinois, 81; Missouri, 72; Iowa, 76; Minnesota, 2¢; North Dakota, 31; South Dakota, 52; Nebraska, 57; Kansas, 48; Oklahoma, 58.

Of oats: Ohio, 58; Indiana, 57; Illinois, 40; Missouri, 34; Iowa, 39; Minnesota, 17; North Dakota, 13; South Dakota, 25; Nebraska, 60; Kansas, 57; Oklahoma, 49.

GENERAL REPORTS.

The general reports given below as to whether or not farmers are free sellers of oats at present prices and also as to whether or not farmers would be free sellers of new corn at $1 per bushel are self-explanatory.

OHIO.

Greenville (2): Farmers not selling oats freely. Do not think they will sell corn freely at $1.00, unless hogs drop to that basis.

Bucyrus (4): The farmers are not free sellers of oats and corn at present prices, corn is fed.

Ansonia (2): Farmers are holding a good many oats and don't want to take 63c for them. They won't sell much corn.

Sidney (2): Farmers hesitating a little on this break in the market but will loosen up after seed. They will be glad to get $1.00 a bushel for corn and will sell freely.

Circleville (6): Farmers will be free sellers of new corn at $1.00 a bushel.

Xenia (3): No surplus of oats here, all will be fed on farms where grown. Very little if any new corn will be sold at $1.00 until the farmers are convinced no advance possible.

Eaton (2): Farmers not selling oats at present prices. They will not sell corn at $1.00.

Portsmouth (6): Cutting corn everywhere. Farmers won't sell under $1.00 and not much at that.

Lima (1): Weather is favorable. Farmers here are usually free sellers if prices are right; not many would sell new corn at $1.00 per bushel.

Agosta (5): Corn will not be sold at $1.00 a bushel unless hogs go to $10.00. Oats are not being sold.

INDIANA.

Greenfield (5): Farmers are not inclined to sell oats. Do not think farmers would sell new corn at price you name.

South Whitney (7): Farmers are not inclined to sell oats at present prices. Don't think there will be much new corn for sale here.

Rushville (8): Very few oats raised here and very little sold. Farmers feed most of their corn in this county, so none sold at $1.00.

Jasper (3): We do not think will sell much corn at $1.00 per bu. unless hogs come down to very bottom price.

Tipton (5): No oats selling and very little corn would sell at $1.00 per bu.

Princeton (3): About all surplus oats have been sold. Very few farmers will sell corn at $1.00 per bu., it will all be needed to feed and fatten stock and for the making of the next crop.

Decatur (7): Farmers holding and feeding oats. New corn will probably be held or fed at $1.00. Too dry to sow.

Waveland (2): Farmers are not free sellers of oats and there won't be one bushel of corn shipped out at $1.00. We will ship in corn.

Angola (7): But few oats and no corn for sale from the farm. All fed at home.

Wabash (4): Farmers holding tight to oats, and will not be free sellers of corn at $1.00.

Frankfort (2): Farmers not inclined to sell oats at present prices. Think they would sell corn freely at $1.00 per bushel.

Monticello (1): Weather has been entirely too dry for fall plowing. Since the decline of oats farmers have quit selling. Do not think they will sell corn freely.

ILLINOIS.

Mattoon (8): Farmers are not selling any oats and will not sell any new corn until gathering time but will crib a great deal at the $1.00 price.

Tuscola (8): It has been so very dry that farmers could not do fall plowing. No winter wheat sown yet. Farmers giving up idea of sowing wheat.

Ashland (5): No oats selling at present market price. New corn would move freely at $1.25 but not below that price.

Vermont (2): Believe farmers would be free sellers of oats and corn if elevators were not congested with wheat. Will be free sellers of corn around $1.00 to $1.10 as it is a bumper crop.

Mt. Pulaski (5): Absolutely no oats offered. New corn price seems to be held at $1.25 just at present.

Marshall (8): Oats will be fed at present price. Very little corn will be sold at $1.00.

Nashville (3): Corn is about a failure in this country. Some lands near creeks will make possibly a half crop. Upland little or nothing.

Lostant (4): Farmers are inclined to hold on to corn and oats at these prices. They will sell corn at $1.25 and oats at 75c, but not any less than that.

Sidell (8): Farmers are selling either corn or oats on recent market decline. Not inclined to contract new corn under $1.25 per bu.

Eureka (1): Very little oats being sold. Farmers undecided on prices of new corn, but possibly only a moderate movement at $1.00.

Earlville (4): No oats being sold at present prices and slow sellers of corn at $1.00.

Rockport (2): No oats in this locality and don't believe farmers will sell corn at $1.00.

Wenona (4): Farmers are not selling oats. Do not think they will sell new corn freely at $1.00.

Princeton (4): The farmers are not free sellers of oats. Think they would be of corn at $1.00.

Ashton (4): Drouth has interfered with plowing for winter wheat, so acreage will be much less than intended.

Mt. Carroll (4): No oats being offered. Free movement of corn not likely.

Odell (7): Farmers have not sold any oats this month. All waiting for price.

Rantoul (5): None.

Freeport (4): Farmers have sold practically no oats. We doubt whether they would sell much new corn at $1.00.

Belleville (3): Farmers do not raise much oats here so hardly any moving. Do not think much corn will move at $1.00 per bu., although hard telling just now.

Highland (6): Farmers only raised enough oats for own use. There will be no surplus of corn, most of them will be obliged to buy some.

Pocahontas (3): No oats to sell in this section while corn was a failure.

MISSOURI.

Charleston (9): Will not be free sellers of corn at $1.00 per bu.

Harrisonville (1): Our farmers sell very little corn at any price a will be needed at home.

Lamar (3): Very few oats sel here. No surplus for shipment. surplus corn.

Clinton (1): Farmers are not sel oats freely. There will be no sur of corn, but think if there were it w move freely at $1.00.

Springfield (3): Will not sell oat present prices. Will sell no corn.

Marionvile (3): Corn and oats have to be shipped in.

Sedalia (5): Previous failure of crop will keep corn from being keted freely here.

Bethany (1): Farmers would no free sellers of corn at $1.00. Oat very short and poor quality. Very tle for sale.

Columbia (5): Oats crop will used at home, also corn.

Salisbury (4): Farmers will not new corn at $1.00. We will not h enough oats to feed.

Higginsville (2): There will b reduction of 30 per cent in wheat a age.

Mercer (1): Farmers not offe oats at present prices and they pre a decided unwillingness to sell cor $1.00.

Chillicothe (1): Scarcely any being sold and don't believe the fa ers would be willing to sell cor $1.00 per bu.

IOWA.

Jefferson (5): Too dry for plo or seeding.

Wright (5): No on corn, and n oats.

Decatur (8): "No" on both cases

Williamsburg (8): No oats mo at all. Farmers will not sell corn.

New Sharon (5): Farmers not clined to sell oats under 60c, but for heavy movement of corn if it st at $1.00.

Coburg (3): Farmers will not corn at $1.00 until forced to do so.

Gilbert (5): No sowing of wi wheat that I know of. Farmers are selling oats freely. They are not ing new corn now, but will at hus time if they can get $1.00.

Allison (4): Farmers are not sellers of oats at present prices. T about $1.25 per bu. is about the p farmers are expecting for their cor

Washington (8): Farmers have been free sellers of oats at pre prices and conditions will deter whether or not the farmers would corn freely at $1.00 per bu.

Osceola (6): Farmers are not sellers of oats and the farm surplu oats will depend largely as to the p of new corn. Farmers are expec around $1.00 per bu. for new corn.

Whitten (4): Farmers holding for 70c and corn for $1.25. Lots of corn yet in farmers' hands asking $

Cedar Rapids (8): Oats not mo at all. Movement of corn depends price of hogs.

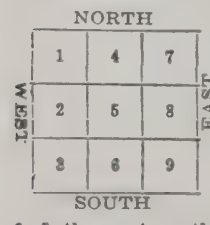
Wall Lake (2): Farmers are sel oats at prevailing price. Would no in position to say if farmers would corn at $1.00.

Clemons (5): Farmers were sellers at 70c but have stopped sel at the present price and as to co don't think they will sell at $1.00.

New Hampton (7): Don't t farmers would sell corn at $1.00.

Truesdale (1): I do not think s

Hull (1): Farmers are holding better prices, but will sell corn at $



Keokuk (9): The farmers are free sellers of oats at present pr and they will crib over their corn fore selling it at $1.00. Generally farmers are bull on the market on w they have to sell, and now that are more or less prosperous, money in the bank they will hold to their corn feeling that it is ch compared to the guaranteed price wheat.

Spencer (1): Farmers will hold at present prices but think will corn at anything above $1.00 but be slow below $1.25.

Arthur (2): Farmers not free sel at present prices and will not sell c

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

eely at $1.00 unless other things come wn accordingly.

Onawa (2): Very few oats raised re. Cannot say as to how the farm- s will sell new corn at $1.00 so early the season.

Hamlin (2): Don't sell oats at pres- t prices. Would sell new corn at .00.

Henderson (3): Holding oats for gher prices. Will not sell corn for .00.

Kirkman (2): Farmers holding oats w, and do not think they will sell rn at $1.00.

MINNESOTA.

London (6): Farmers are not selling ich oats at present prices. Most of e farmers are cutting corn now, and owing. Farmers will be free sellers new corn at $1.00.

Grand Meadow (9): Farmers not ling many oats. No corn for sale.

Prior Lake (6): No oats or corn for e in this country. Entire crop will fed to stock.

Henderson (6): Farmers think oat ces too low compared with other ain, and consider new corn worth re than $1.00 a bu.

Farmington (9): There will not be ny oats to ship from this point on s crop. Some farmers have consid- ble to sell but others are short and buying in from 100 to 500 bus. lots v. Around 65c farmers sell oats te freely but below 60c there is none ng offered. The corn crop is the t we have had in several years, but acreage is below normal and don't nk there will be any to ship out m here unless the stock prices go low that it becomes unprofitable to d.

Hayward (6): Farmers are not sell- much oats, and will not sell corn ly at $1.00.

Albert Lea (6): Farmers won't sell s at these prices, but think would a little new corn at $1.00 on ac- nt of the good corn crop. Oats are rt.

Hutchinson (6): There will not be oats or corn sold at these prices to ak of.

Golden Prairie (6): Corn is about all and good. No plowing done as it oo dry. No winter wheat sown.

Minneota (3): There are no oats ing to market at the present time. nk movement of corn will be small $1.00 per bu. Think they will hold more money.

NORTH DAKOTA.

St. Thomas (7): No corn or winter at raised here. Winter rye acreage ncreased 10 per cent. The barley is almost a failure and oats 50 per as compared with last crop.

Fargo (8): N. D. has never had a er corn crop than this year.

Moss (7): There are few oats raised sale as it is all fed.

SOUTH DAKOTA.

Faulkreau (8): Farmers holding Corn marketing depends on prob- rates of 13 to 1. (Hogs & corn.)

Aberdeen (7): Oats not moving free- nd no corn from farmers at $1.00 bu.

Brookings (8): Farmers not selling at present prices and do not look them to sell corn at $1.00. They end it costs more than this to pro- and will hold until they get more.

Bentford (7): No oats. No corn at .

Miller (5): Not free sellers of oats, moderately free sellers of corn at .

Canton (9): Farmers don't like s given now very much and think things should follow at once in decrease.

Harley (9): Farmers are selling ng, holding old corn somewhat will probably hold new for better $1.00.

Pt. Point (9): Farmers refuse to anything at present prices.

Edgewater (8): No winter wheat All grain being held back by ers on account of break in price.

NEBRASKA.

Superior (9): If we get rain acre- age will be about same, but if don't get rain acreage will be very small, cannot estimate year.

Superior (9): Farmers not selling oats freely. There will be no surplus corn here. Would buy all they need at $1.00.

Humboldt (9): No corn at $1.00 ex- cept renters.

Nebraska City (9): Very few sur- plus oats raised this year. Think farm- ers would sell sparingly of their corn at $1.00 per bu.

Beatrice (9): Farmers are selling no oats. Would sell but very little corn at $1.00 per bu.

Central City (9): Farmers selling oats rather sparingly and we don't think they will sell corn freely at $1.00 until spring. If the market is then down continuously they probably will sell.

Ashland (9): Has been very dry for fall plowing.

Fairmont (9): We will not have a surplus of either corn or oats to sell on account of drouth this season.

KANSAS.

Belleville (4): Farmers selling oats very slowly. There will be no corn sold here this year.

Uniontown (9): Cannot make a fair estimate on this year's corp sown.

Schroyer (7): No oats coming and do not think any corn will move at $1.00.

Blue Rapid (7): No oats for sale here. Practically no corn will be of- fered for sale.

Humboldt (9): 50 per cent of the wheat has not been threshed.

Wichita (6): Not much oats for sale at any prices and no corn.

Wakeeney (2): The farmers will have no new corn or oats to put on the market except for local use only.

Alta Vista (8): Will have to ship in corn and oats.

Wellington (6): Very little corn here. Farmers have stopped plowing as it is too dry.

Junction City (7): Very little oats or corn will be marketed this year at any price.

Neodesha (9): We will not have a large crop of corn and will need the oats for feed.

Pittsburg (9): Practically no oats raised here. No corn will be sold by farmers.

Clay Center (4): No oats or corn to ship out from this territory. Soil very dry and hard for fall plowing.

Concordia (4): Depends on rain as it is very dry here.

Mahaska (4): Corn nearly a total failure. We will ship in corn later on.

Madison (9): Corn crop a failure.

Athol (4): Oats do not move at the present price. Do not think corn would move under $1.25 per bu.

Logan (4): Not any surplus oats. Farmers anticipate new corn will bring $1.25.

Hillsboro (5): In this vicinity the farmers are holding the oats back for higher prices. The corn crop is about a total failure and we have to ship in our own.

OKLAHOMA.

Driftwood (1): No oats raised here much and very little corn. Would not be any corn sold here for $1.00.

Geary (2): Wheat acreage will be reduced materially owing to dry condi- tion of soil. Ploughing impossible at this time. Corn will not move freely at $1.00.

Kingfisher (4): It is too dry to plow, but should rain come soon it would change rapidly.

Enid (4): Do not expect corn to sell at $1.00 here. Will need all for home consumption.

Enid (4): Farmers are selling oats, but will need all their corn for feed.

Marshall (5): Not quite enough corn or oats raised for local demands. Not free sellers of oats and would not be free sellers of corn.

Miami (7): Not much surplus of oats. Emphatically farmers will not be free sellers of corn at $1.00 as they have been talking $1.50.

When the daylight saving scheme is abolished in the States it will be sim- ilarly inoperative in Canada, for al- though it proved very popular in the cities when tried out there were strong protests from the farming element, and due to the international rail service it is much better that the two countries operate alike.

Send us the news from your neigh- borhood—changes, crops, local condi- tions, etc.

Total Grain Stocks Visible.

The aggregate stocks in the United States and Canada, east of the Rocky Mountains, on September 13, 1919, and corresponding weeks of previous years as reported by *Bradstreet's*, were as fol- lows, with comparisons:

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

Philip Rothrock, Federal Supervisor in charge of this district, held examination for licenses here on the 16th.

Mrs. Josephine Rust, mother of A. E. Rust, of the Halliday Elevator Co., died in Los Angeles, Calif., on the 18th.

James E. Bennet & Co., of Chicago, have taken charge of the office here which has been operated by Ichtertz & Watson.

Corn in this section is out of danger of frost with the exception of a few scattered fields which were very backward. Samples on the ear look fine but are still high in moisture.

SIOUX CITY, IA.

Paul Larson, Correspondent.

The annual Interstate Live Stock Fair was held here last week and was a record breaker, the attendance was by far the largest ever attended, and the exhibits were far superior to former years.

The Sioux City traffic bureau has been honored in the appointment of Commissioner J. P. Haynes, as a member of a special committee of five of the National Industrial League to investigate all questions arising out of the reconsigning and diversion of freight throughout the country.

Directors of the Farmers' Terminal Elevator Co., recently organized here, and representatives of the Stevens Construction Co., departed for Omaha, Kansas City, Chicago and other large terminal markets with the view of a thorough canvass of all the modern large elevators, latest machinery and up-to-date methods of handling grain. Plans will be drawn next week for a 1,000,000 bus. terminal elevator to be erected on the twelve-acre tract of land in North Riverside.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 177 cars. Stocks at the end of the week were as follows: Wheat, 794,500 bus., decrease of 103,000. Corn, 88,000 bus., decrease of 9,000. Oats, 522,700 bus., increase of 150,700.

Business continues extremely dull with corn mills in the southeast. Southeastern corn mills, with capacity of 120,000 bushels, reported output last week of 10,900 bushels, or 9.08 per cent of capacity, which compared with 14,072 bushels and 9.27 per cent of capacity of mills reporting the preceding week. Quotations: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.50; plain meal, $3.30.

The grain situation was without important changes in the local market last week. Wheat continues to command a good premium, with mills well supplied. Corn is unsettled on the recent break. The demand for corn is quiet, with light supplies. Oats are in moderate demand. Some complaints are heard of shortage of cars for handling grain. Quotations: Wheat—No. 2 red, $2.25@2.29. Corn—No. 2 white, $1.68@1.70; No. 3 white, $1.65@1.68; No. 3 mixed, $1.65@1.68. Oats—No. 3 white, 75@76c; No. 3 mixed, 73@74c; No. 3 red, 71@72c.

DETROIT.

John Barr, Correspondent.

John Tanton, of London, Ontario, prominent Canadian grain dealer, was here on business last week.

Edward Frensdorf, grain dealer at Hudson and also a prominent politician, was a caller on 'change last week.

Buying of wheat for export has been active during the week and liberal shipments are soon to be made. The market is steady.

Rye is firm at $1.41 for cash No. 2. Exporters have been buying quite freely in this market for several days and shipments will increase as soon as permits are granted.

Beans are inactive at $7.50 for immediate and prompt shipment per cwt. Reports from state points indicate a good yield. It is claimed by some dealers that the state will produce a crop equal to that of last year on half last year's acreage.

Corn was easy early in the week, but recovered during the closing days, and closed at an advance of 2c for the week. Receipts were very small and trading was slow. Quote: No. 3, $1.48; No. 3 yellow, $1.50; No. 4 yellow, $1.48; No. 5 yellow, $1.47; No. 6 yellow, $1.46.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

There is some eastern demand here for oats in this market, but it is difficult to secure a grain heavy enough to meet the requirements of purchasers. Demand for local consumption is active. The market declined ½c and closed with a firm tone at unchanged prices. Quote: No. 2 white, 71½c; No. 3 white, 70@70½c; No. 4 white, 69@69½c.

DES MOINES, IOWA.

B. Randleman, Correspondent.

The partnership existing between L. N. Hart and W. H. Bartz, doing business under the firm name of the Mid West Consumers Grain Co., was dissolved Sept. 23, Mr. Bartz selling his interest in the partnership to Mr. Hart.

The receipts of grain for the past week have nearly doubled those of the week previous. Des Moines' market looks as if it would soon equal or pass any other of the large western grain markets. Prices have ruled about 66¼c for oats and $1.44 for No. 2 yellow corn. One to two cents premium on wheat. Barley was sold from $1.28 to $1.43.

SPOKANE, WASH.

J. B. Jones, Correspondent.

According to G. I. Toevs, manager of the Centennial Mill Co., all mills of Spokane have received government orders for flour. The Centennial Mill has been given an order for 20,000 barrels to be delivered on the coast this month at $9.65 a barrel at the shipping point. They are working on the order now. The flour is to be made from soft white wheat.

T. H. Brewer, president of the Fidelity Nation, reports that 5,000 acres of wheat in the district have been permitted to mature and have been harvested. Luther Turner, probably the biggest individual wheat grower in the Inland Empire, is reported to have received $20,000 for volunteer wheat this year from 640 acres. This is declared to be $2,500 more than the same section yielded in 1918, when it was plowed and sown in the usual way.

Seventy-five per cent of the fall wheat in the vicinity of Pullman is already in the sack and considerable headway has been made in the spring grain and barley. Ten days more of good weather will practically see the close of the 1919 harvest, and the season will go down in history as one of the most successful, from triple standpoint of harvest conditions, yield and price, in the history of the Palouse country. Up to the present time not an hour's time has been lost on account of rain or bad weather, a condition which has prevailed during but few harvest seasons of the past. Yields throughout the Pullman section are holding up considerably better than pre-harvest estimates, with few reports of under 30 bushels in fall wheat and many better than 40. J. T. LaFollette has just finished threshing 240 acres of Red Russian on the Snake river brakes, which returned an average of 42 bushels to the acre. One fine setting gave Mr. LaFollette a pile of 1,630 sacks, valued at over $8,000.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Milwaukee grain shipments for the week ending Sept. 20 were 381,268 bus. oats, 135,042 bus. corn, 91,660 bus. barley, 19,720 bus. wheat; total, 627,690 bus., against 832,950 bus. the preceding week, and 1,080,965 bus. a year ago.

Every effort is being made to hasten the operation of the new Milwaukee, Chicago and Michigan City Transportation Co., "The Water Belt Route," which will give Milwaukee shippers direct connections with Central Freights Association territory.

The receipts of grain at Milwaukee for the week ending September 20 were 182 cars barley, 233 cars corn, 287 cars oats, 504 cars wheat, 48 cars rye, 5 cars flax; total, 1,259 cars, against 1,197 cars the week before, 1,509 cars a year ago and 1,124 cars in 1917.

The Milwaukee cash grain markets were generally higher during the past week, corn rising 8@9c, oats 1c, wheat 5c, while rye ruled strong. Barley, alone, was lower, declining 4@7c, due largely to the Government's indictment of breweries in violation of the war prohibition act. The movement is moderate and the demand good.

W. A. Hottensen, vice-president and treasurer of the W. M. Bell Co., 305 Mitchell Building, 81 Michigan street, Milwaukee, who has recently returned from a 1,200-mile trip through Wisconsin, Minnesota and Iowa, reports that this year's corn crop is exceptionally large and heavy. Due to the fact that the crop is generally two and three weeks ahead of regular growth, Mr. Hottensen feels that the crops are beyond all danger of an early frost. In many sections the crops are already reported out. The late corn crops in Iowa also reported as good, were somewhat stunned by the excess heat in late August and early September.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: O. O. Morrison, Waukegan, O. Friedman, F. Marling, W. A. Bell, Chicago, Ill.; Geo. P. Harding, Minneapolis, Minn; T. W. Lawless, Kansas City, Mo.; F. Wilson, Lamar, Colo.; T. E. L. Port, Stevens Point, G. S. Fisher, Evansville, Wis.; J. M. Garvey, F. C. Cole, Iron Mountain, Mich.; C. Phelps, New York, N. Y.; J. G. Peffard, Kansas City, Mo.; F. Binze, Chicago, Ill.; B. E. Dadmun, Whitewater, L. Rosenheimer, Kewaskum, A. Kroehnke, Grafton, Wis.; Henry Lueders, Lyons, G. A. Lomen, Ridgeway, Ia.; C. J. Johnson, Grand Marais, Minn.; E. J. Host, Lake Geneva, Wis.; C. T. Venard, Richland Center, A. Sether, Rosholt, A. C. Kiefer, Brillion, J. A. Tennis, Antigo, J. G. Martin, Sturgeon Bay, Wis.; R. Smith, Minneapolis, Minn.; R. A. Schuster and Wm. Sears, Chicago, Ill.; H. W. Reimon, Shelbyville, Ind.

DULUTH.

S. J. Schulte, Correspondent.

The contractors for the addition to the Consolidated Elevators Co.'s plant are pushing work through on it, and the pouring of concrete for the bins is now nearly completed. With the completion of this addition that company will be equipped with the largest elevator storage facilities at the Head of the Lakes.

The oats market was ¼@¾c up here at the end of the week at 62½@65c for spot No. 3 white. Receipts were limited, so that trade from day to day was largely nominal. Stocks of oats in the elevators amount to 348,000 bushels, of which the bulk is reported to be marked for Eastern delivery.

Trade in rye continued to absorb the attention of operators to a great extent. The market in spot No. 2 rye closed exactly where it did a week ago at $1.40½, but it sold 3c higher at one stage. Rye accounted for the bulk of the current receipts. Three lots aggregating 400,000 bushels were shipped out from the elevators during the week for the East to fill export orders.

R. M. White of the White Grain Co. reported a fair demand over the district for feeds. That he thought to be due in a great measure to the bringing up of thousands of sheep and cattle from Montana to Northern Minnesota for feeding purposes following the drought in that state last summer. Better Eastern inquiry for feeds is also being experienced on this market.

While advices being received from grain handlers and elevator men regarding the prospects of the movement this way picking up are more encouraging, it is expected to be comparatively light for a time yet. It is understood, though, that the United States Grain corporation proposes to arrange for the routing of as large a tonnage of wheat to the lake terminals as possible between now and the close of the navigation season. Ample boat facilities are now available with ending of the coal docks strike and the releasing of tonnage that had been tied up with loads of coal.

As showing the dullness of trade so far this season, it may be mentioned that receipts at the elevators here during the new crop year from August 1 up till September 19 aggregated only 5,639,528 bushels as compared with 9,663,616 bushels during the same period last year. The wheat movement amounted to 1,426,125 bushels against 8,953,300 bushels last year. Rye and barley helped out wonderfully, receipts of the former amounting to 2,740,820 bushels against 184,192 bushels last year, and barley arrivals came to 1,006,666 bushels, against only 90,971 bushels last year. Stocks of all grains in the elevators at the end of last week were 4,447,000 bu. of which 2,789,000 bushels were rye and 639,000 bushels barley.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

King, Farnum & Co. have opened up offices on the fourteenth floor, with M. T. Logan as manager.

The car shortage is seriously affecting the output and shipping facilities of the Grain Belt Mills, according to F. F. Gilbert, manager of the mills. Shipments of hay and other raw materials have been curtailed so that the manufacture of feed products has had to be cut down.

C. J. Hauber, of the St. Joseph Hay & Grain Co., spent a couple of days hunting ducks. Up to the present writing Mr. Hauber has not returned, but as he is manager of the hay department of the above firm, took along a bale of hay for bait, and it may be he has run out of bait.

A grain elevator of 35,000 bus. capacity will be erected by G. W. Helm, of the G. W. Helm Grain Co. at the southwest corner of Eighth and Olive streets. Construction will be started within the cource of a week or so and it is expected to complete the elevator within the next sixty days. It will have a shelling capacity of 10,000 bus. a day.

The following were registred on the floor of the Grain Exchange during the week: C. M. Linn, Humboldt, Neb.; W. B. Speers, Holton, Kas.; W. J. Falkner, Beloit, Kas.; W. W. Young, H. C. Frankel, R. C. Jones and R. F. Uhlman, of Kansas City; A. E. Wells, Monticello, Ark.; C. E. Murray, Los Angeles; Blaine Shaune, Tarkio; F. H. Hoerman, Union Star, Mo.; William Bailey, Baileyville, Kas.; W. H. Harroun, Bartley, Neb.; M. Banfield, Highland, Kas., an L. Frederick, St. Louis.

R. E. Hastings, a member of the Joseph Grain Exchange, contemplates erection of a new grain elevator near Larabee Mills. He has been selling s for the proposed structure for sev weeks, and intends to raise $200,000, w would build the elevator with a capacity of 500,000 to 1,000,000 Thus far nearly $100,000 has l sold to local people, while the o $100,000 is to be put up by Swift & C pany. Information received is to the fect that work will be started shortly, that the elevator will be in operation e next spring.

Cash Markets.

Wheat—Receipts, 504 cars this w against 422 a week ago and 303 a year Good demand for good grades of h wheat, while lower grades were slow. and mixed wheat was almost unsal Several cars of hot wheat were in to market and a good many cars of sa red. Cash quotations are as follows: 1 dark hard, $2.22@2.40; No. 2 dark h $2.19@2.37; No. 3 dark hard, $2.16@ No. 4 dark hard, $2.12@2.29; No. 5 hard, $2.08@2.23; No. 1 hard, $2.18@ No. 2 hard, $2.15@2.28; No. 3 hard, $2. 2.25; No. 4 hard, $2.08@2.21; N hard, $2.04@2.15; No. 1 yellow h $2.16@2.17; No. 2 yellow hard, @2.14; No. 3 yellow hard, $2.10@2.11; 4 yellow hard, $2.06@2.08; No. 5 ye hard, $2.02@2.06; No. 1 red, $2.18@2.19; 2 red, $2.15@2.16; No. 3 red, $2.12@ No. 4 red, $2.08@2.10; No. 5 red, $2.04@

Corn—Receipts, 39 cars, against 5 week ago and 135 a year ago. The mand for cash corn was slow all during week, and very little trading. One ca sample mixed went begging the en week. What corn was on the tables choice, being mostly of the No. 1 grade, there was very little demand and bu were scarce. New corn is being off from Oklahoma and Texas at around spot market, with no buyers. Cash follows: No. 2 yellow, $1.48@1.51; N yellow, $1.45@1.47; No. 4 yellow, $1. 1.45; No. 5 yellow, $1.41@1.42; No. 2 w $1.48@1.50; No. 3 white, $1.45@1.47; N white, $1.42@1.44; No. 5 white, $1.40@ No. 2 mixed, $1.48@1.49; No. 3 mixed, @1.46; No. 4 mixed, $1.42@1.45; N mixed, $1.40@1.41.

Oats—Receipts, 19 cars, against 2 week ago and 46 a year ago. Oats slow in sympathy to corn. There wa small demand from Kansas feeders, very little new stuff came to market. oats follow: No. 2 white, 68@69c; N white, 67@68c; No. 2 mixed, 64½@65c; 3 mixed, 63@64c; No. 2 red, 64@65c; N red, 63@64c.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Oats has felt the pressure of the de in the corn market and sales have b made from 75c to 76c per bushel deliv New Orleans. Sacked oats have b quoted at 81.5c delivered. The demand oats is slow and buying is not of a he character.

Jno. D. Shanahan, formerly with the ain Standardization, U. S. Department Agriculture and prior to that Chief ain Inspector, Buffalo, N. Y., but now nnected with the United States Grain rporation, was a visitor to our city for veral days during the past week.

The low dip in the Chicago options ought out offerings of corn and Illinois ld, delivered New Orleans, loaded corn $1.49 to $1.51, New Orleans weights and ades to govern. These prices have been low figures at which corn has sold since e market took the decided plunge, but cently the market has started to build again and No. 3 yellow corn is quoted $1.60 per bushel delivered New Orleans.

KANSAS CITY.

T. J. Tanner, Correspondent.

E. D. Bigelow, secretary of the Board Trade, is at Mackinac Island for a vacan.

A. L. Ernst, of the Ernst-Davis Grain .. has returned from a vacation of 51 ys in Michigan.

The Simonds-Shields-Lonsdale Grain Co. s reopened its New York office, hoping participate in the export trade in coarse ains later.

August W. Stewart, formerly of the annon Grain Co., but now secretary of Twidale-Wright Grain Co. was elected membership in the Board of Trade Fri-y.

The dinner to be served in honor of lius H. Barnes by the Kansas City Grain ub will be in the St. Francis Room of e Hotel Baltimore, at 7 p. m., September Only members of the club and Mr. rnes will be admitted.

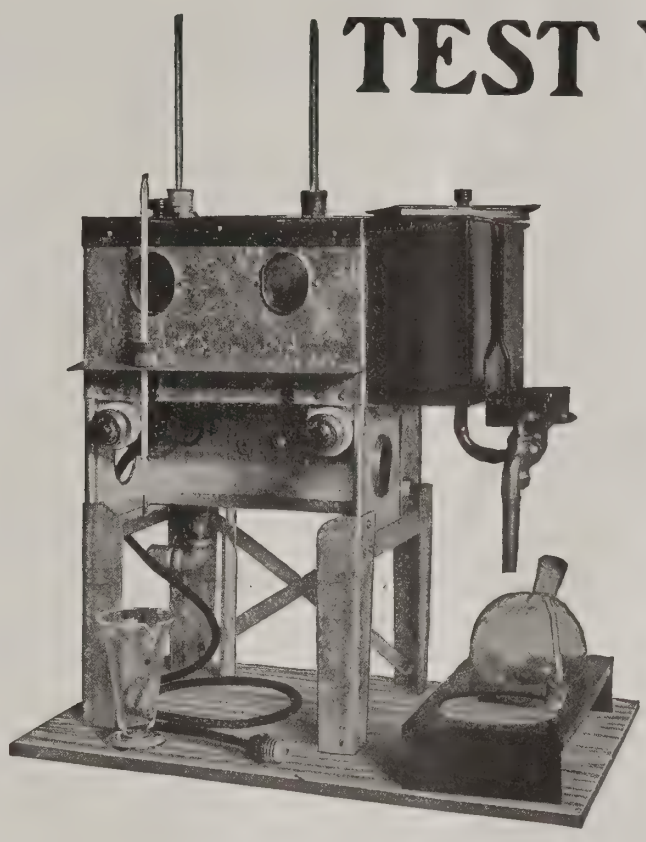
I. J. Brodnax and T. F. McLiney have ganized a receiving house to be known the Brodnax-McLiney Commission Co. Brodnax will continue his connection th the Frisco Elevators Co., of which he president. The new firm will have an ice at 336 Board of Trade Annex.

On a suggestion from the Grain Control mmittee the directors of the Kansas y Board of Trade have authorized ship-ng sales of grain on official destination ights. This became effective September and the grain sold prior to that date s subject to the ruling.

George B. Ross, formerly chief of the nsas Grain Inspection Department, has come a flour miller. Mr. Ross and as-iates have bought the Ottawa Milling .. at Ottawa, Kas. The mill has a daily pacity of 500 bbls. Mr. Ross is also in-ested in a mill at Whitewater, Kas.

J. O. Moffatt, of the Moffatt Grain Co., ent the week in the Panhandle district Texas, where he observed the great crop sorghum grains. He wrote back that lds of milo and kafir occupied most of landscape. Shipments, he said, had n delayed by rains, but would soon be avy if cars could be obtained.

mpatient with country grain dealers o, in many cases, are operating without eral licenses, D. F. Piazzek, zone agent the United States Grain Corporation, s week resolved to begin prosecutions. Piazzek will have aid from the United tes District Attorney. He has deter-ed to put out of business every grain ler or miller operating in defiance of law.



There is going to be more corn in the ntry than was anticipated, or estimated crop reports, or others," is the belief ressed by T. M. Jensen, of Grundy nty, Missouri. "We find our corn is ter than expected," said Mr. Jensen in nsas City this week. "Taking the ntry over, there seems to be a surprise store along this line. In good corn sec-ns where the crop was reported good, is far ahead of expectation, while in ts where corn made a poor start it is ing out better than expected."

rom a dry condition which threatened greatly reduce the new acreage of win-wheat in the southwest, the situation changed radically since the rains of week. The heaviest precipitation was Thursday and Friday, and practically territory in the southwest was relieved drouth. Rains in Western Kansas were heavy that rivers and creeks were over-n, and there was loss of life and prop-. Although the breaking of wheat und had been greatly delayed, it is be-ed that time still remains for good d acreages of both wheat and rye. ny reports indicate, however, that labor rtage will be effective in reducing fall ling.

Cash Grain Markets.

Wheat—Receipts for the week, 1,200 s, against 1,072 a week ago and 906 a r ago. While ordinary qualities showed e change in price, the choice samples of l wheat, especially the dark kinds, ad-ced 9@18c a bushel, due to scarcity an urgent milling request. Soft wheat up 2@3c, but failed to hold the gain. losed unchanged to 1c higher, and was moderate demand. The elevator facil-s were sharply reduced by the explo-which destroyed the Murray house. stocks continued to increase. At the k's close the holders were 15,290,000 or 594,000 more than a week ago. A ago the stocks were 12,740,000 bus.

The car situation here improved somewhat, but still was very unsatisfactory. All restrictions on shipments to Kansas City were removed and the blanket permit system was suspended. There were strong protests from Kansas, western Nebraska and Colorado, where wheat is lying on the ground at some points for lack of storage and cars. Closing prices of leading grades in Kansas City were: No. 1 hard, $2.20@2.50; No. 2, $2.20@2.45; No. 3, $2.17@2.35; No. 1 red, $2.20; No. 2, $2.16@2.17; No. 3, $212@2.14.

Corn—Receipts, 69 cars, against 100 a week ago and 348 a year ago. The market had a sharp rally, due to better buying for local and shipping accounts and the fact that rains had checked shipments of new corn from Texas into territory further north. Mixed corn closed 6@10c higher, at $1.48 for No. 2 and $1.46 for No. 3. The advance in yellow was 10@12c, to $1.51@1.52 for No. 2 and $1.50@1.51 for No. 3. White closed 5@8c higher, with No. 2 at $1.49 and No. 3 at $1.44@1.46. Stocks here increased 10,000 bus., to 36,000 bus., against 608,000 a year ago. There was a delivery of 5,000 bus. on a September contract, the first noted this month.

Oats—Receipts, 82 cars, against 80 a week ago and 273 a year ago. Recent declines and car shortage accounted for the light movement. Prices had stronger tone, sympathizing with corn. White closed 2½@3½c higher, with No. 2 at 70@70½c; No. 3, 69½c. Mixed were unchanged, at 62@63c for No. 2 and 61@62c for No. 3. Red advanced 1@3c, closing with No. 2 at 64@65c and No. 3 at 63@64c. A large proportion of the arrivals went to store, partly for lack of cars in which to make shipments. Stocks increased 68,000 bus., to 1,206,000 bus., against 3,010,000 a year ago. About 200,000 have been delivered on September contracts.

Kafir and Milo—Receipts, 29 cars, against 9 a week ago and 1 a year ago. Further weakness developed in the early part of the week, but the market sympathized with strength in corn and made a good recovery, closing about 5@10c higher than a week ago, as follows: No. 2 white kafir, $2.35 per cwt.; No. 3, $2.30; No. 2 milo, $2.35; No. 3, $2.30. Some of the arrivals were new milo, from Texas, but receipts from there were limited on account of rains and car shortage. Dealers reported a good demand for shipping account. Bids for No. 3 milo to arrive were around $1.90, which indicates the feeling of dealers regarding prices on the new crop. No doubt exists that the yield in Kansas, Oklahoma and Texas will make a record aggregate. Frost from now on would catch only a small proportion of the crop. Stocks here increased 2,000 bus. to 8,000, compared with 92,000 a year ago.

MEMPHIS.

George Williamson, Correspondent.

Cyrus B. Stafford, assistant traffic manager of the Division of Public Service, U. S. Railroad Administration, headquarters in Washington, was a visitor here Saturday. He formerly resided here, and was traffic commissioner of the Merchants' Exchange. He only stopped for a social call, being en route to an important conference in New Orleans.

Efforts of the railroad lines in Illinois to have the freight rates on hay from Illinois points to Memphis and Cairo placed on a basis with Evansville, Ind., which would have meant an increase of 10 cents per 100 pounds, were withdrawn following a hearing before the Chicago district freight traffic committee, in which the unreasonableness of the petition was shown up. J. B. McGinnis, commissioner for the hay and grain exchange of the Memphis Merchants' exchange, has returned from Chicago, where he represented Memphis interests in the case.

Within about 60 days shippers of hay, grain and their products through this market will be getting better rates into the states of Texas, Arkansas and Louisiana, according to an announcement made Saturday by James B. McGinnis, traffic commissioner of the Merchants' Exchange hay and grain department. The Interstate Commerce Commission has just given its official sanction to rates promulgated last May by the federal railroad administration, whereby some reductions are made on shipments through this center. Because some of the smaller roads affected were not under federal control it was necessary that the commission give its sanction. It is expected that business done by this market in the three states will be increased, as rates heretofore have been in favor of some of the other terminal markets.

Business continues very quiet and quotations during the past few days have been changed very little. Receipts of corn for the week were 58 cars, which were large enough for the limited demand. Mixed feed people have bought but little and the millers only enough to fill their immediate requirements. Cash 2 white corn is quoted around $1.45, the best offer on Saturday on call being $1.50, with no bids. Oats have been fairly steady, despite the fact that receipts for the week were 145 cars. A rather large proportion was the red variety, which are slow. A little demand was reported for choice seed quality, but the other offerings went slowly. Cash 3 red bulk sold at 64c, while same sacked sold at 68c and No. 2 sacked sold at 70c. White oats sold around 71c,

but fresh business was scarce. Most of the receipts went on contracts.

Application has been made for a charter for the Hypo-Hay Co., a new concern which will soon be turning out a new process sweet feed. Capitalization is placed at $25,000 and the following signed the application as incorporators: Peter McIntyre, J. C. Roberts, E. G. Hodges, F. M. Bailey and J. W. Farley. The plant will be at the corner of Tennessee and Butler streets. According to Mr. McIntyre, who is one of the pioneer members of the sweet feed business here, the patent process will enable them to force the molasses into the bales of hay, by the use of compressed air through small pipes, in sufficient quantity to saturate the hay and make it suitable for feed, thus saving the cost of grinding the hay and sacking the finished product. He says they have passed the experimental stage and the company is formed to market the hay under the new process.

NEW YORK.

J. M. Nugent, Correspondent.

Corn goods of all kinds was dull and prices were weak and largely nominal. The export outlet was extremely small, and the domestic trade has been of a hand-to-mouth character. Prices, as a result, rule weak and lower.

During the past week, the following gentlemen visited the floor of the New York Produce Exchange: J. E. Southworth of Boston; S. J. Mulqueen of Toronto; Joseph Kurale, of Baltimore; William Goodrich, of Milwaukee; M. Plaser, of Chicago; P. A. Dell, of Chicago, and James A. Patten, of Chicago.

There has been practically no change in the cash corn situation in this market. Supplies are light and some enquiry was in evidence from New England points during the week, but this demand was not heavy. Prices in the spot market were slightly easier at the close of the week in sympathy with the weakness in the West. No. 2 yellow was quoted at $1.64¾; No. 3 yellow, $1.64¼; No. 2 white, $1.65¾; No. 3 white, $1.65¼; No. 2 mixed, $1.63¾, and No. 3 mixed, $1.63¼.

A fairly active domestic demand served to keep values in the spot oats market here firm during the early part of the week, but this demand slackened toward the latter part of the period, and prices, as a result, sagged a trifle. Export demand is entirely lacking, and present indications do not point to an early resumption of the foreign enquiry on a broad scale. Quotations follow: No. 1 white, 79c; No. 2 white, 78c to 78½c; No. 3 white, 77c to 77½c, and No. 4 white, 76½c to 77c.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

Four-fifths of the seed wheat sown in Fayette county this fall will be given the "hot water" treatment against smut. An agent of Purdue University was in the county demonstrating the treatment.

William A. Dair, age seventy-one, a retired flour mill operator and grain broker, died of paralysis at his home in Harrison township, near Lawrenceburg, Ind. He is survived by the widow and one son.

The Buck Baking Co., Elkhart, Ind., incorporated with a capital stock of $100,000, general retail and wholesale bakery. Directors of the new concern are James H. Lloyd, L. B. Tracy, Grover C. Sheck, Fred. W. Martin and Herman Riley.

Fifty thousand pounds of flour was scattered along the Baltimore & Ohio Railroad just outside of Vincennes, Ind., as a result of a box car breaking in two. The flour car, consigned to Cincinnati, was in the center of the train, which was overloaded, it is said.

Conditions last week were very favorable for the rapid ripening of corn, which is generally mature, except in the southern part of the state, where many fields will require another week or two. Considerable corn is to be ensilaged, and some has already been cut.

The Diamond Pure Food Co., Jeffersonville, Ind., incorporated with a capital stock of $500,000; to manufacture, buy and sell flour, grain and cereal products. Directors are Harry Barndollar, P. M. Pearce, George M. McCanna, Harley D. Sanders and George C. Kopp.

After Fred. Doehrman had been caught stealing wheat from the Woodburn Equity Exchange Elevator, Fort Wayne, Ind., he was fined five dollars and costs and sentenced to ten days in jail. Doehrman admitted the theft, saying that he used it to feed his chickens. Under promise of good behavior, the court suspended the jail sentence.

Some of the farmers in northern Indiana whose farms were scourged by the Australian take-all and who had to ship their wheat to the United States Grain Corporation received more from their wheat than if they had sold it at their nearest local markets, according to Frank N. Wallace, state entomologist. Mr. Wallace said that in one instance the farmer got $2.10½ a bushel for his wheat, whereas the local price was but $2.04 for the same grade of wheat.

BOSTON.

R. S. Wallace, Correspondent.

Stocks of grain in regular elevators September 15th were: Wheat, 459,371 bus.; oats, 247,861 bus.; rye, 196,733 bus.; barley, 119,793 bus.

Exports of grain and flour for the week ending September 20th were as follows: Wheat, 267,000 bus.; oats, 99,870 bus.; barley, 25,000 bus.; oatmeal, 1,500 sacks; flour, 3,185 sacks.

Demand for nearby corn is very slow, with prices quoted higher than last week. For shipment, No. 2 yellow corn, $1.67 to $1.68 per bushel; No. 3 yellow corn, $1.65 to $1.66 per bushel. Receipts for the week ending September 20th were 1,170 bus.

The following were visitors on 'Change during the past week: W. S. Day, E. L. Glaser, C. S. Woolman and F. S. Young, Chicago, Ill.; J. W. Mooney, Buffalo, N. Y.; A. W. Allen, Birmingham, Ala.; L. B. Lovett, Memphis, Tenn.; A. S. Dumont, Detroit, Mich.

A little demand for oats during the past week with prices quoted a trifle higher. For shipment, old fancy 40/42 lbs. clipped white oats, 84½c per bushel; fancy 38/40 lbs. clipped white oats, 83½c per bushel; new fancy 38/40 lbs. clipped white oats, 81½c to 82c per bushel; new regular 38/40 lbs. clipped white oats, 80½c to 81½c per bushel; new regular 36/38 lbs. clipped white oats, 79½c to 80c per bushel. Receipts for the week ending September 20th were 133,730 bushels.

BUFFALO.

E. Bangasser, Correspondent.

Rye was dull until the close of the week when there was some inquiry but at several cents under asking prices. No. 2 was quoted at $1.48 on track, through billed.

Corn dropped to $1.45 for No. 2 yellow on Monday and was weak at that price, buyers taking only a few cars of the many offered. This was followed by a sharp advance and buyers tried to get in at $1.48. There was a steady advance and later in the week $1.55 was readily paid and $1.57 by the close of Friday. The close was $1.58 for either No. 1 or No. 2 yellow and all offerings taken. Some of the mills appeared to have more than they needed and sold a few cars at the advance.

Wheat offered on track was quickly disposed of at firm last week's prices for good milling but the offerings were mostly of low grades and there was a wide range in quality and price. No. 1 red sold generally at $2.30; No. 2 red, $2.28; No. 3 red, $2.24; No. 4 red, $2.18; No. 5 red, $2.16 on track, through billed. Smutty, musty and other wheat went at what buyers would pay. Not much spring wheat came on the market and it was difficult to get bids at the close of the week even on the best grades.

The statement of the financial affairs of Geo. E. Pierce, elevator owner, shows according to the committee appointed, that his assets total $1,005,663.06 and liabilities $433,342.23. Attention was drawn to the fact that the assets may shrink due to uncertain values. Much of the real estate will have to be sold to liquidate the indebtedness according to the representatives of three of the banks and he adds that there is where a considerable shrinkage may come in as it may have to be sold at a sacrifice.

The receipts of oats were lighter this week and buyers held off to a certain extent, leaving quite a number of cars until the close of the day. Sellers were anxious to clean up and little attempt was made to follow the option. The demand was principally for good heavy weight oats and occasionally a premium was paid while quite a number of cars of light weight sold under what was considered the market. The advance was about 2c for the week. Closing: No. 1 white, 74c; No. 2 white, 73½c; No. 3 white, 72½c; No. 4 white 71½c on track, through billed.

Inspections for the week: No. 1 white soft, 2 cars; No. 2 white soft, 5 cars; No. 3 white soft, 6 cars; No. 4 white soft, 1 car; No. 1 red, 3 cars; No. 2 red, 21 cars; No. 3 red, 64 cars; No. 4 red, 39 cars; No. 5 red, 10 cars; sample red, 4 cars; No. 1 amber durum, 1 car; No. 2 mixed wheat, 9 cars; No. 3 mixed wheat, 6 cars; No. 4 mixed wheat, 1 car; sample mixed wheat, 1 car; No. 1 dark hard, 10 cars; No. 2 dark hard, 11 cars; No. 3 dark hard, 22 cars; No. 4 dark hard, 13 cars; No. 5 dark hard, 11 cars; sample, 2 cars; No. 1 hard winter, 2 cars; No. 2 winter, 50 cars; No. 3 winter, 69 cars; No. 4 winter, 25 cars; No. 5 winter, 17 cars; sample, 2 cars; No. 1 northern, 2 cars; No. 2 northern, 18 cars; No. 3 northern, 48 cars; No. 4 northern, 31 cars; sample spring, 5 cars; No. 1 dark northern, 37 cars; No. 2 dark northern, 18 cars; No. 3 dark northern, 10 cars; No. 4 dark northern, 2 cars. Corn—No. 1 mixed, 2 cars; No. 2 mixed, 10 cars; No. 4 mixed, 2 cars; No. 1 yellow, 105 cars; No. 2 yellow, 54 cars; No. 3 yellow, 10 cars; No. 4 yellow, 3 cars; No. 5 yellow, 4 cars; No. 6 yellow, 3 cars; sample, 1 car; No. 1 white, 1 car; No. 2 white, 4 cars; No. 3 white, 1 car. Oats—No. 1 white, 31 cars; No. 2 white, 104 cars; No. 3 white, 55 cars; No. 4 white, 11 cars; sample, 5 cars.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending Sept. 19 were 499,568 bus. wheat; 50,000 bus. oats and 29,833 bus. of barley.

Geo. A. Magee & Co., 688 Bourse Building, have made application for membership in the Commercial Exchange.

Former Chief Grain Inspector Captain John O. Foering and wife have just returned from Portland, Me., where they spent the summer.

Receipts for the week ending Sept. 20 were 600 bbls. and 2,960,497 lbs. of flour in sacks; 946,750 bus. wheat; 8,953 bus. corn; 244,201 bus. oats; 13,750 bus. rye; 6,604 bus. barley; 17,250 bus. malt and 300 tons of feed.

The Commercial Exchange has received notice that the U. S. Grain Corporation purchases of wheat flour for the week ending Sept. 16th amounted to six hundred and sixty-six thousand two hundred and ninety barrels at prices ranging from $9.76 to $10.75 per barrel.

The U. S. Railroad Administration has notified the members of the Commercial Exchange that P. R. R. Embargo 320, covering shipments for various points in Philadelphia, is extended to cover all carload shipments of hay or straw consigned to all stations in Philadelphia, unless team track or private siding delivery specifically shown on bill of lading. We have advice that shipments are coming in intended for delivery at various merchants' warehouses in violation of existing restrictions.

Receipts of hay have increased during the past week and there is considerable surplus stock still unsold at the principal receiving points. Much of the hay on hand consists of inferior qualities which receivers are trying to dispose of to the best advantage, and for this description prices are low and irregular. A great deal of the hay in the nearby states was overripe when harvested and more or less damaged by the excessive rains at harvest time. It is expected, however, that the later crop will show much better quality than that cut earlier in the season. The crop of hay in the East is large and prices here are easing off to what is believed to be near the values that will be obtained on this year's crop. Receivers are now looking for values to settle around present quotations.

The following flour and grain men were registered on 'Change during the week: Edwin S. Lee, of the Lee Milling Co., Coshocton, Ohio; T. B. Guitteau, grain shipper, Toledo, Ohio; E. M. Stults, of the Buckeye Milling Company, Massillon, Ohio; C. A. Williams, of the Williams Company, Kent, Ohio; Henry M. Allen, president of the Allen Wheeler Milling Co., Troy, Ohio; H. K. Humphreys, representing Cotton Bros. & Co., millers, Bellefontaine, Ohio; Lester Howard, of H. D. Raddatz & Co., grain shippers, Toledo, Ohio; Jay Decker, of the firm of Jacob E. Decker & Sons, pork packers and provision dealers, Mason City, Iowa; H. M. Hudson, representative of the Armour Grain Co., Buffalo, N. Y.; D. M. Yerxa, of the firm of Andrews, Thurston & Yerxa, millers, Minneapolis, and J. Thomas Dickerson, Suddlersville, Md.

CINCINNATI.

George Mosbacker, Correspondent.

There is a shortage in the local terminals of all sorts of cars.

H. Edward Richter, of the Richter Grain Co., was one of the largest buyers of hay at the local plugging tracks the past week.

Percy Collins, of Collins & Co., is again attending to trade duties after an enjoyable vacation of two weeks spent with his family in Michigan.

The partial lifting of the embargo on shipments of wheat to the seaboard was responsible for the distribution of a larger number of permits among local wheat handlers.

Total receipts of grain and hay as reported by the inspection department of the Grain and Hay Exchange for week ending Saturday were as follows: wheat, 129 cars; corn, 29; oats, 30; rye, 11; barley, 13, and hay, 225 cars.

L. G. McMillen, Vice-President of The Gale-McMillen Hay Co., expects to make an extended trip throughout the hay producing sections of Ohio, Indiana and Illinois. He will probably leave the first week in October.

At the first fall meeting and dinner of the Cincinnati Grain and Hay Exchange in the Hotel Gibson Thursday, Sept. 18, Secretary D. J. Schuh was directed to procure definite propositions for the publication of a daily market journal. When established this journal is to be sent to all shippers and receivers from the Cincinnati market. It will contain daily market quotations from all exchanges and will be an organ of propaganda for the boosting of the Cincinnati exchange. A new constitution and by-laws were adopted, a feature being a provision for transferrable memberships. Heretofore memberships could not be sold. An appropriation of $100 was made for the flood sufferers of Corpus Christi, Texas, and this amount will be sent to the Red C headquarters in that district.

Hay prices generally are very high spite the slight downward fluctuation the past few weeks. Since the first of month declines locally of only $1.50 per were recorded for timothy, with m about $3.00 lower, but clover, heavy tures and alfalfa firmly maintained at advances established early in the sea In all markets values for hay are be the average proportioned with other ing commodities, and feeders in many c are reported as turning their poorly co tioned cattle to market rather than the high-priced hay. This, however, is general, and as Cincinnati is particul favored this year as a distributing p for hay of all kinds to supply a large tion of the country, which has suff severely from drought, a good marke confidently predicted by the trade for fall and winter months.

CASH MARKETS.

Wheat.—The movement of wheat disappointingly light here the past w with indications of becoming much sm because of the inclination of farmer hold their grain, especially the best gra for a possible better price. The dem from all sources, regardless of kind or q ity, was urgent, and as a result prices vanced 1 to 1½c for choice heavy, an much as 2c for the lower grades and sm offerings ,without materially increasing ceipts. The hoarded wheat is not likel be marketed until much higher than p ent prices prevail, and with the dem showing increased activity, nothing is dicated to prevent an advancing mar No. 1 red winter, track, $2:27@2.28; N red winter, track, $2.24½@2.26½; No. 3 winter, track, $2.20@2.22; No. 4 red ter, track, $2.16@2.18; No. 5, red wi track, $2.11@2.13; sample as to qua $2.05@2.15. Smutty wheat discounted 2 to 4c per bushel as to grade.

Corn.—Higher futures and generally proved cash demand for shelled corn ated firmer local conditions, and adva of 9 to 11c for all grades as compared a week ago. Receipts, however, were siderably reduced since the recent break, and the country not disposed to or consign as freely, though some rep of unability to ship because of lack of were current. The demand was conf more to white than yellow during week, and the few cars of top grades held at a premium of 1 to 2c on most with mixed only in fair request at 2 t under yellow. The growing crop throu out this section is practically free f frost. No. 1 white, $1.52@1.53; N white, $1.51@1.52; No. 3 white, $1.50@ No. 4 white, $1.47@1.49; No. 5 white, 1. 1.46; No. 6 white, $1.39@1.42; No. 1 yel $1.52@1.53; No. 2 yellow, $1.51@1.52; 3 yellow, $1.50@1.51; No. 4 yellow, $1. 1.50; No. 5 yellow, $1.45@1.47; No. 6 low, $1.40@1.43; No. 1 mixed, $1.50@ No. 2 mixed, $1.49@1.50; No. 3 mixed, @1.49; No. 4 mixed, $1.44@1.46. N mixed, $1.42@1.44; No. 6 mixed, $1.39@

Oats—The strength gained early in week under influences of higher options good local cash demand was mainta to the close and advances of 2½ to 3c recorded as compared with closing qu tions of a week ago. Both retail and vator interests were active buyers of moderate offerings. No. 2 white, 71½c; 3 white, 71c; No. 4 white, 70c; No. 2 mi 70½c; No. 3 mixed, 69½c; No. 4 mi 68½c.

BALTIMORE.

Wheat movement is rapidly slowing up in this district.

The Springfield (O.) Traffic Association has requested the Louisville District Freight Traffic Committee for revision of rates on mill feed from Maysville, Ky., to Flemingsburg, the new rate to be the same as that applicable on flour.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Peoria live stock receipts have been rather light past few days. Saturday's market was strong to 25c higher with bulk of sales $16@17.50. Cattle market steady.

Country offerings of corn and oats the past week have been rather light and farmers do not appear anxious to sell their grain at the present prices. Some of the larger firms report very few inquiries for bids to arrive.

Country reports state the entire corn crop in this district is out of danger of frost and the yield per acre is expected to be large. The recent rains have been a great benefit to fall ploughing for wheat which is considerably behind due to the long drouth.

Saturday's receipts of corn at Peoria were 22 cars and too light to even satisfy the local demand which requires about 50,000 bushels per day at the present time. Market was quoted one cent lower on all grades but even at the decline was high compared with other markets. No. 1 yellow, $1.48; No. 2 yellow, $1.48; No. 3 yellow, $1.47; No. 4 yellow, $1.45½. Oats receipts were 2 cars, fair demand with market about unchanged, No. 2 white selling at 67¾, destination weights.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

The receipts of all grades of straw continue heavy, with but little demand for any of it. Prices are holding barely steady around $11.50 and $12 a ton.

There is not enough ear corn coming into the local market to establish regular quotations, but yellow No. 2 is selling around $1.70@1.75 a bushel. Only a limited quantity is to be had.

The demand for shelled corn is light and the receipts are about equal. Quotations are weaker, but advices from local brokers is that spot cars can be placed around $1.60 @1.62 a bushel for best grades. Other grades are a few cents lower. Total receipts of corn for the period were 33,800 bushels, against 21,000 bushels the same week last year.

The receipts of oats for the last period have been lighter than for the same period a year ago, there being 96,000 bushels bulletined by Supt. O. C. Alexander at the local exchange, showing a decline of about 4,000 bushels. This issue quotes prices slightly higher, but the market is dull and lacks "pep." Demand is unsteady and confined mostly to No. 2 white, while considerable difficulty is had in disposing of the other grades at satisfactory prices. Quotations follow: No. 1 white, 75¼@75¾c; No. 2 white, 74¾@75c; No. 3 white, 73½@74c; No. 4 white, 71½@72½c.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

The Electric Steel Elevator Co. has been declared "regular" under license by the state railroad and warehouse commission.

The Guckeen (Minn.) Farmers Elevator Co. has been incorporated with a capital stock of $25,000. Henry Seglum, F. E. Child, John W. McGoff and Neal Kennedy are the incorporators.

Traveling representatives' licenses were issued to C. H. Green to represent E. L. Welch & Co., and to H. A. Mulholland to represent Cargill Elevator Co. Frank Bergevin has applied for a traveling representatives' license to represent the Johnson-Olson Grain Co.

W. A. Poehler, of the Pacific Elevator Co., who just returned from an inspection trip through southern Minnesota and South Dakota, reports that the party observed but 11 loads of grain moving in the country during six days of traveling. Farm selling is very light.

The following memberships in the Minneapolis Chamber of Commerce association have been transferred: From T. M. McCord to Arthur J. Lahiff, F. S. Butler to Ralph W. Scroggins, H. P. Watson to William B. Ireys, L. A. Howard to Robert B. Kinney, David Askegaard to Eugene Askegaard.

The following requests for transfer of membership in the Minneapolis Chamber of Commerce association have been posted: From J. R. McMillan to Matthew J. Walsh, H. A. Jeub to Martin J. Kammerer. C. F. Clark has applied for a traveling representative's license to represent the Columbia Elevator Co.

The following out of town visitors registered at the Minneapolis Chamber of Commerce last week: H. E. Marshall, New York, O. E. Wilkinson, Boston; F. E. Carr, Providence, R. I.; Fred Corse, Kansas City; P. W. Debs, Chicago; Phillip C. Sayles, Toledo; Frank Faltz, Omaha; W. A. Eastland and J. A. Gallie, Winnipeg; A. B. Black, Buffalo, and W. C. Mitchell, Duluth.

Cash Wheat.—During the early part of the week cash wheat acted very strong and there was a stiff demand for fancy wheat, but after a day or two of strong competition the big mills began to lay back and prices reacted. Offerings of good spring wheat were scarce. Country deliveries reported light as the farmers are holding stubbornly. There has been considerable improvement in the demand for winter wheat. Semi-dark offerings have been taken readily. Durum wheat is in strong milling and elevator demand.

Corn.—The demand for corn has been slow of late because the local market was out of line for shipping and there is only a moderate local demand. Some new crop corn has been purchased on the arrive basis. The corn crop has been pretty well taken care of, but is not in good condition to crib as yet.

Oats.—The demand from elevators has been rather indifferent on the whole, but the daily offerings have been cleaned up regularly if the holders were willing to accept going bids compared with the futures. Receipts are light and the farmers are selling very light supplies. No. 3 white sells at 1@3c under December, No. 4 white at 1@3½c less.

Rye.—The market has been firm to strong compared with the futures and the offerings were in good general demand. Millers were after the choice offerings and paid 1½c over October at the last of the week. Elevator companies were willing buyers at 1c over for No. 2 and there was a shipping demand for Duluth accounts. No. 3 sold at 1@1½c less than No. 2.

CHICAGO.

Newly elected members of the Board of Trade are C. D. Edenburg, L. H. Worth and A. F. Broderick.

Memberships in the Board of Trade suffered a decline this week, one having sold at $10,300 net to the buyer, being a decline of $550 from the previous high.

The annual pilgrimage to California during the winter season has started and John Inglis, the well known crop statistician, is among the advance guard.

Permit has been issued covering the erection of concrete storage of grain for T. W. Keelin at 4553 Lexington street. The MacDonald Engineering Co. is the architect.

Examiners of the Interstate Commerce Commission have recommended that the complaint of the National Council of Farmers' Co-operative Associations against new rates on coarse grain be dismissed.

Chicago friends of Chas. M. Armstrong, an old timer on the Board of Trade, have been advised that he was injured in an automobile accident at Pasadena, Cal. It is not believed that his injuries will prove fatal, however.

John W. Eckhart, appointed chairman of Chicago's Fair Price Committee, resigned the position within a week after his acceptance, as his health would not permit devoting so much attention to the scheme as would be required.

Director R. H. Aishton of the Northwestern region of the U. S. Railroad Administration has issued notice that permit regulations have not been modified to include maize, kafir corn and feterita and they should be handled the same as other grain so far as permits are concerned.

Among visitors to the Chicago Board of Trade last week were Alexander Hyman, Hibernia Bank Bldg., New Orleans; R. P. Macauley, Atkinson, Ill.: G. Rittmueller, Addison, Ill.; J. H. Jones, Hoopeston, Ill.; F. Thompson, Kankakee, Ill.; A. E. Akers, Quincy, Ill.; and Mr. Gase, of Peotone, Ill.

A. W. Carver, former manager of the Farmers Elevator at Dayton, Ia., and later traveling Iowa territory for a Chicago firm, has just made a connection with Moses Rothschild Co. to represent this firm in Iowa and will start on his duties at once. Mr. Carver will make his headquarters at Davenport, Ia.

Logan & Bryan, Chicago, have now the largest private wire system in the world, extending from coast to coast and from the Canadian Northwest to the Gulf of Mexico. They have leased Room 5 in the Board of Trade Bldg. and it is now fitted up so that 75 wires and 50 operators are in communication with all parts of the country.

TOLEDO.

Carl Bryant, Correspondent.

Lieut. Siva Bender, with Uncle Sam three years from the Mexican border to France, is back on his old job with Southworth & Co.

Phil Horn, of Horn Brothers, Monroeville, O., and member of the Toledo Produce Exchange, spent Saturday with his friends on the floor.

The steamer Arthur Orr unloaded 140,000 bushels of hard winter and soft winter at the East Side Iron Elevator last week. The wheat is owned by the Grain Corporation and it is understood that 1,000,000 bushels of this wheat are on the way to Toledo.

The meeting of the Michigan Bean Jobbers' Association at Detroit this week was attended by George Forrester of The E. B. Slawson Co., Bill Cummings and Joe Streicher of J. F. Zahm & Co., Fred Camper of The S. W. Flower Co., and George Woodman of the Rice Grain Co.

Bill Cummings, of J. F. Zahm & Co., toured over Ohio and Indiana last week and found most of the elevators well supplied with oats, while wheat has been fairly well cleaned up. He says many are inclined to hold their oats for higher prices. The dry weather of late, together with high winds last week, played havoc with the corn in shock and corn husks flying through the air was a common sight.

Cash markets here were firmer last week along with the strength in futures. Receipts have been very satisfactory and were oats moving as they should at this time of the year business here would be greater than for several years. With seaboard situation clearing Toledo dealers have been getting their share of the limited number of permits issued and only a small percentage of receipts are going to local mills. No. 1 red is being booked at basis of $2.24, domestic rate of 23c to New York, with offgrades at established discounts. Cash No. 2 white oats sold at 70c, Toledo rate point. Corn receipts are so small that it is hard to determine the price, but No. 3 yellow in store was quoted Saturday at $1.51. Receipts for the week: Wheat, 278 cars; corn, 16; oats, 48; rye, 45; barley, 1.

OMAHA.

Leigh Leslie, Correspondent.

Charles W. Adams, Manager of the Flanley Grain Company, has returned home from Estes Park, Colorado, where he spent a month.

There has been a light movement of grain to this market in the last week—due to a car shortage. The car situation is admittedly very bad, nor is any marked improvement in it likely in the immediate future.

Frank O. Lenoir will be with Rothschild Grain Co. at Atlantic Iowa, and will buy cash grain. Formerly with Flanley at Sioux City and Milwaukee, just returned from France, was first lieutenant in the army.

Julius H. Barnes, United States Wheat Director, will deliver an address to wheat handlers and producers at the Fontenelle Hotel in Omaha, September 25. In the evening of that day the Bankers' club of Omaha will give a banquet at which Mr. Barnes will be guest of honor. Members of the Grain Exchange will attend the banquet.

Rainfall Has Not Changed.

W. F. Crumb, weather observer at Fairbury for the last twenty years, has prepared and published an article showing that the rainfall for Nebraska has not changed but that as the Rocky Mountains are approached the rainfall decreases.

This article made up from the government records, some of which extend back forty years, shows that the counties along the Missouri river get the highest rainfall, both for the year and during the crop

season, and that the rainfall decreases from the Missouri river west.

Discovery of New Oats.

Discovery of a new and improved variety of the Khersion oat seed by Prof. T. A. Kiesselbach, crop department of the University of Nebraska, has resulted in the increased production of oats, according to E. G. Maxwell, County Agricultural Agent, of Douglas County.

Prof. Kiesselbach developed the seed at the agricultural experiment station at Lincoln, Neb. He furnished the seed to two Douglas county farmers, upon their promise to give it a trial.

The new seed produced 46 bushels of oats to the acre, 10 bushels in excess of the amount produced by the regular seed.

ANOTHER GOOD WORD FOR FERTILIZER.

"As a final precaution against an outbreak of Hessian fly next year, officials at the Ohio Experiment Station recommend the use of heavy applications of fertilizers, ranging from at least 200 to 300 pounds of acid phosphate per acre.

"Later sowing than general is recommended, so that as the fly emerges there will be no young wheat stalks for it to deposit eggs upon. The disadvantage of late sowing can be made up by heavy application of fertilizer.

"Entomologists are alarmed over the fact that there is such a large amount of volunteer wheat growing in stubble fields which will be infested by the fly and may aid in the outbreak. The volunteer wheat should be destroyed as much as possible, it is stated.

"Where there is volunteer wheat in stubble seeded to clover immediate clipping of the stubble is important."

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	17,483,000	33,749,000
Milwaukee	6,015,000	8,342,000
Minneapolis	4,308,000	6,997,000
Duluth	298,000	320,000
St. Louis	4,093,000	5,610,000
Toledo	835,000	3,288,000
Detroit	347,000	1,021,000
Kansas City	1,570,000	5,715,000
Peoria	1,276,000	2,393,000
Omaha	1,682,000	4,946,000
Indianapolis	2,511,000	3,704,000
Total	40,418,000	76,085,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Sept. 20, 1919.	Sept. 13, 1919.	Sept. 21, 1918.
Chicago	2,120,000	1,857,000	2,498,000
Milwaukee	617,000	960,000	945,300
Minneapolis	568,000	683,000	1,043,000
Duluth	13,000	42,000	243,000
St. Louis	628,000	633,000	845,000
Toledo	85,000	132,000	198,000
Detroit	74,000	64,000	56,000
Kansas City	147,000	150,000	518,000
Peoria	145,000	184,000	184,000
Omaha	178,000	254,000	896,000
Indianapolis	319,000	255,000	408,000
Total	4,894,000	5,214,000	7,834,000
Shipments	3,227,000	3,626,000	4,980,000

After a series of tests conducted at the North Dakota Experiment Station it was found that corn produces the best yield in silage as well as quality if cut when the kernels are glazed. Greatest benefits to beef cattle are also obtained when the silage is made from glazed or dented kernels.

Exports from Australia.

A cable from Australia the first week in September says there is at present awaiting shipment to Great Britain 3,285,000 tons of wheat, 132,000 bales wool, 50,000 tons meat, 23,000 tons rabbits and 60,000 tons of other foodstuffs.

Record prices are being paid for cattle and sheep in Australia, with prime steers selling at $168, cows at $122 and beef steers at $105, as compared with $60 to $75 a head during pre-war days.

Cash Prices of Mess Pork.

Following is the monthly range of cash prices of mess pork at Chicago for a series of years (fractional ½ cent omitted):

	1919.	1918.	1917.	1916.	1915.	1914.	1913.

Buy One "Mutual"

(2 ton—3½ ton—5 ton)

Put it into your hardest service, side by side with the truck or trucks that you now consider to be the "best." Keep a careful record of its ton-mile performance, all costs counted.

"Yes, let us buy one 2-ton MUTUAL and watch its work. Their argument seems sound and their specifications are remarkably good."

MUTUAL TRUCK

America's Greatest

EBODY *had* to build *"America's Greatest Truck"* for the time is ripe for another step forward in truck design, engineering construction—a step toward greater endurance, better control reater economy under heavy haulage conditions.

ere were so many good trucks on the market that it was no small o create a machine that would be recognized immediately by every tent authority as enough better than the best of the rest to justify advertising it as—

"America's Greatest Truck"

e chose the safe way—analyzing all modern trucks and studying the es that gave the most satisfactory service under the most exacting ons. Then we spent a year *engineering* these greatest units into one -truck"—adopting each unit in so large a size that the MUTUAL ould always be safely given a

50% Overload

AND, after it was all completed, we figured our costs, adding only 9% for *capita* share—and were pleased, mightily, to find that we could offer this truck at a remarkably attractive price.

How Can We Over-size, Over-power, Yet UNDER-PRICE the MUTUAL TRUCK?

Because our factory is strictly modern and our "overhead" low, with no excessive salaries.

And our financial burden is light, as we need provide for dividends on a relatively low capitalization.

For our Company is, in a large sense, a community enterprise, in which the dominant purpose is to build a vast industry that will ultimately bring thousands of skilled workers to Sullivan County, Indiana, by making this county not only the home of "America's Greatest Truck," but of America's Greatest Truck *company*.

SPECIFICATIONS (2 Ton)

Comparing with most 3 ton trucks

onsin 4x6 "three-ton" Engine.
ex Co.'s Duplex Governor.
inghouse Electric Starting and Lighting.
-Shaw Universal Clutch.
r Universal Joints—3 joints in shaft.
r-Transmission (3 ton size). 4 Speeds and erse.
on 2½-ton Worm-drive Rear Axle (built for % overload).
on Ball-Bearing Steering-Knuckle Front Axle.
h & Bingham Pressed Steel Frame.
er Chrome Vanadium Springs.
d-Brook Oilless Bushings thruout.
n Metal Wheels for Solid Tires.
on Steel Wheels for Pneumatic Tires.
ear or Firestone 36x4 solid front tires.
ear or Firestone 36x8 solid rear tires.
ear or Firestone Pneumatic Tires (extra).
Steering Gear—20 in. wheel.
x Radiator—Cast Tank Type.
Magneto—dust proof, water proof.
berg Carburetor.
l Muffler—12 sections.
her-tite Cab, fully enclosed. Lazy back seat.
ic Steel Castings—at vital points.
llon Gasoline Tank.
allon Reserve Lubricating Oil Tank.

OUR Directors and Stockholders include 500 wealthy farmers, stock-men, coal mine owners, proprietors of natural gas and oil properties and the leading business and professional men of the City and County of Sullivan, Indiana.

They realized that the way to build a great industry, *quickly* is to give truck buyers more for their money than they can secure in any other truck at any price. And, that, by building, in very truth—

"America's Greatest Truck"

and sacrificing their own immediate profits, as *investors* they will all share in the permanent benefits of enlarged home markets for their products.

Every buyer of a MUTUAL TRUCK, therefore, gets the benefit of a county's ambition to make Sullivan the home of an industry that will soon cover acres of busy buildings.

Send for circular giving the super-specifications on which we base —and prove—our claim.

MUTUAL TRUCK COMPANY

Sullivan, Indiana, U. S. A.

Regular Equipment

Tho' our prices rule lower than are asked for high-class trucks of equal rating, and tho' the Mutual is **oversized** thruout we give as part of regular equipment many things that are offered only as high-priced "extras" by other truck makers including—

Electric Starting and Lighting.
Metal Wheels—costing us 55% more than wood.
36x8 rear tires, where others give 7 in. or 4 in. dual.
"Weather-tite" easy-seat cab, worth at least $150 extra.
Over-size pressed steel frame.
Bound-brook Bushings.
Four Speeds forward and reverse.
Electric Steel Castings at vital points.
Reserve Lubricating Oil Tank.

TRADE MENTION.

It is stated that the car shortage, which is beginning to be seriously felt in many parts of the country, is taking its effect upon the sales of motor trucks. One motor truck concern alone increased its August sales 64 per cent over those for July and it said the sales for September continued at the same high rate.

H. I. Baldwin & Co., of Decatur, Ill., are sending to their friends and customers an article which will serve and be a reminder of their desire to work closely with the recipients. It is a 'phone index and is so arranged to be hung over the mouthpiece of the telephone as a constant reminder of the service offered by this live-wire firm.

O. C. Swan, heretofore and for many years, engaged in sugar manufacture, as manager of sugar factories, has acquired an interest in the T. B. Hord Alfalfa Meal Co., at Central City, Neb., and will have supervision and control of the manufacturing department of the Hord Alfalfa Meal Co.'s plant. Mr. Swan is well known in the sugar business, and his experience in making sugar qualifies him in the highest degree to manufacture the Hord products which have been pioneers in the alfalfa milling industry.

"Small's Woodpecker Chips" is the title of a very attractive and classy house organ issued by that progressive seed house, W. H. Small & Co., of Evansville, Ind. In the title page it is stated that it is published by Small's Woodpecker Seed Association, G. M. Purcell, president, an organization of mutual benefit to its members and to the advancement of the business of W. H. Small & Co. in an honorable way. The little magazine contains 16 pages attractively gotten up, full of pithy and pertinent articles of direct interest to the seed business, Evansville, Ind.) the firm of W. H. Small & Co.

If this paper pleases you, kindly ommend it to your neighbors in trade.

Kindly say: "I saw your ad in PRICE CURRENT-GRAIN REPORTER."

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

FLOUR NOTES.

The United States Grain Corporation is advertising through the medium of the daily press that it is prepared to sell to wholesalers and jobbers soft or hard winter straight wheat flour in 140-lb. jute sacks at $10.25 per barrel in carload lots. The following stipulations, however, are tacked to this offer:

"Jobbers and wholesalers purchasing flour from the Grain Corporation must guarantee not to sell at more than 75 cents per barrel additional, and the jobber or wholesaler must require that the retailer buying from them will not sell at more than $1.25 per barrel additional to wholesaler's price to them in original packages, or at a price not higher than 7 cents per pound for broken packages of any size."

The effect of this campaign to stabilize flour prices has made the trade of regular flour jobbers and distributors rather quiet in Baltimore.

The Globe Milling Co. of San Francisco, Cal., has purchased the properties of the Phoenix Milling Co. in Sacramento, Oakland, Fresno, Placerville, Grass Valley and elsewhere for approximately $1,000,000.

The Interstate Milling Co. of Charlotte, N. C., is doubling the capacity of its flour mills at a cost of $100,000, giving the plant a daily capacity of 1,200 barrels. A warehouse addition is also to be erected at a cost of $30,000.

A mill with a daily capacity of 2,000 barrels of flour will be built by Geo. W. Hoyland Flour Mill Co., Kansas City, Mo. Contract for the building and machinery has been awarded.

The Hudson Milling Co. of Hudson, Mich., has been incorporated with a capital stock of $60,000 to do a general milling business. Incorporators: Samuel B. Gaskill, Claude G. Elliott, Chas. F. Kefuss and others.

The offices of the Northwestern Milling Co. are being moved to Minneapolis from Little Falls, Minn. The headquarters will be at 206 Corn Exchange.

The controlling interest in the Larrabee Mills, Hutchinson, Kans., has been sold to the Washburn-Crosby Co. of Minneapolis, Minn.

Geo. B. Ross, former state grain inspector, and J. D. Zimmerman, both of Sterling, Kans., announce their purchase of the Ottawa Flour Mill at Ottawa, Kans., owned by the Midland Milling Co. of Kansas City, Mo.

The State Line Milling Co. of Kiowa, Kans., will commence work on an extension to be built at once. The mill will be enlarged to between 200 and 300 bbls. capacity and an additional warehouse 20x50 is to be constructed.

The United States Grain Corporation announces that its purchase of wheat flour for the week ending Sept. 16 amounted to 666,290 barrels at prices ranging from $9.76 to $10.25.

Albers Bros. Milling Co., with headquarters in Portland, Ore., has increased its capital stock from $2,500,000 to $5,000,000. The Albers Co. recently bought a million dollar property in Oakland, Cal., is completing a $100,000 flour mill in Portland, has bought ground on which its Seattle property stands and is contemplating purchase of cereal mills in Ogden, Utah.

FLOUR MARKETS.

NASHVILLE.

Nashville, Tenn., Sept. 22.—Flour trade in the Southeast last week was without important change. Buyers for current demands are showing conservatism, but the aggregate volume of business is healthy. High grade flour is the best seller. Prices are maintained, with the high grades firmest.

Southeastern flour mills, with capacity of 221,790 bbls., had output last week of 192,233 bbls., or 86.6 per cent of capacity, which compared with 171,318 bbls and 82.5 per cent of capacity of mills reporting the preceding week, and 54.3 per cent the same week in 1918. Quotations: High grade soft winter wheat patents, f. o. b. Ohio river points, $11@11.50; standard or regular patents, $10.15@10.45; 100 per cent flour, $10.

DETROIT.

Detroit, Sept. 20.—Demand for flour continues disappointing but the mills are able to keep running pretty steadily. The market is firm owing to the decline in bran and middlings. Salesmen say buyers are holding off and demanding lower prices, making selling a very difficult job. The market for mill feeds is easy and quiet. Quote: Fancy spring patent, $13.50; fancy winter patent, $12.75; second winter patent, $12; straight, $11@11.25 per bbl.; bran, $44; standard middlings, $56@57; fine middlings, $64; coarse cornmeal, $64; cracked corn, $65; chop, $5 per ton.

DULUTH.

Duluth, Sept. 20.—Flour trade showed improvement on this market during the last few days but millers were still compelled to curtail their outputs somewhat on account of the light receipts of spring wheat on this market with the high premium paid for the best grade wheat, quotations in patents were advanced 25c. The mills at the Head of the Lakes received orders during the week from the Government for durum flour to be shipped to Italy.

Quotations per barrel, in carlots at mills here follow: Family patents, jute, $11.75@12; bakers' patent, jute, $11.50@11.75; first clears, jute, $9.25@9.75; second clears, jute, $7.25@7.50.

NEW YORK.

New York, Sept. 20.—Business transa tions in flour during the past week w of a sporadic character. On the surfa the market appeared quiet and with much feature, but occasionally a g round lot of sales came to life and it v evident that buyers were absorbing fl

prices were considered satisfactory. of the mills, especially in the North- were very firm on the strength in wheat there, while many complaints all sections indicated the shortage of Toward the close of the week North- flour advanced, and wires received here stated that cash wheat in those ts was in active demand and the stronger. As a rule, buyers are in- to be rather conservative on account unsettled economic conditions, but ade at large can see no reason why should go lower as long as cash continues to advance. Spring s were quoted at $11.50@12; first clears at $9@10; soft winter nts, $10.10@10.40; Kansas straights, 11.25; Kansas patents, $11.40@ and Kansas first clears, $9@10.25. rnment purchases of flour during eek were about 666,290 barrels and ranged from $9.76 to $10.25. The ment in addition made purchases of clears on Thursday, but failed to e either the amount taken or the paid. It was rumored, however, alues ranged from $8.25 to $9.50, ac- g to quality.

DES MOINES, IA.

Moines, Sept. 20.—Flour sales have ncreasing the last week and the ty of Northern and Western mills advanced their prices 25c per bbl. rn flours are quoted at $12.25 per Western flours at $11.85 per bbl. unts and jobbers are now buying

MILWAUKEE.

aukee, Sept. 20.—A much steadier proved condition surrounds the local arket, with a good demand for both d wheat flours keeping the mills well occupied. Shipping directions od. Flour production of Milwaukee or the past week reached a total of barrels, or approximately 72 per cent l capacity. Of this, 12,500 barrels wheat flour and 5,000 barrels were ur. Current quotations, in carlots, l., in cotton, are: Spring wheat $11.60@11.80; straight, $11.05@11.25; lear, $8.50@9.25; rye flour, pure, $7.60@7.80; rye flour, straight, $7.10 rye flour, dark, $5.75@6.25. Corn s nominally quoted at $3.75; corn- white, $3.60; and corn grits, $3.90@ 00-lb. sacks.

BOSTON.

n, Sept. 20.—Conditions in the flour uring the past week remained about ne as the previous week with no l change noted. Prices are quoted he same as last week with the ex- of special spring patents and soft clears, the former being quoted and the latter lower. The following were quoted for mill shipments: heat, spring patent, special, $12@13; patent, standard, $11.45@12; hard patent, $11@12; soft winter patent, 11; soft winter straight, $10.30@ oft winter clear, $10.10@10.30. Re- or the week ending September 20th ,490 barrels.

PHILADELPHIA.

delphia, Sept. 20.—Flour receipts past week were 600 bbls and 2,960,- nds in sacks. Generally speaking, quiet but prices are firm and close, per bbl. higher in sympathy with ent sharp advance in wheat at olis. A fair inquiry prevails, how- spring and hard winters, but soft are neglected. Old springs are nd fancy brands which are wanted d full prices. A fair business has ne in new springs and in Kansas, e, and prices were well supported. uote per 196 lbs., packed in 140- sacks: Winter straight, Western, .10@10.40; do., nearby, new, $9.75@ sas straight, new, $11@11.25; Kan- t patent, new, $11.25@11.75; spring tent, new, $12@12.25; do., patent, .50@12; do., first, clear, new, $9.25 rye flour, $7.60@7.90 per bbl. in s to quality.

CINCINNATI.

nati, Sept. 23.—The flour market ded little attention the past week, some substantial purchases were Prices were unchanged, but expressed confidence in an early e of values as patents selling 10.65 are regarded as low enough, considering the firmness of the wheat market. The United States Grain Corporation notified all mills, jobbers and bakers in this zone (No. 9) that it would receive offers of first clear flours for 30 days shipment for export on only one day, until noon of last Thursday, Sept. 18. Quotations for winter patent, $10.50@10.90; hard patent, $11.50@11.80 per bbl.; Kansas bakers' patent, 140-lb. jute, $10.50; and corn flour, 100-lb. sacks to be included, $3.75.

BALTIMORE.

Baltimore, Sept. 20.—Most of the nearby mills are busy grinding flour for Government orders and this buying from week to week prevents any pressure of offerings. The local or domestic demand for flour shows no particular life, although known brands of straights and clears are coming in for more or less constant attention. Rye flour is dull and lower. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $11.75@12; spring straight, $11.25@

11.50; winter patent, $10.50@10.75; winter straight, $9.75@10; rye flour, pure to blended, $7@8.

KANSAS CITY.

Kansas City, Sept. 20.—Millers reported an active demand for the better grades of hard wheat flour this week. Trade was not checked by the advancing prices of wheat and flour. The fact that many mills in Kansas were tied up by car shortage increased the pressure on Kansas City mills. Shipments from here were accomplished by coopering wheat cars for flour. Millers grinding red or soft wheat reported a continued slow trade, but said there were plenty of old orders to be filled. This flour is at a considerable discount under hard wheat flour, but it sells only to family trade, principally southward.

Very little, if any, of the Government purchases of straight grade flour were made in the Southwest, because prices asked were too high in comparison with those of the Northwest and middle states. Millers here are awaiting the result of their offers of first clear, which is an inferior grade.

Total production of flour in Kansas City for the week was 84,600 bbls., against 84,000 a week ago and 74,000 a year ago.

Flour prices, based on carlots, per bbl., sacked in cotton, 98-lb. packages, this week and a week ago are given as follows:

	Sept. 20.	Sept. 13.
Hard wheat—		
Short patent	$11.00@11.50	$10.90@11.30
Long patent	10.60@11.30	10.50@10.90
Straight	10.50@10.90	10.00@10.40
1st clear	9.00@10.00	9.00@10.00
2nd clear	8.00@ 9.00	8.00@ 9.00
Low grade	6.00@ 7.00	7.00@ 7.50
Soft wheat—		
Fancy patent	10.60@11.00	10.60@11.00
Standard patent	10.30@10.60	10.30@10.60
Clear	9.50@ 9.90	9.50@ 9.90
Low grade	7.50@ 8.00	7.50@ 8.00

CHICAGO.

Chicago, Sept. 20.—Purchases by the United States Grain Corporation of first clears have proved very satisfactory to the millers of the country for there had been quite an accumulation of clears in all positions. Stocks of flour at Chicago are said to be ample for all requirements at this time but considerable of it will be shipped shortly to outside points. Offerings from the Southwest have been reduced and shipments from the Northwest have not been so very heavy as yet. Spring wheat flour and rye flour have advanced somewhat. Premiums paid by the millers for the desired wheat has forced higher prices on all grades of spring flours and the reported export demand of Germany for rye flour has caused that product to advance as well. Minneapolis brands of spring wheat flour are quotable in carlots at $11.80, first clears $9.50@9.75 in carlots.

AMERICAN STEEL & WIRE CROP REPORT.

The Weekly Crop Report of the American Steel & Wire Co., Sept. 20, says that practically all corn is out of frost danger; much of it is in shock, and silo filling is the order of the day. Cotton—Actual harvest of the crop is confirming the low yield estimate. Forage crops in general are good, and livestock is doing well. Owing to dry and hard soil conditions fall plowing is much delayed, and the wheat acreage will be greatly lessened.

To date there have been no reports of any severe frost damage from any locality. Frosts injured tender vines and garden stuff in Central and Western Washington. The far Northwest has had good rains which were beneficial. Some Eastern states are too wet, while the Central States need rain which during the latter part of the week have been manifesting themselves in the form of local showers.

Since the signing of the armistice 900,000 emigrants have sailed from New York, most of them bound for southern Europe. The returning aliens saved an average of about $3,000 each, and included Italians, Greeks, Jugo-Slavs, Syrians, Croats, Serbians, Kurds and Roumanians. Their exodus has nearly depleted the labor supply in several mining towns and small industrial centers. The 260,000 sailing in the last three months paid $1,000,000 income taxes.

Alabama is coming to the foreground as a producer of pork products. In co-operative hog marketing the state is rivaling Denmark. From July 1, 1918, to June 30, 1919, 47 counties in Alabama marketed 5,219 carloads of hogs, of which 1,195 cars consisted of co-operative shipments.

HIGHEST MONTHLY AND YEARLY PRICES OF HOGS.

Highest monthly and yearly prices of hogs at Chicago, per 100 pounds, for the term of years indicated, collated by THE PRICE CURRENT-GRAIN REPORTER from Chicago *Daily Drovers' Journal* reports:

FARM PRICES.

The level of prices paid producers of the United States for the principal crops decreased about 3.4 per cent during August; in the past 10 years the price level decreased about 1.2 per cent during August. On September 1 the index figure of prices was about 8.3 per cent higher than a year ago, 13.6 per cent higher than two years ago, and 87.5 per cent higher than the average of the past 10 years on September 1.

The prices of meat animals—hogs, cattle, sheep, and chickens—to producers of the United States decreased 0.3 per cent from July 15 to August 15; in the past nine years prices increased in like period 1.8 per cent. On August 15 the index figure of prices for these meat animals was about 9.5 per cent higher than a year ago, 31.4 per cent higher than two years ago, and 87.3 per cent higher than the average of the past nine years on August 15.

The prices on September 1, 1919, in percentages of their five year average September 1 prices before the war, viz, 1910-1914, follow: Flaxseed 303, cotton 261, corn 253, wheat 235, potatoes 233, apples 231, chickens 216, buckwheat 214, eggs 212, butter 201, barley 196, rye 192, sweet potatoes 188, oats 183, hay 176. Similarly, prices on August 15 were as follows, 100 representing the average of August 15 prices for the five years 1910-1914: Cotton seed 336, wool 293, clover seed 270, hogs 258, lambs 228, cottonseed meal 225, sheep 205, onions 202, veal calves 195, milch cows 192, bran 188, beans, 187, cabbage 184, beef cattle 183, peaches 169, peanuts 165, milk 161, alfalfa seed 146, timothy seed 129, broom corn, 129, horses 88.

Following are details of prices paid to farmers, compared quarterly on dates indicated, as reported by the Bureau of Crop Estimates:

	1918 Aug. 15.	1918 Nov. 15.	1919 Feb. 15	1919 May 15.	1919 Aug. 15.

BROOM CORN.

General rains were received in New Mexico, western Kansas and southwestern and northwestern portions of Oklahoma the past week and in some districts anxiety is felt regarding harvesting the crop without damage. There is little cause for worry in southern Oklahoma as harvesting is very well advanced in that part of the state. Buyers are taking all offers in the Lindsay sections but there is a decrease in deliveries on street markets and buyers are driving out into the country to make their purchases. Prices are somewhat higher and the *Broom Corn Review* quotes values at $150@300 according to quality. Offerings at this time do not compare to those of a month ago. A sale of dwarf corn was reported from Carnegie at $200, average prices ranging from $115@180. Prices in the El City-Sayne area rule from $125@175 according to quality. Except in a small way offerings in the dwarf areas are not expected to be in marketable condition until after October 1. The Wichita market also reports higher prices and a good demand exists for old corn, the visible supply of which is very light. New corn rules from $110@130 on Western with $300 on best Lindsay corn. South Texas offered at $125@250. In central Illinois it is estimated that 50 per cent of the crop has been sold and a very heavy movement is reported from Arcola. South of Mattoon there is a decrease in the buying. Quality is above the average and will grade about self working generally. Values range from $300 to $375.

The Department of Agriculture is urging Southern farmers to store their cotton and stop waste, saying that cotton raisers are losing $30,000,000 annually on an average from weather damage to bales of cotton left in open. Enough "pickings" to represent at least $2.50 are lost from each bale exposed to the weather, and frequently losses are greater.

Field Seeds

The Andrews Seed & Grain Co., of Sherman, Tex., has been chartered with a capital stock of $10,000 by P. T. Andrews, T. H. Andrews and F. E. Valentine.

Seeding of wheat in central and western Kansas is reported the worst in 20 years; too dry. Only ten days until seeding time ends, and acreage may be cut down.

Cowpeas and velvet beans in the South are looking fair to good says the American Steel & Wire Co.'s crop report, but the acreage is small owing to scarcity of good seed.

The Iowa *Weather Crop Bulletin* Sept. 16 reports spring seedings of timothy and clover as well as fall seeding of alfalfa seriously in need of rain. Second cuttings of clover for seed are reported as yielding poorly.

Wm. Ruben, a farmer near Baudette, Minn., is reported to have made a profit of $273.90 per acre on 16.8 acres seeded to clover. The field produced 153 bus. of clover seed at $27 per bu., and 38 tons of hay at $22 per ton, and the cost of producing the crop was $366. In addition to the above income there will be quite a sum from the sale of honey for a number of hives were kept, the bees feeding on the clover. The land value of his farm does not exceed $30 an acre.

In recent advices sent C. A. King & Co., Toledo, a Wisconsin seed dealer writes: "It looks as though this state had a fair clover crop. It is well filled in this section; weather has been dry lately which should mean good quality." Minnesota firm reports yields of mammoth of four to nine bushels with medium yielding one to two bushels. From eastern Illinois a dealer says, "Clover almost a failure, nearly all our seed will have to be shipped in and demand will be large. Farmers will pay the price as clover is going to take considerable of the corn acreage next year."

Selection of seed corn should be made now that the crop is ripe and should be taken from corn in the field rather than later on for the general appearance of the stalk, the number of ears it bears, color, etc., should all influence selection of seed for next year's crop. The cobs should be filled with large, thick kernels which run well to the butt and right on out to the tip and should be of uniform color. After husking the cobs should be strung up and hung in a cool place to dry and later on kernels from each cob should be tested for germinating quality. It has been estimated that the seed from 15 large cobs will sow an acre of corn land.

Buffalo Seed Prices.

Quote grass seed prices at Buffalo, Sept. 17, as follows: Timothy, ch., $5.40@6.80; clover, red, ch., $29@30; alfalfa, $17@18 per bu; alsike, $25@26; white clover, $52@53 per cwt.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Sept. 20, 1919, as reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs...	32,370	9,628	30,250	65,900
Clover, lbs.....	68,072	.....	31,176	20,400

Louisville Seed Market.

LOUISVILLE, KY., Sept. 20.—A fair rain on Friday helped things somewhat, but rain is needed as fields are too dry for plowing, and things are at a standstill. Dealers claim that farmers are putting off seed buying until they are ready to plant. Timothy is moving fairly well, but red clover is too high. Kentucky bluegrass is stronger and in better demand at prices ranging around $3.25 a bushel. Orchard grass is quiet, some movement being shown at around $3.20 a bushel. Red top is being quoted in a jobbing way at around $17 a hundred.

Kansas City Seed Market.

KANSAS CITY, Sept. 20.—The seed market developed no striking features this week. Receipts were light, consisting mainly of timothy seed. Blue grass seed has nearly all been marketed. Clover is still doubtful as to seed production, but some has been saved in Missouri and Iowa. Rains during the week were beneficial to the growing crop of alfalfa. Cane seed may be regarded as made, as moisture will fill it out. Only the frost danger confronts the crop, and most of the fields are safe. The harvesting and threshing of millet has been going on for some time, but Kansas City dealers report no receipts. No sales have been mentioned.

Seeds are quoted nominally, as follows, per cwt.: Alfalfa, $17@23; timothy, $9.50@10.25; blue grass, rough, $10@15; cleaned, $17@26; meadow fescue, $20@25; clover, nominally $35@45; cane and millet, not quoted.

Duluth Flaxseed Market.

DULUTH, Sept. 20.—Trading was active in the flaxseed market during the last week. On the net result, spot seed and the near future declined 10 cents, while October and December gained 3 cents each, and November weakened 2 cents. Prices sagged during the first four days' trading, and losses extending to 25 cents were shown. With the development of bidding on Friday Saturday, recoveries of 15 cents made.

It is intimated that a substa short interest is still uncovered in September future on this market. in October at Winnipeg, and the s tion may become interesting for tra at that end of the game by the en the month. That condition is rega as in a measure indicated in see arrive during September being qu

Nov.		4.26	3.25	2.25	2.91	2.34	2.08
Dec.		4.21	3.37	2.31	2.86	2.18	2.10

Toledo Seed Market.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Sept. 20:

	Rng. for wk. High.	Low.	Close Sept 20.	Close Sept. 13.
Clover—				
Cash, new....	$30.35	$29.25	$29.80	$30.50
October	30.50	29.40	29.95	30.60
December	29.50	28 50	29.35	29.60
January	29.55	28.55	29.40	29 65
March	29.70	28.60	29.45	29.80
Alsike—				
Cash	25.25	25.10	25.40	25.20
October	25 50	25.25	25.45	25.50
December	25.70	25.50	25.65	25 70
March	26.30	25.85	26.10	26.30
Timothy—				
Cash, old.....	5 32½	5.30	5.35	5 30
Cash, new....	5.65	5.50	5.35	5.50
October	5.60	5.45	5.65	5.45
September ...	5.67½	5.50	5.65	5.50
December	5.65	5.52½	5.75	5.55
March	5.80	5.70	5.85	5.70

SEED SITUATION.

QUALITY GOOD.

ILLINOIS (6)—A slow rain started here at about 3:00 a. m., Sept. 17th, to relieve us from a long drought, which was appreciated by man and beast. It will help fall plowing, which could not be done heretofore in heavy soils.

Clover hulling has started and some is of good quality, but the quality is cut down by the grass-hoppers; still, there will be some clover and timothy seed to offer. In this part, wheat and oats were satisfactory crops, and the corn crop looks good.—*Stoecker Seed Co., Peoria, Ill.*

DEMAND BIG.

MONTANA.—We find that there will be a great demand the coming season for all kinds of forage seeds as well as coarse grains and everything will have to be shipped in as our crops have been practically a total failure.—*Snell Bros., Miles City, Mont.*

CLOVER CROP VERY SMALL.

INDIANA (8).—The clover seed crop is practically nothing in this vicinity. A few farmers have small lots. It is turning out about a half to a bushel to the acre and there will not be 10 per cent of the requirements for this locality and we are going to have to ship in seed or else go without.—*Studabaker Grain & Seed Co., Bluffton, Ind.*

CONDITION GOOD.

MISSOURI (8)—Alfalfa has been in good demand and the price ranging according to the demand with an average increase of about $1 per cwt., every eight or ten days.

Fancy seed is bringing about $34 per cwt. at the present. Timothy seed and other seasonable grasses are in fair demand, but the prices are somewhat lower, with the exception of Kentucky blue grass seed, which is very strong at present. The inquiries for timothy are fair, but the seed is not selling in our section, as in former years. This we feel is due to the dry weather. The prospects for a good demand for winter wheat and also for rye for pasture are very promising.

At the present, we are receiving quite a few samples of country run, red clover, but most of same is weedy and full of buck horn and we only have received a very few samples of good, bright seed. To our estimation, the farmers are holding the good seed for higher prices.—*St. Louis Seed Company, St. Louis, Mo.*

St. Louis Seed Market.

ST. LOUIS, Mo., Sept. 20—Offerings of seeds continue light, and consist mostly of clover, timothy and red top seed, the quality of the receipts is fairly good and there is a good demand. Quotations are as follows: Spot seed, per 100 lbs.: Timothy at $8 to $9 for low grade, $10 to $10.50 for fair to $10.70 to $11 for choice; alfalfa at $15 to $25; clover at $41 to $44 for high-grade; $35 to $40 for average country lots; $18 to $30 for heavily buckhorn-mixed and $5 to $15 for very poor; alsike at $35 to $40 for high-grade; redtop at $12.50 to $15 for machine-cleaned (chaffy less) up to $16 for extra fancy solid seed.

Timothy Good Stuff.

There's a feeling generally that timothy is good property. Movement to Toledo has been very light so far on the new crop. It will increase soon. Other markets have absorbed the movement so far. Think a lot of it was hedged here. Been well absorbed. Some think over 75 per cent of the new crop has been marketed. Future prices will be determined by the attitude of the holders and what Europe will do.—*J. F. Zahm & Co., Toledo, O.*

Wet Fall and Clover.

Wet weather from now on would be very bullish on clover. "In fall, clover prices go up when umbrellas do." In the long run, averages rule. On this basis, the wets should have their innings this fall. Sometimes the almanac weather sharps go wrong. It may happen this year.

Wet weather would be unfavorable to maturing, cutting and hulling the crop.

The one big clover fact—short crop in Central States—"vest pocket" edition. Country offerings have been light. Even in Wisconsin and Iowa, which were specially favored in this year's clover deal, the marketings are light. In Ohio and Michigan, which were short-changed on clover this year, there's very little clover moving.—*Southworth & Co., Toledo, O.*

Minneapolis Flaxseed Market.

MINNEAPOLIS, Sept. 22.—The demand for flax sloughed off during the week and at present is quiet and featureless. Spot offerings are selling lower compared wtih the futures and the crushers are anxious for the choice seed only. Receipts are a trifle heavier than expected. To arrive offerings moderate and bids much weaker compared with the futures. No. 1 seed on spot sells at 2c over to 4c under Duluth September price, to arrive at October price to 5c over. No foreign seed purchased during the week, though some was offered. Offerings of new Argentine seed smaller at present prices.

Alfred Vivian, dean of the College of Agriculture of the Ohio State University, places the cost of producing a bushel of wheat at $2.57, stating that the reason the farmer can sell his wheat for less than that price is due to the fact that he offers his own labor and that of his family at a very low figure.

Evansville, Ind., Seed Market.

EVANSVILLE, IND., Sept. 16.—Indications are, this year's (i. e., fall, winter and spring) trade will be the heaviest ever experienced. The extremely dry weather has curtailed the plowing of ground for wheat, and unless there is rain in a short time, many acres of wheat will not be sown this fall and will have to go in corn or other farm products, and believe this will have its effect on the demand for seeds. However, even without this condition, we look for a greater trade on seed this year than ever before. Many acres were plowed up and put in cereals and will have to be gotten back in grasses, both for fertilizing and for hay.

Red Clover.—In our section the crop is going to be very short and badly mixed with buckhorn and dodder.

Blueglass.—The Missouri crop has practically all moved into the hands of the dealers. The Kentucky crop has not all moved, due to the fact that the farmers are asking more than the dealers feel they can afford to pay.

Redtop.—The crop is reported extremely short. Some state 60 per cent, others 50 per cent of last year's crop. The quality of the seed we have seen so far is not attractive.

Orchard Grass.—A part of the new crop is already moved. The quality is not as attractive as last year. Prices ranging around $3 per bu. to the farmer.

Millet.—The crop is reported short in Tennessee, the available supply being bought up by parties who feel that Tennessee millet is good property, even at the high figure.

CROP CONDITIONS.

Condition of Spring Wheat.

Condition of spring wheat, and equivalent of 100 in bushels in final yield compared with September condition since 1904 when spring wheat was reported separately from winter wheat for that month, and with August condition prior to 1904, as compiled from Government reports by THE PRICE CURRENT-GRAIN REPORTER.

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

More Cars Needed.

KANSAS CITY, Sept. 20.—On the presumption that the seriousness of the car situation in Kansas is not understood by the Railroad Administration, Governor Henry Allen has addressed the following communication to Walker D. Hines, director general of railroads: "Kansas farmers are being compelled to unload their wheat on the ground because the elevators are full and unable to move grain in consequence of a lack of cars. Recent rains are badly damaging and destroying some of the grain. All over the state mills, large and small, are shutting down because their stocks of flour cannot be moved out, nor additional wheat moved in.

"It is throwing thousands of men out of employment and indirectly must affect the consumer because of a waste of food products. I have had direct information from the local railroad officials that they are doing everything possible with the equipment allotted them and that only action on your part will bring the relief which is imperative.

"It is learned from unimpeachable authority that box cars suitable for shipping wheat have been moved from this section to the Northwe view of the conditions here I app you for such action as will suppl state with a fair share of equip —T. J. T.

The condition of flax in Minne placed at 80% of a normal crop. has been some damage by grassh both in field and in shock. I seems certain that practically all out of danger of frost, with indic Sept. 1 of 2,817,000 bus., compa 3,120,000 bus., final estimate for 1

Beans and Potatoes

rthwestern Washington bean crop 12 was estimated at only 50 or er cent of normal unless rain falls e immediate future and even then crop will be probably not more 75 per cent of normal. The acre- vas unusually heavy this year and rop would have been far in excess her years had it not been for a ght that has continued with few ts since early in June. Harvest- as started in some places. Prices ower than last year by ½c, due e decrease in the Government's de- . The highest quotation is 2½c a l.

is estimated that the 1919 bean ge in California was 25 per cent han the previous year and there- he 1919 crop is estimated at 3,000,- ags as compared to 5,150,000 bags 18. The decreases in acreage in iern California were not as great some other sections but the crop d to be a very poor one, in some cts an utter failure. Warehouse s are placed at 1,000,000 bus. of growers hold 85 per cent.

ato shipments are about at their according to the Bureau of Mar- 17,581 cars having been shipped eek ending Sept. 15 as compared ,062 previous week and 11,525 a ago.

number of cars shipped of the otato crop from the 16 principal otato shipping states is estimated e Bureau of Crop Estimates to be 8 cars of 700 bus. each. This res with 146,048 cars in 1918.

potato crop in Canada, according ecent estimate of the Department riculture, will be 100,544,400 bu. ear compared with 102,189,000 bus. 8. Prince Edward Island expects 00 bus., Nova Scotia 9,593,300 New Brunswick 10,381,600 bus., c 36,863,200 bus., Ontario 15,907,- us., Manitoba 6,556,800 bus., Sas- wan 7,522,500 bus., Alberta 5,782,- s. and British Columbia 2,485,000

commercial potato acreage of nsin is estimated to be 95 per cent rmal, and the prospective yield, on September 1 condition, 69 per f normal; the commercial produc- t 66½ per cent of normal. Last 25,510 cars were shipped from sta- within the state. Shipments in a f full normal production are es- d at 31,300 cars.

BEAN SITUATION.

UALITY OF BEANS EXCELLENT.

IIGAN (8).—Probably three- s of the bean crop has been har- under ideal conditions, and the e will probably be taken care of next two weeks. The quality ear is excellent and while the e is light, the yield per acre is ood. We think possibly it will e thirteen or fourteen bushels re, which is one of the largest we have ever had. On this basis, al crop will be around four mil- shels, which is somewhat larger st season.

crop in other parts of the coun- wever, is lighter than last year. present price for spot C. H. P. ans is $8 per cwt. f. o. b. Michi- ctober shipment $7.75.

demand for the new crop so far t been as good as usual. This, r, is probably due to the fact ne crop is much earlier than It would seem with the price r commodities that the present f beans is not far out of line.— *w Milling Company, J. M. Coup, e, Mich.*

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified as of Sept. 20:

Beans—

Boston—Limas, $12@12.50.

Buffalo—Marrows, $11@12; mediums, $8@9; pea beans, $8@9; wh. kidney, $11@12; red kidney, $9@12.

Chicago—Pea beans, hand picked, ch. to fancy, $8.50@9; brown Swedish, $5.50@7.50; red kidney, $11.50@12.

Cincinnati — Navies, $9; marrowfats, $12.75; red kidneys, $12.50@12.75; limas, $14.

Detroit—H.-p. pea beans, $7.50.

Denver—Pintos, $6@7; navy, $8.50@9.00; limas, $10@10.50, wholesale.

Montreal—The market for beans is very firm under a good consumptive demand, sales of Ontario hand-picked being reported at $5.50 per bushel; strictly choice hand-picked, $5.75; two or three-pound pickers, $5; common five to six-pound pickers, $4.50 to $4.75 per bushel.—Trade Bulletin.

New York—Calif. limas, $12@12.25; pinks, $7; ch. marrows, $11.50; fair, $10.50@$11.25; ch. pea beans, $8.50; sma. wh. Calif., $8.50; red kidney, $13.50@14; wh. kidney, ch., $12.25@12.50.

Pittsburgh—Limas, $13@13.50; Calif. navies, $8; Mich. navies, $8.75.

St. Louis—Quote c. lts.—Ch. h.-p. Mich., $8.75; prime ma.-p., $8.50; orders and small lots higher; pinto beans, $7 per cwt. From store—Scotch peas, 8c per lb.; split peas, green, at 15c, and yellow at 9c per lb. Per cwt.: Calif. black eyes, $7; ch. limas, $13; Calif. pinks, $8; white, $8.50.—Market Reporter.

Potatoes—

Buffalo—Supplies increasing, bulk just fair; rnd., bu., $1.90@2; long, bu., $1.50@1.60.

Chicago—Minn., Ohio, $2.50@2.60, bulk; Red River, fcy., $2.65, bulk; Wis., rnd. wh., $2.50@2.60.

Cincinnati—Minn. early Ohio and Cobb., bulk, $2.85; N. J. Giants, $4.35@4.40 per 150-lb. sk.; early Ohio h.-g., bbl., $6.25@7.

Denver—Colo., $2.00@2.50, wholesale del., Denver; Calif., $2.50@3.

Kansas City—Minn. Red River, $2.45@2.50; h.-g., bu., $1.60@1.70; Tri., $2.45@2.50.

New York—New Southern, bbl., No. 1, $2.50@3.50; Jer. rnd., 150-lb., $3.25@3.75; L. I., 180-lb., $5@5.75.

Los Angeles—Stockton Burbank, $2.75@3.25.

Montreal—Receipts last week were 443 bags, against 2,159 bags the week previous, and 2,415 bags last year. Owing to large supplies of Quebec white potatoes, prices are on the easy side at $1.75 per bag of 90 pounds for car lots, and $2 in jobbing lots, ex store.—Trade Bulletin.

Pittsburgh—N. J. Cobb., blk., $2.75@3; Pa., rnd., wh., blk., $2.75 c. lts.; N. J. Giants, 150-lb. sk., $3.65@3.75.

St. Louis—Market stronger. Idaho rural, $3@3.15; Colo. Brown Beauty, $3.15 del., Red River early Ohio, $3@3.10.

San Francisco—Salinas, $2.90; River, fcy., $2.15@2.25.

ADJUSTMENT OF LOSS AND DAMAGE CLAIMS.

In speaking of the efforts of the Administration to establish uniform practice and prompt settlements of loss and damage freight claims, Director General Hines of the U. S. Railroad Administration recently said:

"The Railroad Administration has caused to be compiled figures with respect to the unsettled loss and damage freight claims on roads under Federal control, from which it is noted that on April 1, 1919, there were 806,707 such claims unsettled, whereas on August 1 this figure had been reduced to 519,316, a decrease of 287,391, or 35.6 per cent, in the number of unsettled claims.

"Of the total number of outstanding claims on April 1, 1919, 363,476 had been outstanding four months or over. On August 1 this figure had been reduced to 218,424, a decrease of 145,052, or 60.1 per cent.

"These figures indicate clearly that the freight claim departments of the various railroads under Federal control are successfully endeavoring to get their offices up to the highest degree of efficiency."

The production of nitrogen, phosphoric acid, and potash in Germany according to the *Deutsche Allgemeine Zeitung*, during the year 1918-19 amounted to 520,000 tons as compared with 220,000 tons and 80,000 tons produced, respectively, in the years 1917-18 and 1916-17.

Feedstuffs

A parcel of fine quality Egyptian rice bran attracted some attention at £21 per ton at Aug. 30, according to the *London Grain, Seed & Oil Reporter.*

S. D. Scott & Co., feed dealers at Norfolk, Va., have purchased the D. W. Chory Bldg. on Liberty street which they will use as a branch feed store; consideration $12,000.

Dr. C. O. Townsend, Pathologist in charge of sugar plant investigations for the government, states that there were 200,000 more acres of sugar beets cultivated this year than last.

"Considerable numbers of cattle and sheep are being shipped into the state," says the Iowa *Weather Crop Bulletin*, "to consume the large corn crop, though feeders are hesitating somewhat. Less than the usual number of sows will be bred this fall."

The Tuscola Grain Co., Tuscola, Ill., is making extensive alterations to its property preparatory to engaging in a retail and wholesale stock and poultry feed business. When completed there will be ample storage for several carloads of feed at a time.

The Oriskany Valley Feed Co., of Deansboro, Oneida County, N. Y., has been incorporated with a capital stock of $10,000. The company will engage in the manufacturing of flour, feed and grain, agricultural implements and supplies. Stockholders are George I. Hovey, Curtis Miller, Jr., and Harold R. Small of Deansboro.

The cottonseed production of the United States in 1918 amounted to 5,360,000 tons, and the cotton seed crushed for oil during the year ending July 31, 1919, was 4,406,028 tons. The crude-oil production was 1,320,249,788 pounds, or 14.8 per cent of the weight of the seed crushed. Last year 5,040,000 tons of seed were produced, 4,251,680 tons were crushed for oil, and 1,312,471,125 pounds of crude-oil were made, the average yield of oil being 15.4 per cent of the seed.

Fix Cottonseed at $80 a Ton.

The Farmers' Protective League executive board at Montgomery, Ala., Sept. 11, has fixed $80 a ton as the price for cottonseed and at the same time enforced the price of 36 cents a pound for cotton, as agreed on by the American Cotton Association.

GROUND FEED STOCKS.

The Bureau of Markets reporting under date Sept. 20 has the following as regards ground feed stocks throughout the country:

CENTRAL.—Terre Haute — Quotations lower on almost all grades, corn feeds suffering heaviest declines, dmd. good.

EASTERN.—Shpts. lgt. and dmd. not so active as all local mills are running. West'n mills will not book freely until Oct. 15; quote std. bran $44, mxd. fd. $59, std. middlings $59. St. Albans—Dmd. gd., market lower, new crop c. s. meal 36% Oct. $71.50, 25% protein dairy fd. $77, stk. fd. $61.50, corn gluten fd. bulk, $66.12. Norfolk—Std. middlings stks. lgt., dmd. gd., $57.50, bran $43.50. Portland, Me.—Spg. wh. bran $43 c.lt.; spg. wh. middlings, c.lts. $58, c. s. meal 36% Oct. shpt. $69, linseed oil meal c.lts. $80, dairy fd. 20% c.lts. $58. Washington—Stks.-rcts. adequate, dmd. fr., bran $43.50, middlings $58.

SOUTHERN.—Atlanta — C. S. dmd. vy. poor, 36% meal freely offered $61 with no takers, 36% cake $4 ton less, hulls $7 bulk, 36% peanut meal $65, bran $45.50, std. middlings $61, Mpls. spg. bran $47.50. Savannah—Bran $45, middlings $58, 7% c. s. meal Oct. shpt. offered $64, 20% c.s. fd. $60. Macon—Bran $45@47, middlings $62.50@65. Columbus—Bran $45, middlings $67 with gd. dmd., 20% c. s. fd. $50. Mobile—Market dull, bran $41.60, middlings $54, 7% c. s. meal $64, 20% c. s. fd. $53. Montgomery—Middlings dmd. gd., bran $45, middlings $60, grey shorts $64, 30% peanut meal $65, 7% c. s. meal $65. Birmingham—Bran $43, middlings $60, 7% c. s. meal $65, 36% peanut meal $64. Vicksburg—Bran $44, grey shorts $61. Jacksonville—Bran $45, 30% peanut meal $65.50, 7% c. s. meal $66, 20% c. s. fd. $54. Miami—Bran $53. Tampa—Bran $45.75, middlings $64, 7% c. s. meal $67.50, 20% c. s. fd. $57.50. Wilmington—Middlings $62@62.50 and gd. dmd. Greensboro—Bran $52@53, middlings $66@72, increased dmd. for bran acct. dry pasturage.

SOUTHWESTERN.—Ft. Worth — 43% meal $1 under previous wk. or $67, barley chops $2.75, corn chops $3, stg. bran $2. Shreveport—Wh. bran $2.15. Houston—Wh. bran $2.08@2.10, corn chops $3@3.05 per cwt. Ft. Smith, Ark.—Gray shorts $2.80@2.85 Oct. shpt. San Antonio—Mill fds. stks. gd. with fr. rcts.-dmd. El Paso—Millrun bran $2.25 @2.40.

Weak Tone in Cottonseed Feed.

KANSAS CITY, Sept. 20.—Increased offerings of cottonseed cake and meal for prompt and later shipment, and continued quiet demand brought about a further weakening of the market in Kansas City this week. Cake of 43 per cent protein grade was offered at $64 to $65 a ton, basis Texas common points, with 41 per cent down to $62. A moderate number of inquiries are being received by handlers of cake and meal, but buyers display no marked interest in the trade.

FEED MARKETS.

CHICAGO.

Chicago, Sept. 20.—Bran and middlings are unchanged from previous week, the demand being good for both with the latter reported scarce. Bran, $40; middlings, $56. Cottonseed meal easier, quotable $75.

MONTREAL.

Montreal, Sept. 19.—The chief business in bran is still in mixed cars. In straight carlots it is quoted at $45 per ton and shorts at $55 per ton. Business on the whole is quiet, supplies being small. Dealers have still great difficulty in filling their July contracts, the mills being short of wheat. Corn feed is steady and sales are reported at $80@82 per ton, moullie at $69@71, and pure barley meal at $69@70, and dairy feed $48@50 per ton including bags delivered.—Trade Bulletin.

NASHVILLE.

Nashville, Tenn., Sept. 22.—Demand for wheat bran and middlings continued in excess of supply last week. Other ground feeds were in fair demand but unsettled to some extent by the break in prices of coarse grains. Quotations: Wheat bran, 100-lb. bags, per ton, $45.20; standard middlings, $61; horse and mule feed, $48@61; dairy feed, $56@68; poultry feed, $75@79; hog feed, $68.

DULUTH.

Duluth, Sept. 20.—Substantial readjustments downwards were made in feeds quotations during the week as a result of the declining markets in grains. Dealers reported a quickening up in demand at the lower levels set, but at that, trade was comparatively light. Prices per ton follow: Bran, $39.50; ground oats, $45; No. 1 ground feed, $52.75; No. 2 ground feed, $50.75; No. 3 ground feed, $49; shorts, $52.50; flour middlings, $60; red dog, $65; Boston mixed, $49.50; cracked corn, $66.75; rye feed, $50.

NEW YORK.

New York, Sept. 20.—The feed market was heavy, especially for bran, which was offered freely, but with only a very moderate demand in evidence. The recent break in coarse grains has had a depressing influence on feeds of all kinds and buyers are not disposed to pay the prices being asked by the mills. City feed bran was quoted at $45; middlings, $58; red dog, $69; Western spring bran, $42.50@43; standard middlings, $58@58.50; flour middlings, $63@63.50; and red dog at $71.

MILWAUKEE.

Milwaukee, Wis., Sept. 20.—The local mill feed market again this week experienced a general and appreciable drop and is weaker than it has been several weeks past. The supplies are large but more than ample for the demand which is light and only for prompt shipment. Bran is quoted at $1.50@ lower. Current quotations are: Bran, ton, $38@39; standard middlings, $52 flour middlings, $59; red dog, $64.50@6 hominy feed, $60; rye feed, $50; old-pro oilmeal, $80.50@83.50; cottonseed meal, @82; brewers' dried grains, $60; gl feed, September shipment, $65.

NEW ORLEANS, LA.

New Orleans, La., Sept. 20.—Bran, has felt the effects of the decline in co grains. Recent offerings have been at per hundred delivered New Orleans ten-day shipment. October and Nover shipment is quoted at $1.96 per hun delivered. Sales of bran are exceedi slow and offerings are as free as wan

DES MOINES, IA.

Des Moines, Sept. 20.—The output of feeds has been increasing the past w Receipts have been ample to take car the demand and mills are offering siderable feed for future shipment discount. Oilmeal and cottonseed have been on the toboggan for some as the export demand has let up. P are still too high for the feeders to hold of these feeds. Tankage is quoted at $100 and will not likely sell n below this price.

BOSTON.

Boston, Sept. 20.—The demand for f of all kinds was extremely dull during past week with a sharp decline note some grades of feeds. For shipment, b spring, sacked, $43.50 per ton; bran, wi sacked, $44; middlings, sacked, $59 mixed feed, sacked, $55@58; gluten sacked, $71.12; red dog, sacked, $70; se clear, sacked, $71; stock feed, sac $63.50; oat hulls, reground, sacked, hominy feed, sacked, $62.50; cotton meal, sacked, $70@73. Receipts for week ending September 20th were non

are much better able to supply de- due to heavy milling in the North- having filled up short supplies to extent. The market is fairly strong in better shape than had been ex- d.

otations are: Bran, $45 a ton; mixed $61; middlings, $65; cracked corn, ominy feed meal, $65 per ton, cotton, s, Louisville.

PHILADELPHIA.

ladelphia, Sept. 20.—The market for uffs shows a better tone. Offerings ght and with a fair demand prices rmly maintained. Quotations are for s, in 100-lb. sacks, to arrive, at cost, n: Winter bran, $45.50@46.50; spring $45@46; standard wheat middlings, 1; flour middlings, $64.50@66.50; red $71@72; shorts, $60@61; low grade $71@72; rye middlings, $59@60; fine hominy, $67@68; fine white hominy, 9; reground oats feed, $29.50@30.50; seed meal, 36% protein, $71.50@72.50; seed meal, 41% protein, $75@76; cot- ed feed, 20% protein, $55@56.

MEMPHIS.

nphis, Sept. 20.—There is little doing d of any kind. Mixed manufacturers etting but little new business but are illing that which was booked some go. There is no material change yet ces, although revisions are probable the new demand starts up. The seed meal situation is one of waiting ncertainty, depending in a measure e export situation, which just now ot appear promising. There is prac- no old meal here and the trade is ed as to the price of the new, al- h ideas are beginning to settle around 2 for early shipment of 7 per cent y. The lateness of the season is g mills to start crushing slowly, but er shipment meal will be available in quantities.

BALTIMORE.

timore, Sept. 20.—There has been or no change in feed prices in the eek or so and the business passing moment is principally of a jobbing ter. Under these conditions there is uch strength to prices, and current ts are ample for trade requirements. tions follow: Western spring bran, n, 100-lb. sacks, $43@44; Western ngs, per ton, 100-lb. sacks, $57@58; ills' middlings, per ton, 100-lb. sacks, brown middlings, per ton, 100-lb. $58; white middlings, per ton, 80-lb. $68.

CINCINNATI.

innati, Sept. 23.—The feed market ped a decidedly weaker tone during st week, due to the continued slow d, and prices for nearly all kinds sharply lower. Bran ranged at 42 per ton; mixed feed, $49.50@50; shorts, $54.50@55; grey middlings, : standard fine middlings, $57@57.50; minny feed, in 100-lb. sacks, $59 per

PITTSBURGH.

burgh, Sept. 20.—Arrivals of feed been more liberal during the last a total of 28 cars of all grades being ned here. Most of this feed is No. 1 o. 2 white middlings and bran. At me 10 cars are ungraded. There is lemand for middlings, red dog and feeds at good prices.

ST. LOUIS.

Louis, Mo., Sept. 20.—The feed mar- steady, but the trading is confined to wheat feeds, for which there is er inquiry. Prices are as follows: in 100 lb. sacks, $37 to $40; mid- spot, $58.50 to $63, with futures as $57; mixed feed, $50 to $50.50; white feed, $53 to $55 per ton; oat feed, lly, $25 per ton; alfalfa meal, No. 1, at $37, and No. 2 at $33 per ton, sacks.

MINNEAPOLIS.

eapolis, Minn., Sept. 22.—The de- for millfeed is narrow and feature- d offerings are light because some mills closed down on account of the ortage. The output at present is te and the mills are sold ahead Country mill offerings are fair. ons, f. o. b., Minneapolis, car lots, b. sacks: Standard middlings, $49@ r middlings, $55@57; rye middlings, red dog, 150 lbs. jute, $65@66; 35@36.

THE FEED SITUATION.

FEED SHOULD DECLINE.

VERMONT (2)—In regard to the feed situation, the fine rains since Aug. 10 have proved so beneficial that the pastures are as green as in June.

Mill feeds should not remain quite as high as they are now, and when the flour mills receive their usual amount of fall business, although under the 60 day clause it is rather uncertain, feed should decline.

While feeds bear a certain relation to corn, oats and other grains, they are governed by flour business in a way, and the gang plank must be kept clear, and at times when feeds are a drug, prices go far below their value and become a storage proposition, and then the other extreme follows.

At the present time there is little demand for Bran, but a good demand for middlings and low grade. The eastern farmers have unusually good crops, and are reducing their dairies to quite an extent, therefore there will be fewer buyers of feeds this year.—*E. Crosby, Brattleboro, Vt.*

Prof. Christie with Grain and Hay Show.

Prof. G. I. Christie, of the Purdue University, who is now in charge of agricultural extension work in Indiana, has been appointed superintendent of the International Grain and Hay Show to be held in Chicago Nov. 29 to Dec. 6 in conjunction with this year's International Live Stock Exposition.

Prof. Christie in addition to his many other duties acts as secretary of the Indiana Corn Growers' Association, which has since 1906 been under his direction, successfully staging annual grain shows in Indiana. He has been associated with the National Corn Exposition since its inception both as a director and a judge, and to his able direction must be attributed the attractive staging of the show made by Indiana at the Panama Exposition.

During the period of the war he was induced to act as assistant secretary of agriculture with headquarters in Washington. This appointment means that the International Grain and Hay Show will be a decided success.

Storm Danger at Galveston Greatly Reduced.

The railroad authorities, as well as the Galveston terminal people, have advised Sec'y Dorsey of the Texas Grain Dealers' Association that every car of grain on Galveston Island was removed to the island and placed to safety on mainland before the storm reached Galveston on Saturday and Sunday a week ago.

This precaution on the part of those interested in the port of Galveston greatly reduces, if not altogether eliminates the storm danger at this port and no doubt shippers will feel absolutely safe in making shipments to Galveston.

J. R. Leguenec, chief, Rice Division, U. S. Food Administration, says the 140,000 acres planted to rice in the Sacramento Valley will yield 50 per cent more this year than the acreage of any Southern state.

Alfalfa Department

Alfalfa is making close to three tons an acre for the season on farms around Tonganoxie, Kans.

The second crop of alfalfa from a 20 acre field in the vicinity of Cottonwood Falls, Kans., has yielded 43 tons.

Reports from Dillon, Mont., indicate a light second crop of alfalfa although the first crop was said to be an average.

Alfalfa receipts at San Francisco have been more plentiful of late and prices are somewhat lower, quotations ranging $17@22 a ton.

The third cutting of alfalfa is being cut in Grant County, Wash., and there is a good part of the crop sold to date at $16 to $20 in the stack. Sheep men are the principal purchasers.

The Great Western Alfalfa Milling Co., operating plants at Mead, Gilcrest, Ault and Sevarance, Colo., is offering growers $18 a ton for No. 1 alfalfa and $16 for No. 2 delivered at the mills this season. Grinding started Sept. 15.

Many inquiries as to alfalfa hay are coming to Kansas City from dairy interests. The unsettled character of feed markets in general have apparently had the result of inducing dairymen in many instances to withhold purchases for their winter needs pending a clearer outlook as to the course of prices. Much depends on the Northwest in determining the future course of prices of alfalfa hay, dealers assert. The volume of buying by the Northwest is the most uncertain factor.

When an alfalfa field begins to show the ravages of wear the Department of Agriculture recommends that it be plowed up and the field sown to corn or other grain for a year or two or if there is an urgent need of the alfalfa plow the field and sow the entire field anew. Do not try to patch an old field with seed after disking and cultivating in the fall for it is usually just so much seed wasted. Even should the seed germinate the older plants eventually smother out the new seedlings.

It is reported from Deschutes County, Ore., that the alfalfa crop of that county was increased 3,000 tons by the application of ten carloads of sulphur to 3,000 acres of alfalfa land. It will be three years before another such application will have to be made to that land but it is planned to treat 5,000 additional acres in the same manner next spring. Alfalfa in central Oregon is bringing $20 a ton and it is estimated fertilization increased the value of the county crop to the extent of $60,000.

In order that acreage to alfalfa may be increased in South Dakota the Farm Bureaus of the state propose the following plan:

State registration of alfalfa fields where seed will be grown for marketing purposes; the growing of hardy varieties in demand; the interesting of each community in specializing upon one variety; supplying seed of a hardy variety to growers; seed marketing direct to buyers, and the organization of a state marketing association for each variety.

ALFALFA PRICES.

The Bureau of Markets reporting under date of Sept. 20 has the following in regard to alfalfa prices throughout the country:

SOUTHERN.—Atlanta—No. 1 alf. $38, No. 2 $32. Macon—Dmd. poor, rcts. gd., ch. alf. $40, No. 1 $39. Savannah—No dmd. for alf., quote ch. alf. $38, No. 1 $37. Mobile—Ch. alf. $34, No. 1 $32.50 @33.50. Vicksburg—Ch. alf. $34.50. Montgomery—Rcts. alf. approximately 100 tons, dmd. fr. Locally produced alf. being used with additional supplies largely from Missouri, No. 1 alf. $30. Jacksonville—Dmd. poor, ch. alf. $37, No. 1 $36. Wilmington—No stks.-rcts. alf. and no dmd. Greensboro—Little doing in alf. market, ch. $38, No. 1 $35. Birmingham—Ch. alf. $39, mostly from New Mex.

SOUTHWESTERN.—Ft. Worth — No. 1 alf. $29, No. 2 $25 mostly from Arizona and West Texas. Shreveport—Ch. alf. $30. Houston—Alf. $30@32, rcts. practically nil. San Antonio—Ch. alf. $32, No. 1 $30. Oklahoma City—Offers, alf. $25, bids $24. El Paso—Ch. alf. $25.

Alfalfa Meal Prices.

Alfalfa meal is in good demand at Kansas City and production is increasing as more mills are grinding. Prices have suffered due to the declining corn market and are quotable $1 lower. At Wichita, Kans., No. 1 alfalfa feed is quotable $33, No. 2, $28.75. At Shreveport, La., alfalfa feed is quotable $40@56.

Declines in Alfalfa Meal.

KANSAS CITY, Sept. 20.—Lower prices were recorded in the market for alfalfa meal in Kansas City this week, some sales showing a recession of as much as $2 to $3 a ton. Demand was light, though slight improvement in the trade was noticeable late in the week. Mill offerings were fairly liberal, indicating active grinding operations in Kansas, Colorado and other Western states. Few sales were made for future delivery, the trade showing a general inclination to await a more stable feed market.

Choice alfalfa meal was offered at the close of the week at $37.50@39 per ton, in carlots, new sacks, basis Kansas City; No. 1, $35.50@36.50; No. 2, $31@32; brown, $29@30.

A fair demand was reported by alfalfa mixed feed manufacturers. Trade is restricted because of generally excellent conditions of pastures in surrounding territory, and use of new green feeds, including immature corn, rye, barley and cheap wheat. Hog producers still are taking liberal quantities of feed. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2 $38@39; brown, $35.50@37; alfalfa grain molasses feed, $43@54.

ALFALFA SITUATION.

LOOK FOR LOWER PRICES.

MISSOURI (2).—The alfalfa meal situation in the West is very similar to that of grain, particularly corn, and while we do not look for any such tremendous slump in the meal prices as we have had in corn, we do look for lower figures in the very near future, followed by a sharp advance.

There are no stocks of meal anywhere at this writing, either in producers' or consumers' hands, and practically all sales are made on hand-to-mouth basis. —*The Haywood Alfalfa Warehouse Co., Kansas City, Mo.*

ALFALFA GOOD.

NEW MEXICO—Our fourth cutting of alfalfa is ready; it will be unusually heavy, as have had excessive rains; most of it will be shipped at once. Very little alfalfa in storage, probably 25 per cent of average year. Our alfalfa meal mill has been running all season and expect to grind until Jan. 1.—*Fred Miclenz, Dexter, N. M.*

Sugar Beet Contracts.

Growers of sugar beets have almost generally entered into contracts for their crops at $10 a ton although in addition there will be a premium paid at the end of the factory season contingent upon the average price of sugar at New York during Oct., Nov., Dec. and Jan., 1919-20. Should the price of sugar during this period exceed 9c a pound growers in California, Washington, Michigan and Wisconsin will be paid $1 a ton additional for each cent in excess of the 9c basic price. Prices in other states vary somewhat, Ohio paying $9 per ton for the crop with a premium based on an 8c basic price with Minnesota, Nebraska and Iowa paying $9@9.50 per ton to growers.

The Corn Crop.

The corn crop is practically made. The danger of frost seriously impairing present promise is removed, hence the question of probable new crop supplies is no longer a matter of uncertainty. This is borne out by the increased offerings of old crop supplies. The tail-end of a short crop is usually large. It is a result of the farmers' holding policy until his new crop is assured and promises to be large enough to warrant a change in his tactics. ' receipts have naturally been l than those we have been accust to, they are by no means burden As a matter of fact neither visibl Chicago elevator supplies show perceptible increase.—*Simons Day Chicago.*

Canadian Visible Supply.

Canadian visible supply of whe creased 1,620,000 bu. last week and 288,000 bu. Last year wheat decr 30,000 bu. and oats 444,000 bu. D follow:

	Sept. 20, 1919.	Sept. 13, 1919.	Se
Wheat	6,050,000	4,430,000	2,2
Oats	2,088,000	1,790,000	6,1
Barley	1,393,000	1,626,000	8

Hay Department

The yield of hay from the second cutting of clover and the third cutting of alfalfa has been somewhat reduced in Iowa due to drouth conditions.

Joseph C. Bisaillon, hay dealer and exporter, has removed his office to more commodious quarters at 112A Board of Trade Building, Montreal, Canada.

From a total acreage of 37,283 Lehigh county, Pa., farmers gathered 59,653 tons of the product, averaging about 1.60 tons per acre one of the highest average yields of any of the counties.

Except in the southwestern countries, where hay yields are extremely poor, the North Dakota hay ranges from ample to a heavy surplus. The state yield of tame hay is 1.7 tons, compared with the average of 1.33 tons; and the wild hay yield is 1.2 tons, compared with the average of .99 ton.

A $50,000 loss was suffered by Chas. H. Longcope, 1614-16-18 North 22nd St., Philadelphia, when fire destroyed his hay and feed store last week. Fourteen firemen were seriously injured when the roof of the building collapsed and eight horses in an adjoining stable were burned to death.

County farm bureaus of Nebraska have been instrumental in introducing sudan grass into the state and two years have now proven this to be a successful crop in practically all parts of the state and especially in western counties which usually produce but little hay. Two cuttings are the rule and in Otoe County a yield of four tons to the acre was reported.

Poor Outlook for Hay.

The outlook for this year's hay crop is very serious, and it is feared that the supplies will not be sufficient to meet the needs of farmers alone during the coming winter and spring in Great Britain.

A representative of *The Times* was officially informed yesterday that reports showed that the crop was from one-third to one-half less than the average yield. The 1918 supplies for England and Wales totalled 6,785,000 tons, which was considerably below the average of 7,674,000 tons for the preceding 27 years. Before Parliament adjourned on Aug. 19, Lord Somerleyton announced that the government did not intend to commandeer or control the distribution of the 1919 hay, but the Central Council, Forage Department, Civil Supplies, are urging upon the Board of Trade the advisability of extending the control over the new crop in the interests of all parties.

At present the prices for new hay at the stack vary from £12 to as high as £18 per ton, compared with the controlled price of £8 per ton at the stack for 1918 hay. Only a small portion of the 1919 crop has been consumed, so that, unless control is continued, there are prospects of soaring prices in the late autumn and winter. The seriousness of the position is emphasized by the fact that hay, to a great extent, affects milk and meat production.—*The London Grain, Seed & Oil Reporter, Aug.* 29, 1919.

HAY STOCKS.

The Bureau of Markets reporting under date Sept. 20 has the following as regards hay stocks throughout the country:

CENTRAL.—Terre Haute—Market dull, little trading being done, No. 1 tim. $28, No. 2 $27, No. 1 clov. mxd. $27. Hopkinsville, Ky.—No. 1 tim. $37, No. 2 $33, No. 1 clov. mxd. $30.

John. gr. $18@19, ch. Bermuda $19@20. San Antonio—Ch. alf. 32, No. 1 $30. Okla. City—Offers, prairie $19, bids $16.50.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Hay prices in Kansas City are generally lower as compared with a year ago, prairie showing the sharpest decline. Timothy prices are $1 to $5 lower than a year ago. Prairie is $5 to $10 lower than a year ago. Alfalfa is $3 to $6 lower than at this time in 1918. Straw closed the past week at a range of $10 to $10.50, against $8 to $8.50 a year ago. But straw is more plentiful than a year ago. It is probable that the cost of labor is the main factor in the relative position of the straw market.

What effect will the sensational advances in farm land prices have on the hay trade? It is unfortunate that farms are advancing so rapidly, for prices are being based on war time food markets when the tendency of foodstuffs is downward. Farmers who pay boom prices for farms may attempt to reduce their meadows in order to increase their yields. But alfalfa pays wel and an increase in the area in the l gume may be made. After all, howeve high farm land prices will stimulat production even if it is unprofitab production on the basis of the cost the land per acre.

For the first time in two years, D. Carlisle had a short and unexpecte vacation last week. Mr. Carlisle, ho ever, did not spend the vacation wit out attending to some business. H sprained his ankle on the Kansas Ci hay tracks, and was forced to rema at home for a few days. This cons tuted what he described as a vacatio but he attended to some corresponden and other business at home over tel phones. Mr. Carlisle was unable to tal vacations the past two years on a count of his extensive contracting hay with the Government during t war and his other interests. He is r covering rapidly.

Whether the hay trade of Kans City will profit from the efforts no being made to increase the supply cars in the Southwest, especially Ka sas, is an interesting question. Gov nor Allen of Kansas has made an appe to Director General Hines of the Ra road Administration for more cars f the millers and wheat growers of h state. His appeal is being widely su ported in Kansas and meets the a proval of all trade interests in Kans City. Thus far, the Kansas City Ha Dealers' Association has made formal complaint over the car situatio although the trade is suffering as mu or more than other interests. It often reported to hay dealers that terior shippers feel they are being d criminated against unduly in the d tribution of the scant number of ca available for hauling commodities. the car situation is improved in Ka sas for millers and wheat interests, is believed that the hay dealers a shippers of the state will share some the improvement. The charge is ma that the Northwest has taken too ma cars from the Southwest, and the turn of some of this equipment sought. Car shortage continues to strict hay receipts in Kansas City.

Need for rains was emphasized the weekly weather and crop bulleti in the important hay producing stat of the surrounding territory. "Unse sonably hot, dry weather prevailed ov

other report of this building
furnished the PRICE CURRENT,
e well to state that very ex-
lans for the erection of a ware-
d a suitable office building to
date local dealers on this mar-
w under way, and the neces-
ie general office building being
itest, work was commenced upon that before the erection of the warehouse.

On account of a very limited supply of material being available before late next summer, it will be necessary for the local dealers to be satisfied with lesser accommodations than would be possible if an unlimited supply of material could be obtained.

The office building is being erected in an ideal location, being situated centrally, as far as all tracks are concerned, and will be a great accommodation for the tenants, in so far as they will have the ability to watch more closely cars while they are on inspection and being unloaded by local buyers. We are informed that the purchase of a twenty-ton type "P" Fairbanks & Morse latest improved auto truck scale has been purchased by the builders of this office building to be erected in front of the office. This is a great necessity on the market, in so far as it will enable correct weighing of all hay over one of the latest ideas in the way of a scale, and no further annoyance can be expected from that source as soon as this scale is in operation.

This extensive improvement of the facilities on our market all speak well for the progress and the advancement of the trade through the interest of the local hay dealers and should warrant more confidence being placed in our market, both by the shipper as well as the purchaser. It is safe to predict that further advancement of this nature can be expected, especially as the present Hay Exchange office building will encourage other dealers on the market to complete anticipated improvements that have been proposed for the past three to five years, and, furthermore, it may encourage the local exchange to insist upon the railroad companies completing the proposed improvements to the inspection tracks which are so badly needed.

THE HAY SITUATION.

FAIR CROP.

MASSACHUSETTS (2).—Would state that in this county a fair crop of hay was secured in good condition. The pasturage has been very good for the past two months, and the demand for hay is very limited at the present time. We do not believe that as many tons of hay will be sold to the consumers in this county as were used by them last year. —*J. Cushing Co., Fitchburg, Mass.*

NO DEMAND FOR HAY.

VERMONT (2)—Up to the present time on this crop there has been no demand for hay at any time. The old crop was pretty well cleaned up in New England and some of the last shipments of local hay to different points in New England was of such poor quality that it has caused a lot of trouble.

New hay is being offered for shipment from York state of pretty good quality, but buyers will only purchase from hand to mouth and there is no incentive to purchase ahead at present prices. Sellers in northern Vermont, Maine and New Hampshire are offering at about $25.00 f. o. b. without sales. We should say $20.00 would bring some business, but absolutely at the present time there is none.—*E. Crosby, Brattleboro, Vt.*

HAY MARKETS.

KANSAS CITY.

Sept. 20.—Declines were recorded on prairie, timothy and clover mixed on the Kansas City hay market this week. Alfalfa maintained a firm tone, and while some easiness was apparent on the cheaper grades, a good demand prevailed throughout the week. Prairie prices were 50c to $2.50 lower for the week, while declines on clover mixed and timothy amounted to 50c to $2 a ton. Receipts amounted to 1,039 cars, compared with 1,045 cars last week and 825 a year ago. Weakness in the market was due, in a large measure, to the predominance of poor quality hay in the offerings. Only a comparatively small amount of good hay is being received in Kansas City. The South and Southeast continued good buyers of alfalfa, and some timothy hay moved in this direction.

Prairie—Choice, $19.50@20.50; No. 1, $18@19; No. 2, $16@17.50; No. 3, $10@15.50; packing hay, $8.50@9.50.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice, $30@31; No. 1, $28.50@29.50; standard, $25.50@27.50; No. 2, $22.50@25.50; No. 3, $18@20.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

Clover mixed—Light, $25@26; No. 1, $23.50@24.50; No. 2, $17@23.

Clover—No. 1, $21@23; No. 2, $13@20.50.

Straw, $10@10.50.

BUFFALO.

Sept. 20.—Dealers are not in the market, believing prices are too high considering the big crop. There have been no sales worth mentioning. No. 1 timothy is quoted at $27 and No. 2 $26 and No. 3 $24@25. There were offerings at those prices.

NASHVILLE.

Sept. 22.—Hay trade is quiet and of routine character. Quotations: No. 1 timothy, car lots, $35; No. 2 timothy, $33; No. 1 clover, $33; No. 2 clover, $30.

LOUISVILLE, KY.

Sept. 20.—Receipts of hay have been much better during the past two weeks, offerings being liberal and movement good. Demand is fairly good for timothy and mixed hay.

Principal quotations are: No. 1 timothy, $31; No. 2, $29; No. 1 mixed, $29; No. 2, $27; No. 1 alfalfa, $35; No. 2, $32; No. 1 clover, $30; No. 2, $28.

DES MOINES, IOWA.

Sept. 20.—Receipts of hay have been somewhat heavier this week. Prices steady to $1 to $2 lower. Timothy hay is quoted at $22; western upland hay at $20; oat straw, $18; wheat straw, $7 per ton.

MILWAUKEE.

Sept. 20.—The local hay market is holding steady and firm. Shipments are comparatively light, which is quickly absorbed by current demands. Choice timothy is listed at $29@30; No. 1 at $28@28.50. Current quotations are: Choice timothy, $29@30; No. 1, $28@28.50; No. 2, $26@27; No. 1 clover, $20@23; light clover mixed, $26@27; red top and timothy mixed, $25@28; marsh feeding, $14@15; packing, $10.50@11; rye straw, $11@11.50; oat straw, $9@9.50.

ST. JOSEPH.

Sept. 20.—There has been material change in the hay market during the past week with the exception of a decline of 50c@$2.50 in the lower grades of prairie. Good top grades have been in excellent demand while low grades have been draggy and slow sale. Nominal quotations are as follows: Prairie, choice, $20@20.50; prairie, No. 1, $18.50@19.50; prairie, No. 2, $17@18; prairie, No. 3, $12@16; midland, No. 1, $15@16; midland, No. 2, $10@14; alfalfa, choice, $30@31; alfalfa, No. 1, $28@29.50; alfalfa, standard, $25.50@27; alfalfa, No. 2, $22@25; alfalfa, No. 3, $18@20; timothy, No. 1, $26@26.50; timothy, standard, $24@25.50; timothy, No. 2, $22@23; clover light mixed, No. 1, $25.50@26.50; clover light mixed, No. 2, $22@22.50; clover, No. 1, $22@23; clover, No. 2, $18@20; straw, $8@8.50.

NEW ORLEANS, LA.

Sept. 20.—No. 1 timothy hay offered at $35, No. 2 at $33 and No. 3 at $31. Receipts of hay have been fair, in keeping with the demand.

THE PLUGGING TRACK MARKET IS THE PLACE FOR YOUR HA
Why, because we pay no attention whatever to grade. All hay being sold on its merits at our straight price for the entire car.
THE FITZGERALD BROS. CO., CINCINNA OHIO

CINCINNATI.

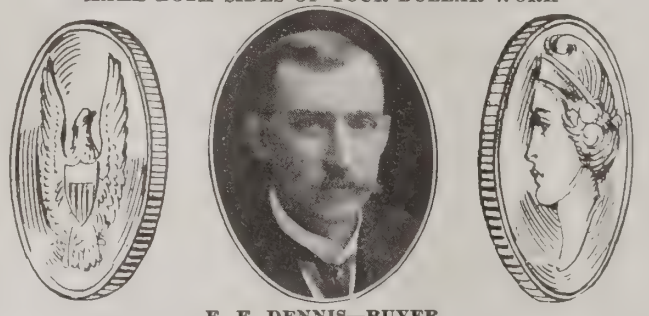
Sept. 23.—Trading in hay was marked by an extreme slowness of demand the early part of the week, which depressed the market to declines of $1.50 for timothy, $2.50 for mixed and $1 for clover, but the reduced quotations had the effect later of improving the shipping inquiries, and the previous losses were partially recovered. The movement was fairly liberal, and buyers hardly able to keep the market cleared of offerings, and as a result an average of 35 cars daily were held in the terminal awaiting plug track room. The demand for local consumption was more active than recently and influenced prices to the steadier position. The market is again assuming a relatively higher basis than other terminals and shippers are advised to make purchases on a safe margin as the southern shipping demand will probably be affected by the firmness of quotations here. Receipts for the week totaled 225 cars. Only 22 cars were officially reported in the terminals at the close of trading Saturday. No. 1 timothy, $29@29.50; standard timothy, $28.50@29; No. 2 timothy, $27.50@28.50; No. 3 timothy, $24.50@26.50; threshed timothy, $14@16; light clover mixed, $27.50@28.50; No. 1 clover mixed, $27@27.50; No. 2 clover mixed, $26@27; No. 1 clover, $34@35; No. 2 clover, $32@33; sample, grassy, $23@24; No. 1 local alfalfa, $35@36; standard alfalfa, $34@35; No. 2 local, $32@34; wheat straw, $8@8.50; rye straw, $11@12; oat straw, $8@8.50.

DULUTH.

Sept. 20.—Trade in hay has been light for some time. Receipts were moderate during the last week, being confined to only a few cars daily, but they were ample for all requirements. Quotations were unchanged as follows: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $18@20; No. 2, $14@16. Straw—Rye, 9@10; oat, $9@10.

DETROIT.

Sept. 20.—Receipts are increasing slowly. Some cars are coming from Canada, but Michigan receipts are restricted owing to insufficient transportation facilities. Demand is active and the market steady. Quote: No. 1 timothy, $29.50@30; standard and light mixed, $28.50@29; No. 2 timothy, $27.50@28; No. 3 timothy, $23@25; No. 1 mixed, $24@25; No. 1 clover, $24@25 per ton.



BALTIMORE.

Sept. 20.—There is a fair demand for the medium to the better qualities of timothy and light mixed hay at about steady prices and the moderate receipts are kept moving reasonably well from day to day. Of course, common, low grade, and bad order hay has to be sold for whatever it will bring.

Straw of all kins is in limited supply and steady under a more or less constant jobbing demand. Quotations follow: No. 1 timothy, $33; standard timothy, $32@32.50; No. 2 timothy, $30.50@31.50; No. 3 timothy, $26@29; No. 1 light clover mixed, $30@31; No. 2 light clover mixed, $28.50@29.50; No. 1 clover mixed, $28.50@29.50; No. 2 clover mixed, $26@28; No. 1 clover, nominal, $25; No. 2 clover, nominal, $22. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

MEMPHIS.

Sept. 20.—Dullness continues to be one of the main features of the trade here. Receipts for the week were 111 cars, which means that stocks have accumulated some, as demand has been only moderate. A large proportion, however, was hay sold some time ago on contract. Prices continue steady and holders are not offering any concessions, while consumers are disposed to seek them, basing their ideas of value on the reactionary disposition in grains. The prolonged dry spell in this section is helping demand a little.

OMAHA.

Sept. 19.—Receipts of prairie hay heavy and demand very poor, causing the market to be weak and lower on prairie hay. Alfalfa firm and steady. Oat and wheat straw steady.

Upland prairie—No. 1, $19@20; No. 2, $15@17; No. 3, $12@14. Midland prairie—No. 1, $18@19; No. 2, $14@16. Lowland prairie—No. 1, $13@14; No. 2, $11@12; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@10; wheat, $8@9.

PHILADELPHIA.

Sept. 20.—Desirable qualities of hay are in good request and with moderate offerings, prices for these are well sustained, but there are liberal supplies of the lower grades which move slowly at inside quotations and the market closes quiet and about $1 per ton lower than a week ago. Straw is in moderate supply and fair demand at steady prices.

Timothy hay—No. 1, $33; No. 2, $29@30; No. 3, $26@27. Clover mixed hay—Light mixed, $29@30; No. 1 mixed, $28@29. Straw—No. 1 straight rye, $13.50@14; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

BOSTON.

Sept. 20.—There is very little change to note in the local hay situation this week. The unfavorable weather conditions existing have worked against the movement of hay at the various railroad terminals and receivers report the demand during the entire week as extremely dull and inactive. Receipts have been moderate, but there is still an oversupply of hay at the railroads for which there is hardly any demand and receivers generally have been disposed to sell at less than open quotations in order to move cars and save storage charges. The demand from out of town buyers continues slow and little baled hay is being sold to this trade. Fewer invoices of hay to arrive are reported on account of the bad weather conditions at shipping points delaying the movement of hay, but supplies here are ample for all demand for some time. No. 1 timothy hay in large bales remains unchanged at $34@35 per ton, with small bales at $32@33. Fancy cars might bring a little higher price if wanted by the buyer. No. 2 timothy is quoted at $31@32 for large bales and $29@30 for small bales. A range of $30@31 is quoted on No. 1 Eastern and $25@28 for No. 2 Eastern, with No. 3 hay at $23@24. Clover mixed hay and fine hay are nominally unchanged with a slow demand reported. Receipts for the week ending September 20th were: Local, 115 cars.

The demand for straw is quiet with the market fairly steady. Choice rye straw is quoted at $17 per ton as a top price with oat straw held at $14 for the bulk of the offerings. Receipts for week ending September 20th were: Local, 5 cars.

MONTREAL.

Sept. 19.—The best hay of the new crop we have to ship grades No. 2, as most of our best timothy is mixed with clover which sells in this market at $21@22 for good No. 2, and $20 for ordinary No. 2, No. 3 being quoted at $18@19. A party who has just returned from a trip through the

ST. LOUIS.

Sept. 20.—Receipts of hay during the past few days have been somewhat lighter, but as usual consisting principally of medium and common grades of timothy and clover mixed.

Timothy hay market continues to rule steady with better grades of timothy in excellent local demand. Medium and lower grades are rather quiet but there is a fair shipping demand for No. 2 and standard timothy. The tracks are well cleaned up and there is no accumulation with the possible exception of some common low grade hay.

Light clover mixed hay continues to rule steady, receipts are moderate, demand good for the better grades and a fair shipping demand for the medium grades. Low grades dull.

Heavy clover mixed hay steady offerings light and demand good on local account.

Pure clover hay continues in scant offerings and excellent local demand for good sound clover hay. There is very little clover among the offerings and it is readily absorbed at full prices.

Alfalfa hay continues to rule steady; offerings of alfalfa are moderate and demand exceedingly good for the better grades. Local dairy trade are liberal buyers of the soft and leafy alfalfa and there is a fair shipping demand for the medium quality.

Prairie hay market steady, offerings moderate, demand fair. Good No. 1 prairie would sell readily if here. The lower grades are rather quiet.

Straw steady.

Track Sales: Timothy, No. 1, $32@24; standard, $29@31; No. 2, $25@28; No. 3, $22@24; threshed timothy, $12@15. Light clover mixed, No. 1, $27@29; No. 2, $23@25. Heavy clover mixed, No. 1, $28@29; No. 2, $25@26. Clover hay, choice, $32@33; No. 1, $30@31; No. 2, $28@29. Alfalfa hay, choice, $36; No. 1, $33@35; standard, $31@32; No. 2, $28@30. Prairie hay, choice, $25@26; No. 1, $23@24; standard, $21@22. No. 2, $19@20. Straw, $7.50.

CHICAGO.

Sept. 22.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Sept. 20, also the total receipts and shipments of hay from Jan. 1, 1919:

	Sept. 20, 1919.	Sept. 13, 1919.	Sept. 21, 1918.
Total receipts	4,166	4,803	5,688
Total shipments ...	393	780	650
Rcpts. since Jan. 1..	174,335	170,169	233,338
Shpts. since Jan. 1..	37,159	36,766	68,854

Prices on the better grades of hay advanced $1 a ton last week partly due to light arrivals from country points, however on Monday of this week over 133 cars of hay were received and prices eased off considerably, the following quotations ruling for the day: No. 1 timothy, $31@33; standard, $30@31; No. 1 light clover, $27@30; No. 2 timothy, $27@29; No. 3 timothy, $22@26; No. 1 clover mixed, $25@27; sample hay, $20@22; threshed timothy, $10@13; clover, $23@26; Kansas and Okla. Pra., $20@24; Ia., Minn., Dak., Pra., $15@24; marsh hay, feeding, $13@15; marsh hay, packing, $10@12; rye straw and oat, $10@10.50; wheat, $7@8.

PITTSBURGH, PA.

Sept. 20.—Receipts of hay have been somewhat lighter during the past week and prices lower, but there is still too much No. 1 timothy coming in to be easily cleared. Congestion is a problem that local dealers have to contend with and shippers are advised to hold off additional assignments of this grade until a better tone shows itself. Conditions are practically unchanged since the last issue, demand being mostly for good No. 2 timothy and No. 1 clover and clover mixed. Prices follow: New No. 1 timothy, $31@31.50; new No. 2 timothy, $28.50@29.50; new No. 3 timothy, $25@27; new No. 1 light mixed, $29.50@30; new No. 1 clover mixed, $31.50@32; new No. 2 clover mixed, $26@28; new No. 1 clover, $31.50@32; No. 2 clover, $22@27. Total receipts for the period, 1,200 tons.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Price Current-Grain Reporter, published weekly at Chicago, Ill., for October 1, 1919.

State of Illinois, County of Cook—ss.

Before me, a notary public in and for the State and county aforesaid, personally appeared J. Carver Strong, who, having been duly sworn according to law, deposes and says that he is the business manager of the Price Current-Grain Reporter, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher—Price Current-Grain Reporter. 912 Webster Bldg., Chicago, Ill.

Editor—Eaton G. Osman, Wilmette, Ill.

Managing Editor—Eaton G. Osman, Wilmette, Ill.

Business Manager—J. Carver Strong, Oak Park, Ill.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.)

J. Carver Strong, Oak Park, Ill.
Sabie A. Strong, Oak Park, Ill.
E. G. Osman, Wilmette, Ill.
H. A. Shepard, Wilmette, Ill.
Geo. A. Wells, Des Moines, Iowa.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.)

None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholders or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is..... (This information is required from daily publications only.)

J. CARVER STRONG,
Business Manager.

Sworn to and subscribed before me this 20th day of September, 1919.

(SEAL) MICHAEL J. O'MALLEY.
(My commission expires March 8, 1920.)

PROVISION STOCKS.

Following is a semi-monthly statement of contract provisions in store at Chicago with comparisons Sept. 15, as reported to the Board of Trade and collated by John Tredwell & Co.:

	Sept. 15, 1919.	Sept. 1, 1919.	Sept. 15, 1918.
Pork—			
Mess	3,074	3,139	8,847
Lard—			
P. S.....	18,257,707	20,520,773	17,952,998
Other	12,395,576	12,260,231	22,272,060
Total lbs...	30,653,283	32,781,004	40,225,058
Sh. ribs.....	4,108,823	5,089,515	13,906,657
Ex. clears...	2,037,312	1,899,640	5,549,476

Changes for the first half of September in years named:

	1919.	1918.	1917.
M. pork.....—	65 —	1,538 —	2,230
P. S. lard..—	2,263,066 —	1,186,260 —	2,276,470
S. ribs.....—	980,692 —	208,959 —	2,619,770
Ex. clears..+	137,672 —	1,517,437 —	768,438

All lard decreases, 2,127,721 lbs., against an increase of 5,502,129 lbs. for the corresponding period last year. Stocks of contract provisions at Chicago are exceedingly light for this time in the season. We cannot find a corresponding time in previous years when mess pork supplies were as light as at present, and in the lard and ribs it is necessary to go back to 1910 to find lighter lard supply, the stock of P. S. lard at that time being, on Oct. 1, 8,200,000 lbs., while the rib stocks here were 5,100,000 lbs., or about 1,000,000 lbs. more than at present. Present stocks of extra clears are just about the average for this time. The decrease in short ribs would indicate to us some demand for the lighter averages, and probably some converting for short clears or short clear backs.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, September 22.—Hogs and cured products sold at the lowest prices of the season last week and lard and short ribs finished around the inside figures, lard being off $1.65 to $2.05, the latter on September. Short ribs lost $1.10 to $1.57½, the latter on October, while the January was the strongest. Pork finished with a loss of $1.10 on October, while September was practically unchanged. Very little business was done with the latter, the price being nominal. It is held up by a local packer as stocks are very small and there is a fair sized short interest.

Never in the history of the provision trade has it been in the same condition as at present. In two months lard has dropped over $12, short ribs over $10 and pork over $14 per brl. Expectations are that lower prices will be seen later.

Herbert C. Hoover, who recently returned from Europe, is quoted as saying that the packers have over 500,000,000 lbs. of hog product abroad, of which 300,000,000 lbs. are in Great Britain, or enough to last until January. While sales have been made at big profits, the decline in foreign exchange has absorbed them. It is understood that this will enable the packers to charge off a large percentage of their big profits. Stocks on hand mostly made from the hog costing $20 and above, so that a large percentage of their stock represents losses as compared with the present market. Reductions of 1 to 2c were made in the price of pork loins last week, hams were cut 1 to 1½c and bacon ½ to 1c within the week.

Liquidation has been on, particularly in lard and ribs, the former leading. Eastern speculators who bought lard in June and July at around the top prices of the season have in the main sold out with serious losses. It was said that considerable lard bought ostensibly for export has been resold. Cash demand for lard has fallen off and for meats is below normal. Should the steel strike reach large proportions and be of long duration, it will affect consumption of hog products and beef. Beef prices are 50c to $1.50 lower in the wholesale market for the week and mutton off $1 to $1.50 per 100 lbs.

Stocks of lard here on September 15 showed a loss of lbs. as compared with September 1, the total being 30,653,000 lbs., against 40,225,000 lbs. last year. Deliveries of lard last week were about 1 000,000 lbs. on September trades. A little inquiry existed for cash lard from the East, but business was small. Leaf lard is $28.50 and cash lard is September price to 10c over. September and October lard closed at the same price, while a week ago September was 17½c premium. January products are selling at a big discount under the nearby deliveries and lower prices are expected for both hogs and product. To make the January, hogs will have to decline materially.

Shipments of lard last week were in excess of those of cured meats, which is unusual and aggregated 15,852,000 lbs., compared with 4,438,000 lbs. last year. Of meats they were 12,701,000 lbs., against 12,514,000 lbs. last year.

Range of prices in August and previous and for the week follow:
